

**Oregon Water Resources Department
Water Right Services Division**

Application for Extension of Time

In the Matter of the Application for an Extension of Time)
for Permit S-54317, Water Right Application S-86337) PROPOSED FINAL
in the name of John and Diane Williams) ORDER

Permit Information

Application:	S-86337
Permit:	S-54317
Basin:	Umpqua / Watermaster District 15
Date of Priority:	June 9, 2005
Source of Water:	North Umpqua River, a tributary of Umpqua River
Purpose or Use:	Domestic expanded use for one household
Maximum Rate:	0.01 cubic foot per second (cfs)

Please read this Proposed Final Order in its entirety.

In summary, the Department proposes to:

- Grant an extension of time to apply water to full beneficial use from October 1, 2010 to October 1, 2021.¹

This Extension of Time request is being processed in accordance with Oregon Revised Statute 537.230 and 539.010(5), and Oregon Administrative Rule Chapter 690, Division 315

¹ Pursuant to ORS 537.230(4), upon the completion of beneficial use of water allowed under the permit, the permit holder shall hire a certified water rights examiner to survey the appropriation. Within one year after the complete application of water to a beneficial use (or by the date allowed for the complete application of water to a beneficial use), the permit holder shall submit a map of the survey and the claim of beneficial use.

ACRONYM QUICK REFERENCE

Department – Oregon Water Resources Department
PFO – Proposed Final Order
cfs – cubic foot per second
RM – River Mile

AUTHORITY

Generally, see **ORS 537.230** and **OAR Chapter 690 Division 315**.

ORS 537.230(3) provides in pertinent part that the Oregon Water Resources Department (Department) may, for good cause shown, order an extension of time within which irrigation or other works shall be completed or the right perfected. In determining the extension, the Department shall give due weight to the considerations described under **ORS 539.010(5)** and to whether other governmental requirements relating to the project have significantly delayed completion of construction or perfection of the right.

ORS 539.010(5) provides in pertinent part that the Water Resources Director, for good cause shown, may extend the time within which the full amount of the water appropriated shall be applied to a beneficial use. This statute instructs the Director to consider: the cost of the appropriation and application of the water to a beneficial purpose; the good faith of the appropriator; the market for water or power to be supplied; the present demands therefore; and the income or use that may be required to provide fair and reasonable returns upon the investment.

OAR 690-315-0040 provides in pertinent part that the Water Resources Department shall make findings to determine if an extension of time may be approved to complete construction and/or apply water to full beneficial use.

FINDINGS OF FACT

Background

1. On July 21, 2006, Permit S-54317 was issued by the Department. The permit authorizes the use of up to 0.01 cfs of water from the North Umpqua River, a tributary of Umpqua River, for domestic expanded use for one household. The permit specified complete application of water was to be made on or before October 1, 2010.
2. On August 2, 2016, the Department issued a letter by certified mail, requesting either a Claim of Beneficial Use or an extension of time be submitted, or cancellation proceedings for Permit S-54317 would begin.
3. On September 26, 2016, John and Diane Williams, submitted an “Application for Extension of Time” to the Department, requesting the time to apply water to full beneficial use under the terms of Permit S-54317 be extended from October 1, 2010 to October 1, 2021. This is the first permit extension requested for Permit S-54317.

4. Notification of the Application for Extension of Time for Permit S-54317 was published in the Department's Public Notice dated October 4, 2016. No public comments were received regarding the extension application.

Review Criteria [OAR 690-315-0040]

The time limits to complete construction and/or apply water to full beneficial use may be extended if the Department finds that the permit holder has met the requirements set forth under OAR 690-315-0040. This determination shall consider the applicable requirements of ORS 537.230², 537.248³ and/or 539.010(5)⁴.

Complete Extension of Time Application [OAR 690-315-0040(1)(a)]

5. On September 26, 2016, the Department received a completed Application for Extension of Time and the fee specified in ORS 536.050 from the permit holder.

Start of Construction [OAR 690-315-0040(1)(b) and 690-315-0040(5)]

6. Construction of the water system began prior to October 1, 2010, as specified in the permit as being the date to apply water to full beneficial use. The permit holder states, a pump with fish screen was installed April 15, 2009.

The Department has determined the permit holder has satisfied the condition requiring beginning of construction of the water works.

Duration of Extension [OAR 690-315-0040(1)(c)]

Under OAR 690-315-0040(1)(c), in order to approve an extension of time for water use permits the Department must find that the time requested is reasonable and the applicant can complete the project within the time requested.

7. As of September 26, 2016, the permit holder states the remaining work to be completed consists of installing a submersible pump, plumbing, electrical, and a drip system, and applying water to full beneficial use.

Given the amount of development left to occur, the Department has determined that the permit holder's request to have until October 1, 2021, to accomplish the application of water to beneficial use under the terms and conditions of Permit S-54317 is both reasonable and necessary.

Good Cause [OAR 690-315-0040(1)(d)]

The Department's determination of good cause shall consider the requirements set forth under OAR 690-315-0040(2).

Reasonable Diligence of the Appropriator [OAR 690-315-0040(2)(a)]

The Department's determination of reasonable diligence shall consider the requirements set forth under OAR 690-315-0040(3)(a-d). In accordance with OAR 690-315-0040(3), the

²ORS 537.230 applies to surface water permits only.

³ORS 537.248 applies to reservoir permits only.

⁴ORS 539.010(5) applies to surface water and ground water permits.

Department shall consider, but is not limited to, the following factors when determining whether the applicant has demonstrated reasonable diligence in previous performance under the permit:

Amount of Construction [OAR 690-315-0040(3)(a)]

8. The Application states work was accomplished within the time allowed in the permit or previous extension as follows:
 - a. Construction of the water system began prior to October 1, 2010.
 - b. Work was completed during the original development time frame under Permit S-54317, being July 21, 2006 to October 1, 2010. The permit holder installed a pump with fish screen, faucet, and small irrigation system, and adapted the water delivery system to connect to an outdoor shower on their motor home.
 - c. Since October 1, 2010, the permit holder has installed an outdoor shower near a faucet, and performed maintenance on the water delivery system.
9. According to the Application, when the permit holder applied for the water right permit, their water system was to be integrated into the new house they had planned to build. When the house did not get built they tried to follow the "spirit" of the plan by purchasing a small gas powered pump and using water from the river according to their proposal. The permit holder filled a 55 gallon water barrel for irrigation later in the summer, developed an outdoor shower and a faucet for cleaning the riding mower used on the property.

The Application provides evidence of progress of physical work made towards completion of the water system, enough to qualify as the minimum necessary for the Department to find good cause and reasonable diligence towards complete application of water to a beneficial use.

Beneficial Use of Water [OAR 690-315-0040(3)(b)]

10. The Application states a maximum rate of 0.01 cfs of water has been diverted from the North Umpqua River, a tributary of Umpqua River for domestic expanded use for one household.
11. Beneficial use of water has been demonstrated under this permit, as all permit conditions were satisfied by October 1, 2010.

Compliance with Conditions [OAR 690-315-0040(3)(c)]

12. The water right permit holder's conformance with the permit or previous extension conditions.
 - a. The Department has considered the permit holder's compliance with conditions, and did not identify any concerns.
 - b. The Application states a fish screen was installed with the pump in April 2009.

- c. The permit holder submitted an Oregon Department of Fish and Wildlife Fish Screening Program Small Pump Screen Self Certification Form, dated September 2, 2016, for Permit S-54317. This letter is in the Department's file for Permit S-54317.

The Department has determined that this extension will allow the permit holder to complete development of the water delivery system, and to apply the water to full beneficial use.

Financial Investments to appropriate and Apply Water to a Beneficial Purpose [OAR 690-315-0040(2)(b),(3)(d),(4)(d)]

13. The Applications states the permit holder has invested about \$580, which is about 22 percent of the total projected cost for complete development of this project. The permit holder anticipates up to an additional \$2,000 investment is needed for the completion of this project.

Good Faith of the Appropriator [OAR 690-315-0040(2)(c)]

14. The Department has found good faith of the appropriator under Permit S-54317.

The Market and Present Demands for Water [OAR 690-315-0040(2)(d-e)]

The Department's determinations of market and present demand for water or power to be supplied shall consider the requirements set forth under OAR 690-315-0040(4)(a-f). In accordance with OAR 690-315-0040(4), the Department shall consider, but is not limited to, the following factors when determining the market and the present demand for water or power to be supplied:

The amount of water available to satisfy other affected water rights and scenic waterway flows; special water use designations established since permit issuance, including but not limited to state scenic waterways, federal wild and scenic rivers, serious water management problem areas or water quality limited sources established under 33 U.S.C. 1313(d); or the habitat needs of sensitive, threatened or endangered species, in consultation with the Oregon Department of Fish and Wildlife [OAR 690-315-0040(4)(a-c)].

15. A review of the amount of water available to satisfy other affected water rights and scenic waterway flows was determined at the time of issuance of Permit S-54317; furthermore, water availability for other affected water rights and scenic waterway flows after the permit was issued is determined when an application for a new water right is submitted. This permit was issued under the North Umpqua Settlement Agreement which set aside a total of 7.0 cfs of water from the North Umpqua River for future allocations, being 1.5 cfs for agriculture and irrigation use; 1.5 cfs for commercial and industrial use; and 4.0 cfs for domestic and human consumptive uses.
16. A current water availability analysis for the North Umpqua River Settlement Agreement allocations show that 99.9% of the 1.5 cfs for agriculture and irrigation use has been allocated; 100% of the 1.5 cfs for commercial and industrial use has been allocated; and 32.3% of the 4.0 cfs for domestic and human consumptive uses has been allocated.

