Re: Water Right Application - Azelea Rojo, LLC (Brockway)

Dear Mr. ~~Wallin~~<sup>Tim</sup>:

Please find enclosed a permit application to appropriate stored surface water for irrigation, which is submitted on behalf of Azelea Rojo, LLC. The Applicant is requesting to divert stored water at a rate of up to 1.5 cfs, limited to a maximum volume of 313 acre-feet annually, for irrigation of the "Brockway property." Also enclosed is the required fee of \$1,793, which was calculated as follows:

- \$ 450 - Base Fee
- \$ 600 - Rate Fee of \$30/acre-foot for 20 acre-feet
- \$ 293 - Rate Fee of \$1.00/acre-foot for 293 acre-feet
- \$ 450 - Permit Recording Fee

Total = \$1,793

The water to be appropriated is stored in Ben Irving Reservoir, as authorized by water right certificates 80425 and 89035. Lookingglass-Olalla Water Control District (LOWCD) manages the stored water in the reservoir, and the Applicant has requested a contract from LOWCD for use of stored water.

An existing water right (Certificate 11530) is appurtenant to a portion of the proposed place of use. The Application will, however, request a voluntary diminishment of this right to supplemental irrigation to occur simultaneously with the issuance of the requested permit. As a result, the requested permit will not result in two primary irrigation rights associated with the proposed place of use.

If you have any questions about the enclosed materials, please contact me at 541-257-9004.

Sincerely,

Kimberly Grigsby  
Senior Water Resources Consultant

**A. Diversion and Conveyance**

What equipment will you use to pump water from your source?

Pump (give horsepower and type): Not yet determined

Other means (describe): \_\_\_\_\_

Provide a description of the proposed means of diversion, construction, and operation of the diversion works and conveyance of water.

The Applicant intends to construct a trench in the creek bed and place a perforated pipe in the trench. The pipe will be covered with a fabric cover and non-native gravel. The water will be piped to a dry well, which will act as a bulge in the system. A suction line will remove the water from the dry well. Water will be conveyed to the vineyards via pipelines.

**B. Application Method**

What equipment and method of application will be used? (e.g., drip, wheel line, high-pressure sprinkler)

The place of use will be irrigated using drip irrigation.

**C. Conservation**

Please describe why the amount of water requested is needed and measures you propose to: prevent waste; measure the amount of water diverted; prevent damage to public uses of affected surface waters.

The Applicant is requesting this permit to authorize the use of up to 313 acre-feet of stored water for which the Applicant has requested a contract from the Lookingglass-Olalla Water Control District. The Applicant intends to irrigate a vineyard using drip irrigation in order to conserve water. The point of diversion will be equipped with a flowmeter to measure water diverted from Lookingglass Creek. The flowmeter will record the amount of water pumped in an effort to prevent waste. The proposed use of stored water is not expected to cause damage to public uses of Lookingglass Creek.

**SECTION 6: RESOURCE PROTECTION**

In granting permission to use water from a stream or lake, the state encourages, and in some instances requires, careful control of activities that may affect the waterway or streamside area. See instruction guide for a list of possible permit requirements from other agencies. Please indicate any of the practices you plan to undertake to protect water resources.

- N/A  Diversion will be screened to prevent uptake of fish and other aquatic life.  
Describe planned actions: To prevent uptake of fish and other aquatic life, the Applicant is not requesting to place an intake pipe into the creek. Instead, water will be diverted via a perforated pipe in the stream bed that is covered with non-native gravels.
- Excavation or clearing of banks will be kept to a minimum to protect riparian or streamside areas.  
Describe planned actions: During construction, excavation or clearing of banks during construction will be kept to a minimum and efforts will be made to protect riparian and streamside areas.
- Operating equipment in a water body will be managed and timed to prevent damage to aquatic life.  
Describe: During construction, equipment will only be operated in the creek during the in-water work period. Use of water under this permit will not require operating equipment in the creek.
- Water quality will be protected by preventing erosion and run-off of waste or chemical products.  
Describe: The Applicant will protect water quality by preventing erosion to the maximum extent possible.

**SECTION 7: PROJECT SCHEDULE**

Date construction will begin: Within 5 years of permit issuance

Date construction will be completed: Within 5 years of permit issuance

Date beneficial water use will begin: Within 5 years of permit issuance

**SECTION 8: WITHIN A DISTRICT**

Check here if the point of diversion or place of use are located within or served by an irrigation or other water district. The point of diversion and a portion of the place of use are within the district and water will be served by Lookingglass-Olalla Water Control District.

Seller shall cooperate with Buyer to apply for water delivery contracts from the Olalla-Lookingglass Water Control District with not less than an eight-year term for (a) 250 acre-feet in annual deliveries to Ranch 1 and (b) 100 acre-feet of annual deliveries to Ranch 2, and to apply for water rights from the Oregon Department of Water Resources to utilize such water on the Property. I am also requesting a second contract for a maximum of 182 acre-feet of stored water per year to irrigate 182.18 acres that are located outside of the District's boundaries. This area is also shown on the attached map.

We are currently in the process of developing a water use permit application for the use of this stored water, which will be submitted to the Oregon Water Resources Department.

Please contact Kimberly Grigsby at GSI Water Solutions if you have any questions about this request. Her telephone number is 541-257-9004. Sincerely,
