Mr. S. L. Templin, Jr.
County Engineer
Department of Roads
Room 120, Courthouse
Grants Pass, Oregon

Dear Mr. Templin:

The plans for the Rough and Ready Log ponds have been examined and are being returned to you for additional information on two items.

1. There appears to be an error in the capacity curve. My computations would indicate a capacity of just over 100 acre feet for all ponds.
2. Could you indicate by note or sketch, the location and type of control or valve of the 18" C.S.P. outlet pipe.

Aside from these two points, the plans appear to adequately represent the existing structures and the changes you propose.

The reservoir application is being returned so that data agreeing with your plans can be shown on the application. It appears that the original application did not make proper allowance for borrow from the interior of the log ponds. Therefore, this application should cover the increased storage. The increased storage is considered to be in all four ponds. Changes should be made in the following items of the application:

- Item 3: The capacity shown should be the difference between the existing capacity and 57.6 acre feet for which a right exists. A notation should be entered in the remarks indicating that the 57.6 acre feet is covered by certificate number 22620.
- Item 5: Should be amended to include the pond to include two western ponds.
- Item 6: Location should be amended as above. Maximum height appears to be about 16 feet at northeast corner of old

Mr. A. L. Templin, Jr.

- 2 -

February 26, 1964

pond. Lengths of dike would be total lengths of old and new dikes. Top width should be minimum proposed top width. Upstream slope appears to be steeper than 3:1. Height of dam above water line should be minimum that will exist at any point where pond is contained by dike.

- Item 8: Should show location and dimensions of the proposed new concrete wasteway.
- Item 9: Should describe the 18" C.S.P. outlet pipe.
- Item 10: The total surface area, maximum depth and mean depth should be shown here.

The application has been endorsed so that in order to retain its priority, it should be returned to this office on or before April 27, 1964.

Very truly yours,

CHARLES L. WILSON
State Engineer

Mr. Richard Tomplin
County Engineer
County Courthouse
Grants Pass, Oregon

Dear Mr. Tomplin:

Mr. Cushing has told me that you are the engineer preparing the plans for the Rough and Ready Lumber Company log pond near Cave Junction. I inspected the log pond on December 9, 1963, but was not able to talk with you about it before I left Grants Pass on December 10. Mr. Letzke will probably be in Grants Pass during the latter part of next week and will be happy to meet with you to discuss any questions you may have about our requirements for these plans.

Very truly yours,

WILLIAM L. WILKINSON
State Engineer

MEMORANDUM OF INSPECTION

Rough and Ready Lumber Company Log Pond

With Robert Steiner this log pond was inspected on December 9, 1963.

A fill appears to have been constructed with a bulldozer by pushing material from below the downstream toe up onto the dam. The material consists of sand, silt and boulders. There was very little seepage noted at the toe although the pond has evidently been full for some time. The maximum height of the dam is 16½ feet with a crest width of approximately six feet minimum. At the northeast corner of the pond is an 18-inch corrugated metal pipe outlet and near the northwest corner there is a wood flume overflow across the crest with a bottom width of 21 inches and a depth of 11½ inches. Along the west side the pond has been formed entirely by excavation. At the present time little damage would be done by a breach of the dike since the water would have to spread over a large area before reaching any structures.

Gentlemen:

This will acknowledge receipt of the signed final proof forms in connection with your Permit Nos. R-1750 and 23609 and \$1 certificate recording fee for which our receipt No. 11203 is enclosed.

Please be advised that there is a \$1 certificate recording fee for each permit, and if you will now submit the recording fee for Permit No. 23609 further action will be taken toward the issuance of the desired certificates.

Very truly yours,

DENNIS A. STANLEY
State Engineer

Rough & Ready Lumber Co.
By Lew F. Arauss
Box 222
Cave Junction, Oregon

Gentlemen: We are enclosing herewith for completion, final proof in connection with the incomplete water right represented by your Permit No. 23609 granting a right to the use of 0.5 cfs of the waters of Rough & Ready mill pond and Rough & Ready Creek, and Permit No. R-1750 for 57.6 a.f. from Rough & Ready Creek for storage of water and mill pond.

The data contained in the proof, which is based on an inspection ~~and survey~~ of your project made by a representative of this department, defines the extent to which your water right has been completed within the terms of your Permit. The proof should be dated and signed by you on the second sheet under the Affidavit of Appropriator and returned to this office.

