James E. Sexson Director

> Mr. Bruce J. Clausen, City Engineer City of Astoria 1095 Duane Street Astoria, Oregon 97103

Dear Sir:

During our recent inspection of the City's water supply reservoirs, I noted a dense growth of bruch and small trees on the embankments forming Middle and Wickiup Lake reservoirs, particularly on the downstream faces. I suggest that this vegetation be removed. Removal, which is a standard maintence procedure, will prevent possible formation of leakage paths by root intrusion into the fill, and will allow vicual inspection for any cracking, sliding or leakage which might occur in the embankment.

With the exception of the partially deteriorated wooden culvert in the outlet channel of the Wickiup Lake spillway, I noted no structural deficiencies. As you advised me, materials have been ordered for replacement of the culvert.

Thank you for your consideration.

Very truly yours,

G. L. OFERHOLTZER Engineer

February 13, 1951

City of Astoria Astoria, Oregon

Gentlemen:

If you will sign and date the enclosed final proof on its second sheet and return the proof to this office, together with the statutory certificate recording fee of \$1.00, a certificate confirming the right under your Permit No. 13424 may be issued for the appropriation of 3.0 cubic feet of water per second from Bear Greek and two reservoirs for municipal supply.

These figures indicate the extent and limit of your water right as provided by law, and mark the completed right.

In the interest of economy and due to the fact that your completed project was examined by a representative of this office, it is not considered necessary that your signature be made before a notary public, nor that the signatures of witnesses be affixed to the proof.

Very truly yours,

tricklin

Mr. G. T. McClean City Manager Astoria, Oregon

Dear Mr. McCleans

88

This acknowledges receipt of your letters of October 31, with which you submitted Forms C, being notices of complete application of water under your Permits Nos. R-724 and 13424.

Fursuant to your reports, and in line with the general practice of this office, a survey will be made sometime next year for the purpose of checking the amount of water used as described in the permit. After this survey, proof may be made by you and certificate issued covering the actual use of water as found by the inspector.

In the meantime, the permit which you hold will be valid and sufficient evidence of your water right.

Very traly yours,

CHAS. E. STRICKLIN State Engineer

Hr. G. T. McClean, City Manager City of Astoria Astoria, Oregon

Dear Mr. McClean:

For your convenience in reporting complete application of water, or requesting an extension of time under your Permit No. 13424, covering the use of 3 c.f.s. of water from Bear Creek and two reservoirs, I am enclosing herewith a form "C" and a blank on which an application for an extension of time may be submitted.

Complete application of water means the actual use of all the water under this permit which it is intended to use at any time to the full extent of such intended use.

Very truly yours,

CHAS. E. STRICKLIN State Engineer

October 20, 1938

Mr. G. T. McClean City Engineer Astoria, Oregon

Dear Mr. McClean:

This is to advise that I have examined the plans and specifications of the dams of the Middle Fork reservoir and the Lake Nickiup reservoir.

The law contemplates that before approval the State Engineer shall make an examination of proposed works. Therefore, I will endeavor to have an examination made of the sites sometime next week. You will be advised later of the definite date.

The specifications or the plans submitted do not show a log of materials upon which the dams are to be constructed or the character of the material with which the dams are to be constructed other than the rock specified.

It is noted from the specifications that the rock fill is to be compacted. I am wondering what plan you have of compacting the rock. The specifications provide also that the earth fill can be compacted by means of a tractor. There is a question in ay mind as to whether or not the material can be compacted sufficiently by this method. If you will compute the weight of the tractor per square foot or inch, it will be relatively small compared with the standard specifications. I am enclosing a copy of the general specifications of the Rock Creek Dam which are somewhat standard specifications, and I would suggest that you give this matter careful consideration, particularly the matter of construction of the earth embankment. We can discuss this more fully at the time of the inspection.

It is noted that the specifications provide for some preparation of the foundation before placing the earth fill. However, no provisions are made for a sut-off trench. It is suggested that you give this matter careful consideration.

The spillway is another important detail and in connection therewith we would appreciate having the drainage area, and if you have any records of the run-off, we would appreciate being furnished with the same. If you do not have these records, we would appreciate receiving your computations for determining the capacity of the spillway.

Fr.G. T. McClean - Page 2

- 27

It is noted that you contemplate some rock in the earth fill. With the type of dam which you have designed, it is very imperative that the earth portion be placed very carefully and that it is of suitable material. Usually all rocks in excess of 5 inches in diameter are removed before the earth portion of the dam is compacted, as the material cannot be rolled with rock larger than this diameter, and the amount of rock in the earth fill should be limited in order to permit the securing of a maximum density after compaction and prevent stratification.

It is noted also that the up-stream face of your dam is designed with slopes of 2:1 and 25:1. This is a detail which we will discuss after we have had an opportunity to examine the sites and the materials on which the dams are to be constructed.

Very truly yours,

CHAS. E. STRICKLIN State Engineer

CES:nfw

1.2.

17651 & 17652

October 17, 1958.

City of Astoria. Astoria, Oregon,

Attention: Mr. G. T. McClean, City Engineer.

Gentlemen:

Receipt is hereby acknowledged of your letter of October 12, with which you enclosed an application for a permit to construct two reservoirs to be known as the Middle Reservoir and the Lake Wickiup Reservoir for the purposes of storing water from Bear Creek for municipal purposes in the City of Astoria and an application which I believe was intended to be a secondary application to accompany a reservoir application and to cover the appropriation of the stored water as described in the first application, together with fees in the amount of \$17.48. Receipt No. 23508 is enclosed.

