Dear Becki,

The Water Resources Department has received your application for a permit to use surface or ground water. At this time, however, we are unable to accept your application because the minimum filing requirements have not been met according to the Oregon Administrative Rules (OAR 690-310-0040 and 0050).

We are therefore returning the incomplete application and fees. You may resubmit the application with the additional required information and fees noted on the enclosed checklist.

Should you have any questions, please contact Water Right Customer Service at 503-986-0801.

Sincerely,

Edward P. Gosse
Water Rights Customer Service

Cc: OWRD Fiscal

This review is based only on the completeness of your application(s). Any determination of water availability, compliance with basin plan rules, or any other water related issues has not been made. Fees may change.

Application Completeness Checklist

Minimum Requirements (OAR 690-310-0040)(ORS 537.400)

- ☐ A **Legal Description** of all the properties involved where water is diverted, crossed, and used. The Legal description includes a metes and bounds or other government survey description. A copy of the deed, land sales contract or title insurance policy can provide this information, or applicant may submit a lot book report prepared by a title company. Copies of tax bills are not acceptable.

- ☐ The **map** must meet all the minimum requirements of OAR 690-310-0050.
 - ☐ Township, Range, Section
 - ☐ Location of main canals, ditches, pipelines or flumes (if POA/POD is outside of POU)
 - ☐ Place of use, ¼-¼'s and tax lot clearly identified
 - ☐ Even map scale not less than 4" = 1 mile (1"= 1320 ft.); examples: 1" = 100 ft., 1" = 200 ft.
 - ☐ Location of *each* diversion point, well or dam by reference to a recognized public land survey corner. Multiple wells shall be uniquely labeled, and identified on well logs if existing.
 - ☐ Reference corner on map
 - ☐ North Directional Symbol
 - ☐ Number of acres per ¼-¼ if for irrigation, nursery, or agriculture
 - ☐ For a standard reservoir application to store ≥ 9.2 acre feet AND having a dam height ≥ 10 feet, map must be prepared by a CWRE

By my signature below I confirm that I understand:

- I am asking to use water specifically as described in this application.
- Evaluation of this application will be based on information provided in the application.
- I cannot use water legally until the Water Resources Department issues a permit.
- Oregon law requires that a permit be issued before beginning construction of any proposed well, unless the use is exempt. Acceptance of this application does not guarantee a permit will be issued.
- If I get a permit, I must not waste water.
- If development of the water use is not according to the terms of the permit, the permit can be cancelled.
- The water use must be compatible with local comprehensive land-use plans.
- Even if the Department issues a permit, I may have to stop using water to allow senior water-right holders to get water to which they are entitled.

Water-Use Permit Application Processing

1. Completeness Determination

The Department evaluates whether the application and accompanying map contain all of the information required under OAR 690-310-0040 and OAR 690-310-0050 (www.oregon.gov/owrd/law). The Department also determines whether the proposed use is prohibited by statute. If the Department determines that the application is incomplete, all fees have not been paid, or the use is prohibited by statute, the application and all fees submitted are returned to the applicant.

2. Initial Review

The Department reviews the application to determine whether water is available during the period requested, whether the proposed use is restricted or limited by rule or statute, and whether other issues may preclude approval of or restrict the proposed use. An Initial Review (IR) containing preliminary determinations is mailed to the applicant. The applicant has 14 days from the mailing date to withdraw the application from further processing and receive a refund of all fees paid minus \$260. The applicant may put the application on hold for up to 180 days and may request additional time if necessary.

3. Public Notice

Within 7 days of the mailing of the initial review, the Department gives [public notice](#) of the application in the weekly notice published by the Department at www.oregon.gov/owrd. The public comment period is 30 days from publication in the weekly notice.

4. Proposed Final Order Issued

The Department reviews any comments received, including comments from other state agencies related to the protection of sensitive, threatened or endangered fish species. Within 60 days of completion of the IR, the Department issues a Proposed Final Order (PFO) explaining the proposed decision to deny or approve the application. A PFO proposing approval of an application will include a draft permit, and may request additional information or outstanding fees required prior to permit issuance.

5. Public Notice

Within 7 days of issuing the PFO, the Department gives public notice in the weekly notice. Notice includes information about the application and the PFO. Protest must be received by the Department within 45 days after publication of the PFO in the weekly notice. Anyone may file a protest. The protest filing fee is \$410 for the applicant and \$810 for non-applicants. Protests are filed on approximately 10% of Proposed Final Orders. If a protest is filed, the Department will attempt to settle the protest but will schedule a contested case hearing if necessary.

6. Final Order Issued

If no protests are filed, the Department issues a Final Order consistent with the PFO. If the application is approved, a permit is issued that specifies the details of the authorized use and any terms, limitations or conditions that the Department deems appropriate.

