- Evaluation of this application will be based on information provided in the application.

(3) Conditional uses. Minimum lot sizes for all conditional uses shall be determined by the Hearings Officer and/or DEQ considering the protection of public health, the size needed to accommodate the use and its accessory uses and the objective to minimize potential conflicts with adjacent land uses;

(4) Pre-existing, non-conforming lots of record. Lots which were lawfully in existence prior to the effective date of this chapter and do not meet the requirements of this section may be used for uses listed in this zone, provided that all other applicable regulations can be met.

(B) *Setback requirements.* No building shall be located closer than 20 feet from a lot line, except on the street side of a corner lot used for a side yard, the setback shall be 25 feet from the lot line.

(C) *Lot coverage and building heights.*

(1) All sewage disposal installations, such as septic tanks and septic drainfields, shall be set back from the mean high-water line or mark along all streams, lakes or wetlands a minimum of 100 feet, measured at right angles to the high-water line or mark. In those cases where practical difficulties preclude the location of the facilities at a distance of 100 feet and the Department of Environmental Quality finds that a closer location will not endanger health, the Planning Director may permit the location of these facilities closer to the stream, lake or wetland, but in no case closer than 50 feet;

(2) All structures, buildings or smaller permanent fixtures shall be set back from the high-water line or mark along all streams, lakes or wetlands a minimum of 100 feet measured at right angles to the high-water line or mark.
