**NOTICE OF COMPLETION OF CONSTRUCTION**

The United States of America, Acting through the  
I, Regional Director, Region 1, Bureau of Reclamation, the holder of Permit No. 32932

to appropriate the public waters of the state of Oregon, completed the construction of the works described  
thereon on the 13th day of August, 1969.

Remarks:

If the works have less capacity than described in the permit, or you have definitely abandoned part of the proposed development, you

should so state in order that our records may not be unnecessarily encumbered.

IN WITNESS WHEREOF, I have hereunto set my hand this 25th day of November, 1970.

Regional Director of Applicant

Box 8008, Boise, Idaho 83707

(Address)

Fill out, detach and mail to the State Engineer, Salem, Oregon 97310, when construction work is completed.

RECEIVED

STATE ENGINEER  
SALEM, OREGON

Form C

**IMPORTANT**—This form is a notice to the State Engineer that permittee is ready to make final proof to the extent to which the water has actually been applied to the intended use under the terms of the permit. Permittee is cautioned that Certificate of Water Right will be issued based on the extent of the quantity and use as determined by the final proof inspection and survey which will be made in response to the filing of this Form C.

NOTE: In the case of an irrigation permit, this Form C should not be mailed to the State Engineer until all of the land described in the permit, which it is intended to irrigate under this permit at any time, has actually been irrigated.  
Fill out, detach and mail to the State Engineer, Salem, Oregon 97310, when all of the water has been applied.

Application No. 20705

**NOTICE OF COMPLETE APPLICATION OF WATER TO A BENEFICIAL USE**

The United States of America, Acting through the  
I, Regional Director, Region 1, Bureau of Reclamation the holder of Permit No. 32932

to appropriate the public waters of the state of Oregon, completely applied the waters to a beneficial use in  
accordance with the terms of said permit, on the 20th day of July, 1971.

Remarks:

IN WITNESS WHEREOF, I have hereunto set my hand this 28th day of July, 1971.

# Proof of Appropriation of Water

100 cfs @  
300 ft  
J.C. 11/18/83

THE UNITED STATES OF AMERICA  
BUREAU OF RECLAMATION

of 214 Broadway Avenue, Boise, State of Idaho 83702, has applied beneficially the waters of Powder River and 64,400.0 acre-feet from Mason Reservoir constructed under Permit R-5083

a tributary of 3,321.8 for the purpose of irrigation of ~~3,318.9~~ 3,318.9 acres and supplemental irrigation of ~~15,000.4~~ 15,077.5 acres

under Permit No. 32932 and that the use of said waters has been completed under the terms of said permit; that the priority of the right dates from June 19, 1958

that the amount of water for the purposes aforesaid, has been actually beneficially used in the amount of 100.0 cubic foot per second

or its equivalent in case of rotation, measured at the point of diversion from the stream. The point of diversion is located in the See final proof map

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to one-fortieth of one cubic foot per second per acre, or its equivalent for each acre irrigated from direct flow and shall be further limited to a diversion of not to exceed 3 1/2 acre-feet per acre for each acre irrigated during the irrigation season of each year from direct flow and storage from reservoir constructed under Permit R-5083, provided further that the right allowed herein shall be limited to the use of stored water only on the lands described as supplemental (storage only).

and shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use under the right, and to which such right is appurtenant, is as follows:

SEE NEXT PAGE

I have read the above and foregoing proof of appropriation of water; I know the contents thereof, and that the facts therein stated are true.

IN WITNESS WHEREOF, I have hereunto set my hand this 2 day of August, 1983.

\* APPLICATION FOR A PERMIT

To Appropriate the Public Waters of the State of Oregon

I, Earl Hoge, trustee of irrigation district to be formed. (Name of applicant) of Baker (Post office), County of ....., State of Oregon

do hereby make application for a permit to appropriate the following described public waters of the State of Oregon, SUBJECT TO EXISTING RIGHTS:

If the applicant is a corporation, give date and place of incorporation .....

1. The source of the proposed appropriation is Mason Reservoir to be constructed under app. No. R-20704, per. No. (Name of stream) Powder River and all seepage & return flow tributary of within district and Elk, Beaver, Sutton, Goodrich, Pine, Washington, Salmon & all other streams in district

2. The amount of water which the applicant intends to apply to beneficial use is 200,000 acre feet per year (If water is to be used from more than one source, give quantity from each)

\*\*3. The use to which the water is to be applied is (Irrigation, power, mining, manufacturing, domestic supplies, etc.)

4. The point of diversion is located ..... ft. and ..... ft. from the corner of dam is in SWSE Sec 24 & NWNE Sec 25, T10S, R38E., W.M. Points of diversion will be at various places along Powder River and other streams to be determined later being within the of Sec. , Tp. R. , W. M., in the county of Baker

5. The (Main ditch, canal or pipe line) to be (Miles or feet) in length, terminating in the of Sec. , Tp. R. , W. M., the proposed location being shown throughout on the accompanying map.

DESCRIPTION OF WORKS

Diversion Works—

6. (a) Height of dam ..... feet, length on top ..... feet, length at bottom ..... feet; material to be used and character of construction (Loose rock, concrete, masonry, rock and brush, timber crib, etc., wasteway over or around dam)

(b) Description of headgate (Timber, concrete, etc., number and size of openings)

(c) If water is to be pumped give general description (Size and type of pump) (Size and type of engine or motor to be used, total head water is to be lifted, etc.)

\*A different form of application is provided where storage works are contemplated.

\*\*Application for permits to appropriate water for the generation of electricity, with the exception of municipalities, must be made to the Hydroelectric Commission. Either of the above forms may be secured, without cost, together with instructions by addressing the State Engineer, Salem, Oregon.

Canal System or Pipe Line—

7. (a) Give dimensions at each point of canal where materially changed in size, stating miles from headgate. At headgate: width on top (at water line) ..... feet; width on bottom ..... feet; depth of water ..... feet; grade ..... feet fall per one thousand feet.

(b) At ..... miles from headgate: width on top (at water line) ..... feet; width on bottom ..... feet; depth of water ..... feet; grade ..... feet fall per one thousand feet.

(c) Length of pipe, ..... ft.; size at intake, ..... in.; size at ..... ft. from intake ..... in.; size at place of use ..... in.; difference in elevation between intake and place of use, ..... ft. Is grade uniform? ..... Estimated capacity, ..... sec. ft.

8. Location of area to be irrigated, or place of use .....

Township	Range	Section	Forty-acre Tract	Number Acres To Be Irrigated
<i>For irrig of lands in Baker Project as outlined in Reclamation Bureau Report of October 1934 by Debler and Foster, Plan "C"</i>				

(If more space required, attach separate sheet)

(a) Character of soil .....  
 (b) Kind of crops raised .....

Power or Mining Purposes—

9. (a) Total amount of power to be developed ..... theoretical horsepower.  
 (b) Quantity of water to be used for power ..... sec. ft.  
 (c) Total fall to be utilized ..... feet.  
(Head)  
 (d) The nature of the works by means of which the power is to be developed .....

(e) Such works to be located in ..... of Sec. ....  
(Legal Subdivision)  
 Tp. ...., R. ...., W. M.  
(No. N. or S.) (No. E. or W.)

(f) Is water to be returned to any stream? .....  
(Yes or No)  
 (g) If so, name stream and locate point of return .....  
 Sec. ...., Tp. ...., R. ...., W. M.  
(No. N. or S.) (No. E. or W.)  
 (h) The use to which power is to be applied is .....

(i) The nature of the mines to be served .....

Municipal or Domestic Supply—

10. (a) To supply the city of .....

..... County, having a present population of .....

(Name of)

and an estimated population of ..... in 194.....

(b) If for domestic use state number of families to be supplied .....

(Answer questions 11, 12, 13, and 14 in all cases)

11. Estimated cost of proposed works, \$.....

12. Construction work will begin on or before .....

13. Construction work will be completed on or before .....

14. The water will be completely applied to the proposed use on or before .....

in length, terminating in the ..... of Sec. ...., Tp. ....  
(Smallest legal subdivision) (N. or S.)  
R. ...., W. M., the proposed location being shown throughout on the accompanying map.  
(E. or W.)

### DESCRIPTION OF WORKS

Diversion Works— See attached Drawing No. 569-137-34.

6. (a) Height of dam ..... feet, length on top ..... feet, length at bottom  
..... feet; material to be used and character of construction .....  
(Loose rock, concrete, masonry,

rock and brush, timber crib, etc., wasteway over or around dam)

(b) Description of headgate .....  
(Timber, concrete, etc., number and size of openings)

(c) If water is to be pumped give general description Lilley Pumping Plant will have 4  
(Size and type of pump)  
vertical turbine pumps. Two will have capacity to pump 23 cfs each, one 16 cfs and  
(Size and type of engine or motor to be used, total head water is to be lifted, etc.)  
one 8 cfs. Motors will be electric - 2 at 400 hp., one at 250 and one at 150 hp.

