

Oregon Water Resources Department
Water Right Services Division

Application for Extension of Time

In the Matter of the Application for an Extension of Time)	PROPOSED
for Permit G-15184, Water Right Application G-15254, in)	FINAL
the name of Jerry T. Phetteplace and Jora J. Phetteplace)	ORDER

Permit Information

Application:	G-15254
Permit:	G-15184
Basin:	4 – Hood / Watermaster District 3
Date of Priority:	November 15, 2000
Source of Water:	two wells in Threemile Creek Basin
Purpose or Use:	supplemental irrigation to make up deficiency in rate of 28.6 acres and domestic use expanded
Maximum Rate:	0.125 cubic foot per second (cfs), being no more than 0.0625 cfs from each of two wells in Threemile Creek basin, for supplemental irrigation to make up deficiency in rate of 28.6 acres, being no more than 0.018 cfs for supplemental irrigation to make up a deficiency in rate of 8.4 acres, and no more than 0.097 cfs for supplemental irrigation to make up deficiency in rate of 20.2 acres, and 0.01 cfs for domestic use expanded for one household

Please read this Proposed Final Order in its entirety.

In Summary, the Department proposes to:

- Grant an extension of time to apply water to full beneficial use from October 1, 2006, to October 1, 2019¹.

This Extension of Time request is being processed in accordance with Oregon Revised Statute 537.630 and 539.010(5), and Oregon Administrative Rule Chapter 690, Division 315.

¹Pursuant to ORS 537.630(5), upon the completion of beneficial use of water allowed under the permit, the permittee shall hire a certified water rights examiner to survey the appropriation. Within one year after the complete application of water to a beneficial use (or by the date allowed for the complete application of water to a beneficial use), the permittee shall submit a map of the survey and a new or revised claim of beneficial use as deemed appropriate by the Department.

Well 2 – WASC 50813
cfs - cubic foot per second

AUTHORITY

Generally, see ORS 537.630 and OAR Chapter 690 Division 315.

ORS 537.630(2) provides in pertinent part that the Oregon Water Resources Department (Department) for good cause shown shall order and allow an extension of time within which irrigation or other works shall be completed or the right perfected. In determining the extension, the Department shall give due weight to the considerations described under ORS 539.010(5) and to whether other governmental requirements relating to the project have significantly delayed completion of construction or perfection of the right.

ORS 539.010(5) instructs the Director to consider: the cost of the appropriation and application of the water to a beneficial purpose; the good faith of the appropriator; the market for water or power to be supplied; the present demands therefor; and the income or use that may be required to provide fair and reasonable returns upon the investment.

OAR 690-315-0040 provides that in order to approve an application for an extension of time to complete construction or apply water to full beneficial use, the Department shall make the findings in OAR 690-315-0040(1) including a finding that there is “good cause” to approve the extension. OAR 690-315-0040(2)-(4) contains the factors that the Department must consider to make findings that support a “good cause” determination.

FINDINGS OF FACT

1. On August 27, 2002, Permit G-15184 was issued by the Department. The permit authorizes the use of up to 0.125 cfs of water from two wells in Threemile Creek Basin for being no more than 0.0625 cfs from each of two wells in Threemile Creek basin, for supplemental irrigation to make up deficiency in rate of 28.6 acres, being no more than 0.018 cfs for supplemental irrigation to make up a deficiency in rate of 8.4 acres, and no more than 0.097 cfs for supplemental irrigation to make up deficiency in rate of 20.2 acres, and 0.01 cfs for domestic use expanded for one household. The permit specified complete application of water was to be made on or before October 1, 2006.
2. On September 21, 2020, the permit holder, Jerry T. Phetteplace and Jora J. Phetteplace, submitted an “Application for Extension of Time” (Application) to the Department, requesting the time to apply water to full beneficial use under the terms and conditions of Permit G-15184 be extended from October 1, 2006, to October 1, 2019. This is the first permit extension requested for Permit G-15184.

