INSPECTION REPORT Ansel Marshall 1981 A-31 July 24, 1985 Ves Garner

On July 24, 1985 I made the annual inspection of Ansel Marshall's project near Burns in Harney County. No one was contacted

The project is to be two wells and pump to provide supplemental irrigation of about 320 acres of hay, grain, and pasture land.

Wells and pumps are installed as previously reported.

It does not appear that either of the two wells completed have been used. The north well still needs a fuel tank and controls.

The crops are again real weedy and poor.

cc: Water Rights G-10578

INSPECTION REPORT Ansel Marshall 1981 A-31 June 3, 1985 Ves Garner

On June 3, 1985 I inspected Ansel Marshall's project near Burns in Harney County.

The project is to be two wells and pump to provide supplemental irrigation of about 320 acres of hay, grain, and pasture land.

Wells and pumps are installed as previously reported.

It does not appear that either of the two wells completed have been used. The north well still needs a fuel tank and controls.

The crops are again real weedy and poor.

Subject: Water Development Loan No. 1981 A-31

Dear Mr. Marshall:

On October 16, 1981 you submitted a request for payment of services and materials for your water development project.
Your request for funds was documented by a contract from Aqua-Sales, Inc. in Burns for the following equipment.

Well in NE 1/4 NW 1/4, Sec. 26, T. 22 S., R. 30 E., Location:

1 - 50 hp turbine 900 gpm at 160' tdh open flow

1 - 50 hp motor

1 - 8" x 16 1/2" discharge head

140' 8" x 2 1/2" x 1 1/2" 0.T. & shaft

l - used bowles

1 - 50 hp panel

1 - kvar capacitor surge capacitor & lightning arrestor install equipment wire in equipment

l - service pole;

Well in SE 1/4 SW 1/4, Sec. 26, T. 22 S., R. 30 E., Location: W.M.

500 gpm at 160' tdh

1 - 30 hp sub pump & motor

180' #6-3 wire

160' 4" x 21' pipe

1 - 4" x 12" well cap

1 - 4" tee

1 - 4" plug

1 - 4" gate valve

1 - 4" x 10' pipe

1 - 30 hp panel

1 - surge & lightning arrestor

1 - kvar capacitor install equipment

wire in controls

l - service pole

Ansel Marshall November 1, 1983 Page Two

You requested \$18,602.00 to complete the purchase and installation of this equipment. The payment request was approved and a check was issued to you and Aqua-Sales, Inc. on October 23, 1981.

Field inspections revealed that no installation of equipment was begun until after August 9, 1983 and as of October 13, 1983 still has not been completed. The field inspection on October 13, 1983 showed the following used equipment being installed at the well in Section 26:

Motor:

International Harvester 345 cubic inch V8 engine

Model UV 549 Serial #5615

Angle Drive:

U. S. Electric Corp.

90° gear drive

rated 150 hp @ 1760 rpm

serial #1367191

Pump:

Fairbanks Morse Turbine

Serial #PN710 6" discharge

No equipment was found at the well in Section 36 at the time of the field inspection.

The above equipment is a substantial departure from that listed in the Aqua-Sales contract and for which loan funds were advanced. All project equipment must be documented as to cost. Documention must be in the form of receipts or paid invoices from Aqua-Sales, Inc.

Also included in the loan funds disbursed to you and Aqua-Sales, Inc. were costs for performing pump tests on two wells. These costs must also be documented with receipts or paid invoices.

If this information is not received by November 11, 1983 the Department will begin legal action to correct the default as per letter of September 12, 1983.

Sincerely,

WILLIAM H. YOUNG

Director

WHY:slv 9016B

INSPECTION REPORT Ansel Marshall 1981 A-31 October 13 & 14, 1983

On the morning of October 13, 1983 I met with Ansel Marshall and inspected his project near Burns.

The project is to be two wells and two pumps to provide supplemental irrigation of hay and grain crops.

The two wells were constructed and tested in the fall of 1981. The north well yielded 900 gpm and the south well yielded 550 gpm. Pumps were not installed during 1982 and still not as of August 9, 1983.

This date the south well is <u>unchanged</u>, a pump <u>has not</u> been installed. Marshall said a 30 horsepower submersible pump is to be installed today.

At the north well, I found a propane powered pump had been installed but the total installation is not complete. Marshall said he elected propane over electricity because the power company wanted more than \$8000 to install power lines and more than \$3000 annual minimum. A fuel tank, valving and emergency controls will complete the installation. It has not been tested yet.

