Application for a Permit to Use

Ground Water

Water-Use Permit Application Processing

1. Completeness Determination

The Department evaluates whether the application and accompanying map contain all of the information required under OAR 690-310-0040 and OAR 690-310-0050 (www.oregon.gov/owrd/law). The Department also determines whether the proposed use is prohibited by statute. If the Department determines that the application is incomplete, all fees have not been paid, or the use is prohibited by statute, the application and all fees submitted are returned to the applicant.

2. Initial Review

The Department reviews the application to determine whether water is available during the period requested, whether the proposed use is restricted or limited by rule or statute, and whether other issues may preclude approval of or restrict the proposed use. An Initial Review (IR) containing preliminary determinations is mailed to the applicant. The applicant has 14 days from the mailing date to withdraw the application from further processing and receive a refund of all fees paid minus \$200. The applicant may put the application on hold for up to 180 days and may request additional time if necessary.

3. Public Notice

Within 7 days of the mailing of the initial review, the Department gives public notice of the application in the weekly notice published by the Department at www.oregon.gov/owrd. The public comment period is 30 days from publication in the weekly notice.

4. Proposed Final Order Issued

The Department reviews any comments received, including comments from other state agencies related to the protection of sensitive, threatened or endangered fish species. Within 60 days of completion of the IR, the Department issues a Proposed Final Order (PFO) explaining the proposed decision to deny or approve the application. A PFO proposing approval of an application will include a draft permit, and may request additional information or outstanding fees required prior to permit issuance.

5. Public Notice

Within 7 days of issuing the PFO, the Department gives public notice in the weekly notice. Notice includes information about the application and the PFO. Protest must be received by the Department within 45 days after publication of the PFO in the weekly notice. Anyone may file a protest. The protest filing fee is \$350.00 for the applicant and \$700.00 for non-applicants. Protests are filed on approximately 10% of Proposed Final Orders. If a protest is filed, the Department will attempt to settle the protest but will schedule a contested case hearing if necessary.

6. Final Order Issued

If no protests are filed, the Department issues a Final Order consistent with the PFO. If the application is approved, a permit is issued that specifies the details of the authorized use and any terms, limitations or conditions that the Department deems appropriate.

SECTION 2: PROPERTY OWNERSHIP

Please indicate if you own all the lands associated	with the project from	n which the water is to	be diverted,
conveyed, and used.			

⊠ Yes		
	\boxtimes	There are no encumbrances.
		This land is encumbered by easements, rights of way, roads or other encumbrances.
□ No		
		I have a recorded easement or written authorization permitting access.
		I do not currently have written authorization or easement permitting access.
		Written authorization or an easement is not necessary, because the only affected lands I do not own are state-owned submersible lands, and this application is for irrigation and/or domestic use only (ORS 274.040).
		Water is to be diverted, conveyed, and/or used only on federal lands.
List the	na	mes and mailing addresses of all affected landowners (attach additional sheets if necessary).

You must provide the legal description of: 1. The property from which the water is to be diverted, 2. Any property crossed by the proposed ditch, canal or other work, and 3. Any property on which the water is to be used as depicted on the map.

SECTION 3: WELL DEVELOPMENT

		IF LESS 7	THAN 1 MILE:	
WELL NO.	NAME OF NEAREST SURFACE WATER	DISTANCE TO NEAREST SURFACE WATER	ELEVATION CHANGE BETWEEN NEAREST SURFACE WATER AND WELL HEAD

2	Powder River	Approx 2,990 ft	Approx 50 ft]
	Muddy Creek	Approx 4,150 ft	Approx 15 ft	
3	Powder River	Approx 1,810 ft	Approx 10 ft	
	Muddy Creek	Approx 2,275 ft	Approx 16 ft	
			RECEIVED	BY OWRD
			AUG 10	2015
			SALEM,	OR

Please provide any information for your existing or proposed well(s) that you believe may be helpful in evaluating your application. For existing wells, describe any previous alteration(s) or repair(s) not documented in the attached well log or other materials (attach additional sheets if necessary).

There are no existing wells by this landowner but there are wells in the surrounding area that are drilled into granite or basalt layers. BAKE 52275 was drilled in 2013 by the landowner to the east and the well log shows black basalt at 75 ft below land surface and fractured black basalt from 142 ft to 385 ft. BAKE 51965 and BAKE 51323 are also nearby and show consolidated formation layers present.

Revised 2/1/2012 Ground Water/4 WR

SECTION 3: WELL DEVELOPMENT, CONTINUED

Total maximum rate requested: <u>4.7 CFS</u> (each well will be evaluated at the maximum rate unless you indicate well-specific rates and <u>annual volumes</u> in the table below).

