Application No.....68382.....

Permit No.....

Permit to Appropriate the Public Waters of the State of Oregon

This is to certify that I have examined the foregoing application and do hereby grant the same SUBJECT TO EXISTING RIGHTS INCLUDING THE EXISTING FLOW POLICIES ESTABLISHED BY THE WATER POLICY REVIEW BOARD and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed0.01..... cubic feet per second measured at the point of diversion from the stream, or its equivalent in case of rotation with other water users, fromSouth Fork.....
.....Coquille River.....

The use to which this water is to be applied is.....irrigation of 0.71 acre.....

If for irrigation, this appropriation shall be limited to1/80..... of one cubic foot per second
or its equivalent for each acre irrigated.....2 1/2.....

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The priority date of this permit is.....June 10, 1985.....

Actual construction work shall begin on or before..... and shall
thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 19.....

Complete application of the water to the proposed use shall be made on or before October 1, 19.....

WITNESS my hand this day of....., 19.....

4. The amount of water which the applicant intends to apply to beneficial use is 0.0125 cfs/AC....
cubic feet per second.....
(If water is to be used from more than one source, give quantity from each)

5. The use to which the water is to be applied is lawn and garden irrigation, supplemental to Spring water irrigation--see Permit 44499 & "Remarks" below.

6.

DESCRIPTION OF WORKS

Include dimensions and type of construction of diversion dam and headgate, length and dimensions of supply ditch or pipeline, size and type of pump and motor, type of irrigation system to adequately describe the proposed distribution system.

There will be no diversion dam or headgate; the system will consist of a Goulds model #GH15D, 1½ HP Jet Pump providing 9 GPM and 40 PSI at upper yard level approximately 80' above (low) river level. A 40 Gallon WELL-X-TROL pressure tank will provide pressure as specified above.

The pump and pressure tank will be installed on a concrete pad approximately 150' from river's edge at 60' elevation (above low river level) requiring 150' each of 1½" and 1½" PVC pipe; an additional 255' of 1½" PVC pipe will transfer water from pump through the 2" iron pipe culvert under the Powers Highway and thence to the rear of the lot to be irrigated. Three standpipes will distribute the water through surface hoses and sprinklers.

The pipes from river to pump will be withdrawn at the conclusion of the irrigation season to avoid flood loss.

If for domestic use state number of families to be supplied

7. Construction work will begin on or before Sept. 1, 1985

8. Construction work will be completed on or before April 1, 1986

9. The water will be completely applied to the proposed use on or before April 1, 1986

Application No. 68382 Permit No.

Remarks: The Map indicates some 3958^{*} sq. ft. around the main building is to be irrigated with water from the Spring. This is probably optimistic. The Spring water is primarily used for drinking, cooking, bathing and general household use; it is adequate for these purposes but there is very little additional water available from this source for irrigation.

*

$\frac{3958}{43560} = 0.09 \text{ Acre}$

Signature of Applicant

This is to certify that I have examined the foregoing application, together with the accompanying maps and data, and return the same for completion.

In order to retain its priority, this application must be returned to the Water Resources Director with corrections on or before September 3, 1985.

WITNESS my hand this 3rd day of July, 1985.

William H. Young, Water Resources Director
