Answered each question completely.

Included a legible map that includes Township, Range, Section, quarter-quarter and tax lot number.

The map must meet map requirements to be accepted.

Included a land use form or receipt stub signed by a local planning official.

Included a check payable to Oregon Water Resources Department for the appropriate amount.

8. Description

The pond is in channel and is served by a seasonal creek. There are other properties served downstream by the creek.

The pond is surrounded by native soil on the south and east side. The west side is a combination of soil dredged from the pond and native soil, it is hard to determine what is natural and what is dredged because of fir trees between 18 and 50+ years.

The dam is a berm dam that is approximately 4 feet high and approximately 40 long tapering into native soil on each side (east and west). The outlet is a 3 foot by 20 foot galvanized culvert. It appears to be located at approximately 2-3 feet lower than the stream feeding the pond and is approximately 2 feet higher than the creek at that outlet.

There are no gates to stop or hinder the natural flow of water and therefore does not affect the downstream properties. The outlet is a 3' discharge culvert. Once the inlet creek begins to flow, the pond fills and there is water discharging within approximately 12 hours. It is just the reverse in the spring when the creek flow stops. I have checked this numerous times in the 30 years we have lived there.

The pond also has a deeded access and permanently fixed suction pipe for the local fire department. It is year around access for filling their trucks for fire suppression for fires in the community. The stored water also is used by various forms of wildlife.

WATERMASTER ALTERNATE RESERVOIR APPLICATION REVIEW SHEET

Recommendations for Water Right Applications under the Alternate Reservoir review process (ORS 537.409)

In lieu of the water right application process set forth in ORS 537.140 to 537.211, an owner of a reservoir may submit an alternate reservoir application for a reservoir that has a storage capacity less than 9.2 acre-feet or a dam or impoundment structure less than 10 feet in height. ORS 537.409 describes the criteria used to evaluate alternate reservoir applications.

The review shall be limited to issues pertaining to: a) water availability, b) potential detrimental impact to existing fishery resources; and c) potential injury to existing water rights. (ORS 537.409 (6))

Within 60 days after the department provides public notice...any person may submit detailed, legally obtained information in writing, requesting the department to deny the application for a permit on the basis that the reservoir: (a) Would result in injury to an existing water right; or (b) Would pose a significant detrimental impact to existing fishery resources. (ORS 537.409 (5))

The review of alternate reservoirs is limited to these criteria only.