Upon receipt of the proof, properly executed and accompanied by the statutory fee of \$1, a Certificate of Water Right will be issued confirming the rights thereunder and, after being recorded in the records of Josephine County, will be forwarded to you.

In the interest of economy and due to the fact that your completed project was examined by a representative of this department, it is not necessary that your signature be made before a Notary Public, nor that the signatures of witnesses be affixed to the proof.

Yours very truly,

Lewis A. Stanley

Attention: Lew F. Krauss, Partner

Gentlemen:

Our field crews normally make final proof surveys during the summer months and prepare the maps and reports during the winter, however since your permits describe only a log pond we will make an attempt to have an inspection made by the engineer in charge of hydraulic structures. He tentatively plans on being in your area during the latter part of this month or the first part of February and he will contact someone at the mill office prior to making the inspection.

Very truly yours,

LEIS A. STANLEY
State Engineer

Re: File No. 29971 & R-29970

Dear Mr. Stanley:

Please refer to your letter of October 1, 1956.

We are anxious to have the survey made and the certificate issued.

We would appreciate you advising us when the survey is made.

Very truly yours,

ROUGH AND READY LUMBER COMPANY

29971 &
R-29970

October 1, 1956

Rough & Ready Lumber Co.
Box 222
Cave Junction, Oregon

Gentlemen:

This will acknowledge receipt of your notice to the effect that complete application of water has been made under Permit No. 23609 & R-1750.

Pursuant to your report and in line with the general practice of this office, a survey will be made at a later date. After this survey, proof may be made and certificate issued covering the actual use of water as found by the engineer. In the case of irrigation, any lands described in the permit that have not been irrigated will be automatically eliminated from the water right.

In the meantime, the permit which you hold will be valid evidence of the water right in question so long as you continue to use the water.

Very truly yours,

Lewis A. Stanley

Mr. Tom R. Pearce
Watermaster, District No. 16
Crater Pass, Oregon

Dear Mr. Pearce:

This will acknowledge receipt of your letter of
May 27, 1955, with which you enclosed completed Application
No. R-29970 to construct a reservoir and store therein
57.6 acre feet of water, and No. 29971, to appropriate 1.0
cubic foot of water per second from Rough & Ready Hill
Road and Rough & Ready Creek for a lot pond.

Your application in the case of the Rough &
Ready Lumber Company, now appears to be in satisfactory
form.

Very truly yours,
W. E. A. [unclear]

Re: File No. R-29970
29971

ATTENTION: Robert D. Best, Assistant

Dear Mr. Stanley:

We are returning herewith corrected applications in the name of Rough & Ready Lbr. Co. and also enclosed is plan and topography of the reservoir and a detail design of a section of the dam and spill-way. In our previous letter we sent you the "Additional information to be Submitted with Application Proposing Construction of Dams less than 10 feet in height". This dam or dike for the most part is less than 10 feet in height but the water impounded is considerably more than the three million gallons. In my opinion the specifications shown on this information are sufficient for the construction of this dam. The company has their own equipment for making construction and unless it is very essential we will omit sending detailed specifications.

I hope the plans I am sending you are sufficient, but Mr. Krauss, manager of the Rough & Ready Lbr. Co., requested that I send you such detail as is necessary, and I will be pleased to make corrections or perform further services if you think it is necessary.

Very truly yours,

Tom R. Pearce
Watermaster, District No. 16

Mr. Tom R. Pearce
Watermaster, District No. 16
Court House
Grants Pass, Oregon

Dear Mr. Pearce:

This will acknowledge receipt of an application in the name of the Rough and Ready Lumber Company for a permit to construct Rough and Ready Mill Pond and store 28 acre feet of water therein and an application for a permit to appropriate 1.0 second foot of water from Rough and Ready Creek and mill pond for log pond, map and print to accompany the applications, data sheet and check in the amount of \$35, for which our receipts No. 3772 and 3773 are enclosed. The applications have been examined, and given file Nos. R-29970 and 29971.

Pursuant to the request in your letter of May 24, the applications are enclosed herewith, endorsed so that in order to retain their dates of priority they must be returned to this office on or before June 27, 1955.

Very truly yours,

LEWIS A. STANLEY
State Engineer
