### MEMO

DATE: March 17, 1998

TO: Files P-82570, P-83260

FROM: Cory Engel 

RE: Correct filing for Lower Salt Creek PC

On 1/28/97, BLM filed a Notice of Exempt Reservoir *and* an expedited Application for a Permit to Store Water for referenced pump chance. Evidently by mistake, the application was included in file P-82570 along with 98 other pond Notices, and the Notice was filed by itself as P-83260.

Therefore, whereas BLM intended to file a Notice and an Application, what they have on file is in essence two exempt notices for the same reservoir.

I have discussed the problem with Lori Lindell of BLM, Medford, and told her that if they wish to continue with the application, we can remove it from P-83260, file it separately with a new application number assigned, and process it properly as an expedited reservoir application, but that we would need a check for \$10.00 first. (They originally submitted money to cover the application, but it was later considered to be excess fees and was refunded.)

BLM is not sure whether they will choose to continue with this application; they intend to check on it and inform the Department of their decision.

If they choose to continue with it, the application materials should be refiled with a new application number after their \$10.00 is received, and WRIS (and any other relevant databases and documents) should be updated to exclude the pond from P-82570.

Regardless of BLM's decision, P-83260 should remain as it is.

**Oregon's major river basins:**

- |               |                 |              |
|---------------|-----------------|--------------|
| 1-North Coast | 8-Grande Ronde  | 15-Rogue     |
| 2-Willamette  | 9-Powder        | 16. Umpqua   |
| 3-Sandy       | 10-Malheur      | 17-S. Coast  |
| 4-Hood        | 11-Owyhee       | 18-Mid Coast |
| 5-Deschutes   | 12-Malheur L.   | 19-Columbia  |
| 6-John Day    | 13-Goose/Summer | 20-Snake     |
| 7-Umatilla    | 14-Klamath      |              |

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. To be eligible to apply under the expedited review process (HB 2376, 1995), your pond must store less than 400,752 cubic feet (43,560 X 92).

| 7-Umatilla    | 14-Klamath      |              |

On this map, the amount of water that would cover Oregon is shown. Using a ruler, you can measure the length and width of the state. Multiply the length by the width to get the area in square miles. Then multiply by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 3,635,363 cubic feet. You can submit a Notice of Exempt Reservoir for a reservoir less than 100,000 cubic feet.

| 7-Umatilla    | 14-Klamath      |              |

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet. (3,561 x 9)

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet.

## Oregon's major river basins:

- |               |                 |              |
|---------------|-----------------|--------------|
| 1-North Coast | 8-Grande Ronde  | 15-Rogue     |
| 2-Willamette  | 9-Powder        | 16.Umpqua    |
| 3-Sandy       | 10-Malheur      | 17-S. Coast  |
| 4-Hood        | 11-Owyhee       | 18-Mid Coast |
| 5-Deschutes   | 12-Malheur L.   | 19-Columbia  |
| 6-John Day    | 13-Goose/Summer | 20-Snake     |
| 7-Umatilla    | 14-Klamath      |              |

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet—43,560 X 92.

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet—43,560 X 9.2.

## Oregon's major river basins:

- |               |                 |              |
|---------------|-----------------|--------------|
| 1-North Coast | 8-Grande Ronde  | 15-Rogue     |
| 2-Willamette  | 9-Powder        | 16.Umpqua    |
| 3-Sandy       | 10-Malheur      | 17-S. Coast  |
| 4-Hood        | 11-Owyhee       | 18-Mid Coast |
| 5-Deschutes   | 12-Malheur L.   | 19-Columbia  |
| 6-John Day    | 13-Goose/Summer | 20-Snake     |
| 7-Umatilla    | 14-Klamath      |              |

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet.

| 7-Umatilla    | 14-Klamath      |              |

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet (43,560 x 920).

