GENERAL TIPS:

- Permit holders of municipal or quasi-municipal water use permits DO NOT use this form. The correct form is *Application for Extension of Time for Municipal and Quasi-Municipal Water Use Permits*, available at the following link:
<http://www.wrd.state.or.us/OWRD/PUBS/forms.shtml#other>
- Request the reasonable amount of time necessary to fully complete the water construction project and/or to fully use the permitted quantity of water under the terms and conditions of your permit. Should this request be approved, it will be OWRD's expectation that you will complete your project within the new time period allowed. Future extensions may not be granted.
- A separate Application for Extension of Time must be submitted for each permit. OAR 690-315-0020(2).
- An instruction sheet (*Instructions for Filling Out Extension of Time Application for Permits*) provides details that will help you answer each question on the application. Permit extensions

are evaluated under OAR Chapter 690, Division 315. These rules may be viewed at:
<http://www.wrd.state.or.us/OWRD/LAW/index.shtml>.

- You may provide OWRD with any additional information or evidence that will aid us in making our decision. Please note that OWRD may require other information that is necessary to evaluate the application. OAR 315-0020(3)(n).
- After careful review of the Application for Extension of Time, you may contact OWRD at (503) 986-0900, to ask questions and request assistance from a Permit Extensions Specialist in the Water Rights and Adjudications Division.
- Once an Application for Extension of Time is received by OWRD, it will be reviewed for completeness. OWRD will return any incomplete or deficient applications to the applicant. OAR 690-315-0040(1)(a).

Reference Materials Needed to Complete this Application:

SALEM, OR

- The water right permit. If needed, a copy of the water right permit can be downloaded from the Department's Website at <http://www.wrd.state.or.us> (find the link to the Water Rights Information System (WRIS)). Or, a copy of the permit (or other documents) may be requested by water right application number from the Water Rights Division at 503-986-0900 (copy fees will apply).
- Documentation which demonstrates compliance with permit conditions (for example, well construction logs; static water level measurement reports; annual water use reports; ODFW fish screen certification; a plan to monitor the effect of water use on ground water aquifers utilized under the permit; etc.).

Answer the Following Questions to Complete this Application for Extension of Time

[OAR 690-315-0020(3)(d)]

1. Did the actual construction of the water system/well drilling begin within the time specified in the permit? ~~x~~ Yes

TIP: Not all permits specify a date by which construction was to begin.

Date construction began is: 9/13/01

Details of construction: It appears from the well log that this well was drilled in September of 2001 prior to the permit application. Much of the construction was completed also prior to the application process. The water is supplemental, and other work such as mainlines and pivot were started in the spring of 2002 and continued until completion in 2002. At this date one pivot was completed with this project, along with 1330 feet of 8" PVC mainline and 1800 feet of 10" pvc mainline. As of this date it is necessary to install a meter at the well, and complete a well test. NOTE: it appears that a well test was conducted in 2001 by the well driller. The test

was for 4 hours and had a total drawdown of 200 feet with a yield of 1000 gpm. The well test shows it was received by Water Resources January 20, 2004 for well "BAKE 50883. As of this time there are a total of 7 other pivots and two semi-circles on this ground but built under other permits. The mainline was connected into other mainlines that existed prior to this construction.

2. Permits typically contain standard or special conditions that must be satisfied to lawfully develop and use permitted water. In the development of this water right, have you satisfied the conditions contained in your permit? No

2-A) Describe how you have complied with each condition contained in the original permit [and, if applicable, each condition contained in any order approving a permit amendment and/or a final order approving a prior extension of time]. Include the date when the condition was satisfied.

TIP: The instruction sheet for the Application for Extension of Time provides an explanation of the typical conditions that must be addressed in this question.

CHART-A

Condition No.**	Date Satisfied	Describe How Permit Condition Has Been Satisfied
A	Not Satisfied	Meter is not yet in place, so watering as per the permit has not occurred.
B	10/6/01	Watermaster has permission to well and meter when installed, water user has submitted annual static water level measurements in March and annually thereafter.
Standard Condition	1/2004	Pump test submitted, (unknown if accepted by Water Resources) 1/2004 to Water Resources. It is unknown if the test was accepted by Water Resources. If it was accepted, another test is not due until the 2014 season. Meter will be installed in May of 2013 prior to start up.
Standard Condition	Not Satisfied	Water not yet applied with all conditions of the permit. Water has been applied to the land as required by the permit with the exception of having the meter in place. Meter will be installed prior to starting the 2013 irrigation season, and complete application of water to the use will be made at that time.
Standard Condition	Not Satisfied	Claim of beneficial Use not yet satisfied. Will be completed by 10/1/2017

** Condition No: Hand-number each condition on a copy of your permit (and, if applicable, permit amendment and prior extension). Include a copy of your hand-numbered permit with the application.

2-B) If you have NOT complied with all applicable conditions, explain the reasons why and indicate with a date certain (in the near future) when compliance will occur.

CHART-B

Condition No.**	Date Will Comply	Explain Why Each Permit Condition Has NOT Been Satisfied
A	5/15/2013	Meter will be installed upon initial startup of 2013 season. The death of Brad Allens' father and partner had delayed the finalization of this permit with the settlement of estate and legal matters.

JAN 14 2013

Standard Condition	6/1/2013	Water will be applied in conformance with all conditions of SALE OF PERMIT Water has not been applied in the permitted manner due to the absence of a meter. Water has been applied to the crops.
Standard Condition	10/1/2017	Completion of a COBU will be submitted prior to the October 1, 2017 date. A COBU has not been ordered due to the missing meter, and could not prove up on the condition of the permit. Realistically the COBU will probably completed in the summer of 2013, unless unforeseen circumstances occur.

**** Condition No:** Hand-number each condition on a copy of your permit (and, if applicable, permit amendment and prior extension. Include a copy of your hand-numbered permit with the application.

9. List the reasons why the project was not constructed, and/or water was not beneficially used within permit time limits. Provide supporting information for the reason(s) that best fits your circumstances (A, B, C or D).

9-A) The project is of a size and scope that was originally planned to be phased in over a time frame longer than the one allowed in the permit.

9-B) The financial resources needed to develop the project precluded completion of the project within authorized time frames.

~~This project was interrupted by the untimely death of Brad Allens father and partner. The completion of this project was delayed while the estate and financial obligations were resolved.~~

9-C) Good faith attempts to comply with permit conditions and/or acquire permits from other agencies, or otherwise comply with government regulations, delayed completion of the project.

JAN 14 2013

SALEM, OR

9-D) Acts of God or other unforeseen events delayed full development of the water system and use of water within the authorized time frames.

[OAR 690-315-0020(3)(k)]

10. **Justify the time requested to complete the project and/or apply the water to full beneficial use.** Your justification should combine information from your answers from Questions 2-B, 7, 8, and 9 of this Application for Extension of Time, and should also include any other information or evidence to establish that the requested amount of time is sufficient and that you will be able to complete the project within the amount of time requested.

The construction needed to complete this project is minimal. We have applied for a 5 year extension, but realistically we believe that this project can be finished in 2013. We have hedged on the time schedule in case of unforeseen problems.

11. **Provide any other information you wish OWRD to consider while evaluating your Extension of Time Application.**

I am the permit holder, or have written authorization from the permit holder (attached to this Extension of Time Application), to apply for an extension of time under this permit. I understand that false or misleading statements in this extension application are grounds for OWRD to suspend processing of the request and/or reason to deny the extension.
