Extension of Time for Permit Number G-13679
Permit Holder: City of Aumsville**

Permit Information

Application File G-14758/ Permit G-13679

Basin 2 – Willamette Basin / Watermaster District 16

Date of Priority: May 26, 1998

Authorized Use of Water

Source of Water:	A Well within the Beaver Creek Basin
Purpose or Use:	Municipal
Maximum Rate:	0.446 Cubic Feet per Second (CFS)

This Extension of Time request is being processed in accordance with Oregon Revised Statute 537.630 and 539.010(5), and Oregon Administrative Rule Chapter 690, Division 315

Appeal Rights

This final order is subject to judicial review by the Court of Appeals under ORS 183.482. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.482(1). Pursuant to ORS 536.075 and OAR 137-003-0675, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Application History

Permit G-13679 was issued by the Department on June 18, 1999. The permit called for complete application of water to beneficial use by October 1, 2003. On November 14, 2014, the City of Aumsville submitted an application to the Department for an extension of time for Permit G-13679. In accordance with OAR 690-315-0050(2), on January 6, 2015, the Department issued a Proposed Final Order proposing to extend the time to fully apply water to beneficial use to October 1, 2024. The protest period closed February 20, 2015, in accordance with OAR 690-315-0060(1). No protest was filed.

FINDINGS OF FACT

The Department adopts and incorporates by reference the findings of fact in the Proposed Final Order dated January 6, 2015.

At time of issuance of the Proposed Final Order the Department concluded that, based on the factors demonstrated by the applicant, the permit may be extended subject to the following conditions:

CONDITIONS

1. Development Limitations

Appropriation of any water up to 0.446 cfs under Permit G-13679 shall only be authorized upon issuance of a final order approving a Water Management and Conservation Plan (WMCP) under OAR Chapter 690, Division 86 that authorizes access to a greater rate of appropriation of water under the permit consistent with OAR 690-086-0130(7). The required WMCP shall be submitted to the Department within 3 years of this Final Order. The amount of water used under Permit G-13679 must be consistent with this and subsequent WMCP's approved under OAR Chapter 690, Division 86 on file with the Department.

The deadline established in this Extension Final Order for submittal of a WMCP shall not relieve a permit holder of any existing or future requirement for submittal of a WMCP at an earlier date as established through other orders of the Department. A WMCP submitted to meet the requirements of this final order may also meet the WMCP submittal requirements of other Department orders.

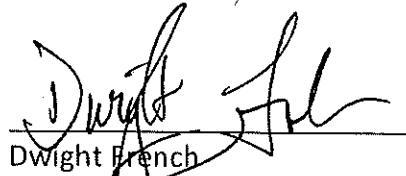

CONCLUSION OF LAW

The applicant has demonstrated good cause for the permit extension pursuant to ORS 537.630, 539.010(5) and OAR 690-315-0080(3).

ORDER

The extension of time for Application G-14758, Permit G-13679, therefore, is approved subject to conditions contained herein. The deadline for applying water to full beneficial use within the terms and conditions of the permit is extended from October 1, 2003 to October 1, 2024.

DATED: February 27, 2015

Dwight French
Water Right Services Division Administrator, for
Thomas M. Byler, Director
Oregon Water Resources Department

PFO – Proposed Final Order

WMCP – Water Management and Conservation Plan

Units of Measure

cfs – cubic feet per second

gpm – gallons per minute

AUTHORITY

Generally, see **ORS 537.630** and **OAR Chapter 690 Division 315**.

ORS 537.630(2) provides in pertinent part that the Oregon Water Resources Department (Department) may, for good cause shown, order and allow an extension of time, for the completion of the well or other means of developing and securing the ground water or for complete application of water to beneficial use. In determining the extension, the department shall give due weight to the considerations described under **ORS 539.010 (5)** and to whether other governmental requirements relating to the project have significantly delayed completion of construction or perfection of the right.

ORS 539.010(5) provides in pertinent part that the Water Resources Director, for good cause shown, may extend the time within which the full amount of the water appropriated shall be applied to a beneficial use. This statute instructs the Director to consider: the cost of the appropriation and application of the water to a beneficial purpose; the good faith of the appropriator; the market for water or power to be supplied; the present demands therefore; and the income or use that may be required to provide fair and reasonable returns upon the investment.

OAR 690-315-0080 provides in pertinent part that the Department shall make findings to determine if an extension of time for municipal and/or quasi-municipal water use permit holders may be approved to complete construction and/or apply water to full beneficial use.

OAR 690-315-0090(3) authorizes the Department, under specific circumstances, to condition an extension of time for municipal and/or quasi-municipal water use permit holders to provide that diversion of water beyond the maximum rate diverted under the permit or previous extension(s) shall only be authorized upon issuance of a final order approving a Water

FINDINGS OF FACT

Background

1. Permit G-13679 was granted by the Department on June 18, 1999. The permit authorizes the use of up to 0.446 cfs of water from a Well within the Beaver Creek Basin, for municipal use. It specified that complete application of water was to be made on or before October 1, 2003.
2. Due to an ongoing permit extension rulemaking, in 1998 the Department stopped processing pending Applications for Extension of Time for municipal and quasi-municipal permits, and did not require municipal and quasi-municipal water use permit holders to submit Applications for Extension of Time during the rulemaking process.
3. Municipal and quasi-municipal water use permit extension rules OAR 690-315-0070 through 690-315-0100 became effective on November 1, 2002. The rules were subsequently amended, and the amended rules became effective on November 22, 2005.
4. The permit holder, the City of Aumsville (City), submitted an "Application for Extension of Time" to the Department on November 14, 2014, requesting the time to apply water to full beneficial use under the terms and conditions of Permit G-13679 be extended from October 1, 2003 to October 1, 2024. This is the first extension of time request for Permit G-13679.
5. Notification of the City's Application for Extension of Time for Permit G-13679 was published in the Department's Public Notice dated November 25, 2014. No public comments were received regarding the extension application.

Review Criteria for Municipal Quasi-Municipal Water Use Permits [OAR 690-315-0080(1)]

The time limits to complete construction and/or apply water to full beneficial use may be extended if the Department finds that the permit holder has met the requirements set forth under OAR 690-315-0080. This determination shall consider the applicable requirements of ORS 537.230¹, 537.630² and/or 539.010(5)³

Complete Extension of Time Application [OAR 690-315-0080(1)(a)]

6. On November 14, 2014, the Department received a completed Application for Extension

¹ ORS 537.230 applies to surface water permits only.

² ORS 537.630 applies to ground water permits only.

³ ORS 537.010(5) applies to surface water and ground water permits.

of Time and the fee specified in ORS 536.050 from the permit holder.

Start of Construction [OAR 690-315-0080(1)(b)]

7. Permit G-13679 was issued prior to June 29, 2005; therefore, the applicant is not required to provide evidence of actions taken to begin actual construction of the project.⁴

Duration of Extension [OAR 690-315-0080(1)(c) and (1)(d)]

Under OAR 690-315-0080(1)(c),(d), in order to approve an extension of time for municipal and quasi-municipal water use permits the Department must find that the time requested is reasonable and the applicant can complete the project within the time requested.

8. The remaining work to be accomplished under Permit G-13679 consists of completing construction of the water system including drilling the well, connecting piping to the raw water line, and applying water to full beneficial use.
9. As of October 1, 2003 the permit holder had not appropriated any of the 0.446 cfs of water authorized under Permit G-13679 for municipal purposes. There is an undeveloped portion of 0.446 cfs of water under Permit G-13679 as per OAR 690-315-0010(6)(g).
10. In addition to the 0.446 cfs of water from one well as authorized under Permit G-13679, the City holds the following municipal water rights:
 - Certificate 65917 for 0.29 cfs of water from Boone Park Well #1 within the Mill Creek Basin;
 - Certificate 32214 for 0.3 cfs of water from Well 3 (Tower Well) within the Mill Creek Basin;
 - Permit G-10223, modified by Permit Amendment T-11186, for 1.4 cfs of water from Wells 1, 2 and Well 3 within the Mill Creek Basin, not to exceed 0.45 cfs from Well 1 and 0.95 cfs from Well 2;
 - Permit G-11891 for 0.45 cfs of water from Reservoir Well within the Mill Creek Basin;

These water rights and permits total 2.886 cfs of water. Park Well #1 is associated with taste and odor problems.

⁴ Section 5, Chapter 410, Oregon Laws 2005 and OAR 690-315-0070(3)(d).

11. The City also holds an un-adjudicated Ground Water Registration GR-3258 for 85 gpm of water from Baker Well within the Mill Creek Basin. This well is associated with taste and odor problems.
12. According to the City, their peak water demand within its service area boundaries was 1.84 cfs in 2014.
13. According to the City, in 2014, the population within the service boundary of the City of Aumsville was 3,895. The City of Aumsville estimates the population will increase at growth rate of 1 percent per year, reaching an estimated population of 4,733 by the year 2024.
14. According to the City, their peak day demand is projected to be approximately 2.85 cfs of water by the year 2024.
15. Full development of Permit G-13679 is needed to address the present and future water demand of the City, including system redundancy and emergency use.
16. The City's request for an extension of time until October 1, 2024, to apply water to full beneficial use under the terms and conditions of Permit G-13679 is both reasonable and necessary.

Good Cause [OAR 690-315-0080(1)(e) and (3)(a-a)and (4)]

The Department's determination of good cause shall consider the requirements set forth under OAR 690-315-0080(3) and OAR 690-315-0080(4).

Reasonable Diligence and Good Faith of the Appropriator [OAR 690-315-0080(3)(a),(3)(c) and (4)]

Reasonable diligence and good faith of the appropriator must be demonstrated during the permit period or prior extension period as a part of evaluating good cause in determining whether or not to grant an extension. In determining the reasonable diligence and good faith of a municipal or quasi-municipal water use permit holder, the Department shall consider activities associated with the development of the right including, but not limited to, the items set forth under OAR 690-315-0080(4) and shall evaluate how well the applicant met the conditions of the permit or conditions of a prior extension period.

17. During the original development time frame under Permit G-13679 the City has developed contract documents and specifications for drilling a new water supply well, and drilled test holes.
18. Since October 1, 2003, the City has drafted updates to a WMCP and a Water Master Plan.
19. According to the City, as of November 14, 2014, they have invested approximately \$48,310, which is approximately 7 percent of the total projected cost for complete development of this project. The City estimates an additional \$660,000 investment is

needed for the completion of this project. The Department recognizes that while some of these investment costs are unique to construction and development solely under G-13679, other costs included in this accounting are not partitioned out for G-13679 because (1) they are incurred under the development of a water supply system jointly utilized under other rights held by the City, and/or (2) they are generated from individual activities counted towards reasonable diligence and good faith as listed in ORS 690-315-0080(4) which are not associated with just this permit, but with the development and exercise of all the City's water rights.

20. As of October 1, 2003, no water has been appropriated from a well for beneficial municipal purposes under the terms of this permit.
21. The Department has considered the permit holder's compliance with conditions, and has identified the following concern: the record does not show that a plan to monitor and report the impact of water use under this permit has been submitted to the Department; the plan was due June 18, 2000.

Cost to Appropriate and Apply Water to a Beneficial Purpose [OAR 690-315-0080(3)(b)]

22. According to the City, as of November 14, 2014, they have invested approximately \$48,310, which is approximately 7 percent of the total projected cost for complete development of this project. The City estimates an additional \$660,000 investment is needed for the completion of this project.

The Market and Present Demands for Water [OAR 690-315-0080(3)(d) and (5)(a-f)]

For municipal or quasi-municipal water use permits issued after November 2, 1998, in making a determination of good cause pursuant to 690-315-0080(3)(d), the Department shall also consider, but is not limited to, the factors in 690-315-0080(5)(a-f).

23. The amount of water available to satisfy other affected water rights and scenic waterway flows; special water use designations established since permit issuance, including but not limited to state scenic waterways; federal wild and scenic rivers, serious water management problem areas or water quality limited sources established under 33 U.S.C. 1313(d); or the habitat needs of sensitive, threatened or endangered species, in consultation with the Oregon Department of Fish and Wildlife [OAR 690-315-0080(5)(a-f)].
 - a. The amount of water available to satisfy other affected water rights and scenic waterway flows was determined at the time of issuance of Permit G-13679; furthermore, water availability for other affected water rights and scenic waterway flows after the permit was issued is determined at such time that such application for a new water right is submitted. The point of appropriation for Permit G-13679 is located within the Stayton-Sublimity Limited Ground Water

Area. The point of appropriation for Permit G-13679, located within the Mill Creek Basin, is not located within or above any state or federal scenic waterway. The point of appropriation is within areas ranked moderate for stream flow restoration needs as determined by the Department in consultation with the Oregon Department of Fish and Wildlife, and is located within a Sensitive, Threatened or Endangered Fish Species Area as identified by the Department in consultation with Oregon Department of Fish and Wildlife. The point of appropriation is not in an area listed by the Department of Environmental Quality as a water quality limited stream.

Economic investment in the project to date [OAR 690-315-0080(5)(d)].

24. According to the City, as of November 14, 2014, they have invested \$48,310, which is approximately 7 percent of the total projected cost for complete development of this project. The City estimates an additional \$660,000 investment is needed for the completion of this project.

Other economic interests dependent on completion of the project [OAR 690-315-0080(5)(e)].

25. None have been identified.

Other factors relevant to the determination of the market and present demand for water and power [OAR 690-315-0080(5)(f)].

26. As described in Findings 9 through 15 the City of Aumsville has indicated, and the Department finds that the City must rely on full development of Permit G- 13679 to meet its present and future water demands.
27. City of Aumsville projects a population increase of 1 percent per year over the next ten years.
28. Given the current water supply situation of the City as well as current and expected demands, there is a market and present demand for the water to be supplied under Permit G-13679.
29. OAR 690-315-0090(3) requires the Department to place a condition on this extension of time to provide that appropriation of water any water up to 0.446 cfs under Permit G-13679 shall only be authorized upon issuance of a final order approving a Water Management and Conservation Plan(s) (WMCP) under OAR Chapter 690, Division 86 which grants access to a greater appropriation of water under the permit consistent with OAR 690-086-0130(7). A "Development Limitation" condition" is specified under Item 1 of the "Conditions" section of this PFO to meet this requirement.

Fair Return Upon Investment [OAR 690-315-0080(3)(e)]

30. Use and income from the permitted water development project would likely result in reasonable returns upon the investment made in the project to date.

Other Governmental Requirements [OAR 690-315-0080(3)(f)]

31. Delays caused by any other governmental requirements in the development of this project have not been identified.

Events which Delayed Development under the Permit [OAR 690-315-0080(3)(g)]

32. Delay of development under Permit G-13679 was due, in part, to the size and scope of the municipal water system, which was designed to be phased in over a period of years, and to lack of new development which would fund a construction of a new well under "System Development Charges."

CONCLUSIONS OF LAW

1. The City is entitled to apply for an extension of time to complete construction and/or completely apply water to the full beneficial use pursuant to ORS 537.630(2).
2. The City has submitted a complete extension application form and the fee specified under ORS 536.050(1)(k), as required by OAR 690-315-0080(1)(a).
3. Pursuant to Section 5, Chapter 410, Oregon Laws 2005, the permit holder is not required to demonstrate that actual construction of the project began within one year of the date of issuance of the permit, as otherwise required by OAR 690-315-0080(1)(b).
4. Pursuant to ORS 540.510(3)(a), water under Permit G-13679 may be applied to beneficial use on land to which the right is not appurtenant.
5. The time requested to apply water to full beneficial use is reasonable, as required by OAR 690-315-0080(1)(c).
6. Full application of water to beneficial use can be completed by October 1, 2024⁵ pursuant to OAR 690-315-0080(1)(d).

