**SECTION 2: PROPERTY OWNERSHIP** 

# SECTION 4: SENSITIVE, THREATENED OR ENDANGERED FISH SPECIES PUBLIC INTEREST INFORMATION

This information must be provided for your application to be accepted as complete. The Water Resources Department will determine whether the proposed use will impair or be detrimental to the public interest with regard to sensitive, threatened or endangered fish species.

To answer the following questions, refer to the map shown on <u>Attachment 3</u> or the link below to determine whether the proposed point of diversion (POD) is located in an area where the Upper Columbia, the Lower Columbia, and/or the Statewide public interest rules apply.

For more detailed information, click on the following link and enter the TRSQQ or the Lat/Long of a POD and click on "Submit" to retrieve a report that will show which section, if any, of the rules apply: https://apps.wrd.state.or.us/apps/misc/lkp\_trsqq\_features/

If you need help to determine in which area the proposed POD is located, please call the customer service desk at (503) 986-0801.

RECEIVED

MAY 26 2020

### Upper Columbia - OAR 690-033-0115 thru -0130

Is the POD located in an area where the Upper Columbia Rules apply?

Yes □ No

**OWRD** 

If yes, you are notified that the Water Resources Department will consult with numerous federal, state, local and tribal governmental entities so it may determine whether the proposed use is consistent with the "Columbia River Basin Fish and Wildlife Program" adopted by the Northwest Power Planning Council in 1994 for the protection and recovery of listed fish species. The application may be denied, heavily conditioned, or if appropriate, mitigation for impacts may be needed to obtain approval for the proposed use.

### If yes,

- I understand that the proposed use does <u>not</u> involve appropriation of direct streamflow during the time period April 15 to September 30, except as provided in OAR 690-033-0140.
- I understand that I will install, operate and maintain a fish screen and fish passage as listed in ORS 498.301 through 498.346, and 509.580 through 509.910, to the specifications and extent required by Oregon Department of Fish and Wildlife, prior to diversion of water under any permit issued pursuant to this application.
- I understand that the Oregon Department of Environmental Quality will review my application to determine if the proposed use complies with existing state and federal water quality standards.
- I understand that I will install and maintain water use measurement and recording devices as required by the Water Resources Department, and comply with recording and reporting permit condition requirements prior to diversion or use of water under any permit issued pursuant to this application.

	Store Water — Page 3
For Department Use: App. Number:	

<u>Lower Columbia - OAR 690-033-0220 thru -0230</u>	
Is the POD located in an area where the Lower Columbia rules apply?	
☐ Yes ⊠ No	
If yes, you are notified that that the Water Resources Department will determine, by reviewing rethe Columbia River Basin Fish and Wildlife Program, and regional restoration programs applicable or endangered fish species, in coordination with state and federal agencies, as appropriate, whether use is detrimental to the protection or recovery of a threatened or endangered fish species and when the conditioned or mitigated to avoid the detriment.	le to threatened or the proposed
If a permit is issued, it will likely contain conditions to ensure the water use complies with existin federal water quality standards; and water use measurement, recording and reporting required by the Resources Department. The application may be denied, or if appropriate, mitigation for impacts mobiling approval of the proposed use.	he Water
If yes, provide the following information (the information must be provided with the application considered complete).	ı to be
Yes No The proposed use is for more than <b>one</b> cubic foot per second (448.8 gpm) and is subject to the requirements of OAR 690, Division 86 (Water Management and Conservation Plans	not s).
If yes, provide a description of the measures to be taken to assure reasonably efficient wa	ter use:
	RECEIVE
<u>Statewide - OAR 690-033-0330 thru -0340</u>	MAY 2 6 202
Is the POD located in an area where the Statewide rules apply?	
⊠ Yes □ No	OWRD
If yes, the Water Resources Department will determine whether the proposed use will occur in an endangered, threatened or sensitive fish species are located. If so, the Water Resources Department of Fish and Wildlife, Department of Environmental Quality, and the Department of Agriculture w conditions required to achieve "no loss of essential habitat of threatened and endangered (T&E) fi "no net loss of essential habitat of sensitive (S) fish species." If conditions cannot be identified the standards of no loss of essential T&E fish habitat or no net loss of essential S fish habitat, the age recommend denial of the application unless they conclude that the proposed use would not harm to	nt, Department ill recommend ish species," or at meet the ncies will
SECTION 5: WATER USE	
a) The use of the impounded water will be: Multple purpose	
b) The amount of water to be stored is: 6 acre-feet.	
c) The area submerged by the reservoir, when filled, will be 3.72 acres.	