Summary

Motor: International Harvester

345 cubic inch V8 engine

Model UV 549 Serial #5615

Angle Drive: U.S. Electric Corp.

90° gear drive

rated 150 hp @ 1760 rpm

Serial #1367191

Pump: Fairbanks Morse Turbine

Serial #PN710 6" discharge INSPECTION REPORT
Ansel Marshall, 1981 A-31
October 13 & 14, 1983 - Ves Garner
Page Two

Note:

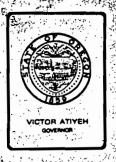

Marshall said all of the equipment was obtained from Aqua Sales in Burns.

All of the north well equipment is used but is supposed to be in good condition.

Appearance would indicate poor to fair condition. Marshall said the pump was new three stage 12 inch.

Note:

I returned to Marshall's at 5:30 pm on the 13th and again at 8:00 a.m. on the 14th and the south pump had not been installed.

Re: Water Resources Department Loan 1981 A-31

Dear Mr. and Mrs. Marshall:

Your loan is both delinquent as extended and out of compliance with the loan agreement for the reason that two of the required pumps have not yet been installed even though the loan proceeds were received some time ago.

I met with the assistant attorney general assigned to our department to discuss your file. He recommended that you be given until October 12, 1983 to bring your loan in compliance in all respects. He also strongly recommended that if that deadline is not met that the department immediately review its alternatives and commence the appropriate action, probably foreclosure proceedings.

Sincerely,

CHRIS L. WHEELER Deputy Director

CC: Larry Thomson, Assistant Chief Counsel
Dale Pallin, Aqua Sales, Inc.

INSPECTION REPORT Ansel Marshall 1981 A-31 August 9, 1983 Ves Garner

On August 9, 1983 I inspected Ansel Marshall's project near Burns.

The project was to have been three wells and three pumps. Two wells have been constructed (numbers 1 and 3) but pumps have not been installed.

The land around the north well (number 1) is farmed and flood irrigated from Silvies River. Crops are hay and grain. The land around the south well (number 3) does not appear to have been activated for some time.

I attempted to locate Mr. Marshall but could not. I had hoped to find out his plan to complete the project.

August 18, 1983

I phoned Aqua Sales and spoke to Dale Pallen, President. I asked Mr. Pallen if Marshall had purchased pumps for his wells. He said he had and came in with a check for \$20,682 made jointly to him and Marshall. He said "since not all of the money was his", he endorsed the check and gave it back to Marshall who, in turn, gave Pallen a check for the correct amount owed Aqua Sales. Pallen said Marshall's check bounced; therefore, he has not been paid so has not installed the pumps. He said he thought Marshall used the \$20,682 for a land payment. I then referred him to Bud.

les House

INSPECTION REPORT Ansel Marshall 1981 A-31

On October 14, 1982 I met with Ansel Marshall to inspect his irrigation project near Burns in Harney County: Mr. Marshall accompanied me on my inspection?

The project consists of constructing two wells and the purchase and installation of two turbine pumps. The project serves about 324 acres as a supplemental flood irrigation water source.

There has been no change since the last inspection. Mr. Marshall said that the pumps are purchased and stored at Aqua Sales in Burns. He also said that it was too wet this spring to get equipment in to set pumps and the Silvie's River provided adequate water this year. He expects to set pumps after barley is harvested.

The land near the southern well was seeded to oats for hay. The land near the northern well was seeded to barley. Both crops looked good.

William

INSPECTION REPORT

Ansel Marshall 1981 A-31 June 14, 1982 Ves Garner

The evening of June 14 I again inspected Ansel Marshall's project near Burns in Harney County. No one was on the project or contacted during the inspection.

I inspected the southerly well first and found it unfinished. The pump, motor, power, etc. is yet to be installed. The land has not been cultivated.

I again attempted to locate the north well but could not find it in the tall grass. It did not appear the electrical service or even the pump was installed.

About 1/2 the area near the north well is farmed in spring grain. No irrigation system was apparent.

INSPECTION REPORT Ansel Marshall 1981 A-31 10/28/81 Ves Garner

On October 28, 1981 I attempted to contact Mr. Marshall to inspect his project near Burns in Harney County.

I arrived at his home about 7:15 a.m. Lights were on in the house and I found an old man who was feeding stock. He said Mr. Marshall was in the house. I rang the bell, beat on the door, and even yelled. No one answered even though I could hear movement in the house.

I attempted to locate the northerly well but could not find it. The southerly well is the same as last inspected.

INSPECTION REPORT Ansel Marshall #237

On July 22, 1981, I met with Ansel Marshall to inspect his irrigation project near Burns in Harney County. Mr. Marshall did not accompany me on my inspection.

