FIELD PROCESSOR WORKING ON THIS TRANSFER

DATE: 12-14-06

FROM:

WATERMASTER, DISTRICT # _____

WATER SECTION
[REDACTED]

(SIGNATURE) Mike Zwart date signed 4/18/07
signed by injury reviewer

SUBJECT: **WATER RIGHT TRANSFER #** 10272

A change in: **POU** **POD** A POA **USE** of water.

In the name(s) of Joseph C. Williams

In my opinion (assuming the right is valid), the proposed change

MAY BE MADE WITHOUT INJURY WOULD RESULT IN INJURY* to an existing water right.

*The approval of this transfer application would result in injury to other water rights because

The existing right may not be valid because _____

Headgate notices HAVE HAVE NOT Been issued for diversion from the source(s) which serve(s) this right.

If for change in point of diversion, is there any intervening point(s) for diversion between the authorized and proposed points of diversion? (Yes or No) _____

In my opinion, the order approving the subject transfer application should include the following in regard to the appropriator installing suitable measuring devices in the diversion works:

_____ (1) PRIOR to the diverting of water at the new point of diversion . . .

_____ (2) WHEN IN the judgement of the watermaster it becomes necessary . . .

The enclosed copy of the transfer application and map(s) is for your records.

Subject: Application Review: T-10272, Joseph C. Williams

This application proposes one additional POA to replace one of the two authorized wells. This proposed well will develop the same water-bearing zones in as the original wells (Well #2: HARN 549 and Well #3, HARN 547, which was replaced by HARN 50935). Only HARN 549 was in the copy of the file I had to review. The other log IDs were located in File U-62.

I find that the proposed change may be made without injury provided the following: the right is valid and the Watermaster can approve the proposal.