⁵ For permits applied for or received on or before July 9, 1987, upon complete development of the permit, you must notify the Department that the work has been completed and either: (1) hire a water right examiner certified under ORS 537.798 to conduct a survey, the original to be submitted as required by the Department, for issuance of a water right certificate; or (2) continue to appropriate water under the water right permit until the Department conducts a survey and issues a water right certificate under ORS 537.625.

7. The Department has considered the reasonable diligence and good faith of the appropriator, the cost to appropriate and apply water to a beneficial purpose, the market and present demands for water to be supplied, the financial investment made and the fair return upon the investment, the requirements of other governmental agencies, and unforeseen events over which the water right permit holder had no control, and the Department has determined that the City has shown good cause for an extension of time to apply the water to full beneficial use pursuant to OAR 690-315-0080(1)(e).
8. As required by OAR 690-315-0090(3) and as described in Finding 29, above, and specified under Item 1 of the “Conditions” section of this PFO, the appropriation of any water up to 0.446 cfs under Permit G-13679 shall only be authorized upon issuance of a final order approving a Water Management and Conservation Plan(s) under OAR Chapter 690, Division 86 that authorizes access to a greater rate of appropriation of water under the permit consistent with OAR 690-086-0130(7).

Proposed Order

Based upon the foregoing Findings of Fact and Conclusions of Law, the Department proposes to issue an order to:

Extend the time to apply the water to beneficial use under Permit G-13679 from October 1, 2003 to October 1, 2024.

Subject to the following conditions:

CONDITIONS

1. **Development Limitations**
Appropriation of any water up to 0.446 cfs under Permit G-13679 shall only be authorized upon issuance of a final order approving a Water Management and Conservation Plan (WMCP) under OAR Chapter 690, Division 86 that authorizes access to a greater rate of appropriation of water under the permit consistent with OAR 690-086-0130(7). The required WMCP shall be submitted to the Department within 3 years of this Final Order. The amount of water used under Permit G-13679 must be consistent with this and subsequent WMCP’s approved under OAR Chapter 690, Division 86 on file with the Department.

The deadline established in the Extension Final Order for submittal of a WMCP shall not relieve a permit holder of any existing or future requirement for submittal of a WMCP at an earlier date as established through other orders of the Department. A WMCP

submitted to meet the requirements of the final order may also meet the WMCP submittal requirements of other Department orders.

DATED: January 6, 2015

Dwight French
Water Right Services Division Administrator

If you have any questions, please check the information box on the last page for the appropriate names and phone numbers.

Proposed Final Order Hearing Rights

1. Under the provisions of OAR 690-315-0100(1) and 690-315-0060, the applicant or any other person adversely affected or aggrieved by the proposed final order may submit a written protest to the proposed final order. The written protest must be received by the Water Resources Department no later than **February 20, 2015**, being 45 days from the date of publication of the proposed final order in the Department's weekly notice.
2. A written protest shall include:
 - a. The name, address and telephone number of the petitioner;
 - b. A description of the petitioner's interest in the proposed final order and if the protestant claims to represent the public interest, a precise statement of the public interest represented;
 - c. A detailed description of how the action proposed in the proposed final order would adversely affect or aggrieve the petitioner's interest;
 - d. A detailed description of how the proposed final order is in error or deficient and how to correct the alleged error or deficiency;
 - e. Any citation of legal authority supporting the petitioner, if known;
 - f. Proof of service of the protest upon the water right permit holder, if petitioner is other than the water right permit holder; and
 - g. The applicant or non-applicant protest fee required under ORS 536.050.
3. Within 60 days after the close of the period for requesting a contested case hearing, the Director shall:
 - a. Issue a final order on the extension request; or
 - b. Schedule a contested case hearing if a protest has been submitted, and:
 - 1) Upon review of the issues, the Director finds there are significant disputes related to the proposed agency action; or
 - 2) The applicant submits a written request for a contested case hearing within 30 days after the close of the period for submitting protests.

July 20, 2015

City of Aumsville
Attn: Steve Oslie, Public Works Director
595 Main Street
Aumsville, OR 97325

Subject: Water Management and Conservation Plan

Dear Mr. Oslie:

On July 17, 2015, I mailed you the final order approving the City of Aumsville's (City) Water Management and Conservation Plan (WMCP) which authorizes the diversion of up to a maximum of 0.446 cfs of water under Permit G-13679 and up to a maximum of 1.4 cfs of water under Permit G-10223 (*being no more than 0.45 cfs from Lucas Well, no more than 0.95 cfs from Boone Park Well 2, and no more than 1.4 cfs from Church Well*).

Unfortunately, the cover letter accompanying the final order incorrectly identified the due date for submittal of the City's WMCP progress report as being July 19, 2025. It should have been **July 15, 2019**, as specified in the final order.

To clarify, I have enclosed a copy of the final order which specifies that:

- The City's WMCP shall remain in effect until **July 15, 2025**;
- The City is required to submit a progress report to the Department by **July 15, 2019**, detailing progress made toward the implementation of conservation benchmarks scheduled in the WMCP; and
- The City must submit an updated WMCP to the Department by **November 15, 2024**.

NOTE: The deadline established in the attached final order for submittal of an updated WMCP (consistent with OAR Chapter 690, Division 086) shall not relieve the City of Aumsville from any existing or future requirement(s) for submittal of a water management and conservation plan at an earlier date as established through other final orders of the Department.

I apologize for any confusion this may have caused. Please feel free to contact me at 503-986-0880 or Lisa.J.Jaramillo@wrds.state.or.us if you have any questions.

Sincerely,

Lisa J. Jaramillo
Water Management and Conservation Analyst

**BEFORE THE WATER RESOURCES DEPARTMENT
OF THE
STATE OF OREGON**

In the Matter of the Proposed Water)	FINAL ORDER APPROVING A
Management and Conservation Plan for)	WATER MANAGEMENT AND
City of Aumsville, Marion County)	CONSERVATION PLAN

Authority

OAR Chapter 690, Division 086, establishes the process and criteria for approving water management and conservation plans required under the conditions of permits, permit extensions and other orders of the Department. An approved water management and conservation plan may authorize the diversion and use of water under a permit extended pursuant to OAR Chapter 690, Division 315.

Findings of Fact

1. The City of Aumsville submitted a Water Management and Conservation Plan (plan) to the Water Resources Department (Department) on December 3, 2014. The required statutory fee for review of the plan was received by the Department on December 19, 2014. The plan was required by conditions set forth under the City's previous plan approved on July 27, 1999, a final order issued on September 29, 2009, approving an extension of time for Permit G-10223, and a final order issued on February 27, 2015, approving an extension of time for Permit G-13679.
2. The Department published notice of receipt of the plan on December 30, 2014, as required under OAR Chapter 690, Division 086. No comments were received.
3. The Department provided written comments on the plan to the City on March 19, 2015. In response, the City submitted a final revised plan on April 29, 2015.
4. The Department reviewed the final revised plan and finds that it contains all of the elements required under OAR 690-086-0125.
5. The projections of future water requirements in the final revised plan demonstrate a need for 1.4 cfs of water available under Permit G-10223 and for 0.446 cfs of water available under Permit G-13679 to help meet the City's overall anticipated 20-year demands. These projections are reasonable and consistent with applicable land use plans.
6. The system is fully metered, except for one remaining meter on the drinking fountain and restroom facilities at the city park. The rate structure includes a base rate and volumetric charge. Unaccounted-for water is estimated at 14 percent.

This is a final order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

7. The final revised plan includes 5-year benchmarks for the City to continue and/or implement the following water conservation activities and/or programs:
 - a. Install the last remaining meter to be placed on the drinking fountain and restroom facilities at the city park;
 - b. Implement a meter testing and maintenance program that includes the following elements:
 - i. Test well and booster station flow meters, calibrate booster station flow meter(s), and continuously log and trend booster station flow meter data on a SCADA system;
 - ii. Test small customer meters as needed and replace them on a 20-year cycle, or as required;
 - iii. Test/replace large customer meters on a 5-year cycle, or as required; and
 - iv. Require that all new construction must include a water meter;
 - c. Implement a program to conduct annual water audits;
 - d. Continue its program to perform leak repair and line replacement as needed, perform site inspections for meters showing unusually high water usage, and implement leak detection studies on a 5-year cycle, or as needed;
 - e. Continue billing its customers on the amount of water used, and implement a program to include the customer's billing history and a comparison of their water use against other water users on every water bill;
 - f. Continue the current public education program by providing annual Consumer Confidence reports, WaterWise school presentations, newsletters with water-related articles, and outreach to industrial facilities and the school district for pledges to conserve water;
 - g. Expand the public education program by updating its website to include information about water rates, water saving practices and procedures, leak detection, and water efficient landscaping; and
 - h. Continue to submit annual water use reports required under OAR 690-085 to the Department.
8. The final revised plan identifies ground water (wells) as the source of the City's water rights. The plan accurately and completely describes that, while the City's wells are not located within the designated boundaries of any critical ground water area, they are within the boundaries of the Stayton-Sublimity Ground Water Limited Area. Further, the City does not hold any surface water sources that are listed as being water quality limited or in which streamflow-dependent species listed as sensitive, threatened or endangered are present.
9. The water curtailment element included in the final revised plan satisfactorily promotes water curtailment practices and includes a list of three stages of alert with concurrent curtailment actions.

10. The diversion of water under Permit G-10223 will be increased and the diversion of water under Permit G-13679 will be initiated during the next 20 years and is consistent with OAR 690-086-0130(7), as follows:
- a. As evidenced by the 5-year conservation benchmarks established by the City (*as described in Finding of Fact #7 above*), the final revised plan includes a schedule for the continuation and implementation of water conservation measures that would provide water at a cost that is equal to or lower than the cost of other identified sources;
 - b. The increased use of water under Permits G-10223 and G-13679 is the most feasible and appropriate water supply alternative available to the City at this time, considering that water savings from identified conservation measures is not anticipated to fully meet the City's current and future water needs, that interconnection with the City of Salem is a cost prohibitive supply option as compared to the use of the City's existing ground water sources under Permits G-10223 and G-13679, and that some of the City's other ground water sources have production capacity issues which could be offset by the ability to utilize authorized wells under Permits G-10223 and G-13679; and
 - c. At this time, there are no known requirements for the City to take any mitigation actions under state or federal law.

Conclusion of Law

The Water Management and Conservation Plan submitted by the City of Aumsville is consistent with the criteria in OAR Chapter 690, Division 086.

Now, therefore, it is ORDERED:

Duration of Plan Approval:

1. The City of Aumsville Water Management and Conservation Plan is approved and shall remain in effect until **July 15, 2025**, unless this approval is rescinded pursuant to OAR 690-086-0920.

Development Limitations:

2. The limitation of the diversion of water under Permit G-10223 established by the extension of time approved on July 10, 2015, is removed. Subject to other limitations or conditions of the permit, the City of Aumsville is now authorized to divert up to a maximum of 1.4 cfs under Permit G-10223 (*being no more than 0.45 cfs from Lucas Well, no more than 0.95 cfs from Boone Park Well 2, and no more than 1.4 cfs from Church Well*).
3. The limitation of the diversion of water under Permit G-13679 established by the extension of time approved on February 27, 2015, is removed. Subject to other limitations or conditions of the permit, the City of Aumsville is now authorized to divert up to 0.446 cfs under Permit G-13679.

Plan Update Schedule:

4. The City of Aumsville shall submit an updated plan meeting the requirements of OAR Chapter 690, Division 086 within 10 years and no later than **November 15, 2024**.

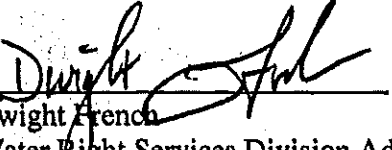

Progress Report Schedule:

5. The City of Aumsville shall submit a progress report containing the information required under OAR 690-086-0120(4) by **July 15, 2019**.

Other Requirements for Plan Submittal:

6. The deadline established herein for the submittal of an updated Water Management and Conservation Plan (consistent with OAR Chapter 690, Division 086) shall not relieve the City of Aumsville from any existing or future requirement(s) for submittal of a Water Management and Conservation Plan at an earlier date as established through other final orders of the Department.

Dated at Salem, Oregon this 15 day of July, 2015.

City of Aumsville
Attn: Steve Oslie, Public Works Director
595 Main Street
Aumsville, OR 97325

Subject: Water Management and Conservation Plan

Dear Mr. Oslie:

Enclosed, please find the final order approving City of Aumsville's (City) Water Management and Conservation Plan (WMCP) and authorizing the diversion of up to a maximum of 0.446 cfs of water under Permit G-13679 and up to a maximum of 1.4 cfs of water under Permit G-10223 (*being no more than 0.45 cfs from Lucas Well, no more than 0.95 cfs from Boone Park Well 2, and no more than 1.4 cfs from Church Well*).

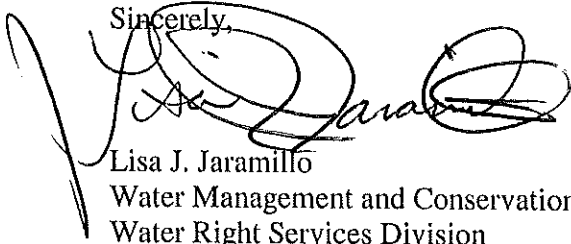

The attached final order specifies that:

- The City's WMCP shall remain in effect until **July 15, 2025**;
- The City is required to submit a progress report to the Department by **July 19, 2025**, detailing progress made toward the implementation of conservation benchmarks scheduled in the WMCP; and
- The City must submit an updated WMCP to the Department by **November 15, 2024**.

NOTE: The deadline established in the attached final order for submittal of an updated WMCP (consistent with OAR Chapter 690, Division 086) shall not relieve the City of Aumsville from any existing or future requirement(s) for submittal of a water management and conservation plan at an earlier date as established through other final orders of the Department.

We appreciate your cooperation in this effort. Please do not hesitate to contact me at 503-986-0880 or Lisa.J.Jaramillo@wrdd.state.or.us if you have any questions.

PROPOSAL

City of Aumsville
595 Main Street
Aumsville, Oregon 97325

Gentlemen;

The undersigned bidder declares that the only person or parties interested in this Proposal are those named herein; that this Proposal is, in all respects, fair and without fraud, and that it is made without collusion with any official or representative of the Owner; and that this Proposal is made without any connection or collusion with any other person making a Proposal on this contract.

The bidder further declares that:

- He has examined the plans and specifications and has become thoroughly familiar with the terms and conditions of the Contract Documents.
- He has personally examined the site of work and has satisfied himself as to the conditions of the work; the nature and type of excavation to be done; the condition and location of existing roadways and streets giving access to the work site; and the topography of the work site.
- He has exercised his own judgement regarding the interpretation of the sub-surface information and has utilized all other data which he believes pertinent from the Engineer, Owner and other sources in arriving at his conclusion;
- ▶ He has reviewed the description of quantities of work and materials as included herein, and understands they are brief and intended to identify the general nature of the work with the detailed requirements of the Contract Documents.