The project consists of constructing three wells, and installing three turbine pumps.

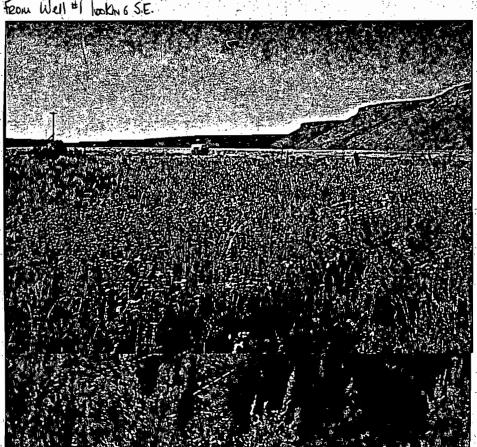

As of this date, the northern well (well No. 1) is being drilled by a cable drill right (no. 782). The well is said to be 140' deep. The middle well (well No. 2) is not drilled and Mr. Marshall said that he didn't think he would have it drilled at present. Well #3, the southern well has been completed and is said to be 150' deep with a static water level of 50%

Further inspections will be necessary.

PROJECT LAND SER 26

ENGINEER: Kery (Classes

Dated July 22, 1981.

INSPECTION REPORT Ansel Marshall 1981 A5/1/81 V.G.

On May 1, 1981 I inspected the project of Ansel Marshall near Burns. I did not attempt to contact Mr. Marshall since it did not appear that any work had been done.

That portion of the project in Section 26 appears to be good farm land now primarily in meadow hay and pasture. There seems to be two farm houses on or near the project land. It did not appear construction of the well had begun.

That portion of the project in the north portion of Section 36 is now unimproved pasture with sage brush in it. If this land had been previously irrigated, there is little evidence. There are two houses located at the NW end of this parcel.

A very old cable tool drill rig on a military style chassis appears to be set up on well No. 2. It appears that this rig may have been there for several years. I do not believe this rig is actively drilling a well.

That portion of the project in the southern part of Section 36 is primarily in sage brush. Maybe the northern portion had been improved and irrigated but not recently. This portion of the project has a mobile home on it. Construction of the well has not started.

January 25, 1983

Ansel and Martina Marshal PO Box 1187 Burns, OR 97720

Dear Mr. and Mrs. Marshal:

REFERENCE: File G-10578

Thank you for the return of Application G-10578 along with the accompanying map.

Item 3 of the application indicates land to be irrigated in the SW 1/4 SW 1/4 of Section 26, however, the map does not indicate any land in that quarter-quarter section. It appears that the quarter-quarter section should be described as the SW 1/4 SE 1/4.

The 3.0 acres described as being supplemental in the NE 1/4 SW 1/4 of Section 36, is not covered by an existing right. You should amend Item 3 and the map to indicate this application is for primary irrigation in this quarter-quarter section.

I am returning your application and map for correction and completion. The application is endorsed so that in order to retain its priority date it must be received in this office on or before March 25, 1983.

Sincerely,

STEPHEN C. BROWN Senior Water Rights Examiner

November 16, 1982

Ansell and Martina Marshall PO Box 1187 Burns, OR 97720

Dear Mr. and Mrs. Marshall:

REFERENCE: File G-10578

Your application now describing the proposed use of 5.4 cubic feet of water per second from two wells for the supplemental irrigation of 324.0 acres, along with the supporting map, has again been reviewed. Our Receipt 33404 acknowledging the additional recording fees submitted in the amount of \$258.80 is enclosed.

There are some discrepancies between what you indicate as having primary irrigation and what our records show. Listed below are the locations where these discrepancies lie:

Our records show primary

Section 26 NW4 NE4 34.9 acres

NE¼ SW¼ 0.0 acres

NW4 SE¼ 35.0 acres

SW4 SE4 33.0 acres

Section 36 NE4 SW4 0.0 acres

SE' SW 11.7 acres

NW4 SE4 18.86 acres

Township 22 South, Range 30 East, WM

Only the lands which have primary rights existing may receive supplemental water. You should amend your application to indicate primary and supplemental to agree with what our records show.

It will be required for you to revise your map to indicate the location of the acreage that is to receive primary water and the location of the land to receive supplemental water.

Ansell and Martina Marshall November 16, 1982 page two

If the application is to be in both names as appear on page one, both signatures must appear on page three.

I am returning the application and map for correction and completion. The application is endorsed so that in order to retain its priority date, it must be received in this office on or before January 17, 1983.

