Indicate if the land is within an irrigation district. The Department is required to notify irrigation districts if transfers are proposed within their boundaries.

3. CURRENT WATER RIGHTS

Indicate the name on the current water right. Enter the decree, permit or certificate number, whichever applies. Also enter the priority date, authorized use, source of water, and the county it is located in. If the use and source are in different counties, please indicate.

Describe the general delivery system. Include type, size, length, measurements.

Finally, list the capacity of the delivery system in cubic feet per second (cfs).

4. PROPOSED CHANGES

If you are proposing a change in type of use, check the box and provide the proposed new use.

Reference transfer # 8490

Mr. Drolett:

I operate a 100 pair cow calf operation in Lee Valley, just East of Myrtle Point, Oregon and have applied for cost share assistance from the USDA through the environmental quality incentives program. I have been working with Tom Purvis in the Coquille office to develop a total farm management program which will still allow for an efficient sensible farming operation, but provide for a positive impact to the total environmental due to our ranching operations.

I have recently requested a waiver (see enclosed) to allow me to begin the installation of a permanent buried mainline and permanent buried two inch trough watering system which will be used to apply irrigation water and cattle drinking water from the North Fork of the Coquille River to our summer pasturelands prior to the anticipated fall approval of our contract by the Farm Service Agency Committee. I think this waiver will allow us to gain a year on the negative impact associated with our current method of irrigation and cattle watering. More specifically, I will have to allow my cow-calf pairs to water directly from the river even though the river banks have just been completely fenced and will have to install four pumps @ four different diversion points for irrigating pastures versus one permanent irrigation pump and no cattle up and down my permanently fenced banks. I currently am pasturing this property through May 15th. I will pull the cattle off May 15th until hay season (approx. July 1st-15th). Shortly thereafter, I will need to start irrigation and pasture through November 15th.

I have not started the installation of the pipeline, and am aware that I must wait for consideration of a waiver to remain eligible for the financial assistance, and will not use water from the new point prior to your formal decision on this matter. Tom Purvis has communicated the requirement for this pipeline installation in accordance with NCRS standards and specifications and will be sharing all plans and specifications with me prior to installation to meet his approval.

Thanks in advance for your consideration hopefully no later then June 1st 2000, and please do not hesitate to contact me @ 541/267-6990 if you have any questions.

Sincerely,

Harold R. Bettencourt

A change in:

of water.

In the name(s) of

Harold Bettencourt

In my opinion (assuming the right is valid), the proposed change

MAY BE MADE WITHOUT INJURY

WOULD RESULT IN INJURY* to an existing water right.

~~*The approval of this transfer application would result in injury to other water rights because~~

There is one intervening Pod, p# 24097 in SW 1/4 NE 1/4 Sec 22. P# 24097 is SENIOR (1956) in priority to the rights being propose for combining POD's ∴ I would not expect injury to the senior right.

The existing right may not be valid because

Headgate notices HAVE

HAVE NOT

Been issued for diversion from the source(s) which serve(s) this right.

If for change in point of diversion, is there any intervening point(s) for diversion between the authorized and proposed points of diversion? (Yes or No) P# 24097

In my opinion, the order approving the subject transfer application should include the following in regard to the appropriator installing suitable measuring devices in the diversion works:

 (1) PRIOR to the diverting of water at the new point of diversion . . .

✓ (2) WHEN IN the judgement of the watermaster it becomes necessary . . .

The enclosed copy of the transfer application and map(s) is for your records.

Enclosed for your review is a copy of a water right transfer application from N Fk Coquille River, tributary of Coquille River.

Consistent with the Oregon Plan, we are soliciting your input on whether the proposed transfer would injure an instream water right or any other water right in which ODFW has an interest. If you believe that the transfer would injure a water right, please describe the nature of the injury and provide any supporting information which you have available.

ORS 540.525 and 540.532 require that we consult with you to determine if a fish screen or by-pass device should be required in conjunction with a permanent or historic change in a point of diversion. If you request a fish screen or by-pass device, we will include such a condition in the transfer order and the applicant will be eligible to participate in ODFW's cost sharing program for screening and by-pass devices.

We must receive your response in our Grants Pass office

Attention: Teresa Vonn

GRANTS PASS OR 97526

by **May 19, 2000** in order to consider it in our decision on the application and to include the appropriate conditions in any approval order. We will presume that you do not have comments and do not intend to request fish screens or by-pass devices if we do not receive a response.

If you have questions, please call (541)471-2886 ext 228.

REFERENCE: Transfer 8490

On 04-11-2000 we received your water right transfer application requesting a change in POD for use of water from N Coquille River. The application was accompanied by \$ 700.00. Our receipt 36871 is enclosed.

By copy of this letter, we are asking the Watermaster for his usual report regarding the potential for injury to existing water rights which may be caused by the change.

Your application will be examined to determine if additional information is needed. You will be contacted following this examination. If you have a specific reason why your application should be examined ahead of other applications, please send us a letter describing your reason. We may be able to examine your application ahead of others.

You may not use water from the new point of diversion until the transfer application has been approved. In order to avoid any possible forfeiture of the water right, you should continue to use the water as described by your existing water right. If the land is sold before the transfer is approved, you will need to obtain consent from the buyer to complete the transfer.

We will notify you if additional information or corrections to the application or map are required.

If you have any questions, please call the Transfer Section, (800) 624-3199 or (503) 378-3739.
