We have received your applications for use of water for irrigation along with supporting data and fees. Our Receipts 41304, 41305 and 41306 are enclosed. Your applications have been filed and assigned numbers G-11218, G-11219 and G-11220.

Applications which are received in proper form for a permit, including maps, supporting data and fees, will receive a permit shortly after the mandatory 30-day waiting period. Applications which are defective, conflict with existing rights or require additional information will be reviewed in detail and will be returned for completion or correction within 45 days.

If your applications are approved, the permits authorizing the project described in the applications would be subject to prior rights and require that the well be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The permits would also require that a weir, meter, or other suitable measuring device be installed, if required by the Watermaster, and a log be kept recording the amount of ground water withdrawals. Dear Mr. Blackburn:

Your three applications for permits to appropriate water from three wells for irrigation have been received.

Unfortunately, the application could not be filed as insufficient fees were included. A new fee schedule, mandated by the Legislature, became effective on October 15, 1983. Your application and fees were not received prior to that date.

Total fees required with each application are: examination fee, \$200, and permit recording fees in the amount of \$188, 412, and 340, respectively, for a total of \$1,540.

If you wish to resubmit the application, it will receive a tentative date of priority as of the date it is received in this office with the statutory filing fees.