The bidder does hereby propose to furnish all materials, labor and equipment and do all work necessary to construct and complete the project entitled:

New Water Supply Well

and all specified work appurtenant thereto in connection with this project, for the Owner, within the time limit specified, and in accordance with the Contract Documents, plans and drawings, and all addenda and change order documents as prepared by JMS Engineering, for the sums set forth in the following Schedule of Prices:

REFERENCE: Application for Extension of Time

Dear Extension of Time Applicant:

The Water Right Services Division has received your application for an extension of time for **APPLICATION FILE #: G-14758 (Permit G-13679)**. Your application will be reviewed in the future. Following the review, you will receive a Proposed Final Order either approving or rejecting the extension of time request. A 45-day protest period begins upon issuance of the Proposed Final Order. After the protest period closes, a Final Order is issued.

If you are interested in having your application reviewed sooner, you may pay to have your file processed immediately, using the Reimbursement Authority program, which is described at: http://www.wrd.state.or.us/OWRD/mgmt_reimbursement_authority.shtml

You may continue the use of water under your water right until the Water Resources Department formally takes action on your extension application. If your permit includes conditions, water use reporting, water level measurement reporting, etc., you are required to comply with the conditions.

Any additional development that occurs after the expired completion date, identified on the permit or an extension order, can only be claimed upon an approved extension application.

If you have questions concerning your extension of time application, please contact Machel Bamberger at (503) 986-0802. For general information about the Water Resources Department, you may contact the Water Resources' Customer Service Group at (503) 986-0801 or you may access the Department's website at: www.wrd.state.or.us.

Historical data from the well records was used to determine the annual average, minimum month, and peak month water systems demands. Water demands per capita include residential, commercial, industrial and institutional users. The demands also include unaccounted for water (e.g. water loss, flushing, unmetered usage, etc.).

The annual average was calculated as an average of all of the monthly average flows for a given year. The minimum and maximum months were selected as the month with the least and greatest metered average, respectively. The peak day was taken from a two day running average of data from the reservoir meter and adjusted to include the flow of the Reservoir well that is not connected to the meter. The peak hour was estimated using a peaking factor typical of similar cities in the area.

TABLE 2.2: Existing Water Demand (gallons per capita per day)

Demand Scenario	2010	2011	2012	2013	Average 2010-2013	2013 Design Values
Population	3584	3680	3700	3815	varies	3815
Annual Average (gpcd)	79	69	76	78	76	73
Min Month (gpcd)	46	47	43	55	48	42
Max Month (gpcd)	150	136	114	130	133	141
Maximum Day (gpcd)	224	180	186	145	184	210
Peak Hour (gpcd)*	380	307	316	246	312	357

Peak hour is estimated to be 1.7 maximum day demand.

Table 2.3 and Chart 2.1 show a comparison of the typical water use to that in neighboring communities. Overall, Aumsville's water use is less than comparable communities. This is likely due to its lack of large industrial facilities.

TABLE 2.3: Comparison of Per Capita Water Consumption

Demand (gpcd)	Aumsville	Amity	Silverton	Stayton	Wilsonville	Willamina	Gates	Wood Village
Average Day (gpcd)	73	114	142	309	163	118	149	100
Max Month (gpcd)	141	162	239		286	171	262	140
Max Day (gpcd)	210	257	304	752	405	219	459	190
Peaking Factor	1.7	1.7	2.1		1.7	1.7	1.7	1.5

 WATER, UTILITIES

to existing demands per capita. If the users implement additional water conservation measures, these demands will decrease. These demands were used as a basis to develop future improvements in the City's water system. Future demands include an industrial reserve of 100 gpm starting in 2019.

TABLE 2.6: Existing and Future Water System Demands

Future Demand Scenario	2018 Design	2019	2024	2034
Population	3815	4318	4733	5673
Annual Average (gpm)	194	320	341	389
Min Month (gpm)	112	226	239	266
Max Month (gpm)	373	522	563	654
Maximum Day (gpm)*	557	730	791	928
Peak Hour (gpm)**	947	1172	1275	1508

*Maximum Day based on 2 day running average to account for changes in storage volume

**Peak hour is estimated to be 1.7* maximum day demand.

***Starting in 2019, an industrial reserve of 100 gpm was added to all demands.

2.4.5 Distribution System Planning Criteria

Distribution system planning criteria include system performance standards for pressures and are summarized in Table 2.7. For the City of Aumsville, the highest flow requirements correspond to a fire flow event during maximum day demands.

In evaluating existing residential areas for fire flows, Keller Associates assumed a minimum fire flow requirement of 1,000 gpm for 2 hours while maintaining at least 20 psi in the distribution system. Aside from residential areas, the local fire authority requested that a fire flow capacity of 1,500 gpm be provided for commercial areas, schools, and large churches. Structures with ISO ratings above 1,500 gpm were also modeled with their required demand. A cap of 3,000 gpm was agreed upon by the City and the local fire authority as a reasonable limit for fire flow to existing buildings. The system should be capable of providing these fire flows while also satisfying maximum day demands. Existing structures with ISO fire flow requirements above 3,000 gpm would need to have fire sprinklers to meet these criteria. Future structures may need sprinklers for fire flow demands as low as 1,500 gpm, depending on location. See Appendix A figures for existing and proposed fire flows with capital improvements. For the purposes of this analysis, the model assumed that all of the pumps were operational for delivering fire flows to the pressure zones serviced directly by the booster station. The booster station capacity evaluation criteria assume that the largest pump is offline.

In addition to design standards for the delivery of flow rates, standards for system pressures are necessary for the normal daily operation of the water system. The aim of standards for pressure is to provide safe and reliable service to water users under a variety of system conditions. If pressures are too high, damage can occur within the distribution system and at points of use. If pressures are too low, a variety of issues arise - including potential for backflow contamination, limited water availability, and a lower level of service. The recommended distribution pressure standards for new connections are listed in Table 2.7. Similar to the fire flow criteria, the booster facilities should be capable of delivering peak hour demands with the largest pumps off-line.

2.0 PLANNING CRITERIA

This chapter details the planning criteria used to establish standards by which the system is evaluated and serve as the basis for identifying needed improvements. These criteria include an evaluation of population, development areas, potable water demands, land use, and other factors affecting the water system.

2.1 POPULATION PROJECTIONS

The population values presented in Table 2.1 summarize existing and future populations used for this planning effort. Growth rates were obtained from the "Population Forecasts for Marion County, its Cities and Unincorporated Areas 2010-2030" which was completed by Portland State University Population Research Center. This study provided population projections for the UGB. The growth rates provided in the study were used in conjunction with PSU's certified population for 2011-2013 and the US census in 2010 to determine the population projections shown in Table 2.1.

TABLE 2.1: Existing & Future Populations

Year	Population
2010	3584
2011	3680
2012	3700
2013	3815
2014	3895
2019	4318
2024	4733
2029	5173
2034	5673

 CALAPA, OREGON

2.2 STUDY AREA

The study area encompasses the existing Aumsville City limits and those users currently being serviced outside the City limits. The study area also includes developed areas outside of the City limits that are currently served by City water system. The future (2034) service area is not expected to change geographically within the planning period, with infill as the most likely growth situation.

2.3 LAND USE AND DEVELOPMENT AREAS

Land use assumptions for current population and future development are summarized in Section 3.5 and illustrated in Figure 1. The City provided input to determine where likely residential & industrial growth would occur during the 20-year planning horizon.

2.4 PRESENT AND FUTURE WATER DEMANDS

2.4.1 Existing Demands

Table 2.2 shows the historical per capita demand data for 2010 through 2013 along with the design demands that were used for evaluating the existing system. Supporting data can be found in Appendix C.

TABLE 3.7: Water Rights

Well	Application #	Permit #	Priority Date	Certification #	Transfer #	Source	Use	Allowed Rate	Actual Diversion				Authorized Completion Date
									Max. Instantaneous Rate Diverted to Date (cfs)	Max. Annual Quantity Diverted to Date (MG)	Avg. Monthly Diversion (MG)	Avg. Daily Diversion (gal)

Application for Extension of Time for Municipal and Quasi-Municipal Water Use Permits

Make use of this form, *Application for Extension of Time for Municipal and Quasi-Municipal Water Use Permits*, only if the permit uses the word "Municipal" or "Quasi-municipal" in the description of the purpose or use to which water is to be applied.

TO THE DIRECTOR OF THE OREGON WATER RESOURCES DEPARTMENT

A separate extension application must be submitted for each permit as per OAR 690-315-0070(2). This page, with an original signature by the permit holder of record, must accompany the extension of time application.

This application and a summary of review criteria and procedures that are generally applicable to this application are available at <http://www.wrd.state.or.us/OWRD/PUBS/forms.shtml>

do hereby request that the time in which to:

complete construction (of diversion/appropriation works and/or purchase and installation of the equipment necessary to the use of water), which time now expires on **October 1, 2003**, be extended to **October 1, 2024**,

and/or the time in which to:

apply water to full beneficial use under the terms and conditions of the permit, which time now expires on **October 1, 2003**, be extended to **October 1, 2024**.

I am the permittee, or have written authorization from the permittee, to apply for an extension of time under this permit. I certify that the information I have provided in this application is true and correct to the best of my knowledge.

GENERAL TIPS:

- A separate Application for Extension of Time must be submitted for each permit. OAR 690-315-0070(2).
- Request the reasonable amount of time necessary to fully develop the permit and complete the project. If you don't request enough time, OWRD may be unable to find that you can complete the project within the time requested.
- Permit extensions for Municipal and Quasi-Municipal permits are evaluated under OAR Chapter 690, Division 315. Except under limited circumstances (see OAR 690-315-0090), upon issuance of an order approving an extension of time, the permit holder will be required to submit a Water Management and Conservation Plan (WMCP) under OAR Chapter 690, Division 86 within 3 years. Diversion of water beyond the maximum rate currently diverted under the permit shall only be authorized upon approval of a WMCP. These rules may be viewed at: <http://www.wrd.state.or.us/OWRD/LAW/index.shtml>.
- The Application for Extension of Time includes detailed tips and instructions to help you respond to each item of the application. Oregon water law and administrative rules require the OWRD to consider each of these items when reviewing a municipal or quasi-municipal water use Application for Extension of Time. However, please feel free to provide OWRD with any additional information or evidence that will aid us in making our decision. Please note that OWRD may require other information that is necessary to evaluate the application. OAR 315-0070(3)(p).

- After careful review of the Application for Extension of Time, you may contact OWRD at (503) 986-0900, to ask questions and request assistance from a Permit Extensions Specialist in the Water Rights and Adjudications Division.
- Once an Application for Extension of Time is received by OWRD, it will be reviewed for completeness. OWRD will return any incomplete or deficient applications to the applicant. OAR 690-315-0080(1)(a).

Reference Materials Needed to Complete this Application

Below is a listing of the items that must be reviewed and considered when completing an Application for Extension of Time for a Municipal or Quasi-Municipal water use permit:

- The subject water right permit. If needed, a copy of the water right permit can be downloaded from the Department's Website at <http://apps.wrd.state.or.us/apps/wr/wrinfo/> (the link to the Water Rights Information System (WRIS)). Or, a copy of the permit (or other documents) may be requested by water right application number from the Water Rights Division at 503-986-0900 (copy fees will apply).

A copy of the subject water right permit is attached to this application.

- Water Management and Conservation Plan (OAR Chapter 690, Division 86), *if applicable*, per OWRD.
A WMCP is on file with WR. An updated WMCP is currently being completed and should be submitted by 3-1-2015.
- Water System Master Plan, *if applicable*, per Oregon Health Division.

An updated Water Master Plan is currently being completed. A copy of the DRAFT Water Master Plan is attached.

- Documentation which demonstrates compliance with permit conditions (for example, well construction logs; static water level measurement reports; annual water use reports; a long-term alternative water supply plan; a plan to monitor the effect of water use on ground water aquifers utilized under the permit, etc.).

A copy of the bid documents executed for the past test hole work are attached.

- All other water rights (certificates, permits, permit amendments, transfers, and/or new applications) held by the applicant.

Attachment 'A' has been completed with this information and is attached to this extension request.

RECEIVED

Definitions Pertinent to this Application for Extension of Time

NOV 14 2014

Actual Construction - any physical work performed toward completion of the water system which demonstrates the water right permit holder's good faith and intention to complete the project with reasonable diligence. Actual construction does not include planning a diversion system,

WATER RIGHTS DIVISION DEPT OF WATER RESOURCES

formulating a business plan, securing financing, letting contracts, purchasing but not installing equipment, or surveying. This definition applies to quasi-municipal permit holders, required under the applicable statute, and for municipal water use permits issued on or after June 29, 2005. OAR 690-315-0070(3)(c) and (d), and OAR 690-315-0020(3)(d)(A)and(B).

C-Date – the date specified in the permit for complete application of water.

Permitted Time Period - period of time between the date when the permit was signed *and* the date specified in the permit for complete application of water

Time Period of the Previous Extension – *For the 2nd Application for Extension of Time* - period of time between the date specified in the permit for complete application of water and the new “extended to date” for complete application of water specified in the 1st approved extension.

For the 3rd, 4th, or . . . nth Application for Extension of Time - period of time between the “extended from date” for complete application of water and the “extended to date” for complete application of water specified in the most recently approved extension.

Undeveloped Portion of the Permit - the portion of the permit that is the difference between the maximum rate, or duty if applicable, specified in the permit and the maximum rate, or duty if applicable, diverted for beneficial use by the C-date or the last “extended to” date for complete application of water from the most recent prior extension. (*Oregon Court of Appeals A147071 WaterWatch vs OWRD & City of Cottage Grove, 2013*)

Work and Actions Accomplished - includes both physical work and other activities associated with the development of the water right, such as: water management planning; conservation planning; development of a water master plan for the Oregon Health Division; planning of a diversion system; demand forecasting; flow or water quality monitoring; source evaluation; entry into intergovernmental agreements for water delivery; property acquisition; engagement in governmental permitting or project financing; procurement of planning, design or construction services; surveying; and any physical work performed toward completion of the system and development of the right (e.g., pumps; pipes; well construction; treatment plant/facilities; transmission systems; distribution systems; and/or intake structures). OAR 690-315-0080(4).

Completing the Extension of Time Application for Quasi-Municipal or Municipal Use Permits

Please provide the information requested by item numbers 1-13. OWRD will use this information to evaluate your Application for Extension of Time.

TIP:

When making a reference to any document, report, and/or plan:

- (1) reference the source document along with any page number(s), table(s) and/or chart(s) used in the response, and
- (2) include a copy of the source document (or appropriate pages) with the extension application.

5. Provide evidence of compliance with conditions contained in the original permit, in any previous extension(s), and/or in any permit amendments (Chart II), or the reason the condition was not satisfied (Chart III).

Conditions requiring a response in the extension of time application include those which:

- Stipulate a specific date by which the permit holder was to accomplish a specific action, such as a condition that requires plans and specifications for a reservoir, a Water Management and Conservation Plan, a ground water monitoring plan or some other document which "...shall be submitted...within two years of permit issuance." If your permit requires submittal of a Water Conservation and Management Plan, please indicate the date the plan was submitted to or approved by OWRD, or whether it is still being drafted, etc.;

and/or

- Are triggered by the use of water, but do not stipulate a specific date. These conditions represent a milestone in development of the project and use of water, such as the permit holder, "shall install...a water meter or other suitable measuring device approved by the Director...before any use of water begins." Another common condition triggered by the use of water is that; "fish screens are to be installed according to Oregon Department of Fish and Wildlife specifications."

