

**Oregon Water Resources Department  
Water Right Services Division**

Water Rights Application  
Number G-17600

**Final Order**

*Appeal Rights*

Under the provisions of ORS 537.170 and ORS 537.622, the applicant may request a contested case hearing by submitting the information required for a protest under ORS 537.153(6) or ORS 537.621(7) to the Department within 14 days after the date of mailing of this order as shown below. If a contested case hearing is requested, the Department must schedule one. In the contested case hearing, however, only those issues based on the modifications to the Proposed Final Order may be addressed.

ORS 536.075 allows for additional appeal rights for other than contested case. This is a Final Order in other than contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080 you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

This statement of judicial review rights does not create a right to judicial review of this order, if judicial review is otherwise precluded by law. Where no changes have been made to a Proposed Final Order on a water right application and no protests have been filed during the protest period, the Final Order is not subject to judicial review.

*Findings of Fact*

1. On November 21, 2012, Trent Weseman submitted an application to the Department for a water use permit.
2. The Department issued a Proposed Final Order on August 4, 2015.
3. The protest period closed September 18, 2015, and no protest was filed.
4. The Department's continuing evaluation reveals that the Proposed Final Order requires modification to include the following permit condition, that was erroneously omitted from the draft permit:
  - If Well 1 (HARN 50173) flows at land surface, it shall be equipped with a control valve and a watertight mechanical

cap, threaded or welded. The well shall also be equipped with a pressure gauge placed on a dead-end line. A petcock valve shall be placed between the gauge and the well casing.

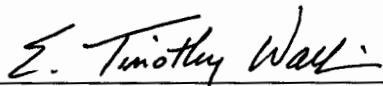

*Conclusions of Law*

1. The proposed use would not impair or be detrimental to the public welfare, safety and health pursuant to ORS 537.621(2).

**Order**

Application G-17600 therefore is approved as described in the Proposed Final Order, and Permit G-17507 is issued as limited by the conditions therein.

**DATED October 22, 2015**

E. Timothy Wallin, Water Rights Program Manager  
for Thomas M. Byler, Director
