Dear Mr. Hillman:

The Department received a letter dated June 2, 1997, requesting certificates be corrected to reflect true storage capacities based upon the information provided for Exempt Pond File P-82343. I apologize for the delay in responding to your request.

Your exempt pond file P-82343 is notice to the Department of the existence of the ponds described in your filing. The reservoirs are exempt from regulation by the Department and you are not required to obtain a permit or certificate of water right for the storage and use of water.

In your case, even though the pond capacities are improperly described by Certificates 70684 and 70684, no action may be taken to enlarge the amount of water described by those documents. This should not cause you any concern since pond file P-82343 allows for the use.

Please feel free to contact me if you have any questions and I will be happy to address any concerns you may have.

Sincerely,

Steve Brown

Dear Mr. French:

I did not compute the quantities properly for the water storage capacities when I filed Application R76761462.

When I checked with the Watermaster he helped me to file Application P-82343 to reflect the true storage capacity.

I hereby request these certificates [70683484] be corrected to reflect the true storage capacities indicated.

Sincerely yours,

WATER
RESOURCES
DEPARTMENT

Dear Applicant,

The 1995 Legislature passed House Bill 2376, a law which requires the Department to issue water right certificates on reservoirs applied for under House Bill 2153 (1993 Ponds Bill).

Our staff is preparing to issue your certificate(s). However, we need a map showing the location of the use, such as the house or area irrigated, and an indication as to the number of acres irrigated.

In order to expedite the processing of your certificate(s), we request that you submit the additional information listed above by **January 31, 1996**. A copy of your original application map is enclosed.

Should you have any questions please feel free to call the Water Rights Information Group at 1-800-624-3199, extension 499.

Sincerely,

DEPARTMENT

WILLIAM S HILLMAN

OAKLAND, OR 97462

REFERENCE: File # R-76761,R-76762;

We have received your application(s) for a water use permit along with your supporting data, documentation, and fees. A receipt is enclosed here unless you were previously issued one. Your application has been assigned the above referenced file number. Please refer to this number whenever you contact us about your application.

Your application will be considered under House Bill 2153 enacted by the 1993 Oregon Legislature. You may continue the storage of water while a decision is pending on your application.

After an application has been accepted for filing, public notification of the application is made, followed by a mandatory 30-day comment period. Thereafter, applications can be considered for processing as time allows.

At present the Water Resources Department has a backlog of several thousand applications for water use permits which has delayed our application processing time. In general, the Department works through Oregon's 18 river basins on a rotating schedule, processing applications in the order in which they have been received.

The processing of an application does not guarantee that a water right permit will be issued. Each application must undergo specialized analysis called a technical review and a public interest review. Until your application is reviewed, it is not possible to determine whether your particular proposed water use will be recommended for a permit.

Technical Reviews are processed in accordance with Oregon Administrative Rules. The Water Resources Commission is considering the adoption of rules to protect stream flows for fish species. This action is being contemplated in response to current and future Endangered Species Act fish listings, including many runs of salmon, steelhead and resident fish throughout the state.

The proposed rules, if adopted, could limit the issuance of new water right permits in certain areas of the state. If and when the Commission adopts these rules, new criteria or restrictions may be imposed on water use applications received after:

July 17, 1992, for use of water in the Upper Columbia/Snake Basin (above Bonneville Dam), including the mainstem Columbia and Snake Rivers and the Hood, Deschutes, John Day, Umatilla, Grande Ronde, Powder, Malheur and Owyhee Basins;

April 8, 1994, for use of water in the North Coast, Mid Coast, South Coast, Rogue and Umpqua Basins and the Clackamas Subbasin of the Willamette Basin; and

June 3, 1994, for use of water in all Oregon basins.

When the report on the technical review is completed and sent to you, a 60-day objection period begins during which you, the applicant, or anyone who has expressed an interest in your proposed water use may communicate to us their disagreement with what we have said in our report on your application. After the 60-day objection period, the Department conducts the public interest review and considers any objections which have been made.

After any objections have been considered, there may follow time to allow parties to resolve conflicts over the proposed water use. In addition, a 30-day protest period may be required. Lastly, it may be necessary to schedule a hearing or send the application to the Water Resources Commission for their review.

If your application is recommended for approval and a permit is issued, the use allowed by the permit will be subject to the Basin Program Rules of the Water Resources Commission, instream flow requirements, the demands of prior right holders and other conditions to conform the water use to particular standards.

Please contact the Water Rights Information Group (WRIG) if you have any questions. You may write to us at 158 12th ST NE, Salem, Oregon 97310 or you may call 378-3739 in Salem or toll free from within the state 1-800-624-3199.

NOTE TO LOCAL GOVERNMENTS

WATER
RESOURCES
DEPARTMENT

The person presenting the attached request for land use information is applying for a water right. The Water Resources Department (WRD) requires its applicants to obtain land use information to be sure water rights do not result in land uses that would violate your comprehensive plan.

WRD will not accept applications which are not accompanied by this completed land use form or the signed, dated receipt stub detached from the bottom of the land use information form.

You will receive notice once the applicant formally submits his or her request to WRD. The notice will give more detailed information about WRD's water rights process and comment opportunities. If you give the applicant the receipt stub in lieu of completing the form, you will have 30 days from the date of the notice mentioned above to complete the form and return it to WRD. If no land use information is received from you within that 30 day period, WRD may presume the land use associated with the proposed water right is compatible with your comprehensive plan.

Your attention to this request for information is greatly appreciated by both the applicant and WRD. If you have questions concerning the form, please contact WRD at 378-3739.
