Redlands, California

Dear Sir and Madam:

Upon rechecking the application of Robert A. and Leonora E. Durflinger, it has been noted that within the NE $\frac{1}{4}$ of the SE $\frac{1}{4}$, Section 12, Township 21 South, Range 3 West, there is an existing right for the entire forty acres through the Stewart and Porter Ditch with the source of supply being Mosby Creek. Since the source of water is identical to one of the sources which you applied for, a supplemental right from Mosby Creek could not be granted. But if it is desired, a supplemental right could be granted from Champion Creek and the unnamed stream which you requested for this 27 acres. Since there is a certificate covering the same forty from the Stewart and Porter Ditch, as is evidence on Page 703 of the State Records of Water Right Certificates, it would appear that you may wish to continue this right rather than initiate a new one.

Action will be suspended under your application for thirty days to allow you to decide whether or not you will use the water under the above-mentioned certificate or whether you wish to delete Mosby Creek from the application and receive a supplemental right for water from Champion Creek and the unnamed stream.

Very truly yours,

CHAS. E. STRICKLIN
State Engineer