\*A different form of application is provided where storage works are contemplated.

\*\*Application for permits to appropriate water for the generation of electricity, with the exception of municipalities, must be made to the Hydroelectric Commission. Either of the above forms may be secured, without cost, together with instructions by addressing the State Engineer, Salem, Oregon.

PERMIT

STATE OF OREGON, }  
County of Marion, } ss.

This is to certify that I have examined the foregoing application and do hereby grant the same, SUBJECT TO EXISTING RIGHTS and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed ..... cubic feet per second measured at the point of diversion from the stream, or its equivalent in case of rotation with other water users, from .....

The use to which this water is to be applied is .....

If for irrigation, this appropriation shall be limited to ..... of one cubic foot per second or its equivalent for each acre irrigated .....

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The priority date of this permit is .....

Actual construction work shall begin on or before ..... and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 19.....

Complete application of the water to the proposed use shall be made on or before October 1, 19.....

WITNESS my hand this ..... day of ....., 19.....

STATE OF OREGON

COUNTY OF BAKER

CERTIFICATE OF WATER RIGHT

This is to Certify, That ELLI POWELL-HASKIN, THOS. MOORE, HETTIE McCULLOUGH, JOHN MOORE of Haines, Oregon and HETTIE STALEY of Baker, State of Oregon has a right to the use of the waters of Powder River, tributary of Snake River for the purpose of the irrigation of 10 acres of land

and that said right has been confirmed by decree of the Circuit Court of the State of Oregon for Baker County, and the said decree entered of record at Salem, in the Order Record of the STATE WATER BOARD of the State of Oregon, in Volume 6, at page 291; that the priority of the right thereby confirmed dates from November 17, 1899

that the amount of water to which such right is entitled, for the purposes aforesaid, is limited to an amount actually beneficially used for said purposes, and shall not exceed 1/10 of one cubic foot per second per acre; and shall be subject to all other conditions and limitations contained in said decree

A description of the lands irrigated under such right, and to which the water is appurtenant (or, if for other purposes, the place where such water is put to beneficial use), is as follows:

10 acc in the Southeast quarter of Southwest quarter of Section Three, Township Nine South, Range Forty East of Willamette Meridian, in Baker County, Oregon.

The right to the use of the water for irrigation purposes is restricted to the lands or place of use herein described.

WITNESS the seal and signature of the State Water Board, affixed this 15th day of February, 1923

STATE WATER BOARD

(Seal of State Water Board)

By FRANCIS A. GURNEY State Engineer, President

Attest:

R. W. POTTER Secretary

Recorded in State Record of Water Right Certificates, Volume 5, page 4203.

BAKER PROJECT WATER RIGHT APPLICATION NO. 20705

DIVERSIONS FROM POWDER RIVER

Bearings and distances of the various diversions from Powder River that will use water under this application are given below. Identification numbers are the same as shown on the attached Drawing 569-137-34.

1. South  $63^{\circ}10'$  West a distance of 2090 feet from the corner common to Sections 17, 18, 19 and 20, T. 10 S., R. 40 E., W.M.
2. South  $70^{\circ}20'$  West a distance of 1995 feet from the corner common to Sections 17, 18, 19 and 20, T. 10 S., R. 40 E., W.M.
3. South  $41^{\circ}30'$  East a distance of 1825 feet from the corner common to Sections 7, 8, 17 and 18, T. 10 S., R. 40 E., W.M.
4. North  $56^{\circ}00'$  East a distance of 2910 feet from the corner common to Sections 5, 6, 7 and 8, T. 10 S., R. 40 E., W.M.
5. South  $6^{\circ}05'$  East a distance of 2530 feet from the corner common to Sections 20, 21, 28 and 29, T. 9 S., R. 40 E., W.M.
6. South  $2^{\circ}25'$  East a distance of 3170 feet from the corner common to Sections 16, 17, 20 and 21, T. 9 S., R. 40 E., W.M.
7. South  $12^{\circ}25'$  East a distance of 1775 feet from the corner common to Sections 8, 9, 16, and 17, T. 9 S., R. 40 E., W.M.
8. South  $10^{\circ}45'$  East a distance of 1710 feet from the corner common to Sections 8, 9, 16, and 17, T. 9 S., R. 40 E., W.M.
- 8a. South  $09^{\circ}30'$  East a distance of 1640 feet from the corner common to Sections 8, 9, 16, and 17, T. 9 S., R. 40 E., W.M.
9. South  $01^{\circ}35'$  East a distance of 1220 feet from the corner common to Sections 8, 9, 16, and 17, T. 9 S., R. 40 E., W.M.
10. North  $10^{\circ}00'$  West a distance of 1645 feet from the corner common to Sections 8, 9, 16 and 17, T. 9 S., R. 40 E., W.M.
11. South  $2^{\circ}15'$  East a distance of 2630 feet from the corner common to Sections 4, 5, 8 and 9, T. 9 S., R. 40 E., W.M.
12. South  $2^{\circ}15'$  West a distance of 1030 feet from the corner common to Sections 4, 5, 8 and 9, T. 9 S., R. 40 E., W.M.

- 13. South 80°50' West a distance of 625 feet from the corner common to Sections 4, 5, 8 and 9, T. 9 S., R. 40 E., W.M.
- 14. North 57°35' West a distance of 960 feet from the corner common to Sections 4, 5, 8 and 9, T. 9 S., R. 40 E., W.M.
- 15. North 8°50' West a distance of 2335 feet from the corner common to Sections 4, 5, 8 and 9, T. 9 S., R. 40 E., W.M.
- 16. South 11°45' West a distance of 1625 feet from the corner common to Sections 32 and 33 in T. 8 S., R. 40 E., W.M., and Sections 4 and 5 in T. 9 S., R. 40 E., W.M.
- 17. North 29°30' East a distance of 1220 feet from the corner common to Sections 4 and 5 in T. 9 S., R. 40 E., W.M., and Sections 32 and 33 in T. 8 S., R. 40 E., W.M.
- 18. South 17°15' East a distance of 2690 feet from the corner common to Sections 28, 29, 32 and 33 in T. 8 S., R. 40 E., W.M.
- 19. South 32°20' East a distance of 3095 feet from the corner common to Sections 20, 21, 28 and 29, T. 8 S., R. 40 E., W.M.
- 20. South 8°40' West a distance of 2570 feet from the corner common to Sections 16, 17, 20 and 21, T. 8 S., R. 40 E., W.M.
- 21. North 64°40' West a distance of 1060 feet from the corner common to Sections 16, 17, 20 and 21, T. 8 S., R. 40 E., W.M.
- 22. South 48°30' West a distance of 1190 feet from the corner common to Sections 8, 9, 16 and 17, T. 8 S., R. 40 E., W.M.
- 23. North 82°00' West a distance of 1875 feet from the corner common to Sections 8, 9, 16 and 17, T. 8 S., R. 40 E., W.M.
- 24. North 26°35' East a distance of 3075 feet from the corner common to Sections 7, 8, 17 and 18, T. 8 S., R. 40 E., W.M.
- 25. South 70°50' West a distance of 1295 feet from the corner common to Sections 5, 6, 7 and 8, T. 8 S., R. 40 E., W.M.
- 26. South 45°50' East a distance of 1670 feet from the corner common to Sections 1 and 12 in T. 8 S., R. 39 E., W.M., and Sections 6 and 7, T. 8 S., R. 40 E., W.M.
- 27. South 35°05' East a distance of 1600 feet from the corner common to Sections 1 and 12 in T. 8 S., R. 39 E., W.M., and Sections 6 and 7, T. 8 S., R. 40 E., W.M.

- 28. South 55°00' West a distance of 560 feet from the corner common to Sections 1, 2, 11, and 12, T. 8 S., R. 39 E., W.M.
- 29. North 88°30' West a distance of 1275 feet from the corner common to Sections 1, 2, 11 and 12, T. 8 S., R. 39 E., W.M.

## ITEM NO. 4 DIVERSION POINTS ARE LOCATED AS FOLLOWS:

Mason Dam, SW $\frac{1}{4}$  SE $\frac{1}{4}$ , Sec. 24, T. 10 S., R. 38 E., W.M.,

Lilley Pumping Plant, NE $\frac{1}{4}$  NE $\frac{1}{4}$ , Sec. 11, T. 8 S., R. 39 E., W.M.