TIP: Any supporting documentation submitted to demonstrate compliance with time-sensitive permit conditions or any conditions from prior permit extension(s) must be clearly referenced and may include, but is not limited to: well construction logs; static water level measurement reports, annual water use reports; a Water Management and Conservation Plan; an alternative long-term water supply plan; and/or a plan to monitor the effect of water use on ground water aquifers utilized under the permit. If needed, please contact OWRD for assistance in identifying and/or interpreting which conditions in the water permit are pertinent to the Application for Extension of Time.

5-A) Describe how each condition has been complied with. Include conditions contained in the original permit (and, if applicable, each condition contained in any order approving a permit amendment and/or a final order approving a prior extension of time). Include the date when the condition was satisfied.

CHART-II

Condition No.**	Date Satisfied	Describe How Permit Condition Has Been Satisfied
1	8/2000	First test hole was drilled-yield minimal for establishing a municipal well
	7/2003	Second and thirds test holes were drilled-again minimal yield for establishing a municipal well.

** Condition No: Attach a copy of the permit and, if applicable, any prior permit extensions or permit amendments with conditions identified and hand-numbered in a continuous number sequence throughout all such documents. Responses to Items 5-A and 5-B should reference each condition by number to correspond with the hand-written number sequence on the attached documents containing permit conditions.

5-B) If applicable conditions have NOT complied with all, explain the reasons why and indicate with a date certain (in the near future) when compliance will occur.

CHART-III

Condition No.**	Date Will Comply	Explain Why Each Permit Condition Has NOT Been Satisfied
2	2024	City continues to look for well test hole sites and would prefer to establish one within a new sub-division as the land would be available. Several sub-divisions have been previously approved and are waiting for the economy to improve before starting construction.

[OAR 690-315-0070(3)(h)]

7. Provide an estimate of the current population served under this permit and a description of the methodology(ies) used to make the estimate.

Estimate the current population that is supplied water by the municipality or quasi-municipality and if applicable, current population served under this permit. Describe how that estimate was derived, or cite the source document from which the data was obtained. Include any calculations, formulas, supporting documentation, including copies of source documents.

Current Population: 3895 as of Year: 2014

Methodology used to estimate current population served:

'Population Forecasts for Marion County' completed by PSU population Research Center

[OAR 690-315-0070(3)(p)]

8. Report the current peak water demand of the current population served, and a description of the methodology(ies) used to make the estimate.

Identify the total rate, or duty if applicable, of water being used to meet the current peak demand for water from all water rights held by the municipal or quasi-municipal entity. This

must be reported in the same units of measurement as specified in the permits, being cfs (cubic feet per second), gpm (gallons per minute), and/or AF (acre-feet – usually only specified on a reservoir right to store water). This total rate should be based on the information provided on “Attachment A” in the column named “*Max Amount of Beneficial Water Used to Date*” [under Item 10-A (a)].

Current Peak Water Demand: 1.81 cfs as of Year: 2014

Methodology used to estimate current peak demand:

Based on per capita water consumption

RECEIVED

NOV 14 2014

WATER RESOURCES DEPT
SALT LAKE, UTAH

[OAR 690-315-0070(3)(k)]

9. **Provide a summary of any events that delayed completion of the water development or application of water to full beneficial use, including other governmental requirements (if any), relating to the project that have significantly delayed completion of construction or perfection of the right.**

TIP:

Such events may include, but are not limited to: the size and scope of the project; financing and/or cash flow issues; local referendums or initiatives; actual growth rates; economic downturns; loss of territory to annexation; water conservation efforts; the need to meet other governmental requirements relating to the project; natural disasters and severe weather; and/or any other events over which the water right permit holder had no control and which delayed development under the permit.

The City will utilize System Development Charges(SDC"s) to finance the construction of a new well. However, with the down-turn in new development, funds have not been readily available for this work. It is anticipated that as the economy improves, previously approved sub-divisions will begin construction, thus making funds available to continue test hole work, eventually constructing a new well.

[OAR 690-315-0070(3)(l)]

- 10-A. **Provide an estimated demand projection and a description of the methodology(ies) used for the subject water right permit, considering the other water rights held by the municipal or quasi-municipal water use permit holder, and a date by which the water development is anticipated to be completed and water put to full beneficial use.**

In developing your estimated demand projections for the permit being extended, you should include the following items:

- a) Inventory of Water Rights Held
List all water rights held, including this permit, currently held by the permit holder. Use the format shown in “Attachment A” (see last page of this Application for

Extension of Time). A link to the Water Rights Information System (WRIS), accessed through OWRD's website at <http://apps.wrd.state.or.us/apps/wr/wrinfo/> may be a helpful source for compiling this information.

Use the "Use Limitations" column to identify and explain why any water right is not currently utilized to meet current peak water demands, or which is used only in a limited capacity.

TIP: *Use limitations include any factors affecting the use of a water right, such as: used for system redundancy; used for emergency back-up water supply; climate patterns or turbidity result in seasonal unavailability; not used due to water quantity issues, etc.*

(See Attachment to this Application)

RECEIVED

NOV 14 2014

WATER RIGHTS DIVISION
STATE OF OREGON

b) **Water Supply Contracts and/or Agreements**

List any water supply contracts or agreements for water that will be supplied by the permit holder to other entities.

There are none.

List any water supply contracts or agreements for water that will be supplied from other entities that the permit holder will depend on to meet its own current or anticipated future water needs.

There are none.

c) **Projected Population**

Identify the projected population growth rate. The population projection must be extended out, at a minimum, to the year requested for complete application of water. Describe the methodology used to create the population projections such as historical growth rates or any factors affecting growth trends.

Population Growth Rate: 1% annually

Projected Population: 4733 as of Year: 2024

Methodology used to estimate projected population and population growth rate:

PSU Population Projection Data

d) Future Peak Water Demands

Identify the projected peak water. The peak water demand projection must be extended out, at a minimum, to the year requested for complete application of water. Describe the methodology used to create the water demand projection, such as historical growth rates or any factors affecting growth trends. Include a summary of how the subject permit, and other water rights and /or supply contracts held by the permit holder are planned or expected to be used to meet anticipated future water needs

Projected Peak Water Demand: 2.85 cfs as of Year: 2024

Methodology used to estimate peak water demand:

Based on past water consumption data

e) Potential Growth

Describe the potential for growth of the service area (such as the annexation of lands or new industrial and/or commercial ventures locating within the service area) and describe how those projects are expected to affect future water demands.

The Aumsville Comprehensive Plan indicates the current water service area is not expected to change geographically within the planning period, with infill as the most likely growth situation.

f) Completion Date

Provide the date by which the water development is anticipated to be completed and water put to full beneficial use. **October 1, 2024**

[OAR 690-315-0070(3)(I)]

10-B. Application for Extension of Time requests for greater than 50 years must include documentation that the demand projection is consistent with the amount and types of lands and uses proposed to be served by the permit holder.

TIP: If you are requesting an extension of greater than 50 years, it is very important to provide all available documentation (including estimates, projections, other related information, and all associated data) supporting the position that the demand projection is consistent with the amount and type of lands and uses to be served by the permit holder.

Show that permit holder's potential for future growth and expansion is feasible and consistent with the amounts and types of lands and uses proposed to be served. Information that may be addressed includes, but is not limited to: land use plan(s); current service area(s) in relation to the urban growth boundary; amounts of lands currently un-served and available for future development; and/or low-density vs. high-density areas.

N/A for this time extension request.

11. Provide an estimate of the costs to complete water development and summary of the future plan and schedule to complete construction and/or perfect the water right.

Considering the demand projections in Item 10-A, describe major future work and actions that must be accomplished in order to fully develop and perfect the subject permit. Provide a list of the major planning, work and/or actions needed, the approximate time frames, and estimated costs anticipated to complete the water development within the parameters of this permit. The review of a Capital Improvement Plan (CIP) or other system infrastructure improvement plans may help when formulating a response.

CHART-V

APPROXIMATE DATE RANGE	WORK AND ACTIONS TO BE ACCOMPLISHED	ESTIMATED COST
2015-2020	Continue to select available sites and drill test holes. Several new sub-divisions will have now come on-line.	\$ 35,000.00
2021-23	Decide on final well site and fully develop new well	\$ 450,000.00
	Connecting Piping to raw water line	\$ 175,000.00
Year: 2024	Date intend to apply water to full beneficial use under the terms and conditions of this permit.	
Estimated Total Cost to Complete Development		\$ 660,000.00

[OAR 690-315-

0070(3)(n)]

12. Justify time requested to complete the project and/or apply the water to full beneficial use.

A justification should integrate information from Items 5-B, 6-A or 6-B, 9, 10-A, and 11 of this application, and should include any other information or evidence to establish that the requested amount of time is reasonable, and that you will be able to complete the project within the amount of time requested.

As can be seen, the cost for a new well is a substantial expense for a city the size of Aumsville. Proceeding with a project of this size depends largely on SDC's generated by new development. When the economy recovers, it will take a number of years to accumulate enough money to undertake this project, which why this time extension is requested to year 2024.

RECEIVED

NOV 14 2014

WATER UTILITIES DEPT
CALIFORNIA

Last Revised: 2/4/2014

[OAR 690-315-0070(3)(o)]

13. **Provide any other information you wish OWRD to consider while evaluating the Application for Extension of Time**

Small cities struggle financially to fund major system improvements such as this. Granting a time extension to complete the proposed work will allow the city to plan, budget and fund such a project.

[OAR 690-315-0070(3)(q)]

14. **For Municipal water use permits issued before November 2, 1998, for the first extension issued after June 29, 2005, provide a copy of any agreements regarding use of the undeveloped portion of the permit between the permit holder and a federal or state agency that include conditions or required actions that maintain the persistence of listed fish species in the portions of the waterways affected by water use under the permit.**

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

CITY OF AUMSVILLE

STEVE OSLIG

P.O. BOX 227

AUMSVILLE, OREGON 97325

PHONE: (503)749-1049

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-14758

SOURCE OF WATER: A WELL IN THE BEAVER CREEK BASIN

PURPOSE OR USE: MUNICIPAL USE

MAXIMUM RATE: 0.446 CUBIC FOOT PER SECOND

PERIOD OF USE: YEAR ROUND

DATE OF PRIORITY: MAY 26, 1998

POINT OF DIVERSION LOCATION: NW 1/4 SW 1/4, SECTION 30, T8S, R1W, W.M.;
2400 FEET NORTH & 1000 FEET EAST FROM SW CORNER, SECTION 30

THE PLACE OF USE IS LOCATED AS FOLLOWS:

WITHIN THE SERVICE BOUNDARY OF THE
CITY OF AUMSVILLE

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or

measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

The well shall be continuously cased and sealed to a minimum depth of 150 feet.

Groundwater shall only be produced from the alluvial groundwater reservoir.

If the number, location, or construction of any well deviates from that proposed in the permit application or permit conditions, the conclusions of the Technical Review, Initial Review or Proposed Final Order under which this permit was granted may be revised, conditions may be appropriately revised, or this permit may not be valid.

The water user shall develop a plan to monitor and report the impact of water use under this permit on water levels within the aquifer that provides water to the permitted well(s). The plan shall be submitted to the Department within one year of the date the permit is issued and shall be subject to the approval of the Department. At a minimum, the plan shall include a program to periodically measure static water levels within the permitted well(s) or an adequate substitute such as water levels in nearby wells. The plan shall also stipulate a reference water level against which any water-level declines will be compared. If a well listed on this permit (or replacement well) displays a total static

water-level decline of 25 or more feet over any period of years, as compared to the reference level, then the water user shall discontinue use of, or reduce the rate or volume of withdrawal from, the well(s). Such action shall be taken until the water level recovers to above the 25-foot decline level or until the Department determines, based on the water user's and/or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The water user shall in no instance allow excessive decline, as defined in Commission rules, to occur within the aquifer as a result of use under this permit.

STANDARD CONDITIONS

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

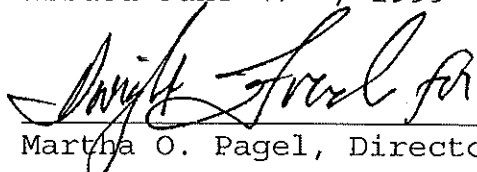

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Actual construction of the well shall begin by May 7, 2000. Complete application of water to the use shall be made on or before October 1, 2003. Within one year after complete application of water to the proposed use, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner (CWRE).

Jerry;

We have received your letter dated March 3, 2014 concerning the subject permit for the City of Aumsville.

The City drilled a test hole for this permit several years ago but it did not yield sufficient water to make drilling a completed well financially viable. However, we plan to continue this program. We will submit an Extension of Time to WR for continuance of this permit.

You should have it prior to your May 2, 2014 deadline.

Let me know if you have any questions concerning this matter.

CITY OF AUMSVILLE
595 MAIN ST
AUMSVILLE OR 97325

Reference: Application G-14758, Permit G-13679

Dear Permit Holder:

This letter is in regard to your water use permit referenced above. The Department would like to help you succeed in completing the development of your water use permit. Your permit required you to complete the development of your water use by 10/1/2003.

If you have not yet finished the development of your water use permit (water system construction and beneficial water use) you need to file an application for an extension of time. The Department's approval of an extension of time request provides more time to complete permit development. The current fee for filing an extension of time is \$575.00. Please see the enclosed 'Resource Sheet' to access the extension of time form.

If you have completed development of the water use permit, *within the development timelines in the permit or previous extension of time*, you may be ready to seek a water right certificate. A certificate is the final stage in the water right development process and provides the highest level of certainty and protection for your water rights. To obtain a water right certificate you are required to hire a certified water rights examiner (CWRE) to prepare and submit a claim of beneficial use that includes a final proof survey map of the water right development. The fee for submitting a claim of beneficial use is \$175.00. Please see the enclosed 'Resource Sheet' for our current database of CWRE's.

If you no longer want the water use permit you may voluntarily cancel it, which will help the Department maintain accurate records. Please see the enclosed 'Resource Sheet' to access the cancellation form, if you are interested in this option.

I encourage you to either: (1) file for an extension of time; (2) work with a CWRE to develop and submit a claim of beneficial use; (3) voluntarily cancel the permit; or (4) contact our office in the next 90 days to discuss your plans and a schedule for progress. If you decide to take none of these four actions within 90 days of this letter, the Department may begin the process of cancelling the permit for you in accordance with the provisions of ORS 537.260 and ORS 174.160.

I have included contact information for my staff on the back of this letter so we may assist you efficiently. Should you have any questions, you may contact me directly at the address above or by telephone at 503-986-0819.

Sincerely,

Dwight French

Return receipt requested

City of Aumsville
595 Main St.
Aumsville, OR 97325

Reference: Application G-14758, Permit G-13679

Dear Permit Holder:

This letter is in regard to your water use permit as referenced above. Your permit required you to complete the development of your water use by October 1, 2003.

In order for the Department to consider issuance of a certificate of water right, you are required by law to hire a certified water right examiner to prepare and submit a claim of beneficial use that includes a final proof survey map of the development. The map and claim of beneficial use were to have been submitted to our Department within one year of October 1, 2003. The fee for submitting a claim of beneficial use is \$175.00. Please see the enclosed 'Resource Sheet' for our current database of CWRE's.

If you are not finished with the development of your permit, you need to file an application for an extension of time to complete your development. The fee for filing an extension of time is \$575.00. Please see the enclosed 'Resource Sheet' to access the extension of time form.

In the event that you are no longer using water as allowed by this permit, you should cancel it so that we may clear our records. Please see the enclosed 'Resource Sheet' to access the cancellation form, if you are interested in this option.