3. On September 29, 2020, notification of the Application for Permit G-15184 was published in the Department's Public Notice. No public comments were received regarding the Application.

Review Criteria [OAR 690-315-0040]

In order to approve an Application for an Extension of Time to complete construction and/or apply water to full beneficial use pursuant to ORS 537.230 or 537.630, or to begin construction, pursuant to ORS 537.248, the Department must make the findings in OAR 690-315-0040(1)(a) – (d).

Complete Extension of Time Application [OAR 690-315-0040(1)(a)]

4. On September 21, 2020, the Department received a completed Application and the fee specified in ORS 536.050 from the permit holder.

Start of Construction [OAR 690-315-0040(1)(b) and 690-315-0040(5)]

5. Construction of the wells began prior to permit issuance.
6. According to the well log received by the Department on May 22, 1997, construction of WASC 50275 (Well 1) began April 30, 1997.

Based on Finding of Fact (FOF) 5 and 6, the Department has determined that the prosecution of the construction of the well began prior to October 1, 2006.

Good Cause [OAR 690-315-0040(1)(d)]

The Department must find that there is "good cause" to approve the extension. In making a "good cause" finding, the Department shall consider the requirements set forth under OAR 690-315-0040(2).

Reasonable Diligence of the Appropriator [OAR 690-315-0040(2)(a)]

In order to make a finding of "good cause" to approve the extension, the Department shall consider whether the applicant has demonstrated "reasonable diligence" in previous performance under the permit. OAR 690-315-0040(2)(a). In determining "reasonable diligence", the Department shall consider, but is not limited to, the following factors: a) The amount of construction completed within the time allowed in the permit or previous extension; b) The amount of beneficial use made of the water during the permit or previous extension time limits; c) Water right holder conformance with the permit or previous extension conditions; and d) Financial investments made toward developing the beneficial use of water.

Amount of Construction [OAR 690-315-0040(3)(a)]

The amount of construction completed within the time allowed in the.²

7. Construction of the WASC 50813 (Well 2) began prior to permit issuance.

² "Actual Construction" is defined in OAR 690-315-0020(3)(d)(A) and (B) as physical work performed toward completion of the water system which demonstrates the water right permit holder's good faith and intention to complete the project with reasonable diligence. Actual construction does not include planning a diversion system, formulating a business plan, securing financing, letting contracts, purchasing but not installing equipment, surveying, clearing land or planting crops.

8. Work was accomplished during the original development time frame under Permit G-15184 is as follows:

- a meter was installed; and
- the existing irrigation system was modified with more efficient micro sprinklers and drip irrigation.

The Application provides evidence of progress of physical work made towards completion of the water system, enough to qualify as the minimum necessary for the Department to find good cause and reasonable diligence towards complete application of water to a beneficial use.

Compliance with Conditions [OAR 690-315-0040(3)(c)]

The water right permit holder's conformance with the permit conditions. If all conditions have been met.

9. The Department has considered the permit holder's compliance with conditions, and has identified the following concern: the required March static water level measurements have not been received by the Department by October 1, 2006.

Based on FOF 9, the Department has determined that the permit holder has not demonstrated compliance with following permit conditions as required by Permit G-15184:

- "To monitor the effect of water use from the well(s) authorized under this permit, the Department requires the water user to make and report annual static water level measurements. The static water level shall be measured in the month of March."

Beneficial Use of Water [OAR 690-315-0040(3)(b)]

The amount of beneficial use made of the water during the permit time limits.

10. A maximum rate of 0.17 cfs of water has been appropriated, being 0.08 cfs from Well 1, and 0.09 cfs from Well 2 for supplemental irrigation of 28.6 acres. This exceeds the amount of water for supplemental irrigation use authorized under this permit. The authorized amount of water for irrigation use is 0.125 cfs.

Based on FOF 10, the Department has determined that beneficial use of water, in compliance with the terms and conditions of the permit, has not yet been demonstrated because not all permit conditions were satisfied by October 1, 2006.