SECTION 4: WATER USE

USE	PERIOD OF USE	ANNUAL VOLUME (ACRE-FEET)
Irrigation	Year Round	

For irrigation use only:

Please indicate the number of primary and supplemental acres to be irrigated (*must match map*).

Primary: 1 Acres Supplemental: N/A Acres

If you listed supplemental acres, list the Permit or Certificate number of the underlying primary water right(s):

Indicate the maximum total number of acre-feet you expect to use in an irrigation season: 1 acre

- If the use is **municipal or quasi-municipal**, attach Form M N/A
- If the use is **domestic**, indicate the number of households: N/A
Exempt Uses: Please note that 15,000 gallons per day for single or group **domestic** purposes and 5,000 gallons per day for a single **industrial or commercial** purpose are exempt from permitting requirements.
- If the use is **mining**, describe what is being mined and the method(s) of extraction (*attach additional sheets if necessary*): N/A

SECTION 5: WATER MANAGEMENT

A. Diversion and Conveyance

What equipment will you use to pump water from your well(s)?

☒ Pump (give horsepower and type): 2 HP, 19 gal P/min., Submersible

☐ Other means (describe): _____

Provide a description of the proposed means of diversion, construction, and operation of the diversion works and conveyance of water. _____

B. Application Method

What equipment and method of application will be used? (e.g., drip, wheel line, high-pressure sprinkler) (*attach additional sheets if necessary*)

Hand water with hoses and measuring meter

C. Conservation

Please describe why the amount of water requested is needed and measures you propose to: prevent waste; measure the amount of water diverted; prevent damage to aquatic life and riparian habitat; prevent the discharge of contaminated water to a surface stream; prevent adverse impact to public uses of affected surface waters (*attach additional sheets if necessary*).

We will use meters to make sure water isn't wasted as well as all organic, environment friendly plant food will be used.

Map Requirements for New Water Right Applications

Provided is a sample map which contains all of the required elements for the map that must be submitted with a new Application for a Permit to Use Groundwater or Surface Water. Below are brief descriptions of the elements.

A) Township, Range and Section

The Public Land Survey System (PLSS) method used in the United States to divide, or "Plat", land established a rectangular grid system by which land could be described for the purposes of mapping and selling of real property. Locations on a map could be arrived at by referencing the grid using the Township and Range to zoom in on a specific area, usually measuring 36 square miles. The Township describes the areas location North to South, and the Range describes the areas location East to West. These areas are further divided into approximately 1 square mile areas known as Sections. Oregon is divided into 9 northern Townships, 41 southern Townships, 16 western Ranges and 51 eastern Ranges.

B) North Directional Symbol

For orientation purposes, the map must indicate which direction is North, relative to the paper the map is printed on.

C) Even Map Scale

An even map scale is required for a complete map. The scale must be true to the dimensions of the map (be sure to check the scale of your map after it is printed). The scale cannot exceed 4-inches to a mile (1-inch = 1,320-feet). Even scales will be in increments of ten feet, i.e. 1" = 400', 1" = 550', 1" = 720' etc. Scales such as 1" = 25.4 feet or 1" = 43 feet will not be accepted.

D) Tax Lot

The map must identify all individual tax lots where water will be diverted, conveyed or used.

E) 1/4, 1/4 Section subdivisions identified

The 1-square mile Sections described above are further divided into 1/4 Sections by bisecting the midpoint of the Section on the North/South and West/East Section lines. These 1/4 Sections are further divided into 1/4, 1/4 Sections (1/16 Sections). These 1/4, 1/4 Sections measure approximately 1,320 feet by 1,320 feet.

F) Public Land Survey Reference Corner

The grid produced by the division of lands using the Township, Range, Section 1/4 Section, and 1/4, 1/4 Section subdivision method creates a number of intersecting lines. Each of these line intersections are recognized as PLSS Reference corners. Additionally, in some areas other subdivisions known as Donation Land Claims (DLC) may be used as the reference corner.

G) Hachury

Hachury is an identifying texture added to the map to show the area where water will be used. Diagonal lines are the most common representation; however any continuous symbol over the area is acceptable.

H) Acres per 1/4, 1/4 PLSS subdivision

The map must show a breakdown of the number of acres in each 1/4, 1/4 PLSS subdivision.

I) Well or Diversion and Conveyance

The map must identify the location of the well or diversion with a unique symbol. Additionally, if the well or diversion fall outside of the area the water is to be used, the map must also include the approximate location of the conveyance system (pipe, ditch etc) from the well or diversion to the area of use.

J) Description of the location of the well or diversion

The map must include a description of the location of the well or diversion, referenced to a recognized PLSS corner, using the distance North/South and West/East from the reference corner. Additionally, the location may be identified using latitude and longitude coordinates.