For Department Use: App. Number: \_\_\_\_\_

### **SECTION 6: DAM HEIGHT AND COMPOSITION**

The maximum height of the structure will be 9.8 feet above streambed or ground surface at the centerline of the crest of the dam.

Attach preliminary plans, specifications and supporting information for the dam and impoundment area including 1) dam height, 2) width, 3) crest width, 4) surface area and 5) preliminary fish passage design.

Note: If your dam height is greater than or equal to 10.0' above land surface AND your reservoir will store equal to or greater than 9.2 acre-feet, engineered plans and specifications must be approved by the Department' Dam Safety Section prior to storage of water.

The dam will be (check one): Earthfill Concrete Flash board Other

If "other," provide the description: This reservoir has been excavated down with that soil placed around the excavated hole for a dam that entirly circles the reservoir. The maximum height of the dam is 9.8 feet from the bottom of the excavation to the top of the fill. The crest width of the dam is 30 feet.

RECEIVED
MAY 2 6 2020

**OWRD** 

### **SECTION 7: PRIMARY OUTLET WORKS**

- a) Describe the location and the dimensions of the outlet conduit through the dam:
   NOTE: Most dams across a natural stream channel will need an outlet conduit having a minimum diameter of 8 inches or greater.

   There is an 18" PVC pipe at the east end of the reservoir with a downstream valve that can be used to lower the water level of the reservoir.
- b) How and when will the outlet be operated? The outlet would be used for maintenance of the reservoir.
- c) If ODFW has determined fish are present in the stream, how do you propose to protect fish through the outlet conduit (the conduit does not constitute fish passage)?
  Not applicable

### **SECTION 8: EMERGENCY SPILLWAY**

- a) Describe the location and the dimensions of the spillway channel. No true emergency spillway. The inlet (12" PVC pipe) is set such that when the water level rises to the inlet level no more water will flow into the reservoir. If for some strange reason the water got higher in the reservoir that the inlet pipe the water would flow out the inlet pipe into a ditch used to irrigate a field near the reservoir.
- b) How will the emergency spillway be designed to prevent erosion? It is an existing flow ditch
- c) What is the maximum design flow for the spillway? (Should be able to handle high flow events. 10-year flood events? 50-year flood events?)
   Not applicable

	Store Water — Page 5
For Department Use: App. Number:	Rev. 06-18

### **SECTION 9: WATER QUALITY**

- a) Describe how the reservoir will be managed to maintain water quality in the reservoir and downstream. First of all there is no downstream, any water that would come out of this reservoir would spread out on a field and percolate into the soil. Water quality during the wintertime will be the same quality as what flows into the reservoir. This reservoir is used to take delivery of Rock Creek DIC water during the delivery season and once again the quality of water will be the same as the water delivered. This mixing of water will provide a certain amount of airation.
- b) Describe how the perimeter of the reservoir will be buffered to limit nutrient and bacteria contamination. The perimeter of the reservoir is enclosed by the dam. The dam complete circles the reservoir so over land flow into the reservoir will not occur.
- c) Describe how annual maintenance of the reservoir will be accomplished without discharging contaminated water instream.

When maintenance is required on the reservoir the water can be discharged onto an existing field and not into any local stream.

### SECTION 10: PROJECT SCHEDULE (List Month and Year)

a) Proposed date construction work will begin: completed (Fish passage approval is necessary prior to construction.)

RECEIVED

MAY 2 6 2020

- b) Proposed date construction work will be completed: completed
- c) Proposed date water use will be completed: completed

**OWRD** 

### **SECTION 11: WITHIN A DISTRICT**

Check here if the point of diversion or place of use are located within or are served by an irrigation or other water district.

