

# ODFW DIVISION 33 APPLICATION REVIEW SHEET

Recommendations for Water Right Applications that may affect the  
Habitat of Sensitive, Threatened or Endangered Fish Species, OAR 690-33-310 through 340.

Application #: G 18192 Applicant's Name: Peter Mazzini

1) Will the proposed use occur in an area that may affect the essential habitat of sensitive, threatened, or endangered fish species?  
[690-33-330(1)]

NO  YES Species: Summer steelhead, coho salmon, Pacific lamprey Status:  Sensitive  Threatened   
Endangered

If YES, continue to question (2). If NO, you may comment by completing the public interest review sheet on the back of this page.

2) Stage or value at risk (check all that apply):  Spawning,  Incubation  Rearing  Passage  Habitat Value

3) Will the proposed use result in a LOSS in the essential habitat of THREATENED OR ENDANGERED SPECIES or a NET LOSS in the essential habitat of a SENSITIVE SPECIES?  NO  YES

A) Standard of NET LOSS applies to sensitive species statewide. [690-33-330(2)(b)]

B) Standard of LOSS applies to T or E species outside the Columbia Basin. [690-33-330(2)(a)]

4) Can conditions be applied to mitigate the impact to the essential habitat of a S, T or E species?

NO; skip to question 6.  YES

Which conditions are recommended? (select from Menu of Conditions) Flow mitigation in the form of purchased irrigation water from Lost Creek reservoir through a Bureau of Reclamation (BOR) contract. The volume of water purchased must be equal to or greater than the amount being removed through the existing well. Additionally, the purchased water must be passed by the property (not diverted) and the contract must be kept up to date and for the period of April 1 through October 31 each year. If the contact with BOR is not kept up to date, water use under this groundwater permit must terminate.

5) If conditions cannot be identified to offset impacts to the essential habitat of S, T or E species, would the proposed use harm the species?  NO  YES [690-33-330(4)]

If YES, please explain: WRD has determined that the proposed ground water use will have the potential for substantial interference with the Rogue River. WRD has also determined that surface water is not available at any time of year. Therefore, the proposed use may result in decreased habitat quantity and quality for State sensitive and federally threatened native fish species in the Rogue River.

6) If WRD determines that it is in the public's interest to approve a permit even if the impact cannot be mitigated what conditions do you recommend? (select from Menu of Conditions) See #4

7) Your recommendation under OAR 690-033-0330 (2):  Approval with conditions  
 Approval without conditions  
 Denial
