This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484 and ORS 536.075. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Hello John,

Attached are copies of the fully executed Applicant's Agreement signed by the required parties and a receipt for the monies paid for these expedited services. The agreement details the terms and conditions that a work order was issued for the expedited services you requested.

As I mentioned in my earlier email, I will need a revised Claim of Beneficial Use (Claim) Map to show the meter and the conveyance system before I can prepare the final certificate.

The Claim map must show the location of the meter. Also, I noted that the map does not show any conveyance systems from the well to the place of use – please let me know if the CWRE can locate the conveyance system on the map.

If you have any questions, please contact me.

Thanks,
Kerry

Attachments: RA contract_G-8858.pdf; RA estimate receipt_G-8858.pdf; RA estimate request_G-8858.pdf

Hello John,

Please find the attached estimate and agreement to process the permit into a certificate. If the proposed agreement is acceptable to you and the water right holders, please ask Joseph Maher and Barbara Maher to return a signed copy to our office along with the payment of the estimated cost to process the permit into a certificate.

There is one item that I need prior to preparation of the final document: the Claim of Beneficial Use map must show the location of the meter. Also, I noted that the map does not show any conveyance systems from the well to the place of use – please let me know if the CWRE can locate the conveyance system on the map.

If you have any questions, please call me.

Thanks,
Kerry

Mayer thought this was drilled in 1975

The system has a psi gage and operates at 30.

There is a Newman 60 HP Turbin pump setting on top of the well head. This is a 3 phase pump. There is 10" steel discharge from the pump and is teed into 10" PVC buring mainline that is laid to the west 1/8 of a mile then turns to the south an 1/8 of a mile and is teed here and is laid to the west a 1/4 mile and on to the south another 1/4 mile.

Mr Maher irrigates with 10" gated pipe that is in 30 foot sections. He has a mile of this. The gated pipe has 10 or 11 gate valves, or openings, on each section of pipe. He operates 3 section of gated pipe at a time on 12 hour settings, flooding the fields.

He pump pumps 800 gpm, per Mayer.

The use is irrigation of oats

The tie is NW corner of section 7, intersection with Princeton Hwy and roadway. Mr. Maher did not know where any BC was and grew up in this area.

Lift is 40'

Took GPS reading at well and on two point along a fenceline on the south end of the irrigation.

Irrigated land shows on aerial NAPP 41025-1223-163R, this is a copy from the Harney Co. ASCS office.

Location of place is on Adobe Flat 7 ½ min. Quadrangle map.

The south end of the South West corner iss not irrigated as the application map shows as there is a hill here.

I left an assignment with Mr. Maher.

Dear Mr. Atwood:

According to the report submitted by our field engineer, you have not made use of water to the extent intended within the limits of your permit number G-8244, although the project was indicated as completed when the application was filed.

Under the terms of your permit, the date for complete application of water is October 1, 1980; therefore, you have more time to irrigate the balance of the land. We will mark the notice previously submitted as premature.

I am enclosing another Form C for your use in reporting the completion of your project when applicable.

Sincerely,

Larry Toll
Water Rights Engineer