The applications have been filed and given No. R-17651 and 17652, respectively.

In order that the secondary application; namely, No. 17632 may cover the appropriation of water from Bear Creek and the reservoirs as described under Application No. R-17651, as I believe is intended by you, I have partially filled out another application blank and an enclosing it berewith for your convenience in completing it by inserting under Item 2 the amount of water for which you wish to apply in second-feet or gallons per minute and by filling in under Item 8 the place of use contemplated as to forty-acre tract, section, township and range. The proper signatures should also be attached. This application has been endorsed so that in order to retain its priority it must be returned to this office within thirty days or on or before November 17, 1938.

You will be advised later concerning blue prints and specifications which were submitted with the above applications.

Very truly yours,

CHAS. E. STRICKLIN, State Engineer.

By

Ed K. Humphrey, Assistant.

M-10 E-17631 17632 March 2, 1964

NENO

The reservoir in Section 2, Township 7 North, Range 8 West, does not appear to have any water right according to a notation on a map in application R-17631, the dam was built in 1911-13. Reportedly the dam was raised approximately 16 feet in 1953 and the new capacity is 700 acre feet. Stevens and Thempson reportedly did the engineering.

Jerry V. Eggleston, Engineer

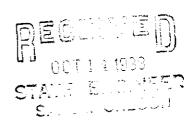

1

MAYOR J. C. TEN BROOK

COMMISSIONERS:

WILLIAM MANNILA OTTO A. OWEN

CITY MANAGER JAMES O. CONVILL

October 12-1938

Mr. Chas. E. Stricklin. State Engineer. Salem. Oregon.

Dear sir:-

I am this day sending to you, under seperate cover, copy of pland and specifications for the construction of two additional reservoirs in the BEAR CREEH headwaters.

You will note that the works proposed are an extension of the existing facilities of the City of Astoria and that these proposed reservoirs draw their storage waters from the same source as our present City of Astoria supply.

We reallize that we have delayed considerable in forwarding this information to you but the assembly of final details was geld up until approval of the project by the P.W.A.

P.W.A. requirements are that we have full plans and specifications in their office by Oct. 15th. This will be complied with. They also require that we begin the construction work not later than Nov. 25th. and, as it requires three weeks for bids to be advertised, we must begin such advertisement very shortly in order to comply with the date for commencing work.

It is for this reason that we are asking for the earliest possible action on our applications for water storage and construction of the dams and reservoirs as shown by the pland and specifications.

The City of Astoria apparently has hever had a State Water Right on Bear Creek but has been using water therefrom since 1895 at which time they purchased the then existing water system from the Columbia Water Co.

Very sincerely yours J.J. M. Clean City Engineer

Permit No.

***APPLICATION FOR A PERMIT**

To Appropriate the Public Waters of the State of Oregon

I, City of Astoria, a municipal Corporation organized under the laws of the State of Oregon (Name of applicant) of ______, County of Clatsop _____, County of Clatsop _____, State ofOregon, do hereby make application for a permit to appropriate the following described public waters of the State of Oregon, SUBJECT TO EXISTING RIGHTS: If the applicant is a corporation, give date and place of incorporation ... Incorporated ... by ... en ect filed with the Secretary of State on Feb. 18-1891 , a tributary of Columbia River 2. The amount of water which the applicant intends to apply to beneficial use is ...Storage only of 162,000,000 Gallons, stored in winter and balance of water to pass cubic feet per second. down creek. One filling only of reservoirs (If water is to be used from more than one source, give quantity from each) **3. The use to which the water is to be applied is <u>Municipal Water Sapply</u> (Irrigation, power, mining, manufacturing, domestic supplies, etc.) 4. The point of diversion is located **3150** ft. North and **800** ft. West from the **15** ft. (N. or S.) (E. or W.) corner of Sect. 13 T.7 N.R.9 W.W.M. and 360 Ft north and 700 Ft. East from the S.W. corner of Sect. 18 T.7 N.R.8 W.W.M. being within the S.E. 4 of the N.E. 4 said Sect 13" and the S.W. 4 said Sect 18 R., W. M., in the county of 5. The No ditches but one 600 Ft. 12" pipe terminating in the S.W. $\frac{1}{4}$ of the N.E. 4 of Sect. (Mainding capal Noise lig) W.W.M. (Miles or feet) R., W. M., the proposed location being shown throughout on the accompanying map. BESCRIPTION OF WORKS DIVERSION WORKS Two Reservoirs for storage known as Middle Reservoir and Lake Wicking Reservoir 1. 2000 Ft 6. (a) Height of dam 2.189.0Ft. feet, length on top2. 1200. Ft. feet, length at bottom 1. 20 Ft 2. 10 Ft feet; material to be used and character of construction both dams to be lower half Fr down-stream half rock fill, upstream half earth, wasteways cround means rock and brush, timber crib, etc., wasteway over or around dam) (b) Description of headgate Middle Reservoir discharge from 12" pipe and Lake (Timber, concrete, etc., number and size of openings) Wicking discharged through 18" pipe, both into creek leading into present operating reservoir lower down on creek (Size and type of pump) (Size and type of engine or motor to be used, total head water is to be lifted, etc.)

* A different form of application is provided where storage works are contemplated.

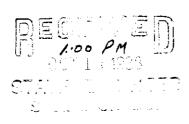

** Applications for permits to appropriate water for the generation of electricity, with the exception of municipalities, must be made to the Hydroelectric Commission. Either of the above forms may be secured, without cost, together with instructions by addressing the State Engineer, Salem, Oregon.