Sincerely,

Stephen C. Brown Senior Water Rights Examiner

File G-10578

Date: September 28, 1982

From

Stephen C. Brown Senior Water Rights Examiner

Subject:

Mrs. A. Marshall called in today and stated that a check in the amount of \$258.80 and the ammended application and map was forwarded to this office on August 18, 1982.

In reviewing our reciepts, there was no indication that the check was recieved. Mrs. Marshall was told we would hold action on the application for 30 days from this date to allow her to complete a new application and submittthe said application to us along with the supporting data.

Water Resources Department MILL CREEK OFFICE PARK

555 13th STREET N.E., SALEM, OREGON 97310

September 14, 1982

Ansell and Martina Marshall PO Box 1187 Burns, OR 97720

Dear Mr. and Mrs. Marshall:

REFERENCE: File G-10578

Since you have not returned Application G-10578 or replied to correspondence regarding it, I assume you have reconsidered the matter of your proposed use of water and will not resubmit your application.

If we do not hear from you within thirty days from the date of this letter, your application will be rejected without further notice and the \$103.20 unearned permit recording fee will be returned.

Sincerely,

Stephen C. Brown Senior Water Rights Examiner

July 9, 1982

Ansell and Martina Marshall PO Box 1187 Burns, OR 97720

Dear Mr. and Mrs. Marshall:

REFERENCE: File G-10578

Your Application G-10578 which was returned to you has not been received. It was endorsed so that in order to retain its priority date, it must have been received in this office on or before July 6, 1982.

Your application has lost its priority, but may be reinstated and given a new priority date as of the date it is next received.

Sincerely,

Stephen C. Brown

Sénior Water Rights Examiner

SCB: tw

May 3, 1982

Ansell and Martina Marshall PO Box 1187 Burns, OR 97720

Dear Mr. and Mrs. Marshall:

REFERENCE: File G-10578

Your application describing the proposed use of 5.9 cubic feet of water per second from three wells for the irrigation and supplemental irrigation of 352.0 acres, along with the supporting map, has been reviewed.

There are some discrepancies between what you indicate as having primary irrigation and what our records show. Listed below are the locations where these discrepancies lie:

Our records show primary

Section 26 NWA NEW 34.9 acres NEW SWW 0.0 acres NWW SEW 35.0 acres SWW SEW 33.0 acres

Section 36 NE% NW% 5.8 acres
NE% SW% 0.0 acres
SE% SW% 11.7 acres
NW% SE% 18.86 acres
Township 22 South, Range 30 East, WM

Onlytthe lands which have primary rights existing may receive supplemental water. You should amend your application to indicate primary and supplemental to agree with what our records show.

Your map must be revised to indicate the location of the acreage that is to receive primary water and the location of the land to receive supplemental water.

The total acreage to receive water as described by your application and map is 352.0 acres, not 351.0 acres as described by the total amount in Item 3.

Ansell and Martina Marshall May 3, 1982 page two

A new fee schedule, enacted by the Legislature became effective August 19, 1981. Under the new fee schedule, the required fees for your application are: examination fee of \$40 and a permit recording fee for irrigation of \$362, for a total of \$402. Since you submitted \$143 with the application, an additional \$258.80 will be required.

If the application is to be in both names as appears on page one, both signatures must appear on page three.

I am returning the application and map for correction and completion. The application is endorsed so that in order to retain its priority date, it must be received in this office on or before July 6, 1982.

Sincerely,

Stephen C. Brown Senior Water Rights Examiner

Ansell and Martina Mershall PO Box 1187 Burns, OR 97720

Dear Mr. and Mrs. Marshall:

REFERENCE: FIle G-10578

We have received your application for use of water for flood irrigation purposes along with the supporting data and fees. Our Receipt 27788 is enclosed. Your application has been filed and assigned number G-10578.

Because of the many applications which have been filed in recent months, we are temporarily behind in our processing. Your application will be examined in detail as soon as possible. We will contact you if we need any additional information. If a permit is required to satisfy the conditions of a loan or land sale or if other emergency conditions exist, please let us know and we will attempt to process your application in the shortest possible time.

After examining your application, a permit may be issued without further correspondence if no additional information is required and it does not conflict with existing rights. The proposed appropriation will be subject to the Water Policy Review Board's Basin Program Statements, existing minimum flows, and demands of prior rights during periods of low water.

Thank you for your patience.

