TO:	Water Rights Section
FROM:	Groundwater/Hydrology Section Do-6 Woodcock Reviewer's Name
SUBJECT:	Application G
1. PER	WATER/SURFACE WATER CONSIDERATIONS THE Basin rules, one or more of the proposed POA's is/is not within feet/mile of a surface water source () and taps a ndwater source hydraulically connected to the surface water.
a b	ED UPON 0AR 690-09 currently in effect, I have determined that the proposed groundwater until, or have the potential for substantial interference with the nearest will not surface water source, namely
3. BASI a b	WATER AVAILABILITY CONSIDERATIONS ED UPON available data, I have determined that groundwater for the proposed use will, or likely be available in the amounts requested without injury to prior rights will not and/or within the capacity of the resource; or will if properly conditioned, avoid injury to existing rights or to the groundwater resource: i. The permit should contain condition #(s) 7c; ii. The permit should contain special condition(s) as indicated in "Remarks" below; iii. The permit should be conditioned as indicated in item 4 below; or
b c d	THE PERMIT should allow groundwater production from no deeper thanft. below land surface; The permit should allow groundwater production from no shallower thanft. below land surface; The permit should allow groundwater production only from the groundwater reservoir between approximatelyft. andft. below land surface; Well reconstruction is necessary to accomplish one or more of the above conditions. One or more POA's commingle 2 or more sources of water. The applicant must select one source of water per POA and specify the proportion of water to be produced from each source.

or withholding the	o not concur in G/H's recommendation A or B above relating to conditioning mit for the following reasons:
	(Signature)
	THIS SECTION TO BE COMPLETED BY ENFORCEMENT PERSOncur in G/H's recommendation A or B above relating to conditioning or with
orth rhiw bolit ei ri	I recommend including the following condition in the permit. "No water may be appropriated under terms of this permit until the well to conform to current well construction standards and proof of such repair Enforcement Section of the Water Resources Department." I recommend withholding issuance of the permit until evidence of well a with the Enforcement Section of the Water Resources Department. WHERER this review to Enforcement Section for concurrence.
