ATTENTION: Jack H. Madison, Manager

Dear Sir:

This will acknowledge an application for change in use of water from an unnamed stream. This application cannot be filed because the required fee of \$25.00 was not submitted.

Since the use of water is being changed from manufacturing of cheese to domestic use, the State Engineer is required to publish notice of this proposed change in a newspaper in general circulation in Tillamook County. This will require a deposit of \$30.00 for the publication notice. Please designate the newspaper of your choice.

Item number 6 on the application indicates the Tillamook People's Utility District is not the owner of the lands to which the right is now appurtenant. The remarks section of the application contradicts Item number 6.

Item number 7 on the application indicates the water has been used beneficially in the past five years. Was this use for the manufacturing of cheese or just the domestic use for the residents on the factory land?

The number of families you propose to serve domestic water should be indicated in Item number 20 on the application. A transparency map showing the boundary of the area to be served domestic water will be required. Item number 13 on the application should then be completed to describe the location of domestic use and be in agreement with the map.

George P. Winslow, Jr.

Tillamook, Oregon 97141

Dear Mr. Winslow:

The right to the use of water as evidenced by certificate 7177 is appurtenant to the property on which water was used regardless of ownership so there is no need for the Tillamook People's Utility District to submit an assignment from the Central Cheese Association.

The right was perfected for use of water for manufacturing cheese so unless this use is continued the right does not serve any purpose. If the use of water has been continued and there has been no period of five years when water was not made then a change in type of use could be applied for.

There are a number of rights in Tillamook County for use of water in creameries or cheese factories which have not been used for considerable period of time and these are not valid even though the pipe line may be used for domestic uses in several houses.

Very truly yours,

Trevor Jones

Re: Water Certificate No. 7177

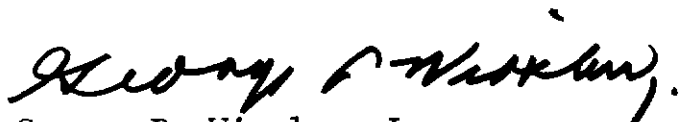

Dear Sir:

The Tillamook People's Utility District has purchased the property of the Central Creamery Association and along with said purchase has acquired all the rights of the Central Cheese Association in Water Certificate No. 7177, which is located in the southern part of Tillamook County.

Is it necessary to have a formal assignment of this to the Tillamook People's Utility District other than the deed reciting the same?

I trust that I shall hear from you in due course.

Very truly yours,