The table below must be completed for each source to be evaluated or the application will be returned. If this is an existing well, the information may be found on the applicable well log. (If a well log is available, please submit it in addition to completing the table.) If this is a proposed well, or well-modification, consider consulting with a licensed well driller, geologist, or certified water right examiner to obtain the necessary information.

^{*} Licensed drillers are required to attach a Department-supplied Well Tag, with a unique Well ID or Well Tag Number to all new or newly altered wells. Landowners can request a Well ID for existing wells that do not have one. The Well ID is intended to serve as a unique identification number for each well.

Revised 2/1/2012 Ground Water/5 WR

^{**} A well log ID (e.g. MARI 1234) is assigned by the Department to each log in the agency's well log database. A separate well log is required for each subsequent alteration of the well.

^{***} Source aquifer examples: Troutdale Formation, gravel and sand, alluvium, basalt, bedrock, etc.

SECTION 4: WATER USE

USE	PERIOD OF USE	ANNUAL VOLUME (ACRE-FEET)
Irrigation	Oct 2 – Oct 31	846
Supplemental Irrigation	Mar 1 – Oct 1	846

Exempt Uses: Please note that 15,000 gallons per day for single or group domestic purposes and 5,000 gallons per day for a single industrial or commercial purpose are exempt from permitting requirements.

For i	rrigation	use	only:
-------	-----------	-----	-------

Please indicate the number of primary and supplemental acres to be irrigated (must match map).

Primary: 282 (Oct 2 – Oct 31) Acres

Supplemental: 282 (Mar 1 – Oct 1) Acres

List the Permit or Certificate number of the underlying primary water right(s): Certificates 1487, 1509, 4438, 8845,

28770, 29065

Indicate the maximum total number of acre-feet you expect to use in an irrigation season: 846 acre-ft

- If the use is municipal or quasi-municipal, attach Form M
- If the use is **domestic**, indicate the number of households:

If the use is mining, describe what is being mined and the method(s) of extraction: **RECEIVED**

SECTION 5: WATER MANAGEMENT

AUG 1 0 2015

A. Diversion and Conveyance

What equipment will you use to pump water from your well(s)?

WATER RESOURCES DEPT SALEM, OREGON

🛛 Pur	np (give	horsepower	and type):	125 F	1P 8"	submersible	pump	placed	between	200-3	JU II	deep
		•	• • •									

Other means (describe): ____

Provide a description of the proposed means of diversion, construction, and operation of the diversion works and conveyance of water. Water will be pumped from the proposed well(s) and applied to the place of use via mainline and header boxes as required.

B. Application Method

What equipment and method of application will be used? (e.g., drip, wheel line, high-pressure sprinkler) Pivots will be installed and used to apply the water. Flood irrigation will be applied to those areas not served by pivots.

C. Conservation

Please describe why the amount of water requested is needed and measures you propose to: prevent waste; measure the amount of water diverted; prevent damage to aquatic life and riparian habitat; prevent the discharge of contaminated water to a surface stream; prevent adverse impact to public uses of affected surface waters.

This landowner is currently irrigating with wheel lines but plans to irrigate with pivots. This upgrade will allow a better use of the water application in a more efficient manner. All water from ground water wells is planned to be transported to the place of use by means of mainline, which will further reduce any water waste.

SECTION 6: STORAGE OF GROUND WATER IN A RESERVOIR

AUG 10 2015

Revised 3/4/2010 G-18/27

SECTION 10: REMARKS

Use this space to clarify any information you have provided in the application (attach additional sheets if necessary).

This landowner is requesting permission to drill one and up to three wells in order to achieve the maximum rate requested. Based on surrounding well logs, it is expected the landowner will most likely need to drill two wells to achieve the rate requested. The land is currently irrigated with flood irrigation and wheel lines. The landowner is planning to install pivots in order to more efficiently irrigate his land and is requesting a higher rate of 1/60th of a CFS per acre in order to proceed.

Due to the proximity of the Powder River, the landowner anticipates that he will have to drill and seal into bedrock and/or a confining layer (granite/basalt, sandstone or clay stone). Well logs in the area indicate the presence of a consolidated formation such as basalt and/or granite that could adequately serve as a confining layer that would allow the landowner to target an aquifer that is confined and has no hydraulic connection to the surface water. The landowner would like to employ a split seal in the well development.

Proposed well development will be similar to as outlined in OAR 690-210-0150 (1) (c) "Method 3" and as shown in Appendix 3, Figure 210-6. Section 3 proposes minimum well construction standards but the top seal depth and bottom seal depth will be in accordance with well development standards and will be material dependent (upper: impermeable clay layer, bottom: rock).

If this proposed well development method is not acceptable by the Oregon Water Resources Department ground water review team, it is the wish of the landowner that other acceptable option(s) are put forth for consideration and a potential ground water application amendment.

