Water Right Services Division**

Application for Extension of Time

In the Matter of the Application for an Extension of Time)
for Permit G-15877, Water Right Application G-15991,) PROPOSED FINAL ORDER
in the name of Weyerhaeuser Company,)
Aurora Forest Nursery)

Permit Information

Application:	G-15991
Permit:	G-15877
Basin:	2 – Middle Willamette / Watermaster District 16
Date of Priority:	April 30, 2003
Source of Water:	Wells 1, 2, 4, 5, 6, 12, 14, and M in Pudding River Basin
Purpose of Use:	Nursery use and frost protection on 218.32 Acres
Maximum Rate:	4.05 cubic feet per second (cfs), further limited for nursery use as follows: 0.412 cfs from Well 1, 0.557 from Well 2, 0.446 cfs from Well 4, 0.501 cfs from Well 5, 0.334 cfs from Well 6, 0.468 cfs from Well 12, 0.223 cfs from Well 14 all for nursery use, and 1.11 cfs from Well M for frost protection

Please read this Proposed Final Order in its entirety.

In Summary, the Department proposes to:

- Grant an extension of time to apply water to full beneficial use from October 1, 2009 to October 1, 2017¹.

This Extension of Time request is being processed in accordance with Oregon Revised Statute 537.630 and 539.010(5), and Oregon Administrative Rule Chapter 690, Division 315.

¹Pursuant to ORS 537.630(4), upon the completion of beneficial use of water allowed under the permit, the permittee shall hire a certified water rights examiner to survey the appropriation. Within one year after the complete application of water to a beneficial use (or by the date allowed for the complete application of water to a beneficial use), the permittee shall submit a map of the survey and a new or revised claim of beneficial use as deemed appropriate by the Department.

ACRONYM QUICK REFERENCE

Department – Oregon Department of Water Resources

PFO – Proposed Final Order

cfs – cubic feet per second

gpm – gallons per minute

AUTHORITY

Generally, see ORS 537.630 and OAR Chapter 690 Division 315.

ORS 537.630(1) provides in pertinent part that the Oregon Water Resources Department may, for good cause shown, order an extension of time within which: irrigation or other works shall be completed; the well or other means of developing and securing ground water shall be completed; or the right perfected. In determining the extension, the Department shall give due weight to the considerations described under ORS 539.010(5) and to whether other governmental requirements relating to the project have significantly delayed completion of construction or perfection of the right.

ORS 539.010(5) provides in pertinent part that the Water Resources Director, for good cause shown, may extend the time within which the full amount of the water appropriated shall be applied to a beneficial use. This statute instructs the Director to consider: the cost of the appropriation and application of the water to a beneficial purpose; the good faith of the appropriator; the market for water or power to be supplied; the present demands therefore; and the income or use that may be required to provide fair and reasonable returns upon the investment.

OAR 690-315-0040 provides in pertinent part that the Water Resources Department shall make findings to determine if an extension of time may be approved to complete construction and/or apply water to full beneficial use.

FINDINGS OF FACT

Background

1. Permit G-15877 was issued by the Department on March 24, 2005. The permit authorizes the use of up to 4.05 cfs of water, further limited for nursery use as follows: 0.412 cfs from Well 1, 0.557 from Well 2, 0.446 cfs from Well 4, 0.501 cfs from Well 5, 0.334 cfs from Well 6, 0.468 cfs from Well 12, 0.223 cfs from Well 14, and 1.11 cfs from Well M for frost protection in Pudding River Basin for nursery use and frost protection on 218.32 acres. The permit specified complete application of water was to be made on or before October 1, 2009.
2. On December 7, 2015, the Department issued a letter by certified mail, requesting either a Claim of Beneficial Use or an extension of time be submitted, or cancellation proceedings for Permit G-15877 would begin.

3. The permit holder, Mark E. Triebwasser, Nursery Manager for Weyerhaeuser Company – Aurora Forest Nursery, submitted an “Application for Extension of Time” to the Department on December 30, 2015, requesting the time to apply water to full beneficial use under the terms and conditions of Permit G-15877 be extended from October 1, 2009 to October 1, 2017. This is the first permit extension requested for Permit G-15877.
4. Notification of the Application for Extension of Time for Permit G-15877 was published in the Department’s Public Notice dated January 12, 2016. No public comments were received regarding the extension application.

Review Criteria [OAR 690-315-0040]

The time limits to complete construction and/or apply water to full beneficial use may be extended if the Department finds that the permit holder has met the requirements set forth under OAR 690-315-0040. This determination shall consider the applicable requirements of ORS 537.230², 537.248³, 537.630⁴ and/or 539.010(5)⁵.

Complete Extension of Time Application [OAR 690-315-0040(1)(a)]

5. On December 30, 2015, the Department received a completed Application for Extension of Time and the fee specified in ORS 536.050 from the permit holder.

Start of Construction [OAR 690-315-0040(1)(b) and 690-315-0040(5)]

6. Construction of the well began prior to the complete application of water date specified in the permit, being October 1, 2009. The application states, construction of the wells were completed in the 1970s.