## Secondary Pumping Points:

1. NW $\frac{1}{4}$  NE $\frac{1}{4}$ , Sec. 19, T. 10 S., R. 40 E., W.M.
2. NW $\frac{1}{4}$  NE $\frac{1}{4}$ , Sec. 19, T. 10 S., R. 40 E., W.M.
3. SW $\frac{1}{4}$  NW $\frac{1}{4}$ , Sec. 17, T. 10 S., R. 40 E., W.M.
4. NE $\frac{1}{4}$  SW $\frac{1}{4}$ , Sec. 5, T. 10 S., R. 40 E., W.M.
5. SW $\frac{1}{4}$  NW $\frac{1}{4}$ , Sec. 28, T. 9 S., R. 40 E., W.M.
6. NW $\frac{1}{4}$  SW $\frac{1}{4}$ , Sec. 21, T. 9 S., R. 40 E., W.M.
7. SW $\frac{1}{4}$  NW $\frac{1}{4}$ , Sec. 16, T. 9 S., R. 40 E., W.M.
8. SW $\frac{1}{4}$  NW $\frac{1}{4}$ , Sec. 16, T. 9 S., R. 40 E., W.M.
- 6A. SW $\frac{1}{4}$  NW $\frac{1}{4}$ , Sec. 16, T. 9 S., R. 40 E., W.M.
9. NW $\frac{1}{4}$  SW $\frac{1}{4}$ , Sec. 16, T. 9 S., R. 40 E., W.M.
10. NE $\frac{1}{4}$  SE $\frac{1}{4}$ , Sec. 8, T. 9 S., R. 40 E., W.M.
11. SW $\frac{1}{4}$  NW $\frac{1}{4}$ , Sec. 9, T. 9 S., R. 40 E., W.M.
12. NE $\frac{1}{4}$  NE $\frac{1}{4}$ , Sec. 8, T. 9 S., R. 40 E., W.M.
13. NE $\frac{1}{4}$  NE $\frac{1}{4}$ , Sec. 8, T. 9 S., R. 40 E., W.M.
14. SE $\frac{1}{4}$  SE $\frac{1}{4}$ , Sec. 5, T. 9 S., R. 40 E., W.M.
15. NE $\frac{1}{4}$  SE $\frac{1}{4}$ , Sec. 5, T. 9 S., R. 40 E., W.M.
16. SE $\frac{1}{4}$  NE $\frac{1}{4}$ , Sec. 5, T. 9 S., R. 40 E., W.M.
17. SW $\frac{1}{4}$  SW $\frac{1}{4}$ , Sec. 33, T. 8 S., R. 40 E., W.M.
18. SW $\frac{1}{4}$  NW $\frac{1}{4}$ , Sec. 33, T. 8 S., R. 40 E., W.M.
19. SW $\frac{1}{4}$  NW $\frac{1}{4}$ , Sec. 28, T. 8 S., R. 40 E., W.M.
20. SE $\frac{1}{4}$  NE $\frac{1}{4}$ , Sec. 20, T. 8 S., R. 40 E., W.M.
21. SE $\frac{1}{4}$  SE $\frac{1}{4}$ , Sec. 17, T. 8 S., R. 40 E., W.M.

- 22. NE $\frac{1}{4}$  NE $\frac{1}{4}$ , Sec. 17, T. 8 S., R. 40 E., W.M.
- 23. SW $\frac{1}{4}$  SE $\frac{1}{4}$ , Sec. 8, T. 8 S., R. 40 E., W.M.
- 24. NE $\frac{1}{4}$  SW $\frac{1}{4}$ , Sec. 8, T. 8 S., R. 40 E., W.M.
- 25. NE $\frac{1}{4}$  NE $\frac{1}{4}$ , Sec. 7, T. 8 S., R. 40 E., W.M.
- 26. NW $\frac{1}{4}$  NW $\frac{1}{4}$ , Sec. 7, T. 8 S., R. 40 E., W.M.
- 27. NW $\frac{1}{4}$  NW $\frac{1}{4}$ , Sec. 7, T. 8 S., R. 40 E., W.M.
- 28. NE $\frac{1}{4}$  NE $\frac{1}{4}$ , Sec. 11, T. 8 S., R. 39 E., W.M.
- 29. SE $\frac{1}{4}$  SE $\frac{1}{4}$ , Sec. 12, T. 8 S., R. 39 E., W.M.

REFERENCE: Files Numbered G-3089, G-10618, and 20705

Your Reference: File B13671, Miles - McCullough

Dear Ms. Stoddard:

Your letter of September 10, 1984, requested information regarding the ability for Kenneth W. and Delma D. Miles to ammend a certificate and permit which were issued to them sometime ago. Permit Number G-2886 was awarded Certificate No. 37874 and as a result of Mr. Miles' letter of December 8, 1982 to this office the Baker Valley Irrigation District Permit Number 32932 was made as the primary source of land under the area identified on your map. Therefore, Permit No. G-2886 is supplemental and can be removed by affidavit signed by Mr. and Mrs. Miles requesting a deletion of that portion of Certificate 37874 which would result in a remaining right certificate being issued to them for the remainder of the land involved under that well. I am including a format which may be used for the partial cancellation of that certificate. Please fill it out carefully giving all the data involved and the correct location of the area to be deleted.

The second item was the Miles' Permit No. G-9731 which is in the stage of being developed by them presently. If they wish to develop less than what the permit called for we can very simply not include that at the time of final proof survey and this will create no problem what so ever. I have entered a copy of the map and your letter in that file. Please send a letter confirming the request to delete that area from this permit.

As a result of Mr. Miles letter requesting the earlier well certificate to be supplemental to the irrigation district's right, the primary source under the Baker Valley Irrigation District will remain intact. The Baker Valley Irrigation District should be advised that the well supplemental filings are being removed from the source so that they are aware that they are the only provider of water for those lands when that has been affected.

Please let me know if your have any further questions.

Sincerely,

Bruce A. Estes, Supervisor  
Survey/Certificate Section

Salem, Oregon 97310

Ladies and Gentlemen:

Re: Proof of Appropriation of Water  
Upper Division, Baker Project,  
Oregon, Permit No. 32932

Enclosed is the Proof of Appropriation of Water for Permit No. 32932 for the Upper Division of the Baker Federal Reclamation Project, Oregon, which has been signed for both the irrigation district and this office.

The irrigation district has advised that boundary change procedures to include within the district all of the lands described as the place of use in the enclosed proof have recently been completed. It appears that a water right certificate should now be issued.

We appreciate the efforts of the members of your Department who have been responsible for resolving the complex issues and problems associated with completion of this water right process.

Sincerely yours,

Regional Director

# Proof of Appropriation of Water

100 *MS 8/15*  
 300 *B.*

THE UNITED STATES OF AMERICA  
BUREAU OF RECLAMATION

of 214 Broadway Avenue, Boise, State of Idaho 83702, has applied beneficially the waters of Powder River and 64,400.0 acre-feet from Mason Reservoir constructed under Permit R-5083

a tributary of 3,321.8 for the purpose of irrigation of ~~3,318.9~~ acres and supplemental irrigation of ~~15,000.4~~ acres

under Permit No. 32932 and that the use of said waters has been completed under the terms of said permit; that the priority of the right dates from

June 19, 1958 that the amount of water for the purposes aforesaid, has been actually beneficially used in the amount of

100.0 cubic foot per second

or its equivalent in case of rotation, measured at the point of diversion from the stream. The point of diversion is located in the See final proof map

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to one-fortieth of one cubic foot per second per acre, or its equivalent for each acre irrigated from direct flow and shall be further limited to a diversion of not to exceed 3 1/2 acre-feet per acre for each acre irrigated during the irrigation season of each year from direct flow and storage from reservoir constructed under Permit R-5083, provided further that the right allowed herein shall be limited to the use of stored water only on the lands described as supplemental (storage only).

and shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use under the right, and to which such right is appurtenant, is as follows:

SEE NEXT PAGE

I have read the above and foregoing proof of appropriation of water; I know the contents thereof, and that the facts therein stated are true.

IN WITNESS WHEREOF, I have hereunto set my hand this ... 2 ... day of ... August ...

Re.: Your Files G-3089, G-10618 and 20705  
Our No. B13671, Miles-McCullough

In response to your letter of September 24, 1984, in connection with the above matter, enclosed is a letter signed by Kenneth W. Miles and Delma D. Miles, and an Affidavit also signed by the Mileses.

If you see anything incorrect about either of these documents please contact me before processing.

Thank you very much for your help.

Sincerely,

  
Linda K. Stoddard  
Manager

Re.: G-3089, G-10618, 20705

This is to notify you that we are requesting a cancellation of a portion of Certificate 37874 that applies to the property described as follows:

Land in Baker County, Oregon, as follows:

In Twp. 8 S., R. 40 E., W.M.:

Sec. 3: All that portion of the E $\frac{1}{2}$ NW $\frac{1}{4}$  and NE $\frac{1}{4}$ SW $\frac{1}{4}$   
lying Southwesterly of the County Road.