## Oregon's major river basins:

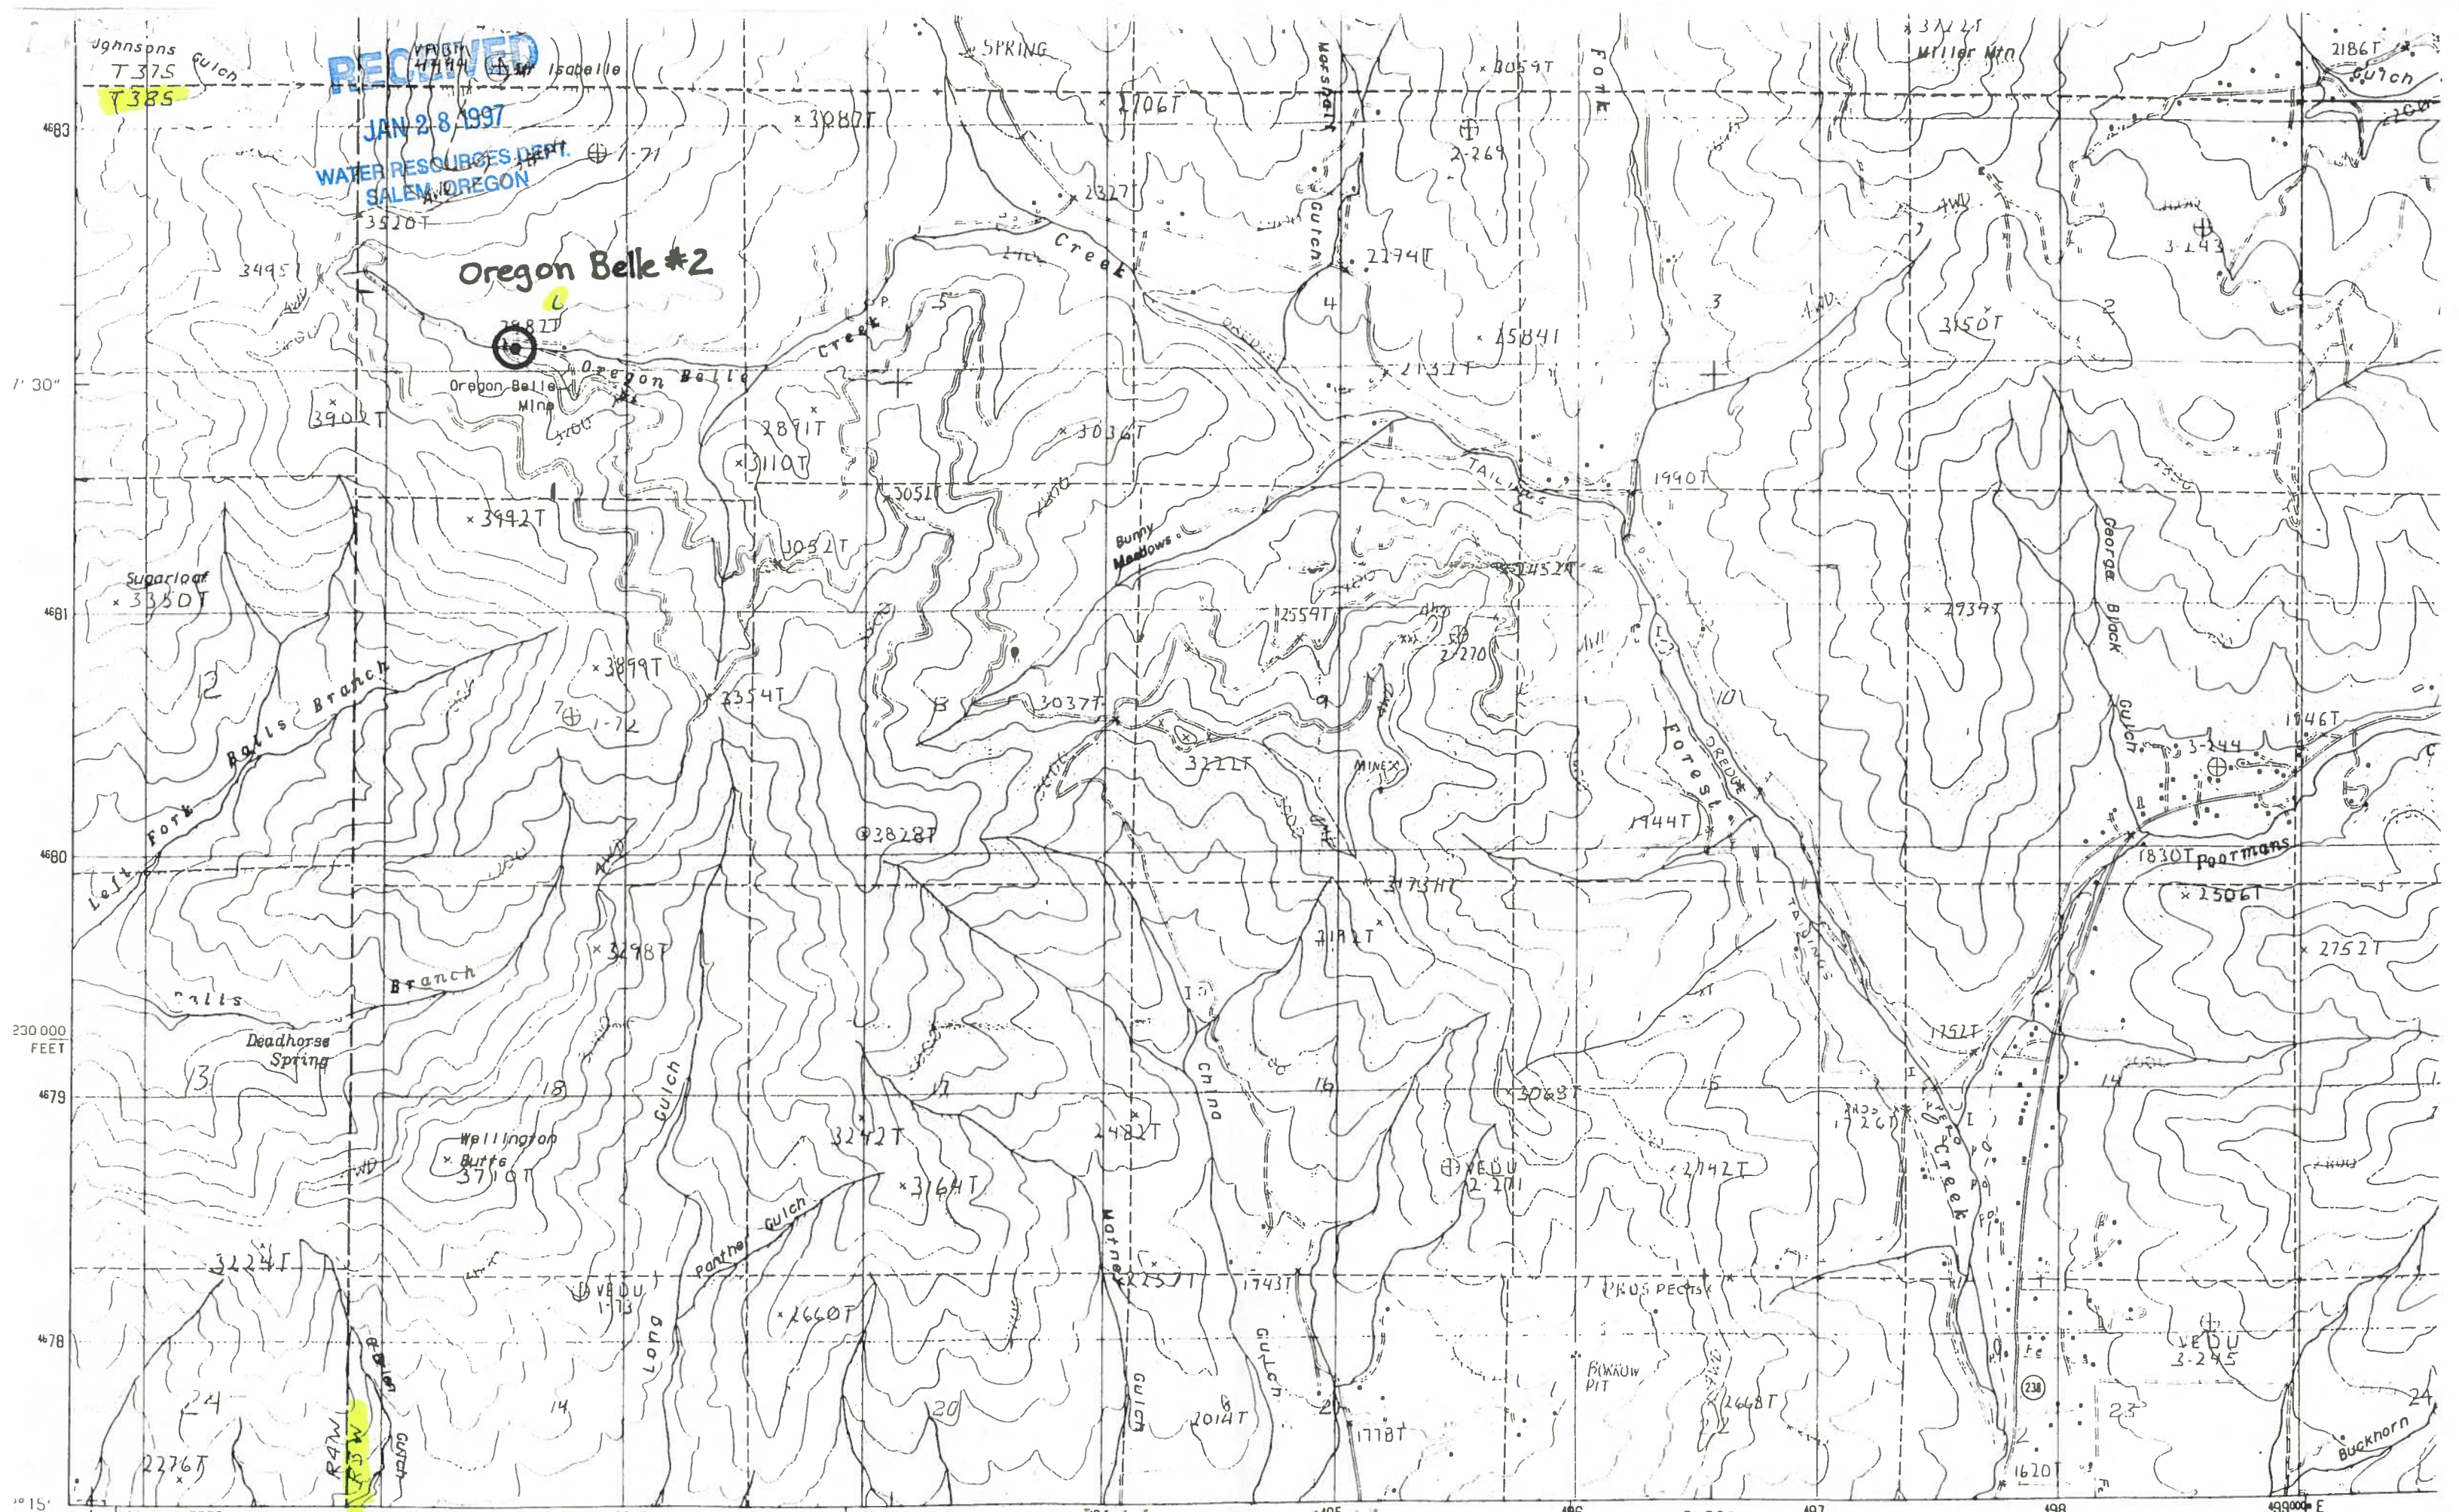

- |               |                 |              |
|---------------|-----------------|--------------|
| 1-North Coast | 8-Grande Ronde  | 15-Rogue     |
| 2-Willamette  | 9-Powder        | 16. Umpqua   |
| 3-Sandy       | 10-Malheur      | 17-S. Coast  |
| 4-Hood        | 11-Owyhee       | 18-Mid Coast |
| 5-Deschutes   | 12-Malheur L.   | 19-Columbia  |
| 6-John Day    | 13-Goose/Summer | 20-Snake     |
| 7-Umatilla    | 14-Klamath      |              |

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet  $43,560 \times 9.2$ .

# Oregon Water Resources Department Notice of Exempt Reservoir

RECEIVED

For reservoirs built before January 1, 1995, that:

JAN 28 1997

- Store less than 9.2 acre-feet of water, or
- Have a dam less than 10 feet high.

WATER RESOURCES DEPT.  
SALEM, OREGON

The deadline for submitting a Notice of Exempt Reservoir is January 31, 1997.

Landowner: U.S. Department of the Interior, Bureau of Land Management

Authorized Agent: Jones, David MI A.

Address: Medford District  
3040 Biddle Road  
Medford Oregon 97504

Phone: City State Zip  
(541) 770-2200

FAX: Home Work  
(541) 770-2400 E-Mail Address: \_\_\_\_\_

A. County of use: Jackson . B. River basin (see reverse): Rogue

C. Legal description of reservoir location:

Township	Range	Section	Quarter/Quarter	Tax Lot #
39S	3E	8	SWNW	-----

D. Name, if any, of reservoir: Head of Sampson . E. Reservoir in existence since: 8 / 3 / 83

MM DD YY

F. Source of water: Unnamed Stream which flows into Sampson Creek  
Name of river or creek Name of river or creek

G. Maximum height of dam: 5.5 feet.

H. Quantity of water stored in reservoir at maximum capacity (see reverse): 0.04 acre-feet.

I. Water stored in reservoir is used for (see reverse): Forest/Range Mgt. (road operations and prescribed fire)

J. Rate and area of use—Refer to chart on the back of this form. For each type of water use listed in Item I., show the quantity of water used and, if applicable, the number of acres on which water is used. Road operations 0.0031 cfs and prescribed fire 0.019 cfs.  
NTE 0.55 acre-feet.

