File No. 33023

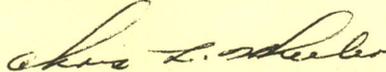

Dear Mr. and Mrs. Hanson:

Enclosed is the final proof in connection with the incomplete water right represented by your permit number 26109.

The data contained in the proof, which is based on an inspection and survey of your project made by a representative of this department, defines the extent to which your water right has been completed within the terms of your permit. The proof should be dated and signed by you and returned to this office.

Upon receipt of the proof, properly executed and accompanied by the statutory recording fee of \$1.50, a certificate of water right will be issued confirming the right thereunder and, after being recorded in the county records, will be forwarded to you.

Very truly yours,

CHRIS L. WHEELER
State Engineer

Enclosure

The enclosed map may be retained for your own records. Our field engineer found a total of 31.5 acres claimed irrigated in connection with permit numbered 26109, which exceeds the limit of 26.5 acres under the permit. If you intend to establish a legal water right for the additional 5.0 acres, a permit must be obtained. We will assist in making an application for a permit for the additional land at your request.

Dear Mr. & Mrs. Hanson:

This will acknowledge receipt of your notice to the effect that complete application of water has been made under Permit No. 26109.

Pursuant to your report and in line with the general practice of this office a survey will be made at a later date. After this survey, proof may be made and certificate issued covering the actual use of water as found by the engineer. In case of irrigation, any lands described in the permit that have not been irrigated will be automatically eliminated from the water right.

In the meantime, the permit which you hold will be valid evidence of the water right in question so long as you continue to use the water.

Very truly yours,

LEWIS A. STANLEY
State Engineer

Dear Sir and Madam:

This will acknowledge receipt of your notice of completion of construction in connection with permit number 26109. On this you stated that you did not complete the number 2 diversion point. If you intend to abandon the use of this diversion point the completion notice is properly submitted. If you intend to complete the facilities at the number 2 diversion point also, you should make application for extension of the time limit for completion of construction.

The date for complete application of water is October 1, 1961 which allows you one more year to actually irrigated the land.

Very truly yours,

LEWIS A. STANLEY
