**BEFORE THE WATER RESOURCES DEPARTMENT  
OF THE STATE OF OREGON**

In the Matter of Water Rights Application        )  
R-87792, Baker County                            )

**FINAL ORDER  
APPROVING THE STORAGE OF  
SURFACE WATER**

**Authority**

Oregon Revised Statutes (ORS) 537.409 establishes the process by which an application to store waters of the public may be submitted.

**Findings of Fact**

1. On MARCH 29, 2012, NORMA APPLE submitted an application for a permit to store water pursuant to ORS 537.409.  
Storage Volume: 8.0 ACRE FEET  
Dam Height: LESS THAN 10 FEET  
Source: SPRINGS AND RUNOFF, TRIBUTARY TO CLEAR CREEK  
Location: BAKER COUNTY IN SECTION 32, TOWNSHIP 7 SOUTH, RANGE 46 EAST, W.M.
2. The required examination fees were paid and minimum application requirements were met.
3. The Department provided public notice of the application in the Department's weekly public notice on April 17, 2012. A 60-day comment period followed.
4. The Department has not received public comment related to the possible issuance of the attached permit.

**APPEAL RIGHTS**

**Appeal to a circuit court:** This is a final order in other than a contested case. Any party affected by a final order in other than a contested case issued by the Water Resources Commission or Water Resources Department may appeal the order to the appropriate circuit court (ORS 536.075). A petition for judicial review must be filed within the 60-day time period specified by ORS 183.484 (2).

**Petition to the Department for Reconsideration of the Final Order:** A person entitled to judicial review of this order may also file a petition for the Department's reconsideration of the order. The petition for reconsideration must be filed with the Department within 60 calendar days after the date of the order. A copy of the petition must also be delivered or mailed to all other persons and agencies requiring notification under statute or rule (OAR 137-004-0080). The petition must set forth the specific grounds for reconsideration, and may be supported by a written argument. The petition may include a request for a stay of the order if the petition complies with the requirements of OAR 137-003-0090 (2). The Department may grant or deny the petition by summary order. If the Department takes no action, the petition is deemed denied as provided by ORS 183.484 (2). A final order remains in effect during reconsideration until stayed or changed. Following reconsideration, the agency must enter a new order, which may be an order affirming the existing order (OAR 137-004-0080). Reconsideration cannot be granted after the filing of a petition for judicial review, unless permitted by the court (OAR 137-004-0080 (6)).

ORS 537.409 does not provide an opportunity to request a contested-case hearing. Appeal rights on this final order approving the application are limited to the above procedures.

5. The Department has determined that the proposed source has not been withdrawn from further appropriation.
6. The proposed reservoir is not prohibited under ORS 390.835.
7. Water is available for the proposed use according to the Department's water-availability model and the watermaster's assessment.
8. The Department finds that existing water rights would not be injured by the proposed use.
9. The Department relies on the Oregon Department of Fish and Wildlife's review and recommendations in determining whether a proposed use would pose a significant detrimental impact to existing fishery resources. The Department has determined that, as conditioned, the proposed use will not pose a significant detrimental impact to existing fishery resources.

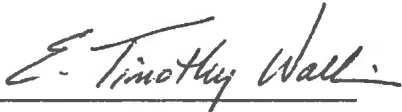

**Conclusions of Law**

1. Water is available for the proposed use.
2. The proposed use will not injure existing water rights.
3. The proposed use will not pose a significant detrimental impact to existing fishery resources.
4. Application R-87792 is consistent with the requirements of ORS 537.409.

**Now Therefore, it is Ordered:**

Application R-87792 is approved, and Permit R-14986 is issued as limited by the conditions contained therein.

Dated at Salem, Oregon on OCTOBER 4 2012.

Measurement, recording and reporting conditions:

A. The Director may require the permittee to install a staff gage that measures the entire range and stage between full reservoir level and dead pool level in the reservoir. The staff gage shall be United States Geological Survey style porcelain enamel iron staff gage style A, C, E or I.

