RECEIVED BY OWRD

By my signature below I confirm that I understand:

NOV 06 2017

- I am asking to use water specifically as described in this application.
- Evaluation of this application will be based on information provided in the application.
- I cannot use water legally until the Water Resources Department issues a permit.
- Oregon law requires that a permit be issued before beginning construction of any proposed well, unless the use is exempt. Acceptance of this application does not guarantee a permit will be issued.
- If I get a permit, I must not waste water.
- If development of the water use is not according to the terms of the permit, the permit can be cancelled.
- The water use must be compatible with local comprehensive land-use plans.
- Even if the Department issues a permit, I may have to stop using water to allow senior water-right holders to get water to which they are entitled.

SALEM, OR

I (we) affirm that the information contained in this application is true and accurate.

SECTION 2: PROPERTY OWNERSHIP

APR 11 2018

Please indicate if you own all the lands associated with the project from which the water is to be diverted, conveyed, and used.

OWRD

☒ Yes

☒ There are no encumbrances.

☐ This land is encumbered by easements, rights of way, roads or other encumbrances.

☐ No

☐ I have a recorded easement or written authorization permitting access.

☐ I do not currently have written authorization or easement permitting access.

☐ Written authorization or an easement is not necessary, because the only affected lands I do not own are state-owned submersible lands, and this application is for irrigation and/or domestic use only (ORS 274.040).

☐ Water is to be diverted, conveyed, and/or used only on federal lands.

List the names and mailing addresses of all affected landowners (*attach additional sheets if necessary*).

You must provide the legal description of: 1. The property from which the water is to be diverted, 2. Any property crossed by the proposed ditch, canal or other work, and 3. Any property on which the water is to be used as depicted on the map.

SECTION 3: WELL DEVELOPMENT

WELL NO.	NAME OF NEAREST SURFACE WATER	IF LESS THAN 1 MILE:	
		DISTANCE TO NEAREST SURFACE WATER	ELEVATION CHANGE BETWEEN NEAREST SURFACE WATER AND WELL HEAD
	Calapooyia River	10 miles	minimal

SECTION 3: WELL DEVELOPMENT, CONTINUED

Total maximum rate requested: 400 gpm (each well will be evaluated at the maximum rate unless you indicate well-specific rates and annual volumes in the table below).

The table below must be completed for each source to be evaluated or the application will be returned. If this is an existing well, the information may be found on the applicable well log. (If a well log is available, please submit it in addition to completing the table.) If this is a proposed well, or well-modification, consider consulting with a licensed well driller, geologist, or certified water right examiner to obtain the necessary information.

OWNER'S WELL NAME OR NO.	PROPOSED	EXISTING	WELL ID (WELL TAG) NO.* OR WELL LOG ID**	FLOWING ARTESIAN	CASING DIAMETER	CASING INTERVALS (IN FEET)	PERFORATED OR SCREENED INTERVALS (IN FEET)	SEAL INTERVALS (IN FEET)	MOST RECENT STATIC WATER LEVEL & DATE (IN FEET)	PROPOSED USE

SECTION 4: WATER USE

APR 11 2018

USE	PERIOD OF USE	ANNUAL VOLUME (ACRE-FEET)
Irrigation	May Through Sept.	182.50 (2.5 acre/ft/acre)

Exempt Uses: Please note that 15,000 gallons per day for single or group **domestic** purposes and 5,000 gallons per day for a single **industrial or commercial** purpose are exempt from permitting requirements.

For irrigation use only:

Please indicate the number of primary and supplemental acres to be irrigated (*must match map*).

Primary: 75 Acres Supplemental: _____ Acres

List the Permit or Certificate number of the underlying primary water right(s): _____

Indicate the maximum total number of acre-feet you expect to use in an irrigation season: 182.50

- If the use is **municipal or quasi-municipal**, attach Form M
- If the use is **domestic**, indicate the number of households: _____
- If the use is **mining**, describe what is being mined and the method(s) of extraction: _____

SECTION 5: WATER MANAGEMENT

A. Diversion and Conveyance

What equipment will you use to pump water from your well(s)?

☒ Pump (give horsepower and type): 20 h.p. submersible

☐ Other means (describe): _____

Provide a description of the proposed means of diversion, construction, and operation of the diversion works and conveyance of water.

B. Application Method

What equipment and method of application will be used? (e.g., drip, wheel line, high-pressure sprinkler)

C. Conservation

Please describe why the amount of water requested is needed and measures you propose to: prevent waste; measure the amount of water diverted; prevent damage to aquatic life and riparian habitat; prevent the discharge of contaminated water to a surface stream; prevent adverse impact to public uses of affected surface waters. *Irrigation of perennial crops, to prevent waste we measure the moisture in the ground so there is no over-watering. There are no close streams or waterways.*

For Local Government Use Only

OWRD

The following section must be completed by a planning official from each county and city listed unless the project will be located entirely within the city limits. In that case, only the city planning agency must complete this form. This deals only with the local land-use plan. Do not include approval for activities such as building or grading permits.