If you have not submitted either a Claim of Beneficial Use or a request for an extension of time for your permit within 60 days of the date of this letter (May 2, 2014) the Department may issue a Final Order to cancel your permit without further notice. If the Department issues a Final Order to cancel your permit, and you request reconsideration of the final order and reinstatement of your permit, there is a \$450.00 reinstatement fee that is charged in addition to the claim of beneficial use or extension of time fee.

Should you have any questions, you may contact me at the address above or by telephone at 503-986-0817.

Sincerely,

Jerry Sauter
Water Rights Program Analyst

AUMSVILLE, OR 97325

REFERENCE: Permit #G13679 (App File #G14758) and the Adoption of New Administrative Rules for Municipal and Quasi-Municipal Water Use Permit Extensions

Dear Municipal and/or Quasi-Municipal Water Use Permit Holder:

The Water Resources Commission has adopted new administrative rules that govern the processing of Municipal and Quasi-Municipal permit extension requests. The new rules are contained in the Oregon Administrative Rules Chapter 690, Division 315 (OAR 690-315-0070 through 690-315-0100). If you wish to view a copy of the new Chapter 690, Division 315 Extension Rules, you may access the document from the Department's web page at:

http://www.wrd.state.or.us/cgi-bin/notices.pl?new_oars

The new rules implement many changes to the extension process for municipal and quasi-municipal permit holders. One of the most significant changes is that an extension is linked to the requirement to develop a Water Management and Conservation Plan under OAR Chapter 690, Division 86.

In preparation for implementing the new extension rules, the Department has reviewed its records and determined that the authorized date for completion of development for your water use permit has passed and that neither a permit extension of time application, nor a claim of beneficial use and final proof survey map, have been received.

As a result of this review, your water use permit falls into one of the three following categories:

1. Development is Not Complete

If development of your water use permit is not finished, you must submit an application for extension of time to complete construction of the water system and/or complete beneficial use of water to the full extent of the permit. You may access the "Application for Extension of Time for Quasi-Municipal and Municipal Water Use Permits" on the Department's website at:

<http://www.wrd.state.or.us/publication/forms/index.shtml>

January 14, 2003
page two

2. Development is Complete and Final Proof Must be Submitted

If your water use permit was issued after July 9, 1987, and development of the permit is complete, you are required by law (ORS 537.230 and/or 537.630) to hire a certified water rights examiner to prepare and submit a claim of beneficial use and final proof survey map.

3. Development is Complete and Waiting for WRD to Conduct Final Proof Survey

If you applied for or received a permit *on or before July 9, 1987*, and development of the permit is complete, you must notify the Department that the work has been completed and choose to either: (a) hire a water right examiner certified under ORS 537.798 to conduct a survey, the original to be submitted as required by the Water Resources Department, for issuance of a water right certificate; *or* (b) continue to appropriate water under the water right permit until the Water Resources Department conducts a survey and the commission issues a water right certificate under ORS 537.250 or 537.625.

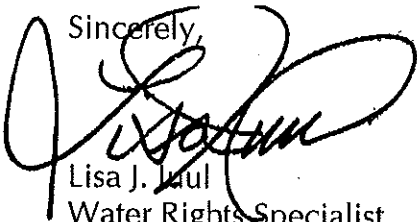

4. Permit is Not Needed and Wish to Authorize Cancellation

If you have determined that this permit is no longer needed and/or you have chosen not to pursue development of the permit, you may choose to authorize its cancellation. If you are interested in this option, please contact Jerry Sauter of our Department at extension 274 for the appropriate cancellation form.

Once you have determined which development category applies to your water use permit, please complete the enclosed "Quasi-Municipal/Municipal Water Use Permit Development Questionnaire" form and return it to my attention at the Water Resources Department by April 14, 2003.

If you would like the new rules or extension application forms sent to you by mail, or if have any questions, please feel free to contact me by telephone at 503-378-8455, extension 272.

Sincerely,

Lisa J. Jaul

REFERENCE: Permit #G13679 (App File #G14758) and the Adoption of New Administrative Rules for Municipal and Quasi-Municipal Water Use Permit Extensions

Dear Municipal and/or Quasi-Municipal Water Use Permit Holder:

The Water Resources Commission has adopted new administrative rules that govern the processing of Municipal and Quasi-Municipal permit extension requests. The new rules are contained in the Oregon Administrative Rules Chapter 690, Division 315 (OAR 690-315-0070 through 690-315-0100). If you wish to view a copy of the new Chapter 690, Division 315 Extension Rules, you may access the document from the Department's web page at:

http://www.wrd.state.or.us/cgi-bin/notices.pl?new_oars

The new rules implement many changes to the extension process for municipal and quasi-municipal permit holders. One of the most significant changes is that an extension is linked to the requirement to develop a Water Management and Conservation Plan under OAR Chapter 690, Division 86.

In preparation for implementing the new extension rules, the Department has reviewed its records and determined that the authorized date for completion of development for your water use permit has passed and that neither a permit extension of time application, nor a claim of beneficial use and final proof survey map, have been received.

As a result of this review, your water use permit falls into one of the three following categories:

1. Development is Not Complete

If development of your water use permit is not finished, you must submit an application for extension of time to complete construction of the water system and/or complete beneficial use of water to the full extent of the permit. You may access the "Application for Extension of Time for Quasi-Municipal and Municipal Water Use Permits" on the Department's website at:

<http://www.wrd.state.or.us/publication/forms/index.shtml>

January 6, 2003
page two

2. Development is Complete and Final Proof Must be Submitted

If your water use permit was issued *after* July 9, 1987, and development of the permit is complete, you are required by law (ORS 537.230 and/or 537.630) to hire a certified water rights examiner to prepare and submit a claim of beneficial use and final proof survey map.

3. Development is Complete and Waiting for WRD to Conduct Final Proof Survey

If you applied for or received a permit *on or before July 9, 1987*, and development of the permit is complete, you must notify the Department that the work has been completed and choose to either: (a) hire a water right examiner certified under ORS 537.798 to conduct a survey, the original to be submitted as required by the Water Resources Department, for issuance of a water right certificate; *or* (b) continue to appropriate water under the water right permit until the Water Resources Department conducts a survey and the commission issues a water right certificate under ORS 537.250 or 537.625.

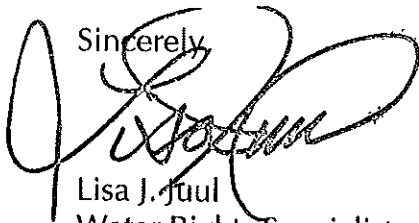

4. Permit is Not Needed and Wish to Authorize Cancellation

If you have determined that this permit is no longer needed and/or you have chosen not to pursue development of the permit, you may choose to authorize its cancellation. If you are interested in this option, please contact Jerry Sauter of our Department at extension 274 for the appropriate cancellation form.

Once you have determined which development category applies to your water use permit, please complete the enclosed "Quasi-Municipal/Municipal Water Use Permit Development Questionnaire" form and return it to my attention at the Water Resources Department by April 6, 2003.

If you would like the new rules or extension application forms sent to you by mail, or if have any questions, please feel free to contact me by telephone at 503-378-8455, extension 272.

BEFORE THE WATER RESOURCES DIRECTOR OF OREGON

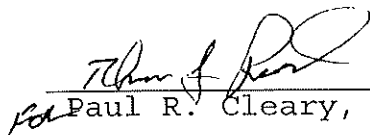

MARION COUNTY

ORDER WITHDRAWING PERMIT AMENDMENT APPLICATION 8564

Permit Amendment Application 8568, in the name of City of Aumsville, was filed July 20, 2000. On October 31, 2000, the City of Aumsville requested via their City Engineer, Jim Schuette, in writing, that Permit Amendment Application 8564 be withdrawn.

Permit Amendment 8564, in the name of City of Aumsville, is withdrawn and of no further force of effect. Any unearned fees will be refunded.

WITNESS the signature of the Water Resources Director,
affixed OCT 16 2000 .

Paul R. Cleary, Director

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2).

Pursuant to ORS 536.075 and OAR 137-004-080 and OAR 690-01-005 you may either petition for judicial review or petition the Director for reconsideration of this order.

Final Order

Application History

On May 26, 1998, CITY OF AUMSVILLE, STEVE OSLIG, submitted an application to the Department for a water use permit. The Department issued a Proposed Final Order on February 23, 1999. The protest period closed April 9, 1999, and no protest was filed.

The proposed use would not impair or be detrimental to the public interest.

Order

Upon payment of outstanding permit recording fees, Application G-14758 shall be approved as proposed by the Proposed Final Order and as provided on the attached draft permit.

Permit recording fees are required in the amount of \$175.00. Said fees are due and payable no later than 60 days from the date of this Final Order. Failure to pay the required permit recording fees within 60 days from the date of this Final Order will result in the proposed rejection of Application G-14758.

DATED May 7, 1999

Martha O. Pagel, Director

Appeal Rights

No changes have been made to the findings of the Proposed Final Order and no protests were filed during the protest period following the Proposed Final Order, therefore, there is no opportunity for appeal or judicial review of this final order (690-310-160(5)).

This document was prepared by Laura Snedaker. If you have any questions about any of the statements contained in this document I am the most likely the best person to answer your questions. You can reach me toll free within Oregon at 1-800-624-3199 extension 331. Outside of Oregon you can dial 1-503-378-8455.

If you have questions about how to file a protest or if you have previously filed a protest and want to know the status, please contact Adam Sussman. His extension number is 262.

If you have other questions about the Department or any of its programs please contact our Water Rights Information Group at extension 499.

STATE OF OREGON

COUNTY OF MARION

DRAFT PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS DRAFT PERMIT IS HEREBY ISSUED TO

CITY OF AUMSVILLE

STEVE OSLIG

P.O. BOX 227

AUMSVILLE, OREGON 97325

PHONE: (503) 749-1049

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-14758

SOURCE OF WATER: A WELL IN THE BEAVER CREEK BASIN

PURPOSE OR USE: MUNICIPAL USE

MAXIMUM RATE: 0.446 CUBIC FOOT PER SECOND

PERIOD OF USE: YEAR ROUND

DATE OF PRIORITY: MAY 26, 1998

POINT OF DIVERSION LOCATION: NW 1/4 SW 1/4, SECTION 30, T8S, R1W, W.M.;
2400 FEET NORTH & 1000 FEET EAST FROM SW CORNER, SECTION 30

THE PLACE OF USE IS LOCATED AS FOLLOWS:

WITHIN THE SERVICE BOUNDARY OF THE
CITY OF AUMSVILLE

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

The well shall be continuously cased and sealed to a minimum depth of 150 feet.

Groundwater shall only be produced from the alluvial groundwater reservoir.

If the number, location, or construction of any well deviates from that proposed in the permit application or permit conditions, the conclusions of the Technical Review, Initial Review or Proposed Final Order under which this permit was granted may be revised, conditions may be appropriately revised, or this permit may not be valid.

The water user shall develop a plan to monitor and report the impact of water use under this permit on water levels within the aquifer that provides water to the permitted well(s). The plan shall be submitted to the Department within one year of the date the permit is issued and shall be subject to the approval of the Department. At a minimum, the plan shall include a program to periodically measure static water levels within the permitted well(s) or an adequate substitute such as water levels in nearby wells. The plan shall also stipulate a reference water level against which any water-level declines will be compared. If a well listed on this permit (or replacement well) displays a total static water-level decline of 25 or more feet over any period of years, as compared to the reference level, then the water user shall discontinue use of, or reduce the rate or volume of withdrawal from, the well(s). Such action shall be taken until the water level recovers to above the 25-foot decline level or until the Department determines, based on the water user's and/or the Department's data and analysis, that no action

is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The water user shall in no instance allow excessive decline, as defined in Commission rules, to occur within the aquifer as a result of use under this permit.

STANDARD CONDITIONS

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Summary of Recommendation: The Department recommends that the attached draft permit be issued with conditions.

Application History

On May 26, 1998, CITY OF AUMSVILLE, STEVE OSLIG, submitted an application to the Department for the following water use permit:

- Amount of Water: 200.0 GALLONS PER MINUTE (GPM)
- Use of Water: MUNICIPAL USE
- Source of Water: A WELL IN THE BEAVER CREEK BASIN
- Area of Proposed Use: MARION County within SECTION 30, TOWNSHIP 8 SOUTH, RANGE 1 WEST, W.M., SECTION 24, AND SECTION 25, TOWNSHIP 8 SOUTH, RANGE 2 WEST, W.M.

On 8/21/98, the Department mailed the applicant notice of its Initial Review, determining that "the use of 0.89 Cubic Foot per Second (200.0 Gallons per Minute) from a well in Beaver Creek Basin for Municipal Use is allowable year-round." The applicant did not notify the Department to stop processing the application within 14 days of that date.

On 9/8/98, the Department gave public notice of the application in its weekly notice. The public notice included a request for comments, and information for interested persons about both obtaining future notices and a copy of the proposed final order.

Within 30 days of the Department's public notice, written comments were received from Jim Schuette, Certified Water Rights Examiner for the applicant.

In reviewing applications, the Department may consider any relevant sources of information, including the following:

- comments by or consultation with another state agency
- any applicable basin program
- any applicable comprehensive plan or zoning ordinance
- the amount of water available
- the rate and duty for the proposed use

- pending senior applications and existing water rights of record
- designations of any critical groundwater areas
- the Scenic Waterway requirements of ORS 390.835
- applicable statutes, administrative rules, and case law
- any general basin-wide standard for flow rate and duty of water allowed
- the need for a flow rate and duty higher than the general standard
- any comments received

Findings of Fact

The Willamette Basin Program allows the following uses: MUNICIPAL USE.

A WELL, IN THE BEAVER CREEK BASIN, is not within or above a State Scenic Waterway.

An assessment of water availability has been completed by the Department's Groundwater/Hydrology Section. A copy of this assessment is in the file. This assessment determined that water is available for further appropriation YEAR ROUND.

The Department finds that no more than 0.446 Cubic Foot per Second (CFS) (200.0 GPM) would be necessary for the proposed use. The amount of water requested, 200.0 GPM, is allowable.

The well is located within the Stayton-Sublimity Groundwater Limited Area. However, the proposed well will draw water from the alluvial aquifer which is not restricted in this area.

The Department determined, based upon OAR 690-09, that the proposed groundwater use will not have the potential for substantial interference with the nearest surface water source, namely **Beaver and Mill Creek**.

The Groundwater Section finds that there is **NOT** a preponderance of evidence that the proposed use of groundwater will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife.

On October 8, 1998, the Department received comments from Jim Schuette, agent for the applicant, expressing concern about the findings of the Department's Groundwater/Hydrology Section that the well must be continuously cased and sealed to a minimum depth of 150 feet. The Department's Groundwater/Hydrology Section reviewed these comments and determined that their original findings still stand.

Conclusions of Law

Under the provisions of ORS 537.621, the Department must presume that a proposed use will ensure the preservation of the public welfare, safety and health if the proposed use is allowed in the applicable basin program established pursuant to ORS 536.300 and 536.340 or given a preference under ORS 536.310(12), if water is available, if the proposed use will

not injure other water rights and if the proposed use complies with rules of the Water Resources Commission.

The proposed use requested in this application is allowed in the Willamette Basin Plan.

No preference for this use is granted under the provisions of ORS 536.310(12).

Water is available for the proposed use.

The proposed use will not injure other water rights.

The proposed use complies with other rules of the Water Resources Commission not otherwise described above.

The proposed use complies with the State Agency Agreement for land use.

No proposed flow rate and duty of water higher than the general basin-wide standard is needed.

For these reasons, the required presumption has been established.

