3. GROUND WATER DEVELOPMENT

A. Number of well(s): 1 B. Name of nearest surface water body: STEWART CREEK

C. Distance from well(s) to nearest stream or lake: 1) 400'

2) _____ 3) _____ 4) _____

D. If distance from surface water is less than one mile, indicate elevation difference between nearest surface water and well head. 1) 30' above the creek

2) _____ 3) _____ 4) _____

E. Well Characteristics

Wells must be constructed according to standards set by the Department for the construction and maintenance of water wells. If the well is already constructed, please enclose a copy of the well constructor's log and the well ID number, if available, for each well with this application. Identify each well with a number corresponding to the wells designated on the map and proceed to question F in this section of the form. If the well has not been constructed, or if you do not have a well log, please complete the following:

Well(s) will be constructed by: LADD HORN WELL DRILLING

Address: ROUTE Box 14 PILOT ROCK, OR 97868

Completion date: 3-10-1982

2. Please provide a description of your well development. (Attach additional sheets if needed.)

4. WATER USE

Please read the instruction booklet for more details on "type of use" definitions, how to express how much water you need and how to identify the water source you propose to use. You must fill out a supplemental form for some uses as they require specific information for that type of use.

A. Type(s) of Use(s)

See list of beneficial uses provided in the instructions.

- If your proposed use is **domestic**, indicate the number of households to be supplied with water: _____
- If your proposed use is **irrigation**, please attach Form I
- If your proposed use is **mining**, attach Form R
- If your proposed use is **municipal or quasi-municipal**, attach Form M
- If your proposed use is **commercial/industrial**, attach Form Q

D. Period of Use

Indicate the time of year you propose to use the water: YEAR ROUND
(For seasonal uses like irrigation give dates when water use would begin and end, e.g. March 1–October 31.)

E. Acreage

If you will be applying water to land, please give the total number of acres where water will be applied or used: 5.0 ACRES
(This number should be consistent with you application map.)

5. WATER MANAGEMENT

A. Diversion

What equipment will you use to pump water from your well(s)?

- ☒ Pump (give horsepower and pump type) 5 HP SUBMERSIBLE

8. MAP REQUIREMENTS

The Department cannot process your application without accurate information showing the source of water and location of water use. You must include a map with this application form that clearly indicates the township, range, section, and quarter/quarter section of the proposed well location and place of use. The map must provide tax lot numbers. See the map guidelines sheet for detailed map specifications.

9. SIGNATURE

By my signature below I confirm that I understand:

- I am asking to use water specifically as described in this application.
- Evaluation of this application will be based on information provided in the application packet.
- I cannot legally use water until the Water Resources Department issues a permit to me.
- If I get a permit, I must not waste water.
- If development of the water use is not according to the terms of the permit, the permit can be canceled.
- The water use must be compatible with local comprehensive land use plans.
- Even if the Department issues a permit to me, I may have to stop using water to allow senior water right holders to get water they are entitled to, and

I swear that all information provided in this application is true and correct to the best of my knowledge:

GROUNDWATER/SURFACE WATER CONSIDERATIONS

1. PER THE _____ Basin rules, one or more of the proposed POA's is/is not within _____ feet/mile of a surface water source (_____) and taps a groundwater source hydraulically connected to the surface water.
2. BASED UPON OAR 690-09 currently in effect, I have determined that the proposed groundwater use
 - a. _____ will, or _____ have the potential for substantial interference with the nearest
 - b. _____ will not _____ surface water source, namely _____; or
 - c. ☒ will if properly conditioned, adequately protect the surface water from interference:
 - i. ☒ The permit should contain condition #(s) 7B;
 - ii. _____ The permit should contain special condition(s) as indicated in "Remarks" below;
 - iii. _____ The permit should be conditioned as indicated in item 4 below; or
 - d. _____ will, with well reconstruction, adequately protect the surface from substantial interference.

GROUNDWATER AVAILABILITY CONSIDERATIONS

3. BASED UPON available data, I have determined that groundwater for the proposed use
 - a. _____ will, or _____ likely be available in the amounts requested without injury to prior rights
 - b. _____ will not _____ and/or within the capacity of the resource; or
 - c. ☒ will if properly conditioned, avoid injury to existing rights or to the groundwater resource:

From: Michael J. Zwart

Subject: Application Review: G-15257, Janet T. Haddock

This application proposes to use about 28.1 gpm from one well for primary irrigation of 5.0 acres. The well (UMAT 140) is completed to a depth of 235 feet and penetrates a confined to semiconfined aquifer developed in basalt of the Columbia River Basalt Group. The static water level is reported as 3 feet and the first water-bearing zone is reported as 95 feet below land surface.

The well is about 600 feet from Stewart Creek. The aquifer is not likely in hydraulic connection with the nearest reach of the creek, however, it may be at a more distant downstream reach. There is no potential for substantial interference, based on the aquifer penetrated, the head relationship and the distance at which hydraulic connection is likely.

I recommend permit condition 7B.

The City of Pilot Rock may also be able to comment on the proposed use.

SEVENMILE CREEK

690-507-060(3)

(a) Classification: permits to use ground water may be issued only for the following classified uses:

(A) The ground water resources of the Birch and McKay Creeks subbasin are classified for statutorily exempt ground water uses (see definition), irrigation, municipal, industrial, power development, low temperature geothermal, mining, fish life, wildlife, recreation, pollution abatement, and artificial ground water recharge; and

(B) Ground water from the basalt reservoir in a five-mile radius around any municipal well of the cities of Pendleton and Pilot Rock is classified for municipal, group domestic and statutorily exempt ground water uses (see definition) only. Other uses may be permitted if it is documented that a barrier to ground water movement separates a proposed well from municipal wells and there will be no interference with municipal wells. Applications for other uses of ground water within a five-mile radius of a municipal well shall automatically be referred to the Commission for review and consideration of public interest unless the affected city affirms that it is in favor of the proposed appropriation. This classification applies only when the affected city(ies) have a full-time conservation program in effect.

(b) Permits issued to appropriate ground waters that may be hydraulically connected with surface water shall be specially conditioned. The condition shall specify that when exercise of the permit unduly interferes with surface water, the permit will be regulated in favor of the surface water source.

Columbia-Umatilla Plateau Subbasin

690-507-070

(1) Objectives: in developing a program for the management, use and control of the surface and ground water resources of the Columbia-Umatilla Plateau subbasin, the Commission has the following objectives:

(a) Protect instream values in the Umatilla River main stem by closing the main stem to future appropriations during the low flow season and limiting future appropriations during the high flow season to selected nonirrigation or nonconsumptive uses.

(b) Permit future surface water storage for any beneficial use.

(c) Permit artificial ground water recharge to offset declining ground water levels and supplement existing ground water uses.

(d) Achieve a balance between ground water pumpage and natural recharge in designated critical ground water areas and ground water study areas.

(e) Protect municipal ground water supplies.

(f) Prevent new appropriations from causing ground water/surface water interference.

(2) Surface Water: appropriation and use of surface water in the Columbia-Umatilla Plateau subbasin shall comply with the following provisions:
