The irrigation requirement will be 0.70 cfs. The water will pre-
 dominately be used from the two unnamed streams, but during the summer
 low flows, the supply must be supplemented by the springs. (Numbers
 3, 5, 6, 7, 8, & 11.) The water from all sources will be gravity
 flow, piped to a holding pond (as shown on the enclosed map) and
 pumped onto the fields.