Please check the appropriate box below and provide the requested information

☒ Land uses to be served by the proposed water uses (including proposed construction) are allowed outright or are not regulated by your comprehensive plan. Cite applicable ordinance section(s): LCC 928.310(B)(1).

☐ Land uses to be served by the proposed water uses (including proposed construction) involve discretionary land-use approvals as listed in the table below. (Please attach documentation of applicable land-use approvals which have already been obtained. Record of Action/land-use decision and accompanying findings are sufficient.) If approvals have been obtained but all appeal periods have not ended, check "Being pursued."

Type of Land-Use Approval Needed (e.g., plan amendments, rezones, conditional-use permits, etc.)	Cite Most Significant, Applicable Plan Policies & Ordinance Section References	Land-Use Approval:	
		☐ Obtained ☐ Denied	☐ Being Pursued ☐ Not Being Pursued
		☐ Obtained ☐ Denied	☐ Being Pursued ☐ Not Being Pursued
		☐ Obtained ☐ Denied	☐ Being Pursued ☐ Not Being Pursued
		☐ Obtained ☐ Denied	☐ Being Pursued ☐ Not Being Pursued
		☐ Obtained ☐ Denied	☐ Being Pursued ☐ Not Being Pursued

Local governments are invited to express special land-use concerns or make recommendations to the Water Resources Department regarding this proposed use of water below, or on a separate sheet.

Map Requirements for New Water Right Applications

Provided is a sample map which contains all of the required elements for the map that must be submitted with a new Application for a Permit to Use Groundwater or Surface Water. Below are brief descriptions of the elements.

A) Township, Range and Section

The Public Land Survey System (PLSS) method used in the United States to divide, or "Plat", land established a rectangular grid system by which land could be described for the purposes of mapping and selling of real property. Locations on a map could be arrived at by referencing the grid using the Township and Range to zoom in on a specific area, usually measuring 36 square miles. The Township describes the areas location North to South, and the Range describes the areas location East to West. These areas are further divided into approximately 1 square mile areas known as Sections. Oregon is divided into 9 northern Townships, 41 southern Townships, 16 western Ranges and 51 eastern Ranges, relative to the N-S Willamette Meridian and an E-W base line.

B) North Directional Symbol

For orientation purposes, the map must indicate which direction is North, relative to the paper the map is printed on.

C) Even Map Scale

An even map scale is required for a complete map. The scale must be true to the dimensions of the map (be sure to check the scale of your map after it is printed). The scale cannot exceed 4-inches to a mile (1-inch = 1,320-feet). Even scales will be in increments of ten feet, i.e. 1" = 400', 1" = 550', 1" = 720' etc. Scales such as 1" = 25.4 feet or 1" = 43 feet will not be accepted.

D) Tax Lot

The map must identify all individual tax lots where water will be diverted, conveyed or used.

E) Quarter-Quarter Section subdivisions identified

The 1-square mile Sections described above are further divided into 1/4 Sections by bisecting the midpoint of the Section on the North/South and West/East Section lines. These 1/4 Sections are further divided into quarter-quarter Sections (1/16 Sections). These quarter-quarter Sections measure approximately 1,320 feet by 1,320 feet.

F) Public Land Survey Reference Corner

The grid produced by the division of lands using the Township, Range, Section 1/4 Section, and 1/4, 1/4 Section subdivision method creates a number of intersecting lines. Each of these line intersections are recognized as PLSS Reference corners. Additionally, in some areas other subdivisions known as Donation Land Claims (DLC) may be used as the reference corner.

G) Hachuring

Hachures are an identifying texture added to the map to show the area where water will be used. Diagonal lines are the most common representation; however any continuous symbol over the area is acceptable.

H) Acres per 1/4, 1/4 PLSS subdivision

The map must show a breakdown of the number of acres in each quarter-quarter PLSS subdivision.

I) Well or Diversion and Conveyance

The map must identify the location of the well or diversion with a unique symbol. Additionally, if the well or diversion fall outside of the area the water is to be used, the map must also include the approximate location of the conveyance system (pipe, ditch etc) from the well or diversion to the area of use.

J) Description of the location of the well or diversion

The map must include a description of the location of the well or diversion, referenced to a recognized PLSS corner, using the distance North/South and West/East from the reference corner. Additionally, the location may be identified using latitude and longitude coordinates.