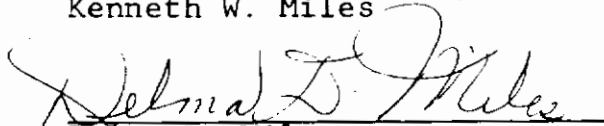

We further request deletion from Permit No. G-9731 any application for water rights as may be pertinent to the property described above.

We have entered into a sale agreement on this land and do not intend to put the water from the Miles well to beneficial use on those lands described herein. We do wish to continue our development plans and filing on the remainder of our land stated in that application.

If you need any further documentation or have any further questions regarding our request, please contact us. Thank you for your help.

Sincerely,

  
Kenneth W. Miles

  
Delma D. Miles

NOTICE OF INTEREST IN WATER RIGHT

MAY 29 1985

**RECEIVED**

MAY 30 1985

**WATER RESOURCES DEPT.  
SALEM, OREGON**

To: Director of Water Resources  
555 13th Street, N.E.  
Salem, Oregon 97310

This is to notify you of an interest in the following described water right:

# Proof of Appropriation of Water

THE UNITED STATES OF AMERICA  
BUREAU OF RECLAMATION

100	8/15
300	

of ~~214~~ Broadway Avenue, Boise, State of Idaho 83702, has applied beneficially the waters of Powder River and 64,400 acre-feet from Mason Reservoir constructed under Permit R-5083

a tributary of J. 321.8 for the purpose of irrigation of ~~3,318.9~~ acres and supplemental irrigation of ~~15,688.4~~ acres

under Permit No. 32932 and that the use of said waters has been completed under the terms of said permit; that the priority of the right dates from June 19, 1958

that the amount of water for the purposes aforesaid, has been actually beneficially used in the amount of 100.0 cubic foot per second

or its equivalent in case of rotation, measured at the point of diversion from the stream. The point of diversion is located in the See final proof map

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to one-fortieth of one cubic foot per second per acre, or its equivalent for each acre irrigated from direct flow and shall be further limited to a diversion of not to exceed 3 1/2 acre-feet per acre for each acre irrigated during the irrigation season of each year from direct flow and storage from reservoir constructed under Permit R-5083, provided further that the right allowed herein shall be limited to the use of stored water only on the lands described as supplemental (storage only).

and shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use under the right, and to which such right is appurtenant, is as follows:

SEE NEXT PAGE

I have read the above and foregoing proof of appropriation of water; I know the contents thereof, and that the facts therein stated are true.

IN WITNESS WHEREOF, I have hereunto set my hand this 2 day of August, 1983.

L. W. Lloyd

Gentlemen:

Your application for an extension of the time limits in which to complete construction and make application of water under the terms of your Permit Number 32932 was received. We also have your check in the amount of \$20.

The application indicates reasonable diligence has been exercised toward completion of the proposed project; therefore, the time limits to complete construction and make complete application of water are being extended to October 1, 1982.

You should make every attempt to complete your project on or before that date because it is doubtful if any further extensions can be granted.

Sincerely,

Bruce A. Estes, Supervisor  
Survey/Certificate Section

Enclosed is the Proof of Appropriation of Water under your Water Right Permit 35727 and R-5083

The data contained in the proof is based on an inspection and survey of your project made by a representative of this office. It defines the extent to which the water right has been completed within the terms of your permit. The proof should be carefully examined, dated and signed, then returned to this office.

Upon receipt of the signed proof, a Certificate of Water Right will be issued confirming the right. This will be forwarded to you after our records are brought up to date.

You may keep the map print for your records.

Sincerely,

BRUCE A. ESTES, Supervisor  
Survey/Certificate Section  
Water Rights Division

Dear Mr. Estes:

We have your letter of January 14, 1983, regarding the Baker Valley Irrigation District's request for extension of time in which to complete construction and beneficial use of water under Permit No. 32932. Our records indicate that "proof of beneficial use" for this permit was submitted to your office on July 20, 1971. We have no objection to your approval of the requested extension.

Sincerely yours,

Acting Regional Director

File 20705

August 9, 1979

Jim Colton, Manager  
Baker Valley Irrigation District  
3895 10th St.  
Baker, OR 97814

Dear Mr. Colton:

In response to your letter of July 30, 1979, regarding numerous points of diversion, and the location of certain lands within the project, we do not feel a transfer is in order. The submission of the form C for proof of appropriation was made on August 18, 1971 by the Bureau of Reclamation. The information I have received from the Oregon State Highway Department is that their construction phase was nearly completed by that time so I would presume that these changes were made prior to submission of the Proof of Appropriation form. That being the case, what was accomplished prior to that time was within the terms of the permit and will be included at the time of final proof survey.

Formal transfers such as you filed here, could not be considered by this office prior to the completion of the survey anyway, however, the forms could be used to identify to this office what was completed and we will use them for reference at the time of the final proof. After the survey and a water right certificate has been issued, formal transfers may be considered by this office for any adjustments made thereafter.

If you have any questions regarding this, please feel free to call me at 1-800-452-7813.

Sincerely,

Bruce A. Estes, Supervisor  
Survey Certificate Section

Dear Sir:

The water applications that I'm sending you are re: adjustments within the Baker Valley Irrigation District from the exclusions lands of I-80-N Freeway. They are filed under permit number 32932 and total 299.05 acres. Kent Searles, Baker County Watermaster, has copies of the readjustments of these transfers. I want to remind you that I'm not applying for additional acreage but to relocate acreages within the Irrigation District. Any questions you may have should be directed to Baker Valley Irrigation, attention Jim Colton, manager. Telephone 503-523-5451.

Thank you.

Sincerely,

Jim Colton, mgr.

SUBJECT: Possible drafting error

T~~ags~~ R40E W/1/4 Sec 21 SW<sup>1/4</sup> SW<sup>1/4</sup> Guber

Jim Colton Mgr BUID thinks we have shown land that could not have been irrigated

I checked our Mylar with photo B80-4N.137 & our stuff appears to be OK but I've asked VLC for input. He will get photo & print & try to reconstruct.

If we're OK, owner could submit application for transfer. Otherwise, I guess we can issue a correction certificate. Maybe a looksee 1<sup>st</sup>.

In April 1981, a Final Proof Survey was completed on Baker Valley Irrigation District Permits R-5083 and 32932, which are for the appropriation of water from Powder River and Mason Dam for the irrigation of 18,399.3 acres.

As with any Final Proof Survey, we check for conflicting water rights of record. I found a water right of record providing for the use of water from your well under Permit Number G-3160. The Baker Valley Irrigation District permit is being listed as the primary source of supply to the lands which automatically makes your well permit supplemental. If you feel this creates a hardship to your operation, please feel free to contact me.

Sincerely,

April 26, 1982

Dear Sir:

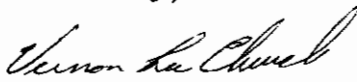

This letter concerns your application 20705 permit 32932 for irrigation and supplemental irrigation of 18399.3 acres from Powder River and 64,400 acre feet from reservoir.

In our telephone conversation of April 20, 1982 I stated I had so far included 18093.9 acres. The decision as to where the remaining 305.4 acres will be placed on the final water right is yours. Keep in mind that it is doubtful that lands not assessed as of Oct. 1, 1980 could be included.

I am enclosing a copy of the maps and a list of assessed people, number of acres found within each ownship, <sup>ACRES</sup> assessed, and acres included so far under the final proof. Please indicate on the maps the acres you want included and return them to me by May 18, 1982.

If you have any questions, feel free to call or write.

Sincerely,

  
Vernon Church  
Water Right Examiner

Baker County Courthouse  
Baker, Oregon 97814

File: 20705

Dear Mr. Colton:

This letter concerns your water right permit 32932. This permit allows the appropriation of 100 cfs from Powder River for the irrigation and supplemental irrigation of 18,399.3 acres.

Enclosed are preliminary maps showing the land found irrigated in my final proof survey of April of 1981. It shows a total of 25751.6 acres irrigated from the Powder River. The acreages shown on the maps represents 7352.3 acres more than permit 32932 allows.

A water right certificate cannot be issued for any quantity greater than that for which the permit was issued. On the maps please indicate in pencil an area roughly 7352.2 acres in size which you wish omitted from permit 32932 and return it to my office.

If you have any questions. Please feel free to contact me.

Sincerely,

Vernon Church  
Field Engineer

BEFORE THE WATER RESOURCES DIRECTOR OF OREGON  
BAKER COUNTY

IN THE MATTER OF CANCELLATION )  
OF A WATER RIGHT IN THE NAME )  
OF ELLA POWELL-HASKIN ET AL )  
-----

O R D E R

On January 11, 1982, Merlyn D. & Bonnie L. Yeakley submitted an affidavit that they are the owners of a certain water right and the lands to which the water right is appurtenant; that they have abandoned any and all interest in and to the said water right and request the same be canceled.