**BEFORE YOU SIGN AND SUBMIT THIS APPLICATION . . . HAVE YOU:**

Answered each question on this form as completely as possible?

Attached a legible map showing township, section, range, quarter-quarter & tax lot number?

By my signature below, I swear that all statements made and information provided in this application are true to the best of my knowledge.

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet.

For Department Use	<u>P-82570-60</u>	File #	Date received
--------------------	-------------------	--------	---------------

## Oregon's major river basins:

- |               |                 |              |
|---------------|-----------------|--------------|
| 1-North Coast | 8-Grande Ronde  | 15-Rogue     |
| 2-Willamette  | 9-Powder        | 16. Umpqua   |
| 3-Sandy       | 10-Malheur      | 17-S. Coast  |
| 4-Hood        | 11-Owyhee       | 18-Mid Coast |
| 5-Deschutes   | 12-Malheur L.   | 19-Columbia  |
| 6-John Day    | 13-Goose/Summer | 20-Snake     |
| 7-Umatilla    | 14-Klamath      |              |

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet (9,500 cfs).

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet—43,560 X 92.

© 1997 Oregon Department of Water Resources  
 Water is a precious resource. It is essential for life and health. It is also essential for the economy. Average annual rainfall in Oregon is 15.5 inches. One acre-foot equals 325,851 gallons. You can save water by turning off the tap when brushing your teeth, taking shorter showers, and using a low-flow toilet.

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet (43,560 X 92).

## Oregon's major river basins:

- |               |                 |              |
|---------------|-----------------|--------------|
| 1-North Coast | 8-Grande Ronde  | 15-Rogue     |
| 2-Willamette  | 9-Powder        | 16.Umpqua    |
| 3-Sandy       | 10-Malheur      | 17-S. Coast  |
| 4-Hood        | 11-Owyhee       | 18-Mid Coast |
| 5-Deschutes   | 12-Malheur L.   | 19-Columbia  |
| 6-John Day    | 13-Goose/Summer | 20-Snake     |
| 7-Umatilla    | 14-Klamath      |              |

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet (43,560 x 9,200).

## Oregon's major river basins:

- |               |                 |              |
|---------------|-----------------|--------------|
| 1-North Coast | 8-Grande Ronde  | 15-Rogue     |
| 2-Willamette  | 9-Powder        | 16-Umpqua    |
| 3-Sandy       | 10-Malheur      | 17-S. Coast  |
| 4-Hood        | 11-Owyhee       | 18-Mid Coast |
| 5-Deschutes   | 12-Malheur L.   | 19-Columbia  |
| 6-John Day    | 13-Goose/Summer | 20-Snake     |
| 7-Umatilla    | 14-Klamath      |              |

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet—43,560 X 9.2.

On this map, the number of acres of water that would cover the basin if it were a single body of water. The number of acres is based on the average depth of the basin. This will give you a rough estimate of cubic feet. One acre foot equals 363,000 cubic feet. You can estimate the number of acre feet of water in your area by multiplying the number of acres by the average depth of the basin.

## Oregon's major river basins:

- |               |                 |              |
|---------------|-----------------|--------------|
| 1-North Coast | 8-Grande Ronde  | 15-Rogue     |
| 2-Willamette  | 9-Powder        | 16. Umpqua   |
| 3-Sandy       | 10-Malheur      | 17-S. Coast  |
| 4-Hood        | 11-Owyhee       | 18-Mid Coast |
| 5-Deschutes   | 12-Malheur L.   | 19-Columbia  |
| 6-John Day    | 13-Goose/Summer | 20-Snake     |
| 7-Umatilla    | 14-Klamath      |              |

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet.  $43,560 \times 92$

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet—43,560 x 9,200.

### Rate and Area of Use

cfs—cubic feet per second

gpm—gallons per minute