Sincerely,

RALPH H. JACKSON Supervisor, Application/Permit Section Water Rights Division

PHONE 378-3066

February 4, 1981

Ansel and Martina P. O. Box 1187
Burns, Oregon, 97720

Dear Mr. and Mrs. Marshall:

Your application for a permit to appropriate 1760 gallons of water per minute from three wells for irrigation of 320 acres was not accompanied with the required fees, so could not be filed.

The application requires the examination fee of \$20.00 and recording fees, based upon the the 320 acres listed, in the amount of \$67.00. Therefore, a total of \$87.00 is needed.

In addition to locating each well by distances from section corners, it is also necessary to list the ½ - ½ section where each well is located. If there is insufficient space in Item 2, you may refer to the remark section and give the required information.

Item 3 must be completed by listing the acreage in each $\frac{1}{4} - \frac{1}{4}$ section to be irrigated. If separate lands will be irrigated from each well, the acreage to be irrigated from each well must be listed separately.

The amount of water you wish to appropriate from each well must be noted in Item 6.

If the water from the wells will be used to make up deficiencies in supply that may accur in the primary supplies covered under existing rights, the use should be noted as supplemental irrigation in Item 7.

Items 10, 11, 12, and 13 must be completed and it will be necessary for both of you to sign the application on the third page.

Your application must be supported by a map showing the project. Pages 3 and 4 of the enclosed booklet relative to ground water applications briefly explains the requirements for your supporting maps. Unless you have had experience in preparing maps, it is

Ansel and Martina Marshall February 4, 1981 Page 2

advisable to secure technical assistance in drawing the required map.

I am returning your application and legal descriptions. I am also enclosing a blank application form you may complete and submit.

Sincerely,

Wayne J. Overcash Water Rights Engineer

Permit No.....

Permit to Appropriate the Public Waters of the State of Oregon

This is to certify that I have examined the foregoing application and do hereby grant the same, SUBJECT TO EXISTING RIGHTS INCLUDING THE EXISTING MINIMUM FLOW POLICIES ESTABLISHED BY THE WATER POLICY REVIEW BOARD and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and
shall not exceed
well or source of appropriation, or its equivalent in case of rotation with other water users, from
being 3.16 cfs from Well # 1 and 0.89 cfs from Well#2
The use to which this water is to be applied is
If for irrigation, this appropriation shall be limited to
second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed
Supp. clause
and shall be subject to such reasonable rotation system as may be ordered by the proper state officer. The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works constructed shall include an air line and pressure gauge or an access port for measuring line adequate to determine water level elevation in the well at all times.
The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shal keep a complete record of the amount of ground water withdrawn.
The priority date of this permit is April 11, 1983
Actual construction work shall begin on or before and shall
thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 19
Complete application of the water to the proposed use shall be made on or before October 1, 19
WITNESS my hand this day of, 19, 19

Water Resources Director

Abstract of Permit

This is to certify that I have examined APPLICATION G-10578 and do hereby grant the same SUBJECT TO EXISTING RIGHTS and the following limitations and conditions:

This permit is issued to Ansel and Martina Marshall of PO Box 1187, Burns, Oregon 97720, phone 573-6255 or 382-4224, for use of the waters from two wells, being 3.16 cubic feet per second from Well 1 and 0.89 cfs from Well 2

for the PURPOSE of irrigation and supplemental irrigation

that the PRIORITY OF THE RIGHT dates from April 11, 1983

and is limited to the amount of water which can be applied to beneficial use and shall not exceed 4.05 cfs

measured at the point of diversion from the wells , or its equivalent in case of rotation with other water users.

The well is to be LOCATED: Well I - 1250 feet South and 1620 feet East from the Northwest Corner of Section 26, being within the NE 1/4 NW 1/4 of Section 26, Township 22 South, Range 30 East, WM; Well 2 - 200 feet North and 1360 feet East from the Southwest Corner, Section 36, being within the SE 1/4 SW 1/4 of Section 36, Township 22 South, Range 30 East, WM, being within * A description of the PLACE OF USE under the permit, and to which such right is appurtenant, is as follows:

* Sections 30 and I, Townships 22 and 23 South, Range 30 East, WM, in the County of Harney.

SEE NEXT PAGE

The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works constructed shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times. The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

Actual construction work shall begin on or before diligence and be completed on or before October 1, 19 , and shall thereafter be prosecuted with reasonable .

Complete application of the water to the proposed use shall be made on or before October 1, 19

Witness my hand this 13th day of June , 19 83

WATER RESOURCES DIRECTOR

This permit is for the beneficial use of water. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan. It is possible that the land use you propose may not be allowed if it is not in keeping with the goals and the acknowledged plan. Your city or county planning agency can advise you about the land-use plan in your