According to the well log received by the Department on May 6, 1974, Well 1 (CLAC 13121) construction began January 28, 1974. The Department has determined that the prosecution of the construction of the well began prior to October 1, 2009.

Duration of Extension [OAR 690-315-0040(1)(c)]

Under OAR 690-315-0040(1)(c), in order to approve an extension of time for water use permits the Department must find that the time requested is reasonable and the applicant can complete the project within the time requested.

7. As of December 30, 2015, the permit holder states the remaining work to be completed consists of meeting all permit conditions, including installing a meter; and applying water to full beneficial use.

²ORS 537.230 applies to surface water permits only.

³ORS 537.248 applies to reservoir permits only.

⁴ORS 537.630 applies to ground water permits only.

⁵ORS 539.010(5) applies to surface water and ground water permits.

Given the amount of development left to occur, the Department has determined that the permit holder's request to have until October 1, 2017, to accomplish the application of water to beneficial use under the terms and conditions of Permit G-15877 is both reasonable and necessary.

Good Cause [OAR 690-315-0040(1)(d)]

The Department's determination of good cause shall consider the requirements set forth under OAR 690-315-0040(2).

Reasonable Diligence of the Appropriator [OAR 690-315-0040(2)(a)]

The Department's determination of reasonable diligence shall consider the requirements set forth under OAR 690-315-0040(3)(a-d). In accordance with OAR 690-315-0040(3), the Department shall consider, but is not limited to, the following factors when determining whether the applicant has demonstrated reasonable diligence in previous performance under the permit:

Amount of Construction [OAR 690-315-0040(3)(a)]

8. The application states, work was accomplished within the time allowed in the permit or previous extension as follows:

- a. Construction of the wells was completed prior to October 1, 2009. Construction of Well 1 (CLAC 13121) began January 28, 1974 and was completed April 30, 1974. Construction of Well 2 (CLAC 12980) began August 29, 1974 and was completed September 24, 1974. Construction of Well 4 (CLAC 12981) began December 30, 1974 and was completed January 30, 1975. Construction of Well 5 (CLAC 12984) began January 2, 1975 and was completed February 7, 1975. Construction of Well 6 (CLAC 13334) began February 3, 1975 and was completed March 27, 1975. Construction of Well 12 (CLAC 12969) began August 12, 1975 and was completed September 2, 1975. Construction of Well 14 (CLAC 13333) began August 12, 1976 and was completed September 2, 1976. Construction of Well M (CLAC 12986) began April 13, 1977 and was completed August 12, 1977. The permit holder connected pipelines and valving.
- b. No work was completed during the original development time frame under Permit G-15877, as all construction was completed prior to permit issuance.

The Department has determined that work has been accomplished prior to permit issuance, which provides evidence of good cause and reasonable diligence towards the complete application of water to a beneficial use.

Beneficial Use of Water [OAR 690-315-0040(3)(b)]

9. The application states a maximum rate of 3.63 cfs of water has been appropriated, being 0.41 cfs from Well 1 (CLAC 13121), 0.55 cfs from Well 2 (CLAC 12980), 0.44 cfs from Well 4 (CLAC 12981), 0.5 cfs from Well 5 (CLAC 12984), 0.33 cfs from Well 6 (CLAC

13334), 0.47 cfs from Well 12 (CLAC 12969), 0.23 cfs from Well 14 (CLAC 13333), and 1.11 cfs from Well M (CLAC 12986) for irrigation of 218.32 acres.

10. Beneficial use of water has not yet been demonstrated under this permit because not all permit conditions were satisfied by October 1, 2009.

The Department has determined that this extension will allow the installation of a meter after October 1, 2009, to satisfy compliance of the condition of installation of a meter or other suitable measuring device, in an effort to make proof of beneficial use of the water as required by Permit G-15877.

Compliance with Conditions [OAR 690-315-0040(3)(c)]

11. The Department has considered the permit holder's compliance with conditions, and has identified the following concern: (1) the record does not show that a meter or other suitable measuring device has been installed, and (2) the required seven consecutive March static water level measurements have not been received by the Department.

The Department records show the initial March static water level measurement for Well 1 (CLAC 13121) was submitted March 11, 1985, and measurements for all other wells were submitted March 21, 2007. The Department records also show annual water use reports for Well 14 (CLAC 13333) were submitted in 2008, and annual water use reports for all other wells were submitted in 2007. The Department has determined the permit holder did not comply with conditions of the permit, by not installing a meter or other suitable measuring device, as required by Permit G-15877.

Beneficial use of water under this permit, therefore, has not yet been demonstrated. In order to legally perfect the use of water under this permit, the permit holder must demonstrate that all conditions of the permit have been satisfied.

Financial Investments to Appropriate and Apply Water to a Beneficial Purpose [OAR 690-315-0040(2)(b),(3)(d),(4)(d)]

12. The application states the permit holder has invested about \$22,500, which is the total cost for complete development of this project.