Under the provisions of ORS 537.621, once the presumption has been established, it may be overcome by a preponderance of evidence that either:

- (a) One or more of the criteria for establishing the presumption are not satisfied; or
- (b) The proposed use would not ensure the preservation of the public welfare, safety and health as demonstrated in comments, in a protest . . . or in a finding of the department that shows:
 - (A) The specific aspect of the public welfare, safety and health under ORS 537.525 that would be impaired or detrimentally affected; and
 - (B) Specifically how the identified aspect of the public welfare, safety and health under ORS 537.525 would be impaired or be adversely affected.

In this application, all criteria for establishing the presumption have been satisfied, as noted above. The presumption has not been overcome by a preponderance of evidence that the proposed use would impair or be detrimental to the public interest.

The Department therefore concludes that water is available in the amount necessary for the proposed use; the proposed use will not result in injury to existing water rights; and the proposed use would ensure the preservation of the public welfare, safety and health as described in ORS 537.525.

Recommendation

The Department recommends that the attached draft permit be issued with conditions.

DATED February 23, 1999

Dwight French
Water Rights Section Manager

*If you have any questions,
please check the information
box on the last page for the
appropriate names and
phone numbers.*

Protest Rights and Standing

Under the provisions of 537.621(7), you have the right to protest this proposed final order. Your protest must be in writing, and must include the following:

- Your name, address, and telephone number;
- A description of your interest in the proposed final order, and, if you claim to represent the public interest, a precise statement of the public interest represented;
- A detailed description of how the action proposed in this proposed final order would impair or be detrimental to your interest;
- A detailed description of how the proposed final order is in error or deficient, and how to correct the alleged error or deficiency;
- Any citation of legal authority to support your protest, if known; and
- If you are not the applicant, the \$200 protest fee required by ORS 536.050 and proof of service of the protest upon the applicant.
- If you are the applicant, a statement of whether or not you are requesting a contested case hearing. If you do not request a hearing, the Department will presume that you do not wish to contest the findings of the proposed final order.
- If you do not protest this Proposed Final Order and if no substantive changes are made in the final order, you will not have an opportunity for judicial review, protest or appeal of the final order when it is issued.

Requests for Standing

Under the provisions of 537.621(6), persons other than the applicant who support a proposed final order may request standing for purposes of participating in any contested case proceeding on the proposed final order or for judicial review of a final order. A request for standing shall be in writing, include a statement that the requester supports the proposed final order, and a statement of how the requester would be harmed if the proposed final order is modified. The fee required at the time of submitting this request is \$50.00. If a hearing is scheduled, an

additional fee of \$150.00 must be submitted along with a request for intervention. Forms to request standing are available from the Department.

Your protest or request for standing must be received in the Water Resources Department no later than **April 9, 1999**.

After the protest period has ended, the Director will either issue a final order or schedule a contested case hearing. The contested case hearing will be scheduled only if a protest has been submitted and if

- upon review of the issues, the director finds that there are significant disputes related to the proposed use of water, or
- the applicant requests a contested case hearing within 30 days after the close of the protest period.

This document was prepared by Laura Snedaker. If you have any questions about any of the statements contained in this document I am most likely the best person to answer your questions. You can reach me toll free within Oregon at 1-800-624-3199 extension 331. Outside of Oregon you can dial 1-503-378-8455.

If you have questions about how to file a protest or if you have previously filed a protest and want to know the status, please contact Adam Sussman. His extension number is 262.

If you have other questions about the Department or any of its programs please contact our Water Rights Information Group at extension 499.

DRAFT

This is not a permit!!!
STATE OF OREGON

DRAFT

COUNTY OF MARION

DRAFT PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS DRAFT PERMIT IS HEREBY ISSUED TO

CITY OF AUMSVILLE
STEVE OSLIG
P.O. BOX 227
AUMSVILLE, OREGON 97325

PHONE: (503) 749-1049

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-14758

SOURCE OF WATER: A WELL IN THE BEAVER CREEK BASIN

PURPOSE OR USE: MUNICIPAL USE

MAXIMUM RATE: 0.446 CUBIC FOOT PER SECOND

PERIOD OF USE: YEAR ROUND

DATE OF PRIORITY: MAY 26, 1998

POINT OF DIVERSION LOCATION: NW 1/4 SW 1/4, SECTION 30, T8S, R1W, W.M.;
2400 FEET NORTH & 1000 FEET EAST FROM SW CORNER, SECTION 30

THE PLACE OF USE IS LOCATED AS FOLLOWS:

WITHIN THE SERVICE BOUNDARY OF THE
CITY OF AUMSVILLE

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of

water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

The well shall be continuously cased and sealed to a minimum depth of 150 feet.

Groundwater shall only be produced from the alluvial groundwater reservoir.

If the number, location, or construction of any well deviates from that proposed in the permit application or permit conditions, the conclusions of the Technical Review, Initial Review or Proposed Final Order under which this permit was granted may be revised, conditions may be appropriately revised, or this permit may not be valid.

The water user shall develop a plan to monitor and report the impact of water use under this permit on water levels within the aquifer that provides water to the permitted well(s). The plan shall be submitted to the Department within one year of the date the permit is issued and shall be subject to the approval of the Department. At a minimum, the plan shall include a program to periodically measure static water levels within the permitted well(s) or an adequate substitute such as water levels in nearby wells. The plan shall also stipulate a reference water level against which any water-level declines will be compared. If a well listed on this permit (or replacement well) displays a total static water-level decline of 25 or more feet over any period of years, as compared to the reference level, then the water user shall discontinue use of, or reduce the rate or volume of withdrawal from, the well(s). Such action shall be taken until the water level recovers to above the 25-foot decline level or until the Department determines, based on the water user's and/or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The water user shall in no instance allow excessive decline, as defined in Commission rules, to occur within the aquifer as a result of use under this permit.

STANDARD CONDITIONS

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include

an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Actual construction of the well shall begin within one year from issuance of the final order approving the use. Complete application of the water to the use shall be made on or before October 1, 2003. Within one year after complete application of water to the proposed use, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner (CWRE).

Laura,

I believe that is the reason that they indicated an alluvial well. It would be a good back-up to limit the well to the alluvial material or prohibit the well from being deepened. Thanks

Re: Protest to Initial Review Determinations
G-14758

Dear Ms. McLoud;

I have read the Initial Review Determinations for the reference file and I must **disagree** with the requirement of Determination # 4: "The well shall be continuously cased and sealed to a depth of 150'." I feel that this requirement is excessive and will greatly reduce the chance of obtaining the required well production as water may be found above this elevation. The 150' seal requirement would be very expensive and I am concerned as to whether the geological formations and the casing exterior roughness would be able to sustain that much weight. If the fear is surface water interference with the nearby ditch that is shown on the Stayton USGS Quad map, let me say that this is a drainage ditch. It dries up in June and is, as of this date, still dry. Since our highest water production months are usually July and August, the well would have no effect on the nearby dry drainage ditch.

In closing, I would request that **the 150' well seal requirement be removed** and the well seal be constructed as set forth in the standard well practices manual.

Yours truly,

Jim Schuette, CWRE

Reference: File G-14758

Dear Applicant:

**THIS IS NOT A PERMIT AND IS
SUBJECT TO CHANGE AT THE NEXT PHASE OF PROCESSING.**

This letter is to inform you of the favorable preliminary analysis of your water use permit application and to describe your options. In determining whether a water use permit application may be approved, the Department must consider the factors listed below, all of which must be favorable to the proposed use if it is to be allowed. Based on the information you have supplied, the Water Resources Department has made the following preliminary determinations:

Initial Review Determinations:

1. The proposed use is not prohibited by law or rule.
2. The use of water from A WELL IN BEAVER CREEK BASIN for MUNICIPAL USE is **allowable** under OAR 690-502-160(2), the Willamette Basin Program.
3. The Department has determined, based upon OAR 690-09, that the proposed groundwater use will not have the potential for substantial interference with the nearest surface water source, namely Beaver Creek and Mill Creek.
4. The Department has also determined, based upon available data, that the use of groundwater in the amount of 0.89 CUBIC FOOT PER SECOND (200.0 GALLONS PER MINUTE) for MUNICIPAL USE if properly conditioned, will not injure existing rights or the groundwater resource.

Summary of Initial Determinations

The use of 0.89 CUBIC FOOT PER SECOND (200.0 GALLONS PER MINUTE) from A WELL IN BEAVER CREEK BASIN for MUNICIPAL USE is allowable year-round.

Because of these favorable determinations, the Department can now move your application to the next phase of the water rights application review process. This phase is where public interest factors will be evaluated.

Please reference the application number when sending any correspondence regarding the conclusions of this initial review. Comments received within the comment period will be evaluated at the next phase of the process.

To Proceed With Your Application:

If you choose to proceed with your application, you do not have to notify the Department. Your application will automatically be placed on the Department's Public Notice to allow others the opportunity to comment. After the comment period the Department will complete a public interest review and issue a proposed final order.

Withdrawal Refunds:

If you choose not to proceed, you may withdraw your application and receive a refund (minus a \$50 processing charge per application.) To accomplish this you must notify the Department in writing by **Friday, September 4, 1998**. For your convenience you may use the enclosed "STOP PROCESSING" form.

Public Notice Requirement:

ORS 537.130 (3) requires notice to all affected landowners. ORS 537.130 (4) allows this notice to be made through publication in a local newspaper if there are more than 25 landowners involved. The following language should be used:

NOTICE OF WATER USE REQUEST

Regarding application: G-14758

The Oregon Water Resources Department is evaluating the request by City of Aumsville to use 0.89 cubic feet per second of the waters of a well in the Beaver Creek Basin for municipal purposes. The proposed source of water is located within Marion County, Township 8S, Range 1W. This process is to determine if the request is in compliance with state water laws and regulations. Public participation and comment is encouraged.

ORS 537.130 (3) requires notice to all affected landowners. ORS 537.130 (4) allows this notice

to be made through publication in a local newspaper if there are more than 25 landowners involved.

For further information contact the Water Resources Department Water Rights Information Group at 1 (800) 624-3199 ext. 499. Written information requests may be addressed to the Oregon Water Resources Department at 158 12th Street NE, Salem, Oregon 97310-0210.

If A Permit Is Issued It Will Likely Include The Following Conditions:

1. Measurement, recording and reporting conditions:
 - A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.
 - B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
 - C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.
2. The water user shall develop a plan to monitor and report the impact of water use under this permit on water levels within the aquifer that provides water to the permitted well(s). The plan shall be submitted to the Department within one year of the date the permit is issued and shall be subject to the approval of the Department. At a minimum, the plan shall include a program to periodically measure static water levels within the permitted well(s) or an adequate substitute such as water levels in nearby wells. The plan shall also stipulate a reference water level against which any water-level declines will be compared. If a well listed on this permit (or replacement well) displays a total static water-level decline of 25 or more feet over any period of years, as compared to the reference level, then the water user shall discontinue use of, or reduce the rate or volume of withdrawal from, the well(s). Such action shall be taken until the water level recovers to above the 25-foot decline level or until the Department determines, based on the water user's and/or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The water user shall in no instance allow excessive decline, as defined in Commission rules, to occur within the aquifer as a result of use under this permit.

3. If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.
4. If the number, location, or construction of any well deviates from that proposed in the permit application or permit conditions, the conclusions of the Technical Review, Initial Review or Proposed Final Order under which this permit was granted may be revised, conditions may be appropriately revised, or this permit may not be valid.
5. The well shall be continuously cased and sealed to a depth of 150 feet.
6. The priority date for this application is May 26, 1998.

If you have any questions:

Questions about the status of your application, processing timelines, or your upcoming Proposed Final Order should be directed to our Water Right Information Group at (800) 624-3199 or (503) 378-8455 extension 499. Feel free to call me at (800) 624-3199 or (503) 378-8455 extension 229 if you have any questions regarding the contents of this letter. Please have your application number available if you call.

Sincerely,

Anita M. McCloud

GROUNDWATER/SURFACE WATER CONSIDERATIONS

- 1. PER THE _____ Basin rules, one or more of the proposed POA's is/is not within _____ feet/mile of a surface water source (_____) and taps a groundwater source hydraulically connected to the surface water.
- 2. BASED UPON OAR 690-09 currently in effect, I have determined that the proposed groundwater use
 - a. ___ will, or _____ have the potential for substantial interference with the nearest
 - b. will not _____ surface water source, namely Beaver & Mill Creek; or
 - c. ___ will if properly conditioned, adequately protect the surface water from interference:
 - i. ___ The permit should contain condition #(s) _____;
 - ii. ___ The permit should contain special condition(s) as indicated in "Remarks" below;
 - iii. ___ The permit should be conditioned as indicated in item 4 below; or
 - d. ___ will, with well reconstruction, adequately protect the surface from substantial interference.

GROUNDWATER AVAILABILITY CONSIDERATIONS

- 3. BASED UPON available data, I have determined that groundwater for the proposed use
 - a. ___ will, or _____ likely be available in the amounts requested without injury to prior rights
 - b. ___ will not _____ and/or within the capacity of the resource; or
 - c. will if properly conditioned, avoid injury to existing rights or to the groundwater resource:
 - i. The permit should contain condition #(s) 1B, 7A, 7E
 - ii. The permit should contain special condition(s) as indicated in "Remarks" below;
 - iii. ___ The permit should be conditioned as indicated in item 4 below; or
- 4.
 - a. ___ THE PERMIT should allow groundwater production from no deeper than _____ ft. below land surface;
 - b. ___ The permit should allow groundwater production from no shallower than _____ ft. below land surface;
 - c. ___ The permit should allow groundwater production only from the _____ groundwater reservoir between approximately _____ ft. and _____ ft. below land surface;
 - d. ___ Well reconstruction is necessary to accomplish one or more of the above conditions.
 - e. ___ One or more POA's commingle 2 or more sources of water. The applicant must select one source of water per POA and specify the proportion of water to be produced from each source.

REMARKS: The well shall be continuously cased and sealed to a minimum depth of 150 feet.

REMARKS: The well shall be ^{continuously} cased and sealed to a minimum depth of 150 feet.

(Well Construction Considerations on Reverse Side)

WELL CONSTRUCTION (If more than one well doesn't meet standards, attach an additional sheet.)

5. THE WELL which is the point of appropriation for this application does not meet current well construction standards based upon:
- a. ___ review of the well log;
 - b. ___ field inspection by _____;
 - c. ___ report of CWRE _____;
 - d. ___ other: (specify) _____
-
6. THE WELL construction deficiency:
- a. ___ constitutes a health threat under Division 200 rules;
 - b. ___ commingles water from more than one groundwater reservoir;
 - c. ___ permits the loss of artesian head;
 - d. ___ permits the de-watering of one or more groundwater reservoirs;
 - e. ___ other: (specify) _____
-
7. THE WELL construction deficiency is described as follows: _____
-
8. THE WELL
- a. ___ was, or constructed according to the standards in effect at the time of
 - b. ___ was not original construction or most recent modification.
 - c. ___ I don't know if it met standards at the time of construction.

RECOMMENDATION:

- A. ___ I recommend including the following condition in the permit:
"No water may be appropriated under terms of this permit until the well(s) has been repaired to conform to current well construction standards and proof of such repair is filed with the Enforcement Section of the Water Resources Department."
- B. ___ I recommend withholding issuance of the permit until evidence of well reconstruction is filed with the Enforcement Section of the Water Resources Department.
- C. ___ REFER this review to Enforcement Section for concurrence.

