Salina, KS 67538

Dear Mr. and Mrs. Frost:

REFERENCE: Files C-7482, C-7483, C-7484, C-7485 and C-7924

I apologize for the long delay in the processing of your Applications C-7482, C-7483, C-7484, C-7485 and C-7924 which were originally filed in August of 1974 and March of 1977. As mentioned in our recent telephone discussion, there were matters that needed to be resolved in regard to clearing our records of the existing rights involved. The applications, at that time, were placed with several other applications that needed further attention. We are now attempting to complete the processing of these applications.

Your Applications C-7482, C-7483, C-7484 and C-7485 were returned to you in January of 1977 for correction and completion. These applications were again received in March of 1977 with four superseding applications and an additional application which was filed and numbered C-7924. The application of C-7924 describes the intended location of the pumps and lines to be installed. These five applications presently describe projects as follows:

Application C-7482 describes the intended use of 8.5 cfs from
Foot Pump 2 for the irrigation of 25.0 acres.

Application C-7483 describes the intended use of 6.5 cfs from
H. J. Pump 2 for the irrigation of 10.9 acres.

Application C-7484 describes the intended use of 0.5 cfs from
Crown Creek Pump 1 for the irrigation of 25.0 acres.

Application C-7485 describes the intended use of 0.5 cfs from
Crown Lane Pump 4 for the irrigation of 25.0 acres.

Application C-7924 describes the intended use of 1.25 cfs from
Crown Creek Pump 2 for the irrigation of 14.0 acres.

Raymond L. and Loretta R. Frost

page two

The matters regarding the existing rights have been taken care of by Orders entered October 19, 1982. These Orders canceled the parts of the existing rights involved which were described by Certificates 2745 and 21475. Copies of these Orders are enclosed.

Your five applications are in satisfactory form and will be placed with the next group to be considered for approval.

Sincerely,

WAYNE J. OVERCASH
Senior Water Rights Examiner

Dear Bob:

We have received the affidavit of abandonment regarding parts of the rights described by certificates No. 2745 and 21695 regarding lands presently owned by Raymond L. and Loretta R. Frost.

In comparing the affidavit with the applicants map, it appears they intend to abandon all of the two particular rights on lands described by their application. It further appears they intend to keep that part of the two rights which lies south of the county road, west of Crooks Creek, and above the land described by their application. If this is the case, their application map indicates a total of 9.3 acres to remain.

If 5.3 acres of certificate No. 2745 is to be kept, then 1.7 acres is to be abandoned. Also, if 5.3 acres is to be kept, the remainder of the land to be abandoned must be then described under certificate No. 21695 which would leave 2.2 acres in the SW $\frac{1}{4}$ NW $\frac{1}{4}$ and 1.8 acres in the NW $\frac{1}{4}$ SW $\frac{1}{4}$, the rest of the right is then to be abandoned.

If you agree, I have prepared a new affidavit to be in agreement with lands as shown by the applicants' map. The new affidavit should be signed by the Frosts and returned to this office. Permits then can be issued in approval of their new applications.

There are also two new certificates to be issued regarding the remainder of each right. Therefore, an additional \$4.00 is required in certificate recording fees. This should be submitted along with the completed affidavit.

Should you have questions, please contact the office.

Sincerely,

Vestal R. Garner
Water Rights Engineer

20 January 1977

Bob Steimer, Watermaster
714 N.W. "A" Street
Grants Pass, Oregon 97526

Dear Bob:

We have received maps, fees of \$80.00, legal land descriptions and 4 applications submitted by Raymond L. and Loretta R. Frost. For reference, these applications are Nos. G-7482, G-7483, G-7484 and G-7485.

Application No. G-7482 is for a permit to use 350 gallons per minute of water from sump No. 2 for irrigation of approximately 25 acres. Application No. G-7483 is for a permit to use 170 GPM of water from sump No. 3 for irrigation of 10 acres. Application No. G-7484 is for a permit to use 250 GPM of water from sump No. 1 for irrigation of from 10 to 25 acres and application No. G-7485 is for a permit to use 200 GPM of water from sump No. 4 for irrigation of 30 acres.

The maps that accompanied these applications do not appear to be prepared to a uniform scale and were not prepared with reference to the government survey showing the Section lines and quarter-quarter sections lines in the vicinity, therefore it is somewhat difficult to locate the intended project.

From the legal land description of the property along with records of this office, I have attempted to prepare a composite map showing the land intended to be irrigated from each sump. The information I have, however, is not adequate. Therefore, I would appreciate your assistance in completing these applications.

In addition to the mapping errors, the applications themselves must describe specific projects and be in agreement with the maps. I believe a map would be sufficient to illustrate each of the 4 projects.

In addition to the examination fee for each application, the permit recording fees must also be submitted. This depends, of course, upon the acreage to be irrigated under each application.

Steimer/Frost

G-7482-G-7485

- 2 -

There are also existing water rights on the property from Crooks Creek described by certificates No. 2745 and 21695. Certificate No. 2745 is evidence of the right to irrigate 7 acres from Crooks Creek and certificate No. 21695 is evidence of the right to irrigate 60 acres from Crooks Creek. I am enclosing copies of the maps regarding these two certificates.

If the rights to use of water from Crooks Creek are still valid, it would appear they cover all of the land between the County Road on the North and Crooks Creek on the South. Therefore, the applications for permits to use water from sumps No. 1, 2, and 3 should be requesting supplemental irrigation.

I am sending you the 4 applications along with the maps for correction and completion of the applications and providing a proper map and the additional fees. Your assistance in contacting the applicant for these corrections is appreciated.

Applications No. G-7482, G-7483, G-7484 and G-7485 are endorsed so that in order to retain their dates of priority, they must be received in this office on or before March 21, 1977.

Sincerely,

Vestal R. Garner
Water Rights Engineer