B. If the Director notifies the permittee to install a staff gage, or other suitable measuring device, the permittee shall install such devices within the period stated in the notice. Such installation period shall not be less than 90 days unless special circumstances warrant a shorter installation period. Once installed, the permittee shall maintain the devices in good working order and shall allow the watermaster access to the devices.

C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used, and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water-use information, the periods of water use and the place and nature of use of water under the permit.

D. The Director may provide an opportunity for the permittee to submit alternative measuring and reporting procedures for review and approval.

The storage of water allowed herein is subject to the installation and maintenance of an outlet pipe (with a minimum diameter of 8" for any in-channel reservoir). This requirement may be waived if the Department determines other means have been provided to evacuate water when necessary.

The permittee shall pass all live flow outside the storage season described above.

The Director may require the user to measure inflow and outflow, above and below the reservoir respectively, to ensure that live flow is not impeded outside the storage season. Measurement devices and their implementation must be acceptable to the Director, and the Director may require that data be recorded on a specified periodic basis and reported to the Department annually or more frequently.

The permittee shall not construct, operate or maintain any dam or artificial obstruction to fish passage in the channel of the subject stream without providing a fishway to ensure adequate upstream and downstream passage for fish, unless the permittee has requested and been granted a fish passage waiver by the Oregon Fish and Wildlife Commission. The permittee is hereby directed to contact an Oregon Department of Fish and Wildlife Fish Passage Coordinator, before beginning construction of any in-channel obstruction.

Notwithstanding that ODFW has made a determination that fish screens and/or by-pass devices are not necessary at the time of permit issuance, the permittee may be required in the future to install, maintain, and operate fish-screening and by-pass devices to prevent fish from entering the proposed diversion, and to provide adequate upstream and downstream passage for fish.

This permit allows an annual appropriation (not to exceed the specified volume). This permit does not provide for the appropriation of water for out-of-reservoir uses, the maintenance of the water level or maintaining a suitable freshwater condition. If any water is to be used for out-of-reservoir purposes, a secondary water right is required. If any additional live flow is to be appropriated to maintain either the water level or a suitable freshwater condition, an additional water right is required.

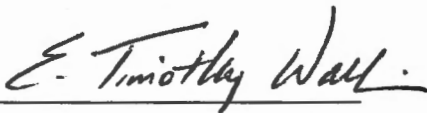

#### STANDARD CONDITIONS

1. Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.
2. This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.
3. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.
4. The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.
5. If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area in accordance with

ODFW's Fish and Wildlife Habitat Mitigation Policy OAR 635-415. For purposes of mitigation, the ODFW Fish and Wildlife Habitat Mitigation Goals and Standards, OAR Chapter 635, Division 415, shall be followed.

6. The use may be restricted if the quality of downstream waters decreases to the point that those waters no longer meet existing state or federal water quality standards due to reduced flows.
7. If the volume of the completed reservoir is 9.2 acre feet or more and a dam is used to impound the water, the height of the dam shall be less than 10.0 feet.
8. Construction shall be completed and up to the permitted annual volume of water shall be stored within five years of the date of permit issuance.
9. Within one year after storage of water, the permittee shall submit a claim of beneficial use to the Oregon Water Resources Department.
10. The claim of beneficial use shall be prepared by a Certified Water Right Examiner in conformance with the requirements of OAR 690-014 if an associated secondary permit exists for the use of stored water under this permit, or if the reservoir capacity is equal to or greater than 9.2 acre-feet.
11. If no secondary permit exists and the reservoir capacity is less than 9.2 acre-feet of water, the claim of beneficial use need not be prepared by a Certified Water Right Examiner. The information submitted to the Oregon Water Resources Department shall include:
  - a. the dimensions of the reservoir;
  - b. the maximum capacity of the reservoir in acre-feet; and
  - c. a map identifying the location of the reservoir prepared in compliance with Water Resource Department standards.

Issued OCTOBER 4 2012.

### 3. LOCATION AND SOURCE

A. Reservoir Name: Norma's pond

B. Source: Provide the name of the water body or other source from which water will be diverted, and the name of the stream or lake it flows into. Indicate if source is run-off, seepage, or an unnamed stream or spring.  
 Source: Springs, runoff Tributary to: Clear Creek

C. County in which diversion occurs: Baker

less than 10' high  
store

D. Reservoir Location

Township (N or S)	Range (E or W)	Section	quarter/quarter	tax lot number
App. No. 7 S	46 E	Permit No. 32	Date	900

E. Dam: Maximum height of dam: 8 ft feet. If excavated, write "zero feet".

F. Quantity: Amount of water to be stored in the reservoir at maximum capacity. List volume in acre-fe 8 A.F. - 110 yds = 330' long, 65 yds = 195' wide, 1.48 AC.

Is this project fully or partially funded by the American Recovery and Reinvestment Act? (Federal stimulus dollars) Yes No

4. WATER USE

Indicate the proposed use(s) of the stored water. NOTE: You may wish to consider filing for "Multipurpose use" for your reservoir. Multipurpose use does not limit the types of future uses for the stored water. Multipurpose covers all uses including: stockwater, fish and wildlife, aesthetics, domestic, irrigation, agriculture, fire protection and pollution abatement. If any use will be out of reservoir use, regardless of the type of storage listed, a secondary application must be filed to appropriate the stored water.

Multipurpose No secondary use

5. PROPERTY OWNERSHIP

Do you own all the land where you propose to divert, transport, and use water?

Yes (please check appropriate box below then skip to section 5)

- There are no encumbrances
- This land is encumbered by easements, right of way, roads of way, roads or other encumbrances (please provide a copy of the recorded deed(s) )

No (Please check the appropriate box below)

- I have a recorded easement or written authorization permitting access.
- I do not currently have written authorization or easement permitting access.
- Written authorization or an easement is not necessary, because the only affected lands I do not own are state-owned submersible lands, and this application is for irrigated and/or domestic use only (ORS 274.040). (Do not check this box if you described your use as "Multipurpose" in #3 above.)

List the names and mailing addresses of all affected landowners:

\_\_\_\_\_

\_\_\_\_\_

6. ENVIRONMENTAL IMPACT

- A. Channel: Is the reservoir: in-stream or off channel?
- B. Wetland: Is the project in a wetland? Yes No Don't know
- C. Existing: Is this an existing reservoir? Yes No

If yes, how long has it been in place? 72 years.

D. **Fish Habitat:** Is there fish habitat upstream of the proposed structure? Yes  No  Don't know  
If yes, how much? \_\_\_\_\_ miles.

E. **Partnerships:** Have you been working with other agencies? Yes  No   
Indicate agency, staff and phone numbers of those involved. Also indicate any agencies that are cost sharing in this project.

### 7. WITHIN A DISTRICT

Check here if the point of diversion or place of use are located within or served by an irrigation or other water district.

Irrigation District Name	<u>N/A</u>		Address
City		State	Zip

### 8. DESCRIPTION

Provide a description of the design and operation of the proposed diversion, including a description of how live flow will be passed outside the authorized storage season. Use this space for narrative. You may also provide narrative and sketches on separate pages.

- The map must meet map requirements to be accepted.
- Included a land use form or receipt stub signed by a local planning official.
- Included a check payable to Oregon Water Resources Department for the appropriate amount.

**FEE STRUCTURE:** The fee is based on the number of acre-feet proposed to be stored. The base fee is \$300. In addition, there is a fee of \$25 per acre-foot or fraction thereof. Example: 0.3 AF= \$325; 1.5 AF= \$350; 20.0 AF= \$800; 30.0 AF= \$1050. Plus a permit recording fee of \$400 (this fee is refunded if no permit is issued).