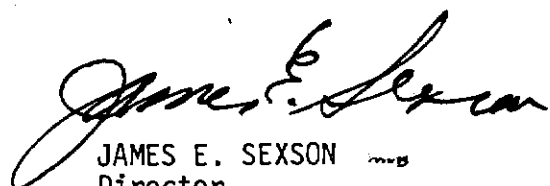

The water right in question was established by Decree of Circuit Court for Baker County, entered March 18, 1918, in the Matter of the Determination of the Relative Rights to the Use of the Waters of Powder River, tabulated in the name of Ella Powell-Haskin et al, at page 394, Volume 6, Order Record of the Water Resources Director, and is described by the certificate recorded at page 4203, Volume 5, State Record of Water Right Certificates, in the name of Ella Powell-Haskin et al, and is for the use of not to exceed one-fortieth cubic foot per second per acre of water from Powder River, with a date of priority of November 17, 1899, for stock, domestic and irrigation of 10.0 acres in the SE $\frac{1}{4}$  SW $\frac{1}{4}$ , Section 3, Township 9 South, Range 40 East, WM.

ORS 540.621 provides that: "Whenever the owner of a perfected and developed water right certifies under oath to the Water Resources Director that the water right has been abandoned by him and that he desires cancellation thereof, the Water Resources Director shall enter an order canceling the water right."

NOW, THEREFORE, it is hereby ORDERED that the said water right, described by the certificate recorded at page 4203, Volume 5, State Record of Water Right Certificates, is canceled.

It is FURTHER ORDERED that the said certificate of water right is canceled.

Dated at Salem, Oregon, this 18th day of January, 1982.

  
JAMES E. SEXSON  
Director

Merlyn D. & Bonnie L. Yeakley  
Missouri Flat  
Baker OR 97814

Dear Mr. & Mrs. Yeakley,

Enclosed is a copy of the Water Resources Director's order entered on January 18, 1982, canceling the water right as evidenced by the certificate recorded at page 4203, Volume 5, State Record of Water Right Certificates, as authorized by your affidavit submitted on January 11, 1982.

Our records have been changed and this certificate will be of no force or effect.

Sincerely,

Myron V. Bish  
Supervisor

RECEIVED  
JUNE 1 1982  
WATER RESOURCES DEPT.  
SALM. OREGON

Dear Merlyn & Bonnie:

You may recall during April of 1981, I visited with you in regard to the final proof survey (field inspection) under Permit No. 32932. This permit is for the use of stored water in Phillips Reservoir on lands served by the Baker Valley Irrigation District.

At the time of the inspection, you indicated that water from the Powder River is no longer used on your property. This being the case, these old rights of record should be canceled.

I have enclosed an Affidavit of Abandonment for your use in clearing up the records of these apparently invalid water rights. The affidavit must be executed in the presence of a Notary Public and returned to my office.

If you have any questions, please contact this office or the office of Kent Searles, Watermaster in Baker, Oregon at 523-6414.

Thanking you in advance for your cooperation,  
I am,

Sincerely,

Dear Mr. Estes:

Your January 21, 1981, letter regarding extension of time "October 1, 1979," for Permit No. 32932, Application No. 20705 (copy attached for your ready reference), has us confused. Our records indicate Proof of Beneficial use was provided to your office on this permit on July 20, 1971.

Our records indicate recent applications for extension of time were submitted for Permit No. 25915 for the Talent Division of the Rogue River Basin Project, and No. 38447 for the Tualatin Project, but we already have confirmation letters from your office extending these permits.

Please advise us of what your files show in this regard.

Gentlemen:

REFERENCE: File Number 20705

Your application for an extension of the time limits in which to complete construction and make complete application of water under the terms of your permit numbered 32932 has been received. We also have your check in the amount of \$10.

The application indicates reasonable diligence has been exercised toward completion of the proposed project; therefore, the time limits to complete construction and make complete application of water are being extended to October 1, 1979.

Sincerely,

Bruce A. Estes, Supervisor

Application for Extension of Time

TO THE WATER RESOURCES DIRECTOR OF OREGON

1. United States of America By Baker Valley Irrigation  
Name

3895 Tenth Street  
Mailing Address

Baker Oregon 97814  
City State Zip

record owner of water right permit No. 32932, do hereby request that the time in which to:

complete the construction of works and/or purchase and installation of the equipment necessary to the use of water, which time now expires on October 1, 19..., be extended to October 1, 19... and/or the time in which to

accomplish beneficial use of water to the full extent now intended under the terms of said permit, which time now expires on October 1, 19..., be extended to October 1, 1979

I have accomplished the following described works and/or purchase and installation of equipment necessary to the use of water under said permit:

within the past year We have leveled lands and gone to more sprinkler systems and combined ditches to conserve the amount of water to be used prior to this past year in this project.

and have accomplished beneficial use of water to the extent of (IF FOR IRRIGATION, STATE HOW MANY ACRES HAVE BEEN IRRIGATED) 18,399.3

(If additional space is required, attach separate sheet)

Re: Permit No. 32932

Dear Mr. Wheeler:

By letter of August 18, 1971, you acknowledged receipt of our notice to the effect that application of water under permit No. 32932 on the Baker Valley Irrigation District was complete. You stated that a survey would be made by your office, after which, "proof may be made and a certificate issued." Would you please inform this office of the current status of this permit?

Sincerely,

Acting

Regional Director

EXHIBIT A

6. (c) The Lilley Pumping Plant is to contain 4 vertical turbine pumps. Two will have capacity to pump 23 cfs each, one 16 cfs and one 8 cfs. Motors will be electric with sufficient horsepower to operate the pumps as indicated above with total head at 101 feet.

7. (a) It is planned that new lands not served by the Lilley Pumping Plant will be served by existing canals and laterals with only minor amounts of additional work in the nature of enlargement or extension.

(b) The canal system served by the Lilley Pumping Plant will consist of a 48" buried pipeline for approximately 500 feet, then an open canal for 3.6 miles, a buried 33" siphon approximately 3350 feet long to a relift pumping plant, then another buried pipe discharge line 1409 feet long, and then an open lateral approximately 4 3/4 miles long. The initial capacity of the canal system will be 70 cfs.

76 STAT. 854.

An Act

To authorize the Secretary of the Interior to construct, operate, and maintain the upper division of the Tucker Federal reclamation project, Oregon, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That for the purpose of providing irrigation water, controlling floods, conserving and developing fish and wildlife, and providing recreational benefits, the Secretary of the Interior, acting pursuant to the Federal reclamation laws (Act of June 17, 1902, 32 Stat. 388, and Acts amendatory thereof or supplementary thereto), is authorized to construct, operate, and maintain the facilities of the upper division of the Tucker Federal reclamation project, Oregon. The principal works of the project shall consist of a dam and reservoir, pumping plants, and related facilities.

Inner Federal reclamation project, Reg. Construction authorization, 43 USC 371 note.

SEC. 2. (a) The period provided in subsection (d), section 9, of the Reclamation Project Act of 1939, as amended (43 U.S.C. 450h), for repayment of the construction cost properly chargeable to any block of lands and acreage to be repaid by installments, may be extended to fifty years, exclusive of any development period, from the time water is first delivered to the block or to a lesser than number of years as consistent with the adoption and operation of a variable repayment plan as provided therein. Cost allocated to irrigation in excess of the amount determined by the Secretary to be within the ability of the irrigator to repay, within the repayment period or period therein provided, shall be repaid out of the reclamation fund, with such period or periods from revenue derived by the Secretary of the Interior from the disposition of power from the McNary project power facilities.

Repayment period, extension, 43 USC 450h, note, 1149; 32 Stat. 547.

(b) Any lands in the upper division of the Tucker project, Oregon, which are held in private ownership by a person whose holdings exceed the equivalent of one hundred and twenty acres of class 1 land shall, to the extent they exceed that acreage, be deemed excess land. No water shall be furnished to such excess land from, through, or by means of project works unless: (1) the owner's total holdings do not exceed one hundred and sixty irrigable acres; or (2) said owner shall have executed a valid, revocable contract with respect to the excess land, not over as provided in the third sentence of section 9 of the Act of May 14, 1925 (43 Stat. 656, 649, 43 U.S.C. 425c). In computing "the equivalent of one hundred and twenty acres of class 1 land" under the third sentence of this section, a hectare of class 2 land shall be counted as seventy-five one hundredths of an acre, each acre of class 3 land shall be counted as fifty-five one hundredths of an acre, and each acre of class 4 land shall be counted as thirty-eight one hundredths of an acre.

(c) (1) The Secretary of the Interior is authorized, in connection with the upper division of the Tucker project, to construct and maintain public recreation facilities and to arrange for the operation and maintenance of the same by an appropriate State or local agency or organization. The cost of constructing such facilities shall be non-reimbursable and non-retainable under the reclamation laws.

Public recreation facilities.

