7-Umatilla 14-Klamath

One acre foot is the volume of wafer that would cover one acre with one foot of water. To find out how much wafer your pond stores, multiply the surface area by the

average depth. This will give you a rough estimate of cubic feet. One acre-foot equals 43,560 cubic feet.
You can submit a Notice of Exempt Reservoiral your pond stores less than 400,752 cubic feet 43,560 X 9.2.