Good Faith of the Appropriator [OAR 690-315-0040(2)(c)]

13. The Department has found good faith of the appropriator under Permit G-15877.

The Market and Present Demands for Water [OAR 690-315-0040(2)(d-e)]

The Department's determinations of market and present demand for water or power to be supplied shall consider the requirements set forth under OAR 690-315-0040(4)(a-f). In accordance with OAR 690-315-0040(4), the Department shall consider, but is not limited to, the following factors when determining the market and the present demand for water or power to be supplied:

The amount of water available to satisfy other affected water rights and scenic waterway flows; special water use designations established since permit issuance, including but not limited to state scenic waterways, federal wild and scenic rivers, serious water management problem areas or water quality limited sources established under 33 U.S.C. 1313(d); or the habitat needs of sensitive, threatened or endangered species, in consultation with the Oregon Department of Fish and Wildlife [OAR 690-315-0040(4)(a-c)].

14. The amount of water available to satisfy other affected water rights and scenic waterway flows was determined at the time of issuance of Permit G-15877; furthermore, water availability for other affected water rights and scenic waterway flows after the permit was issued is determined when an application for a new water right is submitted. The points of appropriation for Permit G-15877, located within the Pudding River Basin, are not located within a limited or critical ground water area. Pudding River is not located within or above any state or federal scenic waterway, however, it is located within an area ranked "high" for stream flow restoration needs as determined by the Department in consultation with the Oregon Department of Fish and Wildlife, and is located within a Sensitive, Threatened or Endangered Fish Species Area as identified by the Department in consultation with Oregon Department of Fish and Wildlife. The points of appropriation are not in an area listed by the Department of Environmental Quality as a water quality limited stream.

Other economic interests dependent on completion of the project [OAR 690-315-0040(4)(e)].

15. None have been identified.

Other factors relevant to the determination of the market and present demand for water and power [OAR 690-315-0040(4)(f)].

16. None have been identified.

Fair Return Upon Investment [OAR 690-315-0040(2)(f)]

17. Use and income from the permitted water development will likely result in reasonable returns upon the investment made to date.

Other Governmental Requirements [OAR 690-315-0040(2)(g)]

18. Delay in the development of this project was not caused by any other governmental requirements.

Unforeseen Events [OAR 690-315-0040(2)(h)]

19. None have been identified.

CONCLUSIONS OF LAW

1. The applicant is entitled to apply for an extension of time to complete construction and/or completely apply water to the full beneficial use pursuant to ORS 537.630(1).

2. The applicant has submitted a complete extension application form and the fee specified in ORS 536.050, as required by OAR 690-315-0040(1)(a).
3. Based on Finding of Facts 6 through 13, full application of water to beneficial use can be accomplished by October 1, 2017, as required by OAR 690-315-0040(1)(c).
4. The Department has considered the reasonable diligence and good faith of the appropriator, the cost to appropriate and apply water to a beneficial purpose, the market and present demands for water to be supplied, the financial investment made and fair and reasonable return upon the investment, the requirements of other governmental agencies, and unforeseen events over which the permit holder had no control, whether denial of the extension will result in undue hardship to the applicant and whether there are no other reasonable alternatives for meeting water use needs, any other factors relevant to a determination of good cause, and has determined that the applicant has shown that good cause exists for an extension of time to apply water to full beneficial use pursuant to OAR 690-315-0040(1)(d).

PROPOSED ORDER

Based upon the foregoing Findings of Fact and Conclusions of Law, the Department proposes to issue an order to:

Extend the time to apply water to beneficial use under Permit G-15877 from October 1, 2009 to October 1, 2017.

DATED: February 16, 2016

Dwight W. French, Administrator,
Water Right Services Division

Proposed Final Order Hearing Rights

1. Under the provisions of OAR 690-315-0100(1) and 690-315-0060, the applicant or any other person adversely affected or aggrieved by the proposed final order may submit a written protest to the proposed final order. The written protest must be received by the Water Resources Department no later than **April 1, 2016**, being 45 days from the date of publication of the proposed final order in the Department's weekly notice.

2. A written protest shall include:
 - a. The name, address and telephone number of the petitioner;
 - b. A description of the petitioner's interest in the proposed final order and if the protestant claims to represent the public interest, a precise statement of the public interest represented;
 - c. A detailed description of how the action proposed in the proposed final order would adversely affect or aggrieve the petitioner's interest;
 - d. A detailed description of how the proposed final order is in error or deficient and how to correct the alleged error or deficiency;
 - e. Any citation of legal authority supporting the petitioner, if known;
 - f. Proof of service of the protest upon the water right permit holder, if petitioner is other than the water right permit holder; and
 - g. The applicant or non-applicant protest fee required under ORS 536.050.
3. Within 60 days after the close of the period for requesting a contested case hearing, the Director shall:
 - a. Issue a final order on the extension request; or
 - b. Schedule a contested case hearing if a protest has been submitted, and:
 - 1) Upon review of the issues, the Director finds there are significant disputes related to the proposed agency action; or
 - 2) The applicant submits a written request for a contested case hearing within 30 days after the close of the period for submitting protests.