The landowner has a number of water rights certificates for the lands indicated but most of the certificates do not locate the acreage in each quarter-quarter where the water rights are located (in the case when they do not cover a full 40 acres). For example, the attached ground water application map shows 22.0 acres from Certificate 1509 and 18.5 acres from Certificate 8845 for the NW ¼ of the SE ¼ of Section 16. It is unknown where these water rights are located within the quarter-quarter, but the applicant is requesting supplemental irrigation for 19.0 acres from March 1 to October 31.

In addition, certificates 1487 and 1509 indicate irrigation is allowed from March 1 – October 1. The landowner is applying for permission to use ground water to supplement his existing primary water rights until October 31 of each year and is therefore applying for proposed use of primary and supplemental irrigation.

Land Use Information Form

NOTE TO APPLICANTS

In order for your application to be processed by the Water Resources Department (WRD), this Land Use Information Form must be completed by a local government planning official in the jurisdiction(s) where your water right will be used and developed. The planning official may choose to complete the form while you wait, or return the receipt stub to you. Applications received by WRD without the Land Use Form or the receipt stub will be returned to you. Please be aware that your application will not be approved without land use approval.

This form is NOT required if:

- 1) Water is to be diverted, conveyed, and/or used only on federal lands; OR
- 2) The application is for a water right transfer, allocation of conserved water, exchange, permit amendment, or ground water registration modification, and <u>all</u> of the following apply:
 - a) The existing and proposed water use is located entirely within lands zoned for exclusive farm-use or within an irrigation district;
 - b) The application involves a change in place of use only;
 - c) The change does not involve the placement or modification of structures, including but not limited to water diversion, impoundment, distribution facilities, water wells and well houses; and
 - d) The application involves irrigation water uses only.

NOTE TO LOCAL GOVERNMENTS

The person presenting the attached Land Use Information Form is applying for or modifying a water right. The Water Resources Department (WRD) requires its applicants to obtain land-use information to be sure the water rights do not result in land uses that are incompatible with your comprehensive plan. Please complete the form or detach the receipt stub and return it to the applicant for inclusion in their water right application. You will receive notice once the applicant formally submits his or her request to the WRD. The notice will give more information about WRD's water rights process and provide additional comment opportunities. You will have 30 days from the date of the notice to complete the land-use form and return it to the WRD. If no land-use information is received from you within that 30-day period, the WRD may presume the land use associated with the proposed water right is compatible with your comprehensive plan. Your attention to this request for information is greatly appreciated by the Water Resources Department. If you have any questions concerning this form, please contact the WRD's Customer Service Group at 503-986-0801.

B11 28 0004 REVISED EXHIBIT "A"

File No.: 00019404

IN TOWNSHIP 7 SOUTH, RANGE 39 EAST of the Willamette Meridian, County of Baker and State of Oregon:

Section 15: The Southwest guarter of the Northeast guarter;

the South half of the Northwest quarter;

the Southwest quarter; and

the West half of the Southeast quarter;

EXCEPTING THEREFROM the following: Commencing at the

Southeast corner of the Southwest quarter of the Southeast quarter

of said Section 15;

thence North along the East line of said Southwest quarter, 900

feet more or less, to a point of intersection with a diagonal fence;

thence Southwesterly along said fence 950 feet more or less, to a point of intersection with the South line of said Section 15;

thence East along said South line, 300 feet more or less, to the

point of beginning.

FURTHER EXCEPTING THEREFROM the following:

Beginning at the West quarter corner of said Section 15;

thence East 720 feet;

thence North 1400 feet, more or less, to the North line of the

Southwest quarter of the Northwest quarter of said Section 15, and

an existing fence line;

thence West 720 feet more or less to the Northwest corner of the

Southwest quarter of the Northwest quarter of said Section 15;

thence South 1400 feet more or less to the point of beginning.

Section 16: The Northeast quarter of the Southeast quarter;

the South half of the Southeast quarter;

all those portions of the Northwest quarter of the Southeast quarter, the Northeast quarter of the Southwest quarter, and the Southeast quarter of the Southwest quarter lying South and East of

the Amanda C. Moore Ditch (Permit No. 8845).

ALSO all that portion of the Southwest quarter of the Northeast

quarter described in the following legal description:

Beginning at a point 1320.0 feet West of the West quarter corner

of Section 15 said township and range;

thence South 1325.0 feet;

thence West 1320.0 feet:

thence North 636.8 feet to a ditch fence line; thence

Northerly along the Amanda C. Moore Ditch (Permit No. 8845)

the following 6 calls:

North 26°00'00" East 64.0 feet;

North 72°00′00" East 185.0 feet;

North 20°00'00" East 280.0 feet;
