GREG A WORTHINGTON
9373 W EVANS CREEK RD
ROGUE RIVER, OR 97537

Dear Reservoir Owner,

You submitted a Notice of Exempt Reservoir under *ORS 537.405 (HB 2376)*. HB 2376 provided an opportunity for the Oregon Department of Fish and Wildlife to comment on how a specific reservoir(s) caused injury to an existing fishery resource. In addition the same law allowed members of the public to comment on how the storage or use of the water caused an injury to an existing water right. This comment period ended on August 1, 1997.

The Department received the attached injury allegation(s) related to your reservoir(s), as provided for in *ORS 537.405*. If you do not agree with the allegation of injury, please submit detailed information to the Department explaining why or how the allegation is in error. Your response must be postmarked no later than *December 10, 1997*.

The Department will review any submission you may make and determine if a Mitigation Order is required. If the Department finds that the allegation is factual and verifiable, the Department will issue a Mitigation Order requiring that the attached conditions, or other conditions that prove to be necessary after reviewing any information that is submitted, be met in order for the reservoir to maintain an exempt status.

If you receive a Mitigation Order, you may request a Contested Case Hearing to contest the findings of the Department and the allegation of injury. Information on how to request a Contested Case Hearing will be provided with the mitigation order, if issued.

If you have any questions, please call the Water Rights Information Group at (503) 378-3739 extension. 499.

Water Right Section

MITIGATION CONDITIONS

File # P- 83152

Date 11/12/97

RWK

Oregon Department of Fish and Wildlife Conditions

_____ In accordance with ORS 498.268 and ORS 509.605, install, maintain, and operate bypass devices as required by the Oregon Department of Fish and Wildlife that will provide adequate upstream passage for fish. (SMBS)

_____ Install, maintain, and operate fish screening devices as required by the Oregon Department of Fish and Wildlife to prevent fish from entering the diversion. (SMSS)

✓ _____ The reservoir owner is required to by-pass flows from 4/1 through 10/31. (BPC)

Water Right Related Conditions

_____ The pond may be filled one time only per year. No diversion of water to storage can occur during times all water rights are not met on the John Day river System. (KR1)

_____ If required by the Watermaster, the water user shall install and maintain a headgate, an in-line flow meter, weir, or other suitable device for measuring and recording the quantity of water diverted. The type and plans of the headgate and measuring device must be approved by the Watermaster (Department). (KR2)

_____ Live stream flow must be passed when required to satisfy existing water rights. In order to substantiate live flow is being passed, measuring devices may be required. (J)

_____ Live flow must be by-passed all year. (BSD)

_____ Any secondary use of stored water is limited each year to the capacity of the reservoir. (BSD2)

_____ The water user shall install and maintain a headgate, an in-line flow meter, weir, or other suitable device for measuring and recording the quantity of water diverted. The type and plans of the headgate and measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.

**ODFW BIOLOGIST COMMENTS FOR
HB 2153 CERTIFICATES
HB 2376 NOTICES**

Application # P-83152 Date: July 31, 1997
Biologist's Name: Jerry Vogt
Certificate # (If applicable) Address: 1495 East Gregory Rd., Central Point
Phone: (541) 826-8774

****Attach additional sheets if necessary**

Please specify which reservoir(s)/ponds(s) the comments pertain to:
*Describe by name, number or Township Range Section and 1/4 1/4 if necessary. If comments refer to all reservoir listed please specify. **Please provide enough information to accurately describe which reservoir the comment(s) pertain to.***

Comments apply to all reservoirs in the application.

Does the reservoir/pond cause a detrimental impact to existing fishery resource. Specify which fishery resource and the evidence which supports that finding. *Please describe for each reservoir listed above. If the water right and the supporting evidence are the same please indicate.*

This reservoir negatively impacts populations of chinook and coho salmon, steelhead and resident trout in Evans Creek. While ODFW has not documented the presence of fish at the POD, this reservoir is above ODFW's instream water right reach on Evans Creek (Certificate 59705, 73027). Evans Creek appears on DEQ's 303 (d) list of water quality limited streams due to high summer water temperatures; these high water temperatures reduce salmonid habitat in this stream. Withdrawals of water for this reservoir contribute to existing temperature problems in Evans Creek and injure ODFW's instream water right on this stream.

*******BACK OF PAGE FOR LIST OF CONDITIONS TO MITIGATE INJURY*******

Which of the following conditions are required to mitigate the described injury?

The reservoir owner shall: (without ODFW approval)

- (a) install, maintain, and operate fish screening devices as required by the Oregon Department of Fish and Wildlife to prevent fish from entering the proposed diversion. *The required screen is to be in place and functional prior to any further diversion of water.
- (b) in accordance with ORS 498.268 and ORS 509.605, install, maintain, and operate by-pass devices as required by the Oregon Department of Fish and Wildlife that will provide adequate upstream and downstream passage for fish.
- (a & b) install, maintain, and operate fish screening and by-pass devices as required by the Oregon Department of Fish and Wildlife to prevent fish from entering the proposed diversion. *The required screen is to be in place and functional prior to any further diversion of water.

The reservoir owner shall: (with ODFW approval)

- (a) install, maintain, and operate fish screening device as required by the Oregon Department of Fish and Wildlife to prevent fish from entering the proposed diversion. *The required screen is to be in place, functional and approved by an ODFW representative prior to any further diversion of water.
- (b) in accordance with ORS 498.268 and ORS 509.605, install, maintain, and operate by-pass devices as required by the Oregon Department of Fish and Wildlife that will provide adequate upstream and downstream passage for fish. *The required by-pass device is to be in place, functional and approved by an ODFW representative prior to any further diversion of water.
- (a & b) install, maintain, and operate fish screening and by-pass devices as required by the Oregon Department of Fish and Wildlife to prevent fish from entering the proposed diversion. *The required screens and by-pass devices are to be in place, functional and approved by an ODFW representative prior to any further diversion of water.

The reservoir owner shall by-pass flows during months when Instream Water Rights are not being met.

Other: (Please specify below)

Because the presence of fish at the POD is unknown, ODFW will not require the applicant to provide fish screens or fish passage. However, to prevent further degradation of stream temperature problems on Evans Creek, and to avoid injury to ODFW's instream water right for that stream, the reservoir owner should be required to by-pass flows from April 1 through October 31.