Financial Investments to Appropriate and Apply Water to a Beneficial Purpose [OAR 690-315-0040(2)(b),(3)(d),(4)(d)]

11. An investment of approximately \$176,500, has been made which is the total cost for complete development of this project.

Based on FOF 11, the Department has determined that the permit holder had made an investment, which provides evidence of good cause and reasonable diligence towards the complete application of water to a beneficial use.

Reasonable Diligence of the Appropriator [OAR 690-315-0040(2)(a)]

The Application provides evidence of progress towards completion of the water system; a financial investment has been made; the permit holder has not demonstrated compliance with all permit conditions, and; beneficial use has not been demonstrated. The Department has determined the applicant has demonstrated the minimum necessary for the Department to find reasonable diligence towards complete application of water to a beneficial use.

The Market and Present Demands for Water [OAR 690-315-0040(4)(a-f)]

The Department's determinations of market and present demand for water or power to be supplied shall consider the requirements set forth under OAR 690-315-0040(4)(a-f). In accordance with OAR 690-315-0040(4), the Department shall consider, but is not limited to, the following factors when determining the market and the present demand for water or power to be supplied:

- *(a) The amount of water available to satisfy other affected water rights and scenic waterway flows;*
- *(b) Special water use designations established since permit issuance, including but not limited to state scenic waterways, federal wild and scenic rivers, serious water management problem areas or water quality limited sources established under 33 U.S.C. 1313(d);*
- *(c) The habitat needs of sensitive, threatened or endangered species, in consultation with the Oregon Department of Fish and Wildlife;*
- *(d) Economic investment in the project to date;*
- *(e) Other economic interests dependent on completion of the project; and*
- *(f) Other factors relevant to the determination of the market and present demands for water and power.*

OAR 690-315-0040(4)(a)

The amount of water available to satisfy other affected water rights and scenic waterway flows.

12. A review of the amount of water available to satisfy other affected water rights and scenic waterway flows was determined at the time of issuance of Permit G-15184; furthermore, water availability for other affected water rights and scenic waterway flows after the permit was issued is determined when an Application for a new water right is submitted.

OAR 690-315-0040(4)(b)

Special water use designations established since permit issuance, including but not limited to state scenic waterways, federal wild and scenic rivers, serious water management problem areas or water quality limited sources established under 33 U.S.C. 1313(d).

13. The points of appropriation for Permit G-15184, located within the Threemile Creek Basin, are not located within a limited or critical groundwater area.
14. Threemile Creek is not located within or above any state or federal scenic waterway.

15. The points of appropriation are not in an area listed by the Department of Environmental Quality as a water quality limited stream.

OAR 690-315-0040(4)(c)

The habitat needs of sensitive, threatened or endangered species, in consultation with the Oregon Department of Fish and Wildlife.

16. Threemile Creek is located within an area ranked “low” for stream flow restoration needs as determined by the Department in consultation with the Oregon Department of Fish and Wildlife, and is located within a Sensitive, Threatened or Endangered Fish Species Area as identified by the Department in consultation with Oregon Department of Fish and Wildlife.

OAR 690-315-0040(4)(d)

Economic interests dependent on completion of the project.

17. An approximate total of \$176,500 has been invested in the project.

OAR 690-315-0040(4)(e)

Other economic interests dependent on completion of the project.

18. Other economic interests dependent on completion of the project have not been identified.

OAR 690-315-0040(4)(f)

Other factors relevant to the determination of the market and present demand for water and power.

19. No other factors relevant to the determination of the market and present demand for water and power have been identified.

Fair Return Upon Investment [OAR 690-315-0040(2)(f)]

20. The use and income from the permitted water development will likely result in reasonable returns upon the investment made to date.

