Certificate of Water Right Ownership Update

NOTICE TO SELLERS & BUYERS:

By law, all water belongs to the public (ORS 537.110). In almost every instance, a permit or water right certificate from the Water Resources Department is needed before using, diverting or storing water (ORS 537.130). However, most domestic wells do not require water rights. A certificate of water right stays with the land. In order to keep track of water right ownership, the Department requests that this form be submitted to the Department. *If for multiple rights, a separate form for each right will be required.*

Water that has been used for a long time in one place or that involves a water structure (like a dam) that already exists is no guarantee that there is a water right which would allow the water use to continue.

If you have any questions about this form or water right requirements, please contact your local watermaster or call the Water Resources Department at 503-986-0900.

Note: Please type or print legibly when filling in the following information. Use additional paper if necessary.

NOTICE OF CERTIFICATE ISSUANCE

The attached certificate confirms the water right established under the terms of a permit issued by this department. The water right is now appurtenant to the specific place where the use was established as described by the certificate. The water right is limited to a specific amount of water, but not more than can be beneficially used for the purposes stated within the certificate.

This is a final order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within **60 days of the mailing date stated above** as specified by ORS 183.484(2).

This statement of judicial review rights is required under ORS 536.075; it does not alter or add to existing review rights or create review rights that are not otherwise provided by law.

Under ORS 537.260 and 537.270, a water right certificate may be contested before the Water Resources Department within three (3) months of the date it is issued. If a certificate is contested, the qualifying contestant shall be offered an administrative hearing.

Oregon law does not allow the Director to reissue a certificate because of a change in the ownership of the appurtenant place of use. The water must be controlled and not wasted. To change the location of the point of diversion, the character of use, or the location of use requires the advance approval of the Water Resources Director.

If any portion of this water right is not used for five or more consecutive years, that portion of the right may be subject to forfeiture according to ORS 540.610. Land enrolled in a Federal Reserve Program is not subject to forfeiture during the period of enrollment. Other exceptions to forfeiture are explained in ORS 540.610.

If you have any questions please contact Gerry Clark at 503-986-0811.

The Water Resources Department has reviewed and accepted the pump test results you submitted for POD-ID 20740. The Department requires no further testing of this well at this time. However, you will be required to submit a static water level measurement of the well on the ten-year anniversary of the test you conducted.

The Department has also reviewed your request for an exemption for the additional well listed above based on the results of the tested well. Our review indicates that the tested well and the well proposed for exemption:

- . are located within a five-mile radius and
- . appear to be completed in the same water-bearing zone.

Therefore, the Department is granting the exemption. This means that the additional well need not be tested. This exemption is valid only if both wells are owned by the same landowner.

In your letter dated March 1, 1994, you requested wells three and five on Permit G-6237 be exempt as well. However, your records show that Permit G-6237 was canceled February 20, 1981, Special Order Volume 34, Page 324. I have enclosed a copy of the order for your information.

Permit to Appropriate the Public Waters of the State of Oregon

This is to certify that I have examined the foregoing application and do hereby grant the same, SUBJECT TO EXISTING RIGHTS INCLUDING THE EXISTING MINIMUM FLOW POLICIES ESTABLISHED BY THE WATER POLICY REVIEW BOARD and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 1.0 cubic feet per second measured at the point of diversion from the well or source of appropriation, or its equivalent in case of rotation with other water users, from two wells; being 0.5 cfs from each well

The use to which this water is to be applied is irrigation

If for irrigation, this appropriation shall be limited to 1/80 of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3 acre feet per acre for each acre irrigated during the irrigation season of each year;

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

The works constructed shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times.

The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

The priority date of this permit is Sept 29, 1983

Actual construction work shall begin on or before and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 19.....

Dear Mr. Blackburn:

REFERENCE: File G-11104

Your Application G-11104 describing the proposed use of 1.0 cubic foot per second of water from two wells for irrigation of 79.89 acres, together with the maps, has been reviewed.

The application, as submitted, requires the \$40 examination fee and permit recording fee for irrigation of 79.89 acres of \$90. Total required fees for this application amount to \$130. Since \$120 has already been received, please submit the \$10 needed to complete the fees. ✓

The total amount of water to be appropriated must be broken down to the amount of water to be appropriated from each well. ✓

A legal description of the property where the water is to be used is needed to verify the place of use. This can be copied from your deed, title insurance policy, or sales contract. ✓

I am returning your application for completion and the map for reference. The application is endorsed so that in order to retain its priority date it must be received in this office on or before January 4, 1984.

We have received your application for use of water for irrigation along with supporting data and fees. Our Receipt 38950 is enclosed. Your application has been filed and assigned number G-11104.

Applications which are received in proper form for a permit, including maps, supporting data and fees, will receive a permit shortly after the mandatory 30-day waiting period. Applications which are defective, conflict with existing rights or require additional information will be reviewed in detail and will be returned for completion or correction within 45 days.

If your application is approved, the permit authorizing the project described in the application would be subject to prior rights and require that the well be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The permit would also require that a weir, meter, or other suitable measuring device be installed, if required by the Watermaster, and a log be kept recording the amount of ground water withdrawals. If you have any questions regarding these provisions or the Well Standards, please contact this office.

Dear Mr. Estes:

Enclosed please find my application for a permit to appropriate ground water, four section plat maps, Abstract of Permit No. G-2473 and a check in the amount of \$120.00 for examination and recording fees.

Abstract of Permit No. G-2473 is being cancelled because the Soldier Creek primary flood water rights have not been used. Therefore, I am submitting this new application for primary water rights, which is the same description and wells as described in Permit # G-2473.

If you desire any additional information please feel free to contact me.

Thank you.