Irrigation District Name	Address	·
Rock Creek District Improvement Company	РО Вох	
City	State	Zip
Wamic	OR	97063

### **SECTION 12: REMARKS**

Use this space to clarify any information you have provided in the application.

Volume of the reservoir is 6 Acre feet. We are not sure how much water we will get out of this runoff source, so we have filed on the volume of the reservoir. After using the source, we will be able to determine how much water comes to us. The final Claim will be for the amount of water actually stored from this runoff source.

The Unnamed Surface Runoff that is the source of water is water that falls by rain or is snow melt on the west side of Smock Road. This water flows toward Smock Road and flows under the road in an existing culvert. This water would normally flow over land toward Rock Creek but the amount is normally small enough that it does not reach Rock Creek. There are no defined channels here. This water only occurs during the winter months. Some years there is no water.

	Store Water — Page 6
For Department Use: App. Number:	Rev. 06-13

### **Minimum Requirements Checklist**

Minimum Requirements (OAR 690-310-0040, OAR 690-310-0050 & ORS 537.140)

### Include this checklist with the application

Check that each of the following sections are completed. The application will be returned if all required items are not included. If you have questions, please call the Water Rights Customer Service Group at (503) 986-0900.

Please submit the original application and signatures to the Water Resources Department. Applicants are encouraged to keep a copy of the completed application.

### **Water-Use Permit Application Processing**

### 1. Completeness Determination

The Department evaluates whether the application and accompanying map contain all of the information required under OAR 690-310-0040 and OAR 690-310-0050. The Department also determines whether the proposed use is prohibited by statute. If the Department determines that the application is incomplete, all fees have not been paid, or the use is prohibited by statute, the application and all fees submitted are returned to the applicant.

### 2. Initial Review

The Department reviews the application to determine whether water is available during the period requested, whether the proposed use is restricted or limited by rule or statute, and whether other issues may preclude approval of or restrict the proposed use. An Initial Review (IR) containing preliminary determinations is mailed to the applicant. The applicant has 14 days from the mailing date to withdraw the application from further processing and receive a refund of all fees paid minus \$260. The applicant may put the application on hold for up to 180 days and may request additional time if necessary.

#### 3. Public Notice

Within 7 days of the mailing of the initial review, the Department gives <u>public notice</u> of the application in the weekly notice published by the Department at <u>www.oregon.gov/owrd</u>. The public comment period is 30 days from publication in the weekly notice.

### 4. Proposed Final Order Issued

The Department reviews any comments received, including comments from other state agencies related to the protection of sensitive, threatened or endangered fish species. Within 60 days of completion of the IR, the Department issues a Proposed Final Order (PFO) explaining the proposed decision to deny or approve the application. A PFO proposing approval of an application will include a draft permit, and may request additional information or outstanding fees required prior to permit issuance.

### 5. Public Notice

Within 7 days of issuing the PFO, the Department gives public notice in the weekly notice. Notice includes information about the application and the PFO. Protest must be received by the Department within 45 days after publication of the PFO in the weekly notice. Anyone may file a protest. The protest filing fee is \$410.00 for the applicant and \$810.00 for non-applicants. Protests are filed on approximately 10 percent of Proposed Final Orders. If a protest is filed the Department will attempt to settle the protest but will schedule a contested case hearing if necessary.

### 6. Final Order Issued

If no protests are filed, the Department can issue a Final Order within 60 days of the close of the period for receiving protest. If the application is approved, a permit is issued. The permit specifies the details of the authorized use and any terms, limitations or conditions that the Department deems appropriate

RECEIVED

MAY 26 2020

### NOTE TO APPLICANTS

**OWRD** 

In order for your application to be processed by the Water Resources Department (WRD), this Land Use Information Form must be completed by a local government planning official in the jurisdiction(s) where your water right will be used and developed. The planning official may choose to complete the form while you wait, or return the receipt stub to you. Applications received by WRD without the Land Use Form or the receipt stub will be returned to you. Please be aware that your application will not be approved without land use approval.