Other Governmental Requirements [OAR 690-315-0040(2)(g)]

21. Delay in the development of this project was not caused by any other governmental requirements.

Unforeseen Events [OAR 690-315-0040(2)(h)]

22. No unforeseen events were identified that contributed to the extended the length of time needed to fully develop and perfect Permit G-15184.

Denial of the Extension Will Result in Undue Hardship [OAR 690-315-0040(2)(i)]

23. A denial of the extension would result in undue hardship, and that there are no other reasonable alternatives exist for meeting water use needs. Wells in this area are low producers, and available water is limited. Loss of this right would likely result in the need to produce lower value crops, and would result in less employment opportunities available from the water user.

Good Faith of the Appropriator [OAR 690-315-0040(2)(c)]

24. The Application provides evidence of good faith of the appropriator under Permit G-15184.

Based on FOF 5, 6, 7, 8, 10, 11, and 17, the Department has determined that the applicant has shown good faith and reasonable diligence.

Duration of Extension [OAR 690-315-0040(1)(c)]

Under OAR 690-315-0040(1)(c), in order to approve an extension of time for water use permits the Department must find that the time requested is reasonable and the applicant can complete the project within the time requested.

25. As of September 21, 2020, all work is complete. An extension of time is necessary to demonstrate compliance with the condition requiring submittal of March static water level measurements.

Given the amount of development left to occur, the Department has determined that the permit holder's request to have until October 1, 2019, to accomplish the application of water to beneficial use under the terms and conditions of Permit G-15184 is both reasonable and necessary.

Good Cause [OAR 690-315-0040(1)(d)]

The Department must find that there is "good cause" to approve the extension. In making a "good cause" finding, the Department shall consider the requirements set forth under OAR 690-315-0040(2).

The Department has considered the reasonable diligence and good faith of the appropriator, the cost to appropriate and apply water to a beneficial purpose, the market and present demands for water to be supplied, the financial investment made and fair and reasonable return upon the investment, the requirements of other governmental agencies, and unforeseen events over which the permit holder had no control, whether denial of the extension will result in undue hardship to the applicant and whether there are no other reasonable alternatives for meeting water use needs, any other factors relevant to a determination of good cause, and has determined that the applicant has shown that good cause exists for an extension of time to apply water to full beneficial use pursuant to OAR 690-315-0040(1)(d).

CONCLUSIONS OF LAW

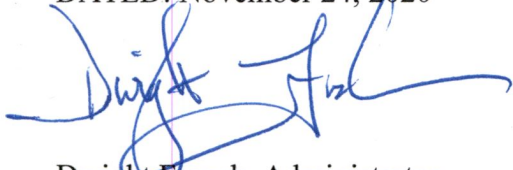

1. The applicant has submitted a complete extension application form and the fee specified in ORS 536.050, as required by OAR 690-315-0040(1)(a).
2. The applicant has complied with the construction timeline requirements to begin construction as required by ORS 537.630, OAR 690-315-0040(1)(b) and OAR 690-315-0040(5).
3. Based on Finding of Facts 5 through 24, full application of water to beneficial use can be accomplished by October 1, 2019, as required by OAR 690-315-0040(1)(c).
4. The applicant can complete the project within the time period requested for the extension on the project and is granted only for the reasonable time necessary to complete water development and apply water to beneficial use. OAR 690-315-0050(5).
5. The applicant has demonstrated good cause for the extension.

PROPOSED ORDER

Based upon the foregoing Findings of Fact and Conclusions of Law, the Department proposes to issue an order to:

Extend the time to apply water to beneficial use under Permit G-15184 from October 1, 2006, to October 1, 2019.

DATED: November 24, 2020

Dwight French, Administrator,
Water Right Services Division

Proposed Final Order Hearing Rights

1. Under the provisions of OAR 690-315-0100 and 690-315-0060, the applicant or any other person adversely affected or aggrieved by the proposed final order may submit a written protest to the proposed final order. The written protest must be received by the Water Resources Department no later than **January 12, 2021**, being 45 days from the date of publication of the proposed final order in the Department's weekly notice.
