Note: Attach multiple copies as needed

By my signature below I confirm that I understand:

- I am asking to use water specifically as described in this application.
- Evaluation of this application will be based on information provided in the application.
- I cannot use water legally until the Water Resources Department issues a permit.
- Oregon law requires that a permit be issued before beginning construction of any proposed well. Acceptance of this application neither guarantees an emergency use permit will be issued nor indicates that a permanent water right may be obtained.
- If I get a permit, I must not waste water.
- If development of the water use is not according to the terms of the permit, the permit can be cancelled.
- The water use must be compatible with local comprehensive land-use plans.
- Even if the Department issues a permit, I may have to stop using water to allow senior water-right holders to get water to which they are entitled.

I (we) affirm that the information contained in this application is true and accurate.

SECTION 2: PROPERTY OWNERSHIP

Please indicate if you own all the lands associated with the project from which the water is to be diverted, conveyed, and used.

Yes

- There are no encumbrances.
- This land is encumbered by easements, rights of way, roads or other encumbrances.

RECEIVED

APR 12 2021

No

- I have a recorded easement or written authorization permitting access.
- I do not currently have written authorization or easement permitting access.
- Written authorization or an easement is not necessary, because the only affected lands I do not own are state-owned submersible lands, and this application is for irrigation and/or domestic use only (ORS 274.040).
- Water is to be diverted, conveyed, and/or used only on federal lands.

OWRD

List the names and mailing addresses of all affected landowners (*attach additional sheets if necessary*).

See attached list

SECTION 3: WELL DEVELOPMENT

WELL NO.	NAME OF NEAREST SURFACE WATER	IF LESS THAN 1 MILE:	
		DISTANCE TO NEAREST SURFACE WATER	ELEVATION CHANGE BETWEEN NEAREST SURFACE WATER AND WELL HEAD
Well #1	Lost River	1.18 mi.	

Please provide any information for your existing or proposed well(s) that you believe may be helpful in evaluating your application. For existing wells, describe any previous alteration(s) or repair(s) not documented in the attached well log or other materials (*attach additional sheets if necessary*).

See attached well log KLAM 54078 and KLAM 57413

SECTION 3: WELL DEVELOPMENT, CONTINUED

Source (aquifer), if known: Basalt

Total maximum rate requested: 17.8 CFS (each well will be evaluated at the maximum rate unless you indicate well-specific rates and annual volumes in the table below).

Complete the table below. If this is an existing well, the following information may be found on the applicable well log. (If a well log is available, please submit it in addition to completing the table.) If this is a proposed well, or well-modification, consider consulting with a licensed well driller, geologist, or certified water right examiner.

OWNER'S WELL NAME OR NO.	PROPOSED	EXISTING	WELL ID (WELL TAG) NO.* OR WELL LOG ID**	FLOWING ARTESIAN	CASING DIAMETER	CASING INTERVALS (IN FEET)	PERFORATED OR SCREENED INTERVALS (IN FEET)	SEAL INTERVALS (IN FEET)	MOST RECENT STATIC WATER LEVEL & DATE (IN FEET)	PROPOSED USE			
										SOURCE AQUIFER***	TOTAL WELL DEPTH	WELL-SPECIFIC RATE (GPM)	ANNUAL VOLUME (ACRE-FEET)
Well #1	<input type="checkbox"/>	<input checked="" type="checkbox"/>	L-64053	<input type="checkbox"/>	24"	+2 to 336	0	0 to 336	22.62 on 3/29/2021	Basalt	1551	9874	2910.5

	<input type="checkbox"/>	<input type="checkbox"/>		<input type="checkbox"/>									
	<input type="checkbox"/>	<input type="checkbox"/>		<input type="checkbox"/>									
	<input type="checkbox"/>	<input type="checkbox"/>		<input type="checkbox"/>									

* Licensed drillers are required to attach a Department-supplied Well Tag, with a unique Well ID or Well Tag Number to all new or newly altered wells. Landowners can request a Well ID for existing wells that do not have one. The Well ID is intended to serve as a unique identification number for each well.
 ** A well log ID (e.g. MARI 1234) is assigned by the Department to each log in the agency's well log database. A separate well log is required for each subsequent alteration of the well.
 *** Source aquifer examples: Troutdale Formation, gravel and sand, alluvium, basalt, bedrock, etc.

SECTION 4: WATER USE

USE	PERIOD OF USE	ANNUAL VOLUME (ACRE-FEET)
IS	April 1 to October 31	2910.5

Rights affected by drought:

County in which use will occur: Klamath (if the right is located in Klamath Basin/County you must complete section 7)

Please indicate the total number of acres to be irrigated (must match map): 2910.5 acres

List the Permit or Certificate number(s) of the water right(s) affected by drought: KA-1000 & KA-1004

Indicate the maximum number of acre-feet you expect to use in an irrigation season: 2910.5 acre-feet

SECTION 5: WATER MANAGEMENT

A. Diversion and Conveyance

What equipment will you use to pump water from your well(s)?

Pump (give horsepower and type): 300 hp turbine

Other means (describe): _____

Provide a description of the proposed means of diversion, construction, and operation of the diversion works and conveyance of water. This well will both pump direct to pivots and wheel line and pump into the KID Canal system for delivery to the various locations.

