

ODFW DIVISION 33 APPLICATION REVIEW SHEET

Recommendations for Water Right Applications that may affect the
Habitat of Sensitive, Threatened or Endangered Fish Species, OAR 690-33-310 through 340.

Application #: S-88049 Applicant's Name: Allison Remington

1) Will the proposed use occur in an area that may affect the essential habitat of sensitive, threatened, or endangered fish species?
[690-33-330(1)]

☒ NO ☐ YES Species: _____ Status: ☐ Sensitive ☐ Threatened ☐ Endangered

If YES, continue to question (2). If NO, you may comment by completing the public interest review sheet on the back of this page.

2) Stage or value at risk (check all that apply): ☐ Spawning, ☐ Incubation ☐ Rearing ☐ Passage ☐ Habitat Value

3) Will the proposed use result in a **LOSS** in the essential habitat of **THREATENED OR ENDANGERED SPECIES** or a **NET LOSS** in the essential habitat of a **SENSITIVE SPECIES**? ☐ NO ☐ YES

A) Standard of NET LOSS applies to sensitive species statewide. [690-33-330(2)(b)]

B) Standard of LOSS applies to T or E species outside the Columbia Basin. [690-33-330(2)(a)]

4) Can conditions be applied to mitigate the impact to the essential habitat of a S, T or E species?
☐ NO; skip to question 6. ☐ YES

Which conditions are recommended? (select from Menu of Conditions;

5) If conditions cannot be identified to offset impacts to the essential habitat of S, T or E species, would the proposed use harm the species? ☐ NO ☐ YES [690-33-330(4)]

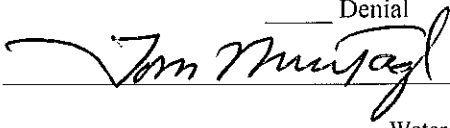

If YES, please explain: _____

6) If WRD determines that it is in the public's interest to approve a permit even if the impact cannot be mitigated what conditions do you recommend? (select from Menu of Conditions)

___ Flows should be metered and withdrawals should never exceed surface water flow quantity at the POD ___

___ (wq) _____

7) Your recommendation under OAR 690-033-0330 (2): ☒ Approval with conditions
☐ Approval without conditions
☐ Denial

ODFW Representative signature:  Date: 6-5-2015

ODFW PUBLIC INTEREST REVIEW SHEET

Application #: S-88049 Applicant's Name: Allison Remington

1) Will the proposed use occur in an area that may affect the habitat of fish or wildlife species?

☐ NO (Sign form and return)

☒ YES Species: Cutthroat Trout and various aquatic herpitiles like Pacific Giant Salamanders downstream of POD
Other: _____

Stage or value at risk (check all that apply): ☐ Spawning, ☐ Incubation ☒ Rearing ☐ Passage ☒ Habitat Value

2) Will the proposed use result in a loss of habitat? ☐ NO ☒ YES Possibly if stream goes dry downstream

3) Can conditions be applied to mitigate the impact to the loss of habitat? ☐ NO ☒ YES

Which conditions are recommended? (select from Menu of Conditions) Stream should be monitored (possibly metered) to make sure that surface flows to some level are maintained downstream of the diversion, and that at no time should the entire stream be dewatered below the POD. Aquatic life in the stream reach downstream of the diversion need surface water to survive, and if all flows are removed at the POD then the stream below the diversion will run dry, or dewater to a point where native fish, herpetiles and insects etc. will perish, a severe but preventable outcome to the natural ecology of the stream in the reach below the diversion.

4) If conditions cannot be identified to offset impacts to the habitat, would the proposed use harm the species? ☐ NO ☒ YES

If YES, please explain: See explanation in number (3) above.

5) If WRD determines that it is in the public's interest to approve a permit even if the impact cannot be mitigated what conditions do you recommend? (select from Menu of Conditions)

Flows should be metered and withdrawals should never exceed surface water flow quantity at the POD

(wq)

6) Your recommendation: ☒ Approval with conditions
☐ Approval without conditions
☐ Denial