THIS SECTION TO BE COMPLETED BY ENFORCEMENT PERSONNEL

I concur in G/H's recommendation A or B above relating to conditioning or withholding the permit
_____, 199____

SUBJECT: Groundwater Application G- 14758

Date June 15, 1998

Applicant(s) seek 200 gpm () cfs from one wells in the Willamette basin
Applicants Name: Atunsville sub basin
Proposed Use: Municipal sub basin

Pertinent 7 & 1/2 minute Quads Stayton

Well Proposed WRD# T 8S R 1W S 30 QQ CBA County Marion

Legal Description
Well is 650 ± 2300 ft from Trib & Beaver Creek (river/stream)
Well is 2200 ft from Mill Creek (river/stream)
Well Elevation 370 ft River/Stream elevation 360-345 ft.
Well Elevation - River/Stream elevation 10-25 ft.

Proposed

Well depth ± 140 ft SWL 30 ft on
Sealed to 50 ft Depth first water found 120 ft
Cased to ± 120 ft Perforations/screens ft
Lined to ft Perforations/screens ft

Well test and types
(Confined/Semi-confined/Unconfined) Direct hydraulic connection? YES / NO
Potential to cause substantial interference?

Well WRD# T R S QQ County

The Department cannot process your application without accurate information showing the source of water and location of water use. You must attach a map to this application form that clearly indicates the township, range, section, and quarter/quarter section of the proposed well location and place of use. The map must provide tax lot numbers. See page 3 in the instruction booklet for detailed map specifications. In addition, please provide the following information:

A. County

In what county is the use proposed? MARION

In what county is the appropriation point proposed? MARION

B. River Basin

(See instruction booklet pg.3 for list):

WILLAMETTE

C. Property Ownership

Do you own all the land where you propose to divert, transport, and use water?

- Yes (Skip to section 3 "Groundwater Development.")
- No Please check the appropriate box below, and on a separate sheet of paper list the names and addresses of all affected landowners.**
 - I have a recorded easement or written authorization permitting access. (ATTACHED)
 - I do not currently have written authorization or easement permitting access.

**If more than 25 landowners are involved, a list is not required. See page 4 in the instruction booklet for more details.

3. Groundwater Development

A. Number of wells: ONE B. Name of nearest surface water body BEAVER CREEK

C. Distance from well(s) to nearest stream or lake: 1) ± 2800 LF

2) _____ 3) _____ 4) _____

D. If distance from surface water is less than one mile, indicate elevation difference between nearest surface water and well head. 1) ± 201

2) _____ 3) _____ 4) _____

E. Well Characteristics

Wells must be constructed according to standards set by the Department for the construction and maintenance of water wells. If the well is already constructed, please enclose a copy of the well constructor's log and the well ID number, if available, for each well with this application. Identify each well with a number corresponding to the wells designated on the map and proceed to question F in this section of the form. If the well has not been constructed, or if you do not have a well log, please complete the following:

1. Wells will be constructed by: _____ RECEIVED

Address: _____ MAY 26 1998

Completion date: _____ WATER RESOURCES DEPT.
 SALEM, OREGON

2. Please provide a description of your well development. (Attach additional sheets if needed.)

Well No.	Diameter	Type and size of casing	No. of feet of casing	Intervals casing is perforated (in feet)	Seal depth	Estimated depth to water	Est. depth to water-bearing stratum	Type of access port or measuring device	Total well depth
1	8"	8" STEEL	±120'	G.G. WELL SCREEN	50'	30'	120'	PLUG IN WELL SEAL	±140'

F. Artesian Flows

If your water well is flowing artesian, describe your water control and conservation works:

4. Water Use

Please read the instruction booklet for more details on "type of use" definitions, how to express how much water you need and how to identify the water source you propose to use. You must fill out a supplemental form for some uses as they require specific information for that type of use.

A. Type(s) of Use(s)

(see list of beneficial uses in the instruction booklet):

- If your proposed use is **domestic**, indicate the number of households to be supplied with water: _____
- If your proposed use is **irrigation**, please attach Form I
- If your proposed use is **mining**, attach Form R
- If your proposed use is **municipal**, attach Form M
- If your proposed use is **commercial/Industrial** or **quasi-municipal**, attach Form Q

B. Amount of Water

Provide the production rate in gallons per minute (gpm) and the total annual amount of water you need from each well, from each source or aquifer, and for each use. You do not need to provide source information if you are submitting a well log with your application.

Well No.	Source or Aquifer	Type of Use	Total Annual Amount	Production Rate of the Well in gpm
ONE	GRAVELS	MUNICIPAL	± 80.0 ac-ft	2006 gpm

C. Season of Use

Indicate the time of year you propose to use the water (for seasonal uses like irrigation give dates when water use would begin and end):

YEAR AROUND

D. Acreage

If you will be applying water to land, please give the total number of acres where water will be applied or used:

Application No. G-14958

Permit No.

RECEIVED

MAY 26 1998

5. Water Management

WATER RESOURCES DEPT. SALEM, OREGON

A. Diversion

What equipment will you use to pump water from your well(s)?

- Checked: Pump (give horsepower and pump type) ± 15hp Submersible
Other means (describe)

B. Transport

How will you transport water to your place of use?

- Ditch, canal (give average width and depth): Width, Depth, Is the ditch or canal to be lined?
Checked: Pipe (give diameter and total length) Diameter(s) 8" & 6" Length ± 2000 LF
Other (describe)

C. Application/Distribution Method

What equipment will you use to apply water to your place of use?

Irrigation or land application method (check all that apply):

- Flood, High-pressure sprinkler, Low pressure sprinkler, Drip, Water cannons, Center pivot system, Hand lines, Wheel lines, Siphon tubes or gated pipe with furrows, Other, describe

Distribution method

- In-line storage (tank or pond), Checked: Direct pipe from source, Open canal

D. Conservation

What methods will you use to conserve water? Why did you choose this distribution or application method? For example, if you are using sprinkler irrigation rather than drip irrigation, explain. If you need additional space, attach a separate sheet.

City has prepared a water conservation plan and is in the process of adopting it.

6. Project Schedule

Proposed date construction will begin June, 1998

Proposed date construction will be completed October 1, 2000

Proposed date beneficial water use will begin October 1, 2000

7. Remarks

If you would like to clarify any information you have provided in the application, please do so here and reference the specific application question you are addressing.

THE intermittent stream shown near the well site
is a drainage-way during the winter months,
but does not flow, & is dry during the
summer months, & should not be considered
a surface water source in evaluating this application.

Signature

By my signature below I confirm that I understand:

- I am asking to use water specifically as described in this application.
- Evaluation of this application will be based on information provided in the application packet.
- I cannot legally use water until the Water Resources Department issues a permit to me.
- If I get a permit, I must not waste water.
- If development of the water use is not according to the terms of the permit, the permit can be canceled.
- The water use is compatible with local comprehensive land use plans.
- Even if the Department issues a permit to me, I may have to stop using water to allow senior water right holders to get water they are entitled to, and

I swear that all statements made and information provided in this application are true and correct to the best of my knowledge:

H. C. Ash
Signature of Applicant

5-20-98
Date

Signature of Co-applicant

Date

Before submitting this application, have you:

- Answered every question?
- Included a Land-Use Information Form or receipt stub signed by a local official?
- Attached a legible map that meets all the necessary criteria?
- Included a check made out to WRD for at least the amount of the application fee?

NOTICE OF WATER USE
REQUEST

Regarding application: G-14758
The Oregon Water Resources Department is evaluating the request by City of Aumsville to use 0.89 cubic feet per second of the waters from a well for Municipal purposes. The proposed source of water is located within Marion County, Township 8 south, Range 1 West, Section 30. This process is to determine if the request is in compliance with state water laws and regulations. Public participation and comment is encouraged.

ORS 537.130 (3) requires notice to all affected landowners. ORS 537-130 (4) allows this notice to be made through publication for three consecutive weeks in a local newspaper if there are more than 25 landowners involved.

For further information contact the Water Resources Department Water Rights Information Group at 1 (800) 624-3199 ext. 499. Written information requests may be addressed to the Oregon Water Resources Department, at 158 12th Street NE, Salem, Oregon 97310-0210.

RE: Application File # G-14758

Dear Mr. Oslig:

On January 4, 1999, the Department sent you a certified letter requesting you to run a notice of the application in a newspaper. If you have already published notice of the application, please submit the affidavit of publication. If not, the following must still be done:

- ▶ Since there are more than 25 land owners involved in the proposed use, the Department requests that the applicant run a notice of the application for three consecutive weeks in a publication which meets the statutory definition of "newspaper" under ORS 193 for the purpose of public notice. The language to be used in the advertisement of the application is attached. A copy of the affidavit of publication needs to be submitted to the Department following completion of the notice period.

Please provide the requested information by **February 12, 1999**. If we do not receive the information requested above by this date, we may reject your application consistent with ORS 537.153. If your application is rejected, any fees submitted in excess of the examination fee will be refunded; however, the examination fee is non-refundable and will not be returned. In addition, the priority date associated with your application will be lost.

Should you have any questions regarding your application or the required materials listed above, or if you need to request an extension of time, please call me at (503) 378-8455, extension 331, or toll free within Oregon at 1-800-624-3199.

Sincerely,

Laura K. Snedaker

RE: Application File # G-14748

Dear Mr. Oslig:

The Department is currently in the process of preparing a Proposed Final Order for the above referenced application. However, based upon continued review, the Department has determined that additional information is necessary in order to complete your application. The following information must be received:

- ▶ Since there are more than 25 land owners involved in the proposed use, the Department requests that the applicant run a notice of the application for three consecutive weeks in a publication which meets the statutory definition of "newspaper" under ORS 193 for the purpose of public notice. The language to be used in the advertisement of the application is attached. A copy of the affidavit of publication needs to be submitted to the Department following completion of the notice period.

If the notice has already been published for three consecutive weeks, please submit the affidavit of publication.

Please the requested information by **January 18, 1999**. If we do not receive the information requested above by this date, we **may** reject your application consistent with ORS 537.153. If your application is rejected, any fees submitted in excess of the examination fee will be refunded; however, the examination fee is non-refundable and will not be returned. In addition, the priority date associated with your application will be lost.

The notice process does not need to be complete by the deadline identified above but should be started by this deadline.

Should you have any questions regarding your application or the required materials listed above, or if you need to request an extension of time, please call me at (503) 378-8455, extension 331, or toll free within Oregon at 1-800-624-3199.

Sincerely,

A handwritten signature in black ink, appearing to read "Laura K. Snedaker". The signature is fluid and cursive, with the first name "Laura" being the most prominent.

fish life, wildlife, recreation, pollution abatement, wetland enhancement and public instream uses.

(3) Multnomah Channel and drainage waters originating within drainage districts are classified for domestic, livestock, municipal, industrial, irrigation, commercial, agricultural, mining, power, fish life, wildlife, recreation, pollution abatement, wetland enhancement and public instream uses.

(4) Except as specified in subsections (1)(a), (b) and (c) of this rule, all stream systems in the Columbia Subbasin and Columbia Slough are classified year-round only for domestic, commercial use for customarily domestic purposes not to exceed 0.01 cfs, livestock and public instream uses.

Hist.: WRD 4-1992, f. & cert. ef. 3-13-92

Groundwater Classifications and Conditions

690-502-160 (1) Use of groundwater from the basalt aquifer within the Cooper-Bull Mountain Critical Groundwater Area shall be as described in the State Engineer's order designating the Cooper-Bull Mountain Critical Groundwater Area dated May 17, 1974.

(2) Groundwater Classification: The ground-water resources of the Willamette Basin are classified for domestic, livestock, irrigation, municipal, industrial, agricultural, commercial, power, mining, recreation, fish life, wildlife, pollution abatement, wetland enhancement and statutorily exempt groundwater uses with the following exceptions:

(a) Groundwater from the *shallow* Troutdale aquifer and the specially designated portion of the *deep* Troutdale aquifer in the Sandy-Boring area is classified for exempt uses only. The Sandy-Boring Groundwater Limited Area is as described and shown in Exhibit 1. Groundwater applications pending on October 4, 1991 shall be processed according to the classifications in effect on the date the application was filed and shall contain the Special Permit Conditions specified in section (4) of this rule. Applications may be rejected if the aquifer displays any of the adverse impacts defined in OAR 690-08. Applications submitted after October 4, 1991 shall be processed according to the requirements of these rules and classifications;

(b) Groundwater from the basalt aquifers in the Damascus, Glad Tidings, Kingston, Mt. Angel, Parrett Mountain, and Stayton-Sublimity areas, and the Troutdale aquifer in the Damascus area is classified for exempt uses only:

(A) The Damascus Groundwater Limited Area is as described and shown in Exhibit 2. The Glad Tidings Groundwater Limited Area is as described and shown in Exhibit 3. The Kingston Groundwater Limited Area is as described and shown in Exhibit 4. The Mt. Angel Groundwater Limited Area is as described and shown in Exhibit 5. The Parrett Mountain Groundwater Limited Area is as described and shown in Exhibit 9. The Stayton-Sublimity Groundwater Limited Area is as described and shown in Exhibit 7;

(B) Groundwater applications pending on October 4, 1991 shall be processed according to the classifications in effect on the date the application was filed. Permits may be issued for a period not to exceed five years and shall contain the Special Permit Conditions specified in section (3) of this rule. Permits may be extended for additional five-year periods if the Director finds that the groundwater resource can probably support the extended use. Applications may be rejected or permit or certificate extensions may be denied if the aquifer displays any of the adverse impacts defined in OAR 690-08. Applications submitted after October 4, 1991 shall be processed according to the requirements of these rules and classifications. Within two years of permit issuance, the applicant shall prepare a plan for the Water

Resources Commission which shall indicate the steps for obtaining an alternate long-term water supply.

(c)(A) Except as provided in paragraph (B) of this subsection, groundwater from the basalt aquifers in the Sherwood-Dammasch-Wilsonville Groundwater Limited Area as described and shown in Exhibit 6 is classified for exempt uses only;

(B) Groundwater applications G-12155 (City of Sherwood) and G-13353 (Manke Lumber Co.) shall be processed according to the classifications in effect on the date the application was filed. Permits shall contain the Special Permit Conditions specified in Section (3) of this rule.

(d) Groundwater in the basalt aquifers in the Chehalem Mountain, Eola Hills and South Salem Hills Groundwater Limited Areas is classified for exempt uses, irrigation and rural residential fire protection systems only. Permits may be issued, for a period not to exceed five years, for fire protection and for drip or equally efficient irrigation provided the Director finds the proposed use and amount do not pose a threat to the groundwater resource or existing permit holders. The amount of water used for irrigation shall be further limited to one acre-foot per acre per year. Permits may be extended for additional five-year periods if the Director finds that the groundwater resource can probably support the extended use. Applications may be rejected or permit or certificate extensions may be denied if the aquifer displays any of the adverse impacts defined in OAR 690-08:

(A) The Chehalem Mountain Groundwater Limited Area is as described and shown in Exhibit 8. The Eola Hills Groundwater Limited Area is as described and shown in Exhibit 10. The South Salem Hills Groundwater Limited Area is as described and shown in Exhibit 11;

(B) Groundwater applications pending on October 4, 1991 shall be processed according to the classifications in effect on the date the application was filed. Permits may be issued for a period not to exceed five years and shall contain the Special Permit Conditions specified in section (3) of this rule. Permits may be extended for additional five-year periods if the Director finds that the groundwater resource can probably support the extended use. Applications submitted after October 4, 1991 shall be processed according to the requirements of these rules and classifications. Within two years of permit issuance, the applicant shall prepare a plan for the Water Resources Commission which shall indicate the steps for obtaining an alternate long-term water supply;

(e) Groundwater — Surface water hydraulic connection: These rules are in addition to the requirements of OAR 690-09. Groundwater in unconfined alluvium within 1/4 mile of the banks of a stream or surface water source is presumed to be in hydraulic connection with the surface water source, unless the applicant or appropriator provides satisfactory information or demonstration to the contrary. This hydraulically connected groundwater shall be classified the same as the surface source. This section shall not apply to those groundwater uses exempted by ORS 537.545. Notwithstanding such classification, permits may be issued for the use of water from a well in an unconfined aquifer that is hydraulically connected to groundwater, within a quarter mile of a stream, provided that surface water impacts are mitigated through storage releases.

