FROM:	Groundwater/Hydrology Section Dove Woodcock
SUBJECT:	Application G- 14483 Reviewer's Name
1. PER	WATER/SURFACE WATER CONSIDERATIONS  THE Basin rules, one or more of the proposed POA's is/is not within feet/mile of a surface water source () and taps a ndwater source hydraulically connected to the surface water.
a b	ED UPON 0AR 690-09 currently in effect, I have determined that the proposed groundwater until, or have the potential for substantial interference with the nearest will not surface water source, namely
3. BASE a b	WATER AVAILABILITY CONSIDERATIONS ED UPON available data, I have determined that groundwater for the proposed use will, or likely be available in the amounts requested without injury to prior rights will not and/or within the capacity of the resource; or will if properly conditioned, avoid injury to existing rights or to the groundwater resource:  iThe permit should contain condition #(s);  iiThe permit should contain special condition(s) as indicated in "Remarks" below;  iiiThe permit should be conditioned as indicated in item 4 below; or
b c d	THE PERMIT should allow groundwater production from no deeper thanft.  below land surface; The permit should allow groundwater production from no shallower thanft.  below land surface; The permit should allow groundwater production only from the  groundwater reservoir between approximatelyft. andft. below land surface; Well reconstruction is necessary to accomplish one or more of the above conditions. One or more POA's commingle 2 or more sources of water. The applicant must select one source of water per POA and specify the proportion of water to be produced from each source.