(2) The Secretary may make such reasonable provision in the works authorized by this Act as he finds to be required for the conservation and development of fish and wildlife in accordance with the provisions of the Fish and Wildlife Coordination Act (48 Stat. 401, as amended; 16 U.S.C. 661-666), inclusive, and the portion of the construction cost allocated to these purposes shall be paid in equal control together with an appropriate share of the operation, maintenance, and replacement costs.

Fish and wildlife conservation, 48 Stat. 1080.

R-31037  
20705  
R-20704

December 28, 1967

Bureau of Reclamation  
Box 8008  
Boise, Idaho

Gentlemen:

This will acknowledge receipt of your returned application No. 20705, a transparency map showing separately the location of the primary and supplemental irrigation, the additional recording fee of \$234.48 for which our receipt No. 2287 is enclosed.

Also acknowledged is receipt of a \$1 recording fee to assign application No. 20705 to the name of the Bureau of Reclamation for which our receipt No. 2286 is enclosed. Applications No. R-20704, 20705, and R-31037 are all now in the name of the Bureau of Reclamation.

I must apologize for the long delay in acknowledging receipt of the application map and the amended item No. 8. Due to the size and complexity of this project and the existing rights on the land, it has taken many man-hours to thoroughly check the application. There are discrepancies between the land shown on the map and the existing rights. However, these will be rectified by a stipulation in the permit providing that any lands listed as primary irrigation, which have a valid water right on them now will be described as supplemental irrigation on the certificate issued finally approving these applications. Also, any lands listed as supplemental irrigation in item No. 8 that are not irrigated under an existing right will be likewise shown as primary irrigation on the certificate.

There are however, several small discrepancies between the map and item No. 8 on the application, which must be corrected. The map appears to show certain lands as supplemental irrigation in the NW 1/4 SW 1/4 of Section 11, Township 8 South, Range 39 East, the NE 1/4 SW 1/4 of Section 16, Township 8 South, Range 40 East, and the NE 1/4 NE 1/4 of Section 1, in Township 9 South, Range 40 East, where no acreages are listed on the map or in item No. 8 for these lands.

Item No. 8 lists acreage as irrigated in the SW 1/4 NE 1/4 of Section 1, the NE 1/4 SW 1/4 of Section 1, and the NW 1/4 NE 1/4 of Section 21 in Township 9 South, Range 40 East, where no acreages are shown on the map itself.

The lands shown in Sections 10 and 11 of Township 8 South, Range 40 East as supplemental irrigation are listed in item No. 8 on the application as primary irrigation. Our records would indicate that most of these lands

December 28, 1967

now have existing rights, and should therefore be filed on as supplemental irrigation. Also the 4.3 acres in the SW 1/4 of Section 21 and the 0.3 acres in the NW 1/4 of Section 32 in Township 9 South, Range 40 East are shown on the application map as supplemental irrigation and listed in item No. 3 as primary irrigation. Item No. 8 and the application should be in agreement.

Item No. 4 on the application describes the location of the point of diversion for the stored water from the Mason Dam, and indicates that there are 30 existing diversions from the Powder River, so far as the direct flow of the river is concerned. Each of these points of diversion must be described on the application map in reference to a government survey corner. Item No. 4 on the application will also have to be completed to describe each of these points of diversion.

I am returning application No. 20705, the attachment for item No. 8, the transparency map under separate cover, the assignment forms and receipts, and receipt No. 2287. The application is endorsed so that in order to retain its date of priority, it must be returned on or before March 28, 1968.

Very truly yours,

CHRIS D. WHEELER  
State Engineer

November 23, 1966

Bureau of Reclamation  
Norman H. Moore, Regional Director  
Box 8006  
Boise, Idaho 83707

Gentlemen:

This will acknowledge receipt of the superseding application for application No. 20705, a new map, a copy of the specifications for Mason Dam and a voucher in the amount of \$414.39.

I realize that it would take considerable work to designate the location and number of acres of primary and supplemental irrigation in each particular forty concerned. However, this provides the information necessary for the proper processing of this application. A map showing only the land to be irrigated under this application with the primary and supplemental irrigation designated separately is required. I doubt if this can be shown with a reasonable degree of accuracy at a scale of two inches equal to one mile. There is no need for soils classifications on this application. The map must be in the form of a transparency and preferably to a minimum scale of four inches equal to one mile. Perhaps it would be best to submit the map in a number of sheets each showing the land in one township and range.

I am returning the application No. 20705 and map for completion. The application is endorsed so that in order to retain its date of priority it must be returned to this office on or before January 23, 1967.

Very truly yours,

CHRIS L. WHEELER  
State Engineer

OCT 31 1966

Mr. Chris L. Wheeler, State Engineer  
State of Oregon, Water Resources Dept.  
516 Public Service Building  
Salem, Oregon 97310

Attention: Mr. Larry W. Jebousek

Dear Mr. Wheeler:

Enclosed is a consolidated application for a permit to appropriate the public waters of the State of Oregon. This application follows the form suggested by Mr. Jebousek in his May 18 letter.

The tabulation of land by 40-acre tracts reveals that there are 4398.1 irrigable acres of land in the Baker Project, and also in the Baker Valley Irrigation District, that does not now have a water right. The application requests a natural flow right for this land, plus supplementing the right by water stored in Mason Reservoir. The tabulation shows there are 13,990.4 irrigable acres in the project with an existing water right. This land is to receive supplemental irrigation water from storage in Mason Reservoir.

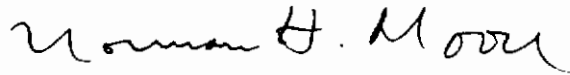

A transparency showing by symbols the primary and supplemental land in the project area is being submitted under separate cover. A print of this drawing is enclosed. The acreage figure for each category in each 40-acre tract is not shown on the transparency because of the large number of separate figures that would need to be placed on the drawing.

Also enclosed is a voucher in the amount of \$414.39. This has been calculated from the schedule shown in Oregon Revised Statutes 536.050 and includes the following:

Reservoir Storage Permit	\$179.00
Application submitted with this letter	234.39
Recording assignment from District to United States	<u>1.00</u>
Total	\$414.39

If the amount stated on the voucher is not correct, please return it for correction or sign and return it and advise us of any additional amount that should be paid.

Very truly yours,

~~Assistant~~ Regional Director

May 14, 1966

Department of Interior  
Bureau of Reclamation  
Box 8008  
Boise, Idaho

Gentleman:

Enclosed you will find a partially completed application form combining the information which you submitted on two application forms on May 2, 1966.

The reservoir application for the storage of 100,000 acre feet, requires the additional fee of \$184.

The secondary application for the irrigation of 13,466.1 acres requires an additional fee of \$240.17.

The map must be a transparency drawn to a scale necessary to show the land to be irrigated in each 1/16th section. Supplemental and primary irrigation should be indicated on the map at least by the acreage figure for each 1/16th section.

The point of diversion for the stored water is the dam and in addition should also be shown those diversions on the river where direct flow will be diverted for primary irrigation. Item No. 4 of the application should also show these diversions.

The separate sheets marked, exhibit B, can be attached, instead of entries in item No. 8. I am returning these sheets for your convenience in preparing the map.

I am also returning your new application for inspection, correction, and signature.

Very truly yours,

CHARLES E. WHEELER  
State Engineer

Enclosures

May 11, 1966

Department of the Interior  
Bureau of Reclamation  
Box 8003  
Boise, Idaho 83707

Gentlemen:

This will acknowledge receipt of two applications for permits, one to appropriate 100,000 acre feet from Mason Reservoir for irrigation and the other to appropriate 113 cubic feet per second of water from Powder River.

I assume both of these are intended as more complete applications to supersede the preliminary application filed by Earl Hoge and assigned to Baker Valley Irrigation District. I also assume your use of two forms was for convenience and actually this is intended as one application. If this is so, I believe it would be more clear to list the source as Powder River and Mason Reservoir and include quantity of water from direct flow as well as quantity from storage, and then use the single list of acres to be irrigated as supplemental from the reservoir for those with an existing right and primary irrigation from direct flow and from storage for those lands without a right at present.

I don't understand the reasons for the voucher for \$1. The \$1 for recording the assignment of 20705 is in order, but if this application is to supersede the other the recording fee has been paid but the examination fee is \$235.17 based on the total of 18,466.1 acres you have listed in Exhibit B attached to the application. The voucher is not correct in that it does not represent complete payment for the examination fee of the application. I am completing the voucher so far as it applied to the \$1 for recording the assignment of application 20705. On receipt of this we will record the assignment of application R-31037 previously submitted and change our records to show the United States of America, acting through The Regional Director, Region I, Bureau of Reclamation.

I will write further concerning the other charges after we have gone over the application in more detail.

