## Oregon's major river basins:

1-North Coast	8-Grande Ronde	15-Rogue
2–Willamette	9-Powder	16. Umpqua
3–Sandy	10–Malheur	17–S. Coast
4-Hood	11–Owyhee	18-Mid Coast
5-Deschutes	12-Malheur L.	19–Columbia
6–John Day	13-Goose/Summer	20–Snake
7–Umatilla	14–Klamath	

One acre-foot is the volume of water that would cover one acre with one foot of water. To find out how much water your pond stores, multiply the surface area by the average depth. This will give you a rough estimate of cul

average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet. You can submit a Notice of Exempt Reservoir if your pond stores less than 400,752 cubic feet-43,560 X 9.2.