RECEIVED

APR 12 2021

OWRD

B. Conservation

Please describe why the amount of water requested is needed and measures you propose to: prevent waste; measure the amount of water diverted; and prevent the discharge of contaminated water to a surface stream. The land subject to this application are all in the Klamath Project. Because of a 20 year history of uncertain and reduced Project water supply, the owners of these lands have installed efficient pivots and wheel lines. Conservation is a way of everyday practice.

SECTION 6: DROUGHT INFORMATION:

Explain how drought conditions have created an inability to obtain water under your existing right(s), and any other remarks to clarify any other information (*attach additional sheets as necessary*).

The Klamath Project is forecast to have about 80,000 acre feet or less when the needed supply is 450,000. The date Project water deliveries will begin is not known. For the second year in a row, there will likely not be enough water in the Klamath basin to sustain fish, farmers and birds. Klamath County commissioners recently declared a drought in the basin and asked the state to do the same. The Governor of Oregon declared a drought on 3-31-2021.

Please note: in the past OWRD has required a consent to injury from the owners of Cougar Spring and Crystal Spring. Applicant has been in communication with the Watermaster concerning these springs. Cougar Spring is dry and Crystal Spring is not flowing as of the date of this application. The Watermaster has a staff gauge in the pond at Crystal Spring. Because the water rights related to Cougar and Crystal springs cannot benefit from non-flowing springs, requiring a consent to injury is futile. Please check with the Watermaster to verify this statement concerning these springs are not flowing.

APR 1 2 2021

OWRD

SECTION 7: KLAMATH BASIN/COUNTY WELL INFORMATION

A functioning, totalizing flowmeter will be required for any drought permits issued. Is there currently a flowmeter installed on each of the PODs listed in the table in Section 3 of this application? Yes No*

*Please note that watermaster staff will visit the well to confirm flowmeter presence prior to issuance of an emergency drought groundwater permit. Where possible, watermaster staff will take a static water level measurement. Alterations to the well head may be required in order to make the water level measurements and these may be conditions of the permit.

For each well, please provide a description of the flowmeter location, the serial number, the current flowmeter reading and the date the reading was taken in the table below.

OWNER'S WELL NAME OR NUMBER.	WELL TAG NUMBER (IF AVAILABLE)	WELL LOG ID (E.G., KLAM 1234)	FLOWMETER SERIAL NUMBER	FLOWMETER READING	FLOWMETER DATE	FLOWMETER LOCATION
Well #1	L-64053	<u>KLAM 54078 & KLAM 57413</u>	Meter#1: 20-03831-12 Meter#2: no serial # visible, inspected by Garrett Steensland of OWRD	696.573 0000.00	2020 2021	Meter #1 is 50 feet NW of the well Meter #2 is 750 south of the well.

EXECUTIVE ORDER NO. 21-07

**DETERMINATION OF A STATE OF DROUGHT EMERGENCY IN
KLAMATH COUNTY DUE TO UNUSUALLY LOW SNOW PACK AND
LACK OF PRECIPITATION**

RECEIVED

APR 12 2021

OWRD

At the request of Klamath County (by Resolution 2021-012, dated March 9, 2021) and based on the recommendations of the Drought Readiness Council and the Water Supply Availability Committee, and pursuant to ORS 536.740, I find the lack of precipitation and low snow pack have caused or will cause natural and economic disaster conditions in this county.

Forecasted water supply conditions are not expected to improve, and drought is likely to have significant economic impacts on the farm, ranch, forest, recreation, drinking water, and natural resources sectors, as well as impacts on fish and wildlife and other natural resources which are dependent on adequate precipitation and streamflow in these areas. Extreme conditions are expected to affect local growers, and increased the potential for fire, a loss of economic stability, shortened growing season, and decreased water supplies.

Conditions continue to be monitored by the state's natural resource and public safety agencies, including the Oregon Water Resources Department and the Oregon Office of Emergency Management.

Preparation and resiliency to drought are vital to the health and safety of persons, property, and the economic security of the citizens and businesses. I therefore declare that a severe, continuing drought emergency exists and is likely to continue to exist in Klamath County.

NOW, THEREFORE, IT IS HEREBY DIRECTED AND ORDERED:

- I. The Oregon Department of Agriculture is directed to coordinate and provide assistance in seeking federal resources to mitigate drought conditions and to assist in agricultural recovery in Klamath County.
- II. The Oregon Water Resources Department and the Water Resources Commission are directed to coordinate and provide assistance to water users in Klamath County as the Department and Commission determine is necessary and appropriate in accordance with ORS 536.700 to 536.780.
- III. The Oregon Water Resources Department is directed to seek information from the Oregon Department of Fish and Wildlife to help understand the impacts of water availability on Oregon's fish and wildlife, as necessary and appropriate in accordance with ORS 536.700 to 536.780.

EXECUTIVE ORDER NO. 21-07
PAGE TWO

- IV. The Office of Emergency Management is directed to coordinate and assist as needed with assessment and mitigation activities to address current and projected conditions in Klamath County.
- V. All other state agencies are directed to coordinate with the above agencies and to provide appropriate state resources as needed to assist affected political subdivisions and water users in Klamath County.
- VI. This Executive Order expires on December 31, 2021.

Done at Salem, Oregon, this 31st day of March, 2021.

Kate Brown
GOVERNOR