# WATERMASTER ALTERNATE RESERVOIR APPLICATION REVIEW SHEET

Recommendations for Water Right Applications under the Alternate Reservoir review process (ORS 537.409)

In lieu of the water right application process set forth in ORS 537.140 to 537.211, an owner of a reservoir may submit an alternate reservoir application for a reservoir that has a storage capacity less than 9.2 acre-feet or a dam or impoundment structure less than 10 feet in height. ORS 537.409 describes the criteria used to evaluate alternate reservoir applications.

The review shall be limited to issues pertaining to: a) water availability, b) potential detrimental impact to existing fishery resources; and c) potential injury to existing water rights. (ORS 537.409 (6))

Within 60 days after the department provides public notice...any person may submit detailed, legally obtained information in writing, requesting the department to deny the application for a permit on the basis that the reservoir: (a) Would result in injury to an existing water right; or (b) Would pose a significant detrimental impact to existing fishery resources. (ORS 537.409 (5))

**The review of alternate reservoirs is limited to these criteria only.**

# ODFW Alternate Reservoir Application Review Sheet

This portion to be completed by the applicant.

Applicant Name/Address/Phone/Email: Norma Apple 47363 Slaughterhouse  
Halfway, OR 97834 (541) 742-4966

Reservoir Name: Norma's Pond Source: Springs Volume (AF): \_\_\_\_\_

Twp Rng Sec Q0775 R46E Section 32 Basin Name: \_\_\_\_\_  in-channel  
E 1/2 SW 44  off-channel

Note: It is unlikely that ODFW will be able to complete this form while you wait, nevertheless we recommend making an appointment to submit the form so as to provide any necessary clarifications. See pg. 6 of Instructions for contact information.

This portion to be completed by Oregon Department of Fish and Wildlife (ODFW) District staff.

1) Is the proposed project and AO<sup>2</sup> off channel? .....  YES  NO  
(if yes then proceed to #4; if no then proceed to #2)

2) Is the proposed project or AO located where NMF<sup>3</sup> are or were historically present? .....  YES  NO  
(if yes then proceed to #3; if no then proceed to #4)

MAR 29 2012

3) If NMF are or were historically present:

- a. Is there an ODFW-approved fish-passage plan?.....  YES  NO  
b. Is there an ODFW-approved fish-passage waiver or exemption?.....  YES  NO

If fish passage is required under ORS 509.580 through .910, then either 3(a) or 3(b) must be "Yes" to move forward with the application. If responses to 3(a) and 3(b) are "No", then the proposed reservoir does not meet the requirements of Oregon Fish Passage Law and shall not be constructed as proposed.

4) Would the proposed reservoir pose any other significant detrimental impact to an existing fishery resource?.....  YES  NO  
.....  
*Explain below (for example, list STE species or other existing fishery resources that would be impacted negatively.)*

- Any diversion or appropriation of water for storage during the period \_\_\_\_\_ through \_\_\_\_\_ poses a significant detrimental impact to existing fishery resources. (For example, if diversion of water for storage during a certain time period would cause a significant detrimental impact to an existing fishery resource, then ODFW should recommend conditions or limitations.) If NMF fish are present at the project site or point of water diversion then the applicant should be advised that a fish screen consistent with screening criteria will be required.

This proposed pond or reservoir contemplates impounding water in the Columbia Basin above Bonneville Dam. ODFW has determined that additional diversions of water in this area pose a significant detrimental impact to existing fishery resources during the period April 15 through September 30.

Proposal water storage project would affect all anadromous  
Salmonid populations utilizing the Columbia + Snake Rivers as a migratory  
Corridor

<sup>2</sup> AO = Artificial Obstruction means any dam, diversion, culvert or other human-made device placed in waters of this state that precludes or prevents the migration of native migratory fish. ORS 509.580 (1)

<sup>3</sup> NMF = Native Migratory Fish Species in Oregon as defined by OAR 635-412-0005 (32)

If YES, can conditions be applied to mitigate the significant detrimental impact to an existing fishery resource?

NO (explain)

YES (select from Menu of Conditions on next page)

Diversification of surface waters only during the period:  
October 1 through April 14.
