**This portion to be completed by Oregon Department of Fish and Wildlife (ODFW) District staff.**

- 1) Is the proposed project and AO<sup>1</sup> off channel? .....  YES  NO  
 (if yes then proceed to #4; if no then proceed to #2)
- 2) Is the proposed project or AO located where NMF<sup>2</sup> are or were historically present?.....  YES  NO  
 (if yes then proceed to #3; if no then proceed to #4)
- 3) If NMF are or were historically present:  
 a. Is there an ODFW-approved fish-passage plan?.....  YES  NO  
 b. Is there an ODFW-approved fish-passage waiver or exemption?.....  YES  NO

If fish passage is required under ORS 509.580 through .910, then either 3(a) or 3(b) must be "Yes" to move forward with the application. If responses to 3(a) and 3(b) are "No", then the proposed reservoir does not meet the requirements of Oregon Fish Passage Law and shall not be constructed as proposed.

- 4) Would the proposed project pose any other significant detrimental impact to an existing fishery resource locally or downstream?.....  YES  NO  
 Explain below (for example, list STE species or other existing fishery resources that would be impacted negatively.)

- Any diversion or appropriation of water for storage during the period \_\_\_\_\_ through \_\_\_\_\_ poses a significant detrimental impact to existing fishery resources. (For example, if diversion of water for storage during a certain time period would cause a significant detrimental impact to an existing fishery resource, then ODFW should recommend conditions or limitations.) If NMF fish are present at the project site or point of water diversion then the applicant should be advised that a fish screen consistent with screening criteria will be required.
- This proposed pond or reservoir contemplates impounding water in the Columbia Basin above Bonneville Dam. ODFW has determined that additional diversions of water in this area pose a significant detrimental impact to existing fishery resources during the period April 15 through September 30.