- A. The point of diversion is located on North Umpqua River, a tributary of Umpqua River, and is not located within a Withdrawn Area.
- B. The Umpqua River is not located within or above a state or federal scenic waterway.
- C. Umpqua River is located within an area ranked "high" for stream flow restoration needs as determined by the Department in consultation with the Oregon Department of Fish and Wildlife, and is located within a Sensitive, Threatened or Endangered Fish Species Area as identified by the Department in consultation with Oregon Department of Fish and Wildlife.
- D. The point of diversion is in a location listed by the Department of Environmental Quality as a water quality limited stream for Temperature in RM 0 to 32.8.

Other economic interests dependent on completion of the project [OAR 690-315-0040(4)(e)].

- 17. No other economic interests dependent on completion of the project have been identified.

Other factors relevant to the determination of the market and present demand for water and power [OAR 690-315-0040(4)(f)].

- 18. No other factors relevant to the determination of the market and present demand for water and power have been identified.

Fair Return Upon Investment [OAR 690-315-0040(2)(f)]

- 19. Use and income from the permitted water development will likely result in reasonable returns upon the investment made to date.

Other Governmental Requirements [OAR 690-315-0040(2)(g)]

- 20. Delay in the development of this project was not caused by any other governmental requirements.

Unforeseen Events [OAR 690-315-0040(2)(h)]

- 21. The Application did not identify unforeseen events that occurred prior to the complete application of water date, being October 1, 2010.

Denial of an Extension Would Result in Undue Hardship [OAR 690-315-0040(2)(i)]

- 22. The Application did not state if a denial of the extension would result in undue hardship.

CONCLUSIONS OF LAW

- 1. The Applicant is entitled to apply for an extension of time to complete construction and/or completely apply water to the full beneficial use pursuant to ORS 537.230(3).
- 2. The Applicant has submitted a complete extension application form and the fee specified in ORS 536.050, as required by OAR 690-315-0040(1)(a).

3. The Applicant complied with timeline requirements to begin construction pursuant to ORS 537.230 as required by OAR 690-315-0040(1)(b) and OAR 690-315-0040(5).
4. Based on Finding of Facts 6 through 14, full application of water to beneficial use can be accomplished by October 1, 2021⁵, as required by OAR 690-315-0040(1)(c).
5. The Department has considered the reasonable diligence and good faith of the appropriator, the cost to appropriate and apply water to a beneficial purpose, the market and present demands for water to be supplied, the financial investment made and fair and reasonable return upon the investment, the requirements of other governmental agencies, and unforeseen events over which the permit holder had no control, whether denial of the extension will result in undue hardship to the applicant and whether there are no other reasonable alternatives for meeting water use needs, any other factors relevant to a determination of good cause, and has determined that the applicant has shown that good cause exists for an extension of time to apply water to full beneficial use pursuant to OAR 690-315-0040(1)(d).

PROPOSED ORDER

Based upon the foregoing Findings of Fact and Conclusions of Law, the Department proposes to issue an order to:

Extend the time to apply water to beneficial use under Permit S-54317 from October 1, 2010 to October 1, 2021.

DATED: November 8, 2016

Dwight French, Administrator
Water Right Services Division

*If you have any questions,
please check the information
box on the last page for the
appropriate names and
phone numbers.*

⁵Pursuant to ORS 537.230(3), upon the completion of beneficial use of water allowed under the permit, the permittee shall hire a certified water rights examiner to survey the appropriation. Within one year after the complete application of water to a beneficial use (or by the date allowed for the complete application of water to a beneficial use), the permittee shall submit a map of the survey and a new or revised claim of beneficial use as deemed appropriate by the Department.

Proposed Final Order Hearing Rights

1. Under the provisions of OAR 690-315-0100(1) and 690-315-0060, the applicant or any other person adversely affected or aggrieved by the proposed final order may submit a written protest to the proposed final order. The written protest must be received by the Water Resources Department no later than **December 23, 2016**, being 45 days from the date of publication of the proposed final order in the Department's weekly notice.
2. A written protest shall include:
 - a. The name, address and telephone number of the petitioner;
 - b. A description of the petitioner's interest in the proposed final order and if the protestant claims to represent the public interest, a precise statement of the public interest represented;
 - c. A detailed description of how the action proposed in the proposed final order would adversely affect or aggrieve the petitioner's interest;
 - d. A detailed description of how the proposed final order is in error or deficient and how to correct the alleged error or deficiency;
 - e. Any citation of legal authority supporting the petitioner, if known;
 - f. Proof of service of the protest upon the water right permit holder, if petitioner is other than the water right permit holder; and
 - g. The applicant or non-applicant protest fee required under ORS 536.050.
3. Within 60 days after the close of the period for requesting a contested case hearing, the Director shall:
 - a. Issue a final order on the extension request; or
 - b. Schedule a contested case hearing if a protest has been submitted, and:
 - 1) Upon review of the issues, the Director finds there are significant disputes related to the proposed agency action; or
 - 2) The applicant submits a written request for a contested case hearing within 30 days after the close of the period for submitting protests.