(3) Special Columbia River Basalt Group Aquifer Permit Conditions: New permits issued to appropriate groundwater from Columbia River Basalt Group aquifers shall be specially conditioned. The conditions shall specify:

(a) A static water level measurement be made and submitted before any use of water may commence at the well;

(b) The permittee/appropriator install a meter or other suitable measuring device approved by the Director and submit an annual report of water used to the Department;

(c) Limits on acceptable amounts of depletion and interference with other users;

(d) Use of water from the well be controlled or shut off if limits specified in the permit to protect the resource from depletion, and prior appropriators from interference, are exceeded;

(e) The Department shall determine, from measurements submitted by the permittee/ appropriator, or other data on file in the department, the initial and subsequent water levels from which the previously cited declines are referenced;

(f) Following the issuance of a permit, the permittee/appropriator shall measure the water levels in the permitted well each year between March 1 and March 31 (spring high-water level) and submit the data to the Department within 90 days of measurement. Water level measurements shall be made by a certified water rights examiner, licensed water well driller, licensed pump installer, registered geologist, licensed land surveyor, registered professional engineer or the permittee/ appropriator;

(g) Any other conditions derived from OAR 690-08 as deemed necessary to protect the groundwater resource.

(4) Special Permit Conditions: New permits issued to appropriate groundwater from aquifers within the Sandy-Boring Groundwater Limited Area and the Troutdale aquifer in the Damascus Groundwater Limited Area shall be specially conditioned. The conditions shall specify:

(a) A static water level measurement be made and submitted before any use of water may commence at the well;

(b) Limits on acceptable amounts of depletion and interference with other users;

(c) Use of water from the well be controlled or shut off if limits specified in the permit to protect the resource from depletion, and prior appropriators from interference, are exceeded;

(d) The Department shall determine, from measurements submitted by the permittee/ appropriator, or other data on file in the department, the initial and subsequent water levels from which the previously cited declines are referenced;

(e) Following the issuance of a permit, the permittee/appropriator shall measure the water levels in the permitted well each year between March 1 and March 31 (spring high-water level) and submit the data to the Department within 90 days of measurement. Water level measurements shall be made by a certified water rights examiner, licensed water well driller, licensed pump installer, registered geologist, licensed land surveyor, registered professional engineer or the permittee/ appropriator;

(f) Any other conditions as specified in OAR 690-08 as deemed necessary to protect the groundwater resource.

[ED. NOTE: The Exhibit(s) referenced in this rule is not printed in the OAR Compilation. Copies are available from the Water Resources Department.]

Land Use Information Form

RECEIVED

MAY 26 1998

WATER RESOURCES DEPT.
SALEM, OREGON

This information is needed to determine compatibility with local comprehensive plans as required by ORS 197.180. The Water Resources Department will use this and other information to evaluate the water use application. DO NOT fill out this form if water is to be diverted, conveyed, or used only on federal lands.

To Be Completed By Applicant

The following section includes information about proposed water use. This section must be completed by the individual or group that is filing an application for a water right with the Water Resources Department.

A. Applicant

Name: City of Aumsville

Address: PO Box 227

City: Aumsville State: OR Zip: 97325 Day Phone: 749-1049

B. Land and Location

Please provide information as requested below for all tax lots on or through which water will be diverted, conveyed, or used. Check "diverted" if water is diverted (taken) from its source on tax lot, "conveyed" if water is conveyed (transported) on tax lot, and "used" if water will be put to beneficial use on tax lot. More than one box may be checked. (Attach extra sheets as necessary.) Applicants for municipal use, or irrigation uses within irrigation districts, may substitute existing and proposed service area boundaries for the tax lot information requested below.

TBS, RIW, SEC 30

Tax Lot I.D.	Plan Designation (e.g. Rural Residential/RR-5)	Water to be: (check all that apply)		
1200	LIGHT INDUSTRIAL	<input type="checkbox"/> Diverted	<input type="checkbox"/> Conveyed	<input checked="" type="checkbox"/> Used
		<input type="checkbox"/> Diverted	<input type="checkbox"/> Conveyed	<input type="checkbox"/> Used
		<input type="checkbox"/> Diverted	<input type="checkbox"/> Conveyed	<input type="checkbox"/> Used

List counties and cities where water is proposed to be diverted, conveyed, or used. Aumsville, MARION County

C. Description of Water Use

Indicate what the water will be used for. Include the beneficial use (found in the instruction booklet for your water right application) and use the space below to describe the key characteristics of the project.

Beneficial Use(s): Community Water Supply - Municipal

Briefly describe: _____

D. Source

Indicate the source for the proposed water use:

Reservoir/Pond Ground Water Surface Water _____ (source)

E. Quantity

Indicate the estimated quantity of water the use will require:

200 CFS GPM Acre-Feet

For Local Government Use Only

The following section must be completed by a planning official from each county and city listed unless your project will be located entirely within the city limits. In this case, only the city planning agency must complete this form. Please request additional forms as needed or feel free to copy.

A. Allowed Use

Check the appropriate box below and provide requested information.

- Land uses to be served by proposed water uses (including proposed construction) are allowed outright or are not regulated by your comprehensive plan. Cite applicable ordinance section(s); 324. Go to section B "Approval" below
- Land uses to be served by proposed water uses (including proposed construction) involve discretionary land use approvals as listed in the table below.

Type of Land Use Approval Needed (e.g. plan amendments, rezones, conditional use permits, etc.)	Cite Most Significant, Applicable Plan Policies & Ordinance Section References	Check the item that applies: Land Use Approval:	
		<input type="checkbox"/> Obtained <input type="checkbox"/> Denied	<input type="checkbox"/> Being pursued <input type="checkbox"/> Not being pursued
		<input type="checkbox"/> Obtained <input type="checkbox"/> Denied	<input type="checkbox"/> Being pursued <input type="checkbox"/> Not being pursued
		<input type="checkbox"/> Obtained <input type="checkbox"/> Denied	<input type="checkbox"/> Being pursued <input type="checkbox"/> Not being pursued
		<input type="checkbox"/> Obtained <input type="checkbox"/> Denied	<input type="checkbox"/> Being pursued <input type="checkbox"/> Not being pursued
		<input type="checkbox"/> Obtained <input type="checkbox"/> Denied	<input type="checkbox"/> Being pursued <input type="checkbox"/> Not being pursued

Note: Please attach documentation of applicable local land use approvals which have already been obtained. (Record of Action plus accompanying findings is sufficient.)

B. Approval

Please provide printed name and written signature.

Name: Dennis Chalut DENNIS CHALUT Date: 5-26-98
 Title: PLANNING CHAIRMAN Phone: 503-749-4224
 Signature: Dennis Chalut

C. Additional Comments

Local governments are invited to express special land use concerns or make recommendations to the Department regarding this proposed use of water below, or on a separate sheet.

Note: If this form cannot be completed while the applicant waits, sign and detach the receipt stub as instructed below. You will have 30 days from the Water Resources Department's notice date to return the completed Land Use Information Form or WRD will presume the land use associated with the proposed water right is compatible with local comprehensive plans. (See attached letter.)

WATER RESOURCES DEPT.
SALEM, OREGON

REFERENCE: WINDEMERE MEADOWS MANUFACTURED HOME PARK
. 9643 MILL CREEK RD. AUMSVILLE, OREGON

THIS AGREEMENT MADE ON THE 10th DAY OF AUGUST, 1995 BY AND BETWEEN
OREGON PARK DEVELOPMENT L.L.C. AND THE CITY OF AUMSVILLE, OREGON:

1. OREGON PARK DEVELOPMENT L.L.C. WILL MAKE A PREPAYMENT TO THE CITY OF
AUMSVILLE IN THE AMOUNT OF \$70,000.00 TO BE USED FOR WATER SYSTEMS
DEVELOPMENT. THIS PAYMENT SHALL BE MADE TO THE CITY PRIOR TO ISSUANCE OF
A CONSTRUCTION PERMIT. IN RETURN THE CITY OF AUMSVILLE WILL COLLECT ^{(SDC) System}
~~WATER HOOKUP~~ FEES IN THE AMOUNT OF \$600.00 PER HOME OWNER, THEN
REIMBURSE ALL COLLECTED ^{SDC} FEES STARTING JULY 1, 1996 AND AGAIN ON EACH JULY
1 THEREAFTER TO OREGON PARK DEVELOPMENT L.L.C., UNTIL ALL 112 ^{SDC} FEES HAVE
BEEN COLLECTED AND REIMBURSED.

2. OREGON PARK DEVELOPMENT L.L.C. WILL GIVE THE CITY, AT NO COST,
SUFFICIENT LAND AND A TEN YEAR PERIOD OF TIME, TO LOCATE A WELL AND
LOCATE ANY ASSOCIATED EQUIPMENT WITHIN THE AREA DESIGNATED AS PARCEL A.
IF A WELL IS NOT DRILLED IN THIS AREA WITHIN TEN YEARS FROM THE DATE OF
THIS AGREEMENT, THIS OPTION SHALL EXPIRE AND THE LAND WILL REVERT BACK
TO OREGON PARK DEVELOPMENT L.L.C.. IF A WELL IS DRILLED BY THE CITY
WITHIN THE AGREED UPON 10 YEAR PERIOD, THEN PARCEL A PROPERTY SHALL BE
DEEDED TO THE CITY. DURING THE TEN YEAR PERIOD OREGON PARK DEVELOPMENT
L.L.C. SHALL MAINTAIN THIS PARCEL A AND THE CITY SHALL HAVE FULL ACCESS
TO THIS PARCEL A. OREGON PARK DEVELOPMENT L.L.C. SHALL HAVE THE RIGHT TO
USE THIS PROPERTY IN THE MEANTIME FOR STORAGE OR PARK AREA USE.

THIS AGREEMENT SHALL BE BINDING UPON ALL PARTIES HERETO AND THEIR
RESPECTIVE HEIRS, EXECUTORS, ADMINISTRATORS, SUCCESSORS AND ASSIGNS.

IN WITNESS WHEREOF, THE PARTIES HERETO HAVE EXECUTED OR CAUSED TO BE
EXECUTED BY THEIR DULY AUTHORIZED OFFICIALS, THIS AGREEMENT IN TWO
COPIES, EACH OF WHICH SHALL BE DEEMED AN ORIGINAL ON THE DATE FIRST
ABOVE WRITTEN.

Well Site Reservation Agreement

(Modification of August 10, 1995 Agreement between Oregon Park Development L.L.C. And City of Aumsville, Oregon)

RECEIVED

MAY 26 1998

WATER RESOURCES DEPT
SALEM, OREGON

This Agreement changes Paragraph 2 of the August 10, 1995 Agreement (as attached hereto) to read as follows:

- 2. Oregon Park Development L.L.C. will give to the City of Aumsville a parcel of land (75 feet by 75 feet), and a ten (10) year period of time (starting from the date of this Agreement) in which to locate and construct a well, and any other associated equipment ie: well house building, piping, fencing, etc., within the following described property:

Parcel 1 and 2 of Partition Plat No. 95-31, as recorded April 5, 1995, in Records of Town Plats for Marion County Oregon.

If said well is drilled by the City within the agreed ten (10) year period of time, then the said parcel of property shall be deeded to the City by Oregon Park Development L.L.C., at no cost to the City. A permanent ingress and egress access easement (20 feet in width) shall also be granted to the City as part of this Agreement. Said access shall be for a roadway and required piping and appurtenances to connect the new well to the municipal water distribution system. Said parcel location and access route shall be agreed upon by both parties prior to the well being developed for use.

Said Agreement shall allow the right of ingress and egress to and over said above described property at any and all times for the purpose of locating a potential well site, test drilling, constructing, maintaining and repairing or doing anything necessary, useful or convenient for the enjoyment of the easement and parcel hereby granted.

Upon such time when said parcel of property and easements are granted to the City, responsibility for maintenance of said parcel and easements shall be the sole responsibility of the City.

If a well is not drilled on the above described property within the stated ten (10) year period of time, this Agreement shall expire, and become null and void.

This Agreement shall be binding to all parties hereto and their respective heirs, executors, administrators, successors and assigns.

In witness whereof, the parties hereto have executed by their duly authorized officials, this Agreement in two (2) copies, each of which shall be deemed an original.

MAY 26 1998

FOR MUNICIPAL WATER SUPPLIES

WATER RESOURCES DEPT. SALEM, OREGON

Unless otherwise noted, water use information should be in acre-feet per year (AFY). An acre-foot is equal to 325,851 gallons.

Background Information

Name of water supplier: City of AUMSVILLE, OREGON

Name and size of area to be served: ± 2.0 (in square miles)

Present population of service area: 2820 (Cite source and year.)

Projected population in 20 years: 6787 (For example: "20,595 Based upon 1995 Portland State University projections." Contact county planning staff, if needed.)

List present water rights and permits held:

Date of Issuance:	Natural Source of Water:	Amount Permitted:
3/1975	WELL	130 GPM
4/1983	WELL	380 GPM
8/1958	WELL	135 GPM
12/1990	WELL	200 GPM
GR-3258	WELL	75 GPM

Water Use

Average yearly demand: 33.0 AFY Year: 1997

Per-capita daily consumption (in gallons): 110 (Divide average annual water sales by population to arrive at consumption, then divide by 365 to get daily values.)

Peak season (by month/day): 7/1 to 10/1 Total peak season demand: 120.0 Acre-feet

Peak season per-capita consumption: 160 (Divide total peak season demand by population)

Annual amount of water:

produced: 103,490,500 (diverted or pumped)

delivered: 95,400,000

Is your system fully metered? [X] Yes [] No

Describe your rate structure: INCREASING BLOCK RATE (e.g. flat rate, increasing or decreasing block rate or combination of different systems)

Request for Water

A. Discuss the reason(s) for your request for additional water

(e.g. loss of current supply, peak demand, growth, or other): _____

Aumsville has grown from 2585 in 1996 to 2820 persons in 1997, or a rate of over 6%/yr, since 1990. Additional supply is needed to meet current demands.

B. How long is the amount of water requested in this application expected to meet future needs?

(e.g. until the year 2040) 2003

C. Briefly discuss operation of water system and the most constraining component of the system:

Water currently obtained from 4 wells. Storage and distribution adequate but additional supply needed.

D. Percentage of water use by type:

Residential: 80%

Commercial: 3%

Public Authority: 5%

Agricultural: _____

Unaccounted for use: 10%

Industrial: 2%

Other(specify use): _____

E. List cost to implement proposed request.

Compare cost and benefits with other water supply, or combination of supply options. This should include water efficiency measures such as replacing current showerheads with low-flow types. (Attach documentation, as available.)

to drill test hole(s): \$20,690.00

to develop test hole to well: \$59,940.00

F. How and by how much will your proposed water use efficiency programs increase efficiency?

(Express as a percentage of per-capita consumption.)

5% to 10%