Yours very truly,

CHRIS L. CHELTER  
State Engineer

MAY 3 1966

Mr. Chris L. Wheeler  
State Engineer  
Water Resources Department  
516 Public Service Building  
Salem, Oregon 97310

Dear Mr. Wheeler:

By letter dated April 28, 1966 we submitted two applications to appropriate the public waters of the State of Oregon. The applications were for the Baker Project in Baker County, Oregon.

We now find that the Exhibit A attached to the application for use of water stored in Mason Reservoir contains an incorrect legal description. The Lilley Relift Pumping Plant will be located in the NW $\frac{1}{4}$ NE $\frac{1}{4}$  of Section 30, T. 7 S., R. 40 E., W.M., instead of the NE $\frac{1}{4}$ NW $\frac{1}{4}$  as shown on the Exhibit A.

A new Exhibit A with the correct legal description is attached. Please replace the Exhibit A in our submittal with the one attached to this letter.

Very truly yours,

*Norman H. Moore*

Assistant Regional Director

Attachment

Copy to: Mr. John C. Hesketh, Secretary, Baker Valley I.D., Baker, Oregon (w/c attachment)

EXHIBIT A

Item 6 (c) LILLEY PUMPING PLANT - Location, NE $\frac{1}{4}$  NE $\frac{1}{4}$  Section 11, T. 8S., R. 39E., W. M. Four vertical shaft pumps--2-23 c.f.s. each, 1-16 c.f.s., 1-8 c.f.s. Electric motors--2-400 horsepower each, 1-250 horsepower, 1-150 horsepower. Static head 90 feet. Replaces existing plant at same location.

LILLEY RELIFT PUMPING PLANT - Location, NW $\frac{1}{4}$  NE $\frac{1}{4}$ , Section 30, T. 7S., R. 40E., W. M. Three vertical shaft pumps, 1-13.4 c.f.s., 1-6.7 c.f.s., and 1-3.9 c.f.s. Electric motor driven, total load about 110-horsepower. Static head 10-feet.

New pump canals to be constructed by the District.

Item 7 - CANAL SYSTEM OR PIPE LINE - Irrigation system consists of 28 canal systems diverting from the Powder River at locations shown on attached Drawing No. 569-137-34. This existing system has served the District lands for many years and will continue to serve the Project in the future.

Mr. Chris L. Wheeler  
State Engineer  
Water Resources Department  
516 Public Service Building  
Salem, Oregon 97310

Dear Mr. Wheeler:

Enclosed are two applications for a permit to appropriate the public waters of the State of Oregon. One of these is a secondary application to the permit for storage of water in Mason Reservoir in Baker County. Accompanying this application is an assignment from the Baker Valley Irrigation District of its application No. 20705.

The second application is for a permit to use natural flow water, when available, for irrigation of 4,509 acres of land in the Baker Valley Irrigation District. According to the information we have obtained, this land does not now have a water right. It is also included in the area to be irrigated with water stored in Mason Reservoir, as indicated in the first described application. Thus this application, if approved, will result in all of the land in the Baker Valley Irrigation District having a natural flow right plus a right for use of storage water from Mason Reservoir.

Enclosed is a voucher for \$11.00. This includes \$1.00 for recording the assignment of application No. 20705 to the United States, and an examination fee of \$10.00 for the application for a natural flow right for the new land. Please sign and return the voucher for payment.

We are not certain about calculation of the additional fees for the two applications, partly because the list of lands to be irrigated appears in both applications. Please advise as to the appropriate fees and we will prepare a voucher for your signature.

Very truly yours,

*Norman H. Moore*

R-31037

November 19, 1965

U. S. Department of the Interior  
Bureau of Reclamation  
Box 237  
Boise, Idaho 83701

Attention Norman H. Moore

Dear Mr. Moore:

Your reference 424

Applications R-20704 and R-31037 can be combined as you have done with the one application you submitted November 9, 1965. The priority date will remain June 19, 1956 for 100,000 acre feet.

The two applications can be assigned to the Bureau if you will submit the recording fee of \$1.00 for the assignment you submitted. Application No. 20705, the secondary application, provides for the use of stored water, so if the reservoir application is to be in the name of the United States of America I think application No. 20705 should be also, and in the name of Baker Valley Irrigation District.

Yours very truly,

CHARLES L. HALLMAN  
State Engineer

By  
Trevor Jones, Assistant

August 16, 1965

Mr. David B. Hall  
Watermaster District No. 8  
County Courthouse  
Baker, Oregon 97814

Dear Dave:

Applications numbered R-20704, 20705 and 31037 are being held pending data that the Bureau of Reclamation has to supply, particularly a list of acreage involving both primary and supplemental irrigation.

Every effort should be made to submit the balance of the data so the permits could be issued but I don't know of any particular time limit when they must be completed. I assume the State Engineer could not hold them indefinitely but unless the plans were abandoned I do not think there is any immediate intention to reject the applications.

Very truly yours,

CHRIS L. WHEELER  
State Engineer

Mr. Chris L. Wheeler  
State Engineer  
Salem, Oregon

Dear Mr. Wheeler:

I am sorry that I am not able to supply you with the land classification maps requested in your letter of January 3, other than the one attached to the Upper Division, Baker Project Report. I am enclosing a copy of this map in case the report you received did not have it attached. Final classification maps will be sent to you as soon as they are completed, but the field work is not scheduled to start until later this year. We can supply you with a list of acreage involved both for primary and supplemental irrigation when this final land classification report is executed.

Thank you for your assistance with these applications and when this further information is available I will forward it to you.

Sincerely yours,

  
William Burpee  
Field Solicitor

Attention: Mr. James W. Carver, Jr.,  
Assistant

Dear Mr. Carver:

This will acknowledge receipt of your letter of September 15, 1961. I am advised by the Secretary of the District that the Secretary and a Director will be in Salem by the time you get this letter and expect to confer with the State Engineer's office in regard to District plans.

Perhaps at that time we can get something straightened out in regard to the applications.

As I understand it, the project plans are being considered by Bureau of the Budget, but probably will not be included in this years' appropriations and will have to be considered by the next session. However, the District representatives will be able to discuss this more in detail.

Yours very truly,

JACKSON & JOHNSON

Boise, Idaho

December 12, 1962

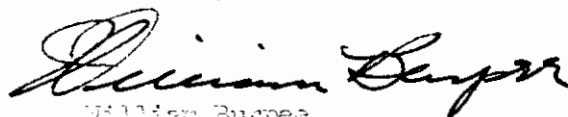

Mr. Chris L. Wheeler  
State Engineer  
Salem, Oregon

Dear Mr. Wheeler:

In connection with getting the now authorized Upper Division, Baker Project underway, we are anxious, of course, to comply with our usual practice of having federal reclamation projects conform completely to state water law procedures. I am enclosing a copy of House Document No. 302, 87th Congress, 2d session, which contains the project report and which was favorably commented on by your office on behalf of the State of Oregon. I am also enclosing a copy of the authorizing act—Public Law 87-700, approved September 27, 70 Stat. 634.

It is my understanding from the board of directors of the Baker Irrigation District and from their attorney, Mr. William Jackson, Baker, that water filings were made some years ago by the local project sponsors, which were subsequently assigned to the Baker Irrigation District. I would appreciate it very much if you would provide me with authenticated copies of these filings, together with any comments you might have with respect to the material that will be needed by your office to conform these filings to the project plan of development, looking towards early issuance of permits from your office under these filings.

Sincerely yours,

  
William Burpee  
Field Solicitor

March 2, 1961

Mr. William L. Jackson  
Attorney at Law  
P. O. Box 851  
Baker, Oregon

Dear Mr. Jackson:

Applications numbered R-20704, 20705 and R-31037, now in the name of the Baker Valley Irrigation District, have been held without action since the date of filing pending organization of the district and the development of data necessary to completion of the applications,

I would appreciate it if you would advise us whether the district is now in a position to proceed with completion of the applications so they may be considered for approval by the State Engineer.

Although a municipality enjoys certain advantages in regard to beginning of construction, once the permit has issued, the statutes do not provide authority for holding the application in an incomplete status.

It appears that this office does not have any records regarding the formation of the Baker Valley Irrigation District. We would appreciate it if you could supply us with copies of the petition for organization and the proclamation of formation of the district. If you do not have any copies to spare, if you would loan us your copies of these documents, we would make photocopies for our files and return the borrowed copies to you.

Very truly yours,

LEWIS A. STANLEY  
State Engineer

July 11, 1960

Mr. William L. Jackson  
Attorney at Law  
P. O. Box 771  
Baker, Oregon

Dear Mr. Jackson:

This letter is in reference to applications numbered R-20704 and 20705 that were filed in this office on February 23, 1945, in the name of Earl Hoge, trustee, for an irrigation district to be formed and application numbered R-31037 which was filed in this office on August 13, 1956, in the name of Fred J. Warner, trustee, for irrigation district to be formed.

