Permit to appropriate the Public Waters of the State of Oregon

This is to certify that I have examined the foregoing application and do hereby grant the same **SUBJECT TO EXISTING RIGHTS INCLUDING THE EXISTING FLOW POLICIES ESTABLISHED BY THE WATER POLICY REVIEW BOARD** and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 0.015 cubic feet per second measured at the point of diversion from the stream, or its equivalent in case of rotation with other water users, from unnamed Stream 1, with any deficiency in the available supply to be made up by appropriation from unnamed Stream 2.

The use to which this water is to be applied is domestic for five families and stock, being 0.01 cfs for domestic and 0.005 cfs for stock.

If for irrigation, this appropriation shall be limited to of one cubic foot per second or its equivalent for each acre irrigated.

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The priority date of this permit is April 28, 1981

Actual construction work shall begin on or before August 20, 1982 and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1983

Complete application of the water to the proposed use shall be made on or before October 1, 1984

WITNESS my hand this 20th day of August, 1981

John Drolet
Watermaster, Dist. 19
290 North Central
Coos Co. Annex
Coquille, OR 97423

Dear John:

REFERENCE: Files 61604-61609, T.R. McNeely

You have asked if Mr. McNeely can still apply for extensions of the time limits for his Permits 45897, 45898, 45899, 45900, 45901, and 45902. The answer is "Yes, he can".

Except for Permit 45900 which was filed as "completed", we have not been notified as to what, if anything, was accomplished since the permits were issued. No B or C forms were filed, and no response was received from our March 26, 1985 certified letter.

Any request for extension of time would have to be very clear as to what was accomplished within the time limits in terms of construction and use of water. The permits are all awaiting survey, and carry the "survey regardless" designation.

Sincerely,

Steven P. Applegate
Field Crews Supervisor

REFERENCE: File 61609

According to the terms of your Permit 45902 which was for 0.015 cubic foot per second of water from two unnamed streams for domestic use for five families and stock purposes in Coos County,

complete application of water was to have been made by October 1, 1984.

Complete application of water means the application of water to a beneficial use under the permit to the full extent intended. In the case of irrigation, it means beneficial irrigation of all the lands the permittee intends to cover under the terms of the permit. If the water has been used, you should promptly submit notice describing the extent of completion as set forth in the letter accompanying your permit and also in our postal card of October 18, 1984.

ORS 537.260 provides that: "Whenever the time within which any appropriation under a permit should have been perfected has expired and the owner of the permit fails or refuses within three months thereafter to submit to the Water Resources Director proof of completion of the appropriation as required by ORS 537.230 and 537.250, the Water Resources Director may, after 60 days notice by registered mail, order the cancellation of the permit..."

In accordance with the provisions of ORS 537.260, you are hereby notified that unless proof of beneficial use is received within 60 days from the date of this letter, the permit(s) may be canceled without further notice.

If for any reason, you are no longer interested in the project described by the permit, we would appreciate it if you would so advise. If the property involved has changed hands and any part of the project has been completed, you should immediately assign the permit to the new owner and advise us of his name and address. An assignment form will be furnished upon request.

Sincerely,

Bruce A. Estes, Supervisor
Survey/Certificate Section

Coeville, CO 81423

Dear Mr. McNulty:

REFERENCE: Files 61604, 61605, 61606, 61607, 61608 and 61609

Your six applications and accompanying maps have been reviewed. Application 61604 describes the proposed use of 0.015 cubic feet per second of water from two unnamed streams for domestic use for four families and stockwater; Application 61605 describes the proposed use of 0.01 cfs from two unnamed streams for domestic use for five families and stockwater; Application 61606 describes the proposed use of 0.015 cfs from two unnamed streams for domestic use for four families and stockwater; Application 61607 describes the proposed use of 0.02 cfs of water from two streams for domestic use for six families and stockwater; Application 61608 describes the proposed use of 0.015 cfs of water from an unnamed stream for domestic use for five families and stockwater, and Application 61609 describes the proposed use of 0.01 cfs from two unnamed streams for domestic use for five families and stockwater.

Permits will be issued for the use of water from the Coeville River and its tributaries. However, water may not be available during dry periods. The water may be needed to satisfy existing rights.

Your applications are in satisfactory form for the issuance of permits and will be considered for approval with the next group to be processed.

Sincerely,

STEPHEN C. BROWN
Water Rights Engineer
