SECTION 3 CLAIM DESCRIPTION

1. POD source and, if from surface water, the tributary:

POD NAME OR NUMBER	SOURCE	TRIBUTARY
POD	Willamette Basin Project Reservoirs, Constructed under Permits R-1625 and R5363	Willamette River

2. Developed use(s), period of use, and rate for each use:

POD	Irrigation	Lawn, garden and landscaping	April through October	0.064 cfs
Total Quantity of Water Used				0.064 cfs

3. Provide a general narrative description of the distribution works. This description must trace the water system from **each** point of diversion to the place of use:

Water is diverted using a 1½-hp centrifugal pump mounted on a float in the Willamette River. The water is conveyed by 1½-inch-diameter plastic and PVC piping to a 1-inch-diameter flowmeter located on the slope about 100 feet from the pump. After passing through the flowmeter, 1½-inch-diameter PVC piping conveys the water to hose bibs located on the property. Hand lines with sprinklers are used to apply the water to the places of use.

Reminder: The map associated with this claim must identify the location of the point(s) of diversion, Donation Land Claims (DLC), Government Lots (GLot), and Quarter-Quarters (QQ).

AUG 10 2021

4. Variations:

Was the use developed differently from what was authorized by the permit, permit amendment final order, or extension final order? If yes, describe below.

OWRD YES

(e.g. "The permit allowed three points of diversion. The water user only developed one of the points." or "The permit allowed 40.0 acres of irrigation. The water user only developed 10.0 acres.")

The permit authorized irrigation of 6.0 acres. The water user developed 1.6 acres of irrigation.

5. Claim Summary:

RE: Application S-87888/Permit S-54861 & Application S-87889/Permit S-54862

To whom it may concern,

This letter is in regards to fish screening and fish passage device requirements set forth in Oregon Water Resources Department Permits S-54861 and S-54862. These permits are associated with adjoining properties owned and managed by Dr. Carl Stevens, located at 24849 NE Butteville Rd, Aurora, OR. Both water rights are sourced from the Willamette Basin Project Reservoirs, and both are limited to a maximum volume of 15 acre feet.

The point of diversion for each respective permit is an end-of-pipe diversion, so bypass devices are not necessary for fish passage. In regards to fish screening requirements, the two points of diversion associated with these permits will be equipped with Sure-Flo SCS2 fish screens and each will be operated in conjunction with a 1.25 HP pump. These screens effectively screen up to 44 gpm, which will exceed National Marine Fisheries Service fish screen criteria for the allotted water rights.

Both fish screen and passage requirements are met for these diversions. If you have any questions regarding this information, please do not hesitate to contact me at 541-296-8026.

Sincerely,

Hilary A. Doulos

Subject: Use of July 1, 2017 CBU Report Form - Application S-87888, Permit S-54861

Hi Gerry,

I am completing a Claim of Beneficial Use (CBU) for Permit S-54861 (Application S-87888) for Carl D. Stevens, the current property owner.

I am hereby requesting the Department's approval to use the CBU form dated July 1, 2017 instead of the more recent March 2, 2020 form. The CBU, started in 2019, could not be filed until now because the Carl M. Stevens Family Trust estate was going through probate.

I will include an assignment form with the CBU.

Please call or email me if you have any questions.

Thank you,
Steve