### This form is NOT required if:

- 1) Water is to be diverted, conveyed, and/or used only on federal lands; OR
- 2) The application is for a water right transfer, allocation of conserved water, exchange, permit amendment, or groundwater registration modification, and all of the following apply:
  - a) The existing and proposed water use is located entirely within lands zoned for exclusive farm-use or within an irrigation district;
  - b) The application involves a change in place of use only;
  - c) The change does not involve the placement or modification of structures, including but not limited to water diversion, impoundment, distribution facilities, water wells and well houses; and
  - d) The application involves irrigation water uses only.

### NOTE TO LOCAL GOVERNMENTS

The person presenting the attached Land Use Information Form is applying for or modifying a water right. The Water Resources Department (WRD) requires its applicants to obtain land use information to be sure the water rights do not result in land uses that are incompatible with your comprehensive plan. Please complete the form or detach the receipt stub and return it to the applicant for inclusion in their water right application. You will receive notice once the applicant formally submits his or her request to the WRD. The notice will give more information about WRD's water rights process and provide additional comment opportunities. You will have 30 days from the date of the notice to complete the land use form and return it to the WRD. If no land use information is received from you within that 30-day period, the WRD may presume the land use associated with the proposed water right is compatible with your comprehensive plan. Your attention to this request for information is greatly appreciated by the Water Resources Department. If you have any questions concerning this form, please contact the WRD's Customer Service Group at 503-986-0801.

### BARGAIN AND SALE DEED

KNOW ALL PERSONS BY THESE PRESENTS, that JACK E. STEVENS, hereinafter called grantor, for the consideration hereinafter stated, does hereby grant, bargain, self and convey unto WHITE RIVER RANCH, LLC, hereinafter called grantee, and unto grantee's heirs, successors and assigns, all of that certain real property with the tenements, hereditaments and appurtenances thereunto belonging or in anywise appertaining, situated in the County of Wasco, State of Oregon, described as follows, to-wit:

#### Parcel 1:

The Southwest quarter of the Southeast quarter of Section 16, Township 4 South, Range 12 East of the Willamette Meridian, County of Wasco, State of Oregon.

### Parcel 2:

The Southwest quarter, the Northwest quarter of the Southeast quarter of Section 16, and the North half of the Southeast quarter of Section 17, Township 4 South, Range 12 East of the Willamette Meridian, County of Wasco, State of Oregon.

Page 1 - Bargain and Sale Deed

### Parcel 3:

The Southeast quarter of the Southeast quarter of Section 17, Township 4 South, Range 12 East of the Willamette Meridian, County of Wasco, State of Oregon.

### Parcel 4:

The East half of the Southwest quarter of Section 17, Township 4 South, Range 12 East of the Williamette Meridian.

### Parcel 5:

The South half of the North half of Section 16, and the South half of the Northeast quarter of Section 17, Township 4 South, Range 12 East of the Willamette Meridian.

#### Parcel 6:

The Southeast quarter of the Northwest quarter of Section 17, Township 4 South, Range 12 East of the Willamette Meridian.

### Parcel 7:

The Southwest quarter of the Southeast quarter of Section 17; the East half of the Northwest quarter, the Northwest quarter of the Northeast quarter, and the East half of the Northeast quarter of Section 20; all of Section 21 except the East half of the Northeast quarter; all that portion of the Northwest quarter lying North and West of the County Market Road in Section 27; and the Northeast quarter, the East half of the Northwest quarter, and that part of the North half of the South half lying North and East of Rock Creek in Section 28, Township 4 South, Range 12 East of the Willamette Meridian.

### Parcel 8:

The Southeast quarter of the Southwest quarter, the South half of the Southeast quarter and the Northeast quarter of the Southeast quarter of Section 22, Township 4 South, Range 12 East of the Willamette Meridian, County of Wasco, State of Oregon.

#### Parcel 9

The Southeast quarter of the Southeast quarter of Section 33 and the South half of Section 34, Township 4 South, Range 12 East of the Willamette Meridian, County of Wasco, State of Oregon.

#### Parcel 10:

The South half of the Northwest quarter and the West half of the Northeast quarter of Section 35, Township 4 South, Range 12 East of the Willamette Meridian, County of Wasco, State of Oregon.

### Parcel 11:

The East half of the Northeast quarter of Section 21 and the West half of the Northwest quarter of Section 22, Township 4 South, Range 12 East of the Willamette Meridian, County of Wasco, State of Oregon.