Our records indicates that the applications which enjoy the tentative priority date of June 19, 1958, have been held in this office without action for several years pending formation of the irrigation district and development of plans for the project. It is our understanding that the irrigation district has been formed and that plans are being developed. It would appear, therefore, that the applications should now be assigned to the irrigation district and completed so that they can be considered for approval by the State Engineer.

Very truly yours,

LEWIS A. STANLEY  
State Engineer

NOV 23 1947  
STATE ENGINEER  
SALAM OREGON

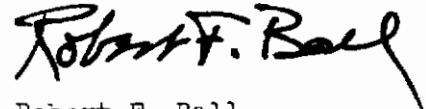

Dear Mr. Stricklin:

On February 23, 1945, Mr. Earl Hoge, acting as trustee of the Baker Valley Irrigation Project, made some sort of a filing on all waste water from the proposed dam and all creeks entering the project direct.

As the writer is currently concerned in the development of the Baker Valley Irrigation Project in the same capacity Mr. Hoge previously served, it is desired to learn what the present status of these filings is, what they cover, and any other pertinent information concerning them. Am also anxious to learn whether any supplemental filings may be necessary to validate these.

Whatever information you may send me will certainly be appreciated.

Sincerely,

Robert F. Ball  
Manager

REFERENCE: Files G-5489 and 20705

In April, 1981, we conducted a final proof survey on the Baker Valley Irrigation District Permits R-5083 and 32932. These permits describe the appropriation of water from Powder River and Mason Dam for the irrigation of 18,399.3 acres.

Upon checking for conflicting water rights of record, we found your Permit G-4637 covers part of this land from two wells. The Baker Valley Irrigation District permits will be listed as the primary source of supply to the lands and the well permit will automatically become supplemental. Jim Lindsay, the operator of the project, has been informed of this and concurs.

If you have any questions, please feel free to contact me.

Sincerely,

BRUCE A. ESTES, Supervisor

Box 043  
Boise, ID 83724

Dear Mr. Lloyd:

REFERENCE: File 20705

We have received an application for extension of time in which to complete construction and beneficial use under the Bureau's Permit 32932. This request was made by the Baker Valley Irrigation District, the project operating under the permit. A copy of the request is enclosed for your reference.

We are able to act on an extension request of this nature by an interested party, but we require approval from the permittee. The substance of this request was in order to allow some changes of ditch deliveries and pumping points that have been accomplished since the last extended period of the permit October 1, 1979. This extension will accommodate the changes within the terms of the permit to be included within the final proof survey presently underway.

Please let me know by February 8, 1983, if at all possible so that we will have this information for the meeting in Baker. If I do not have a response by February 15, 1983, I will assume you do not have an objection to it and we will honor the request at that time. The statutory fees were submitted with the application.

If you have any questions, please feel free to contact me.

Sincerely,

BRUCE A. ESTES, Supervisor  
Survey/Certificate Section

Neil Stessman, Regional Supervisor  
Water and Power Resources Service  
Pacific Northwest Region  
Federal Building and US Courthouse  
PO Box 043-550 West Fort Street  
Boise, ID 83724

Dear Mr. Stessman:

REFERENCE: File 20705

We received your letter of January 29, 1981 regarding the recent extension of time granted permit 32932. This permit was assigned to the Bureau of Reclamation on December 19, 1967 from the Baker Valley Irrigation District. The permit is for the irrigation and supplemental irrigation of 18,399.3 acres from the Powder River and Mason Reservoir.

Your information is correct and proof of complete application of water was received at this office on July 30, 1971 and entered on the records. The permit is presently about to have the final proof survey made by the regional field crew in Pendleton, Oregon. Upon initial inspection consideration of the irrigation district and members of this office was that there had been some minor adjustments made since 1971 which would not be allowed without an extension. Because of this the irrigation district submitted a request for an extension of time in the name of the bureau which was honored. This will not create a conflict to the permit but will allow some minor flexibility in being able to utilize the lands that are found within the terms of the permit to be issued a water right certificate.

We have ordered aerial photography and hope to have the survey completed by midsummer so that we will be able to issue a water right certificate. As with other projects once the survey has been completed and the irrigation district satisfied with the results, they will be sent to your office for approval.

COPY

Neil Stessman, Regional Supervisor  
February 20, 1981

Mr. H. R. Gray  
Acting for the  
Regional Director  
Bureau of Reclamation  
P. O. Box 8008  
Boise, Idaho 83707

Dear Mr. Gray:

I have reviewed the draft "Flood Control Regulations Phillips Lake" which you transmitted with a copy of your letter of May 22, 1970 to Warren A. Dickman.

It appears to me that the parameters are unduly restrictive particularly during June. If we continue to use this regulation, I think it unlikely there will ever be any water stored in the exclusive flood control space that could later be used for irrigation. If this is the case, the use of water under this criteria would effectively limit the right acquired under the permit to 73,526 acre feet including inactive and dead storage.

I recognize that when the project was authorized that the top 17,000 acre feet were for exclusive flood control storage. However, many parties had hoped that a reasonable curve would be adopted that would permit some storage in this space after the threat of floods had passed which might provide effective hold-over storage if the subsequent years runoff was deficient.

I would appreciate the opportunity to discuss this further with you at some mutually convenient time.

Sincerely,

CHRIS L. WHEELER  
State Engineer

Mr. George Ward

MEMORANDUM

TO Application Nos. R-20704, 20705 & R-31037

FROM Chris Wheeler

DATE July 9, 1968

Messrs Bill Burpee and John Mangan were in the office this date to discuss permit Nos. R-5083 and 32932. I advised them that if runoff was sufficient without interfering with prior rights, they could store the full 100,000 acre feet capacity of the reservoir which would provide holdover for subsequent years. However, if at any time during the runoff period that water could not be stored in Mason Reservoir, in order to effect the flood control of the project, that any right for storage subsequent in priority which utilized water that otherwise would have passed on downstream to meet flood control requirements would not be that which the district could later demand to fill its supply.

That during the early part of the irrigation season while runoff was taking place, they would be entitled to take up to 100 second feet of inflow through the reservoir for direct diversion to the lands, together with <sup>water for</sup> the rights which district lands hold prior to the project permit at such times as the landowners desired to use the water therefrom. This water would be passed through the reservoir as though it did not exist and would not be charged as acre feet of storage and subsequent release from storage.

That the permit did not authorize and could not cover the transient surcharge storage that would occur if excessive runoff occurred after the reservoir had filled to the top of the controlled storage space and had uncontrolled discharge through the spillway. That it is the policy of this office and the laws of Oregon that such noncontrollable storage which would occur in the process of flood routing would be considered simply as direct flow of the stream, building up storage at such times as the inflow exceeded the capability of the spillway to pass the outflow and discharge from this sometime stored area as rapidly as the capability existed to discharge water in excess of the inflow.

That the annual limitation from direct flow and stored water which might be utilized on the project was limited to 64,000 acre feet and this was at the rate of not to exceed 3 acre feet per acre for each acre irrigated during the irrigation season.

CLW:eh

January 3, 1963

Mr. William Burpee, Field Solicitor  
U. S. Department of the Interior  
Portland Region, Boise Field Office  
P. O. Box 937  
Boise, Idaho

Dear Mr. Burpee:

Thank you for the copy of an authorizing action and House Document 302. Copies of the pending applications in the name of the Baker Valley Irrigation District are enclosed as requested. When these applications are completed, I would suggest that superseding copies be prepared and the two reservoir applications combined into one.

Primarily, the data needed to complete the applications would be maps showing land to be irrigated and a list of the acreage involved both for primary and supplemental irrigation. I am sure this data is available in your engineering offices either in the land classification maps or through a combination of existing maps.

The secondary application should delineate quantity of water as a rate of flow rather than acre feet of seasonal use and be completed describing the authorized project. I should also receive a copy of the plans and specifications for the construction of Mason Dam as soon as they are available.

Sincerely,

CHRIS L. WHEELER  
State Engineer

 Time limit to complete construction ~~10-1-70~~ extended to extended to  
 Time limit to completely apply water ~~10-1-71~~ extended to extended to 52008

Remarks: This appropriation shall be limited to 1/40th of one cubic foot per second or its equivalent for each acre irrigated from direct flow and shall be further limited to a diversion of not to exceed 3 1/4 acre feet per acre for each acre irrigated during the irrigation season of each year from direct flow and storage from reservoir tanks constructed under Permit No. R-5083, provided further that the right allowed herein shall be limited to any deficiency in the available supply of any prior right existing for the same land and shall not exceed the limitation allowed herein and further limited to the use of stored water only on the lands described as supplemental, however, lands listed as being for supplemental irrigation may be considered as primary irrigation if at time of final proof it is determined that no primary right exists for lands, and shall be subject to such reasonable rotation system as may be ordered.
