Form C

IMPORTANT—This form is a notice to the State Engineer that permittee is ready to make final proof to the extent to which the water has actually been applied to the intended use under the terms of the permit. Permittee is cautioned that Certificate of Water Right will be issued based on the extent of the quantity and use as determined by the final proof inspection and survey which will be made in response to the filing of this Form C.

NOTE: In the case of an irrigation permit, this Form C should not be mailed to the State Engineer until all of the land described in the permit, which it is intended to irrigate under this permit at any time, has actually been irrigated. Fill out, detach and mail to the State Engineer, Salem, Oregon 97310, when all of the water has been applied.

Dear Ms. Leedy,

Thank you for bringing the proof of appropriation of water form in connection with permit G-4926 to our office. We also have the \$2.00 certificate recording fee and our receipt numbered 54218 was handed to you.

I apologize for not having brought this to your attention when you were in the office, but it is my understanding that Linda I. Ayres has passed away, therefore, it will be necessary for you to submit a statement to this effect.

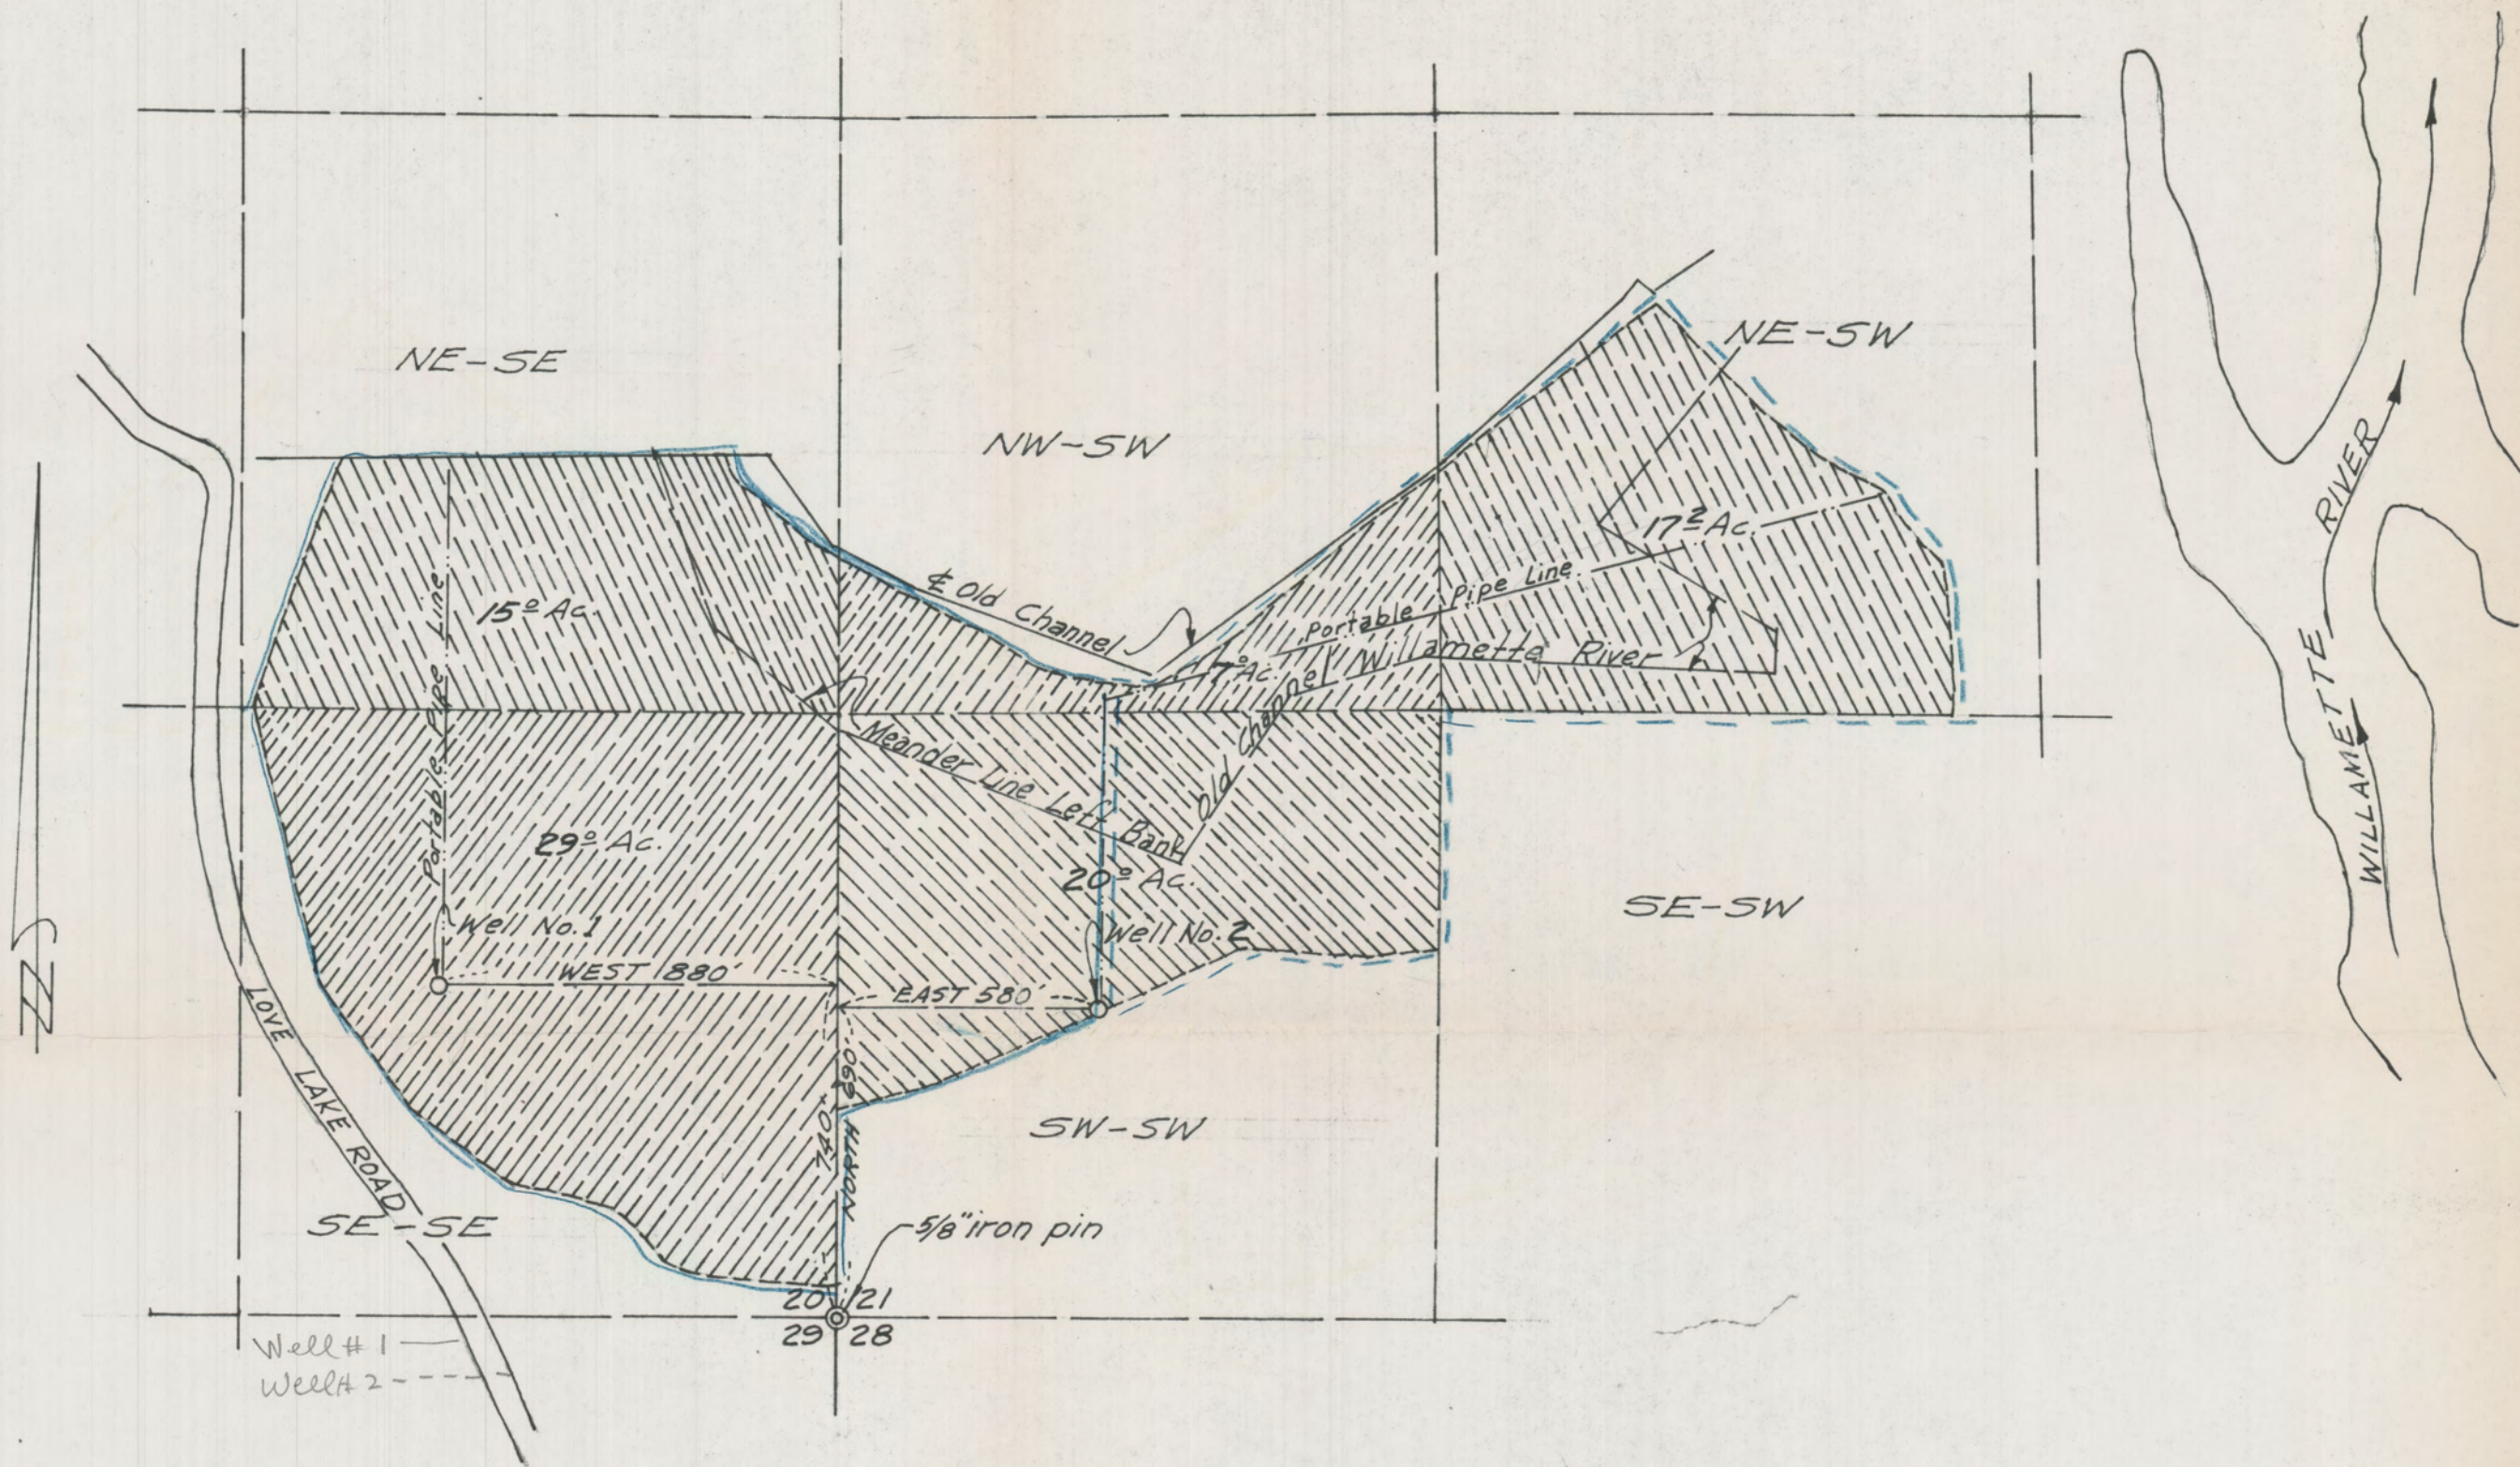

If the property was held in joint tenancy, please advise us and we will be able to change our records accordingly. If not, the personal representative of the Ayres estate must assign a portion of the permit to you. We will send you the necessary forms to do this upon your request.

Further action will be held on this file for a reasonable length of time pending your reply.

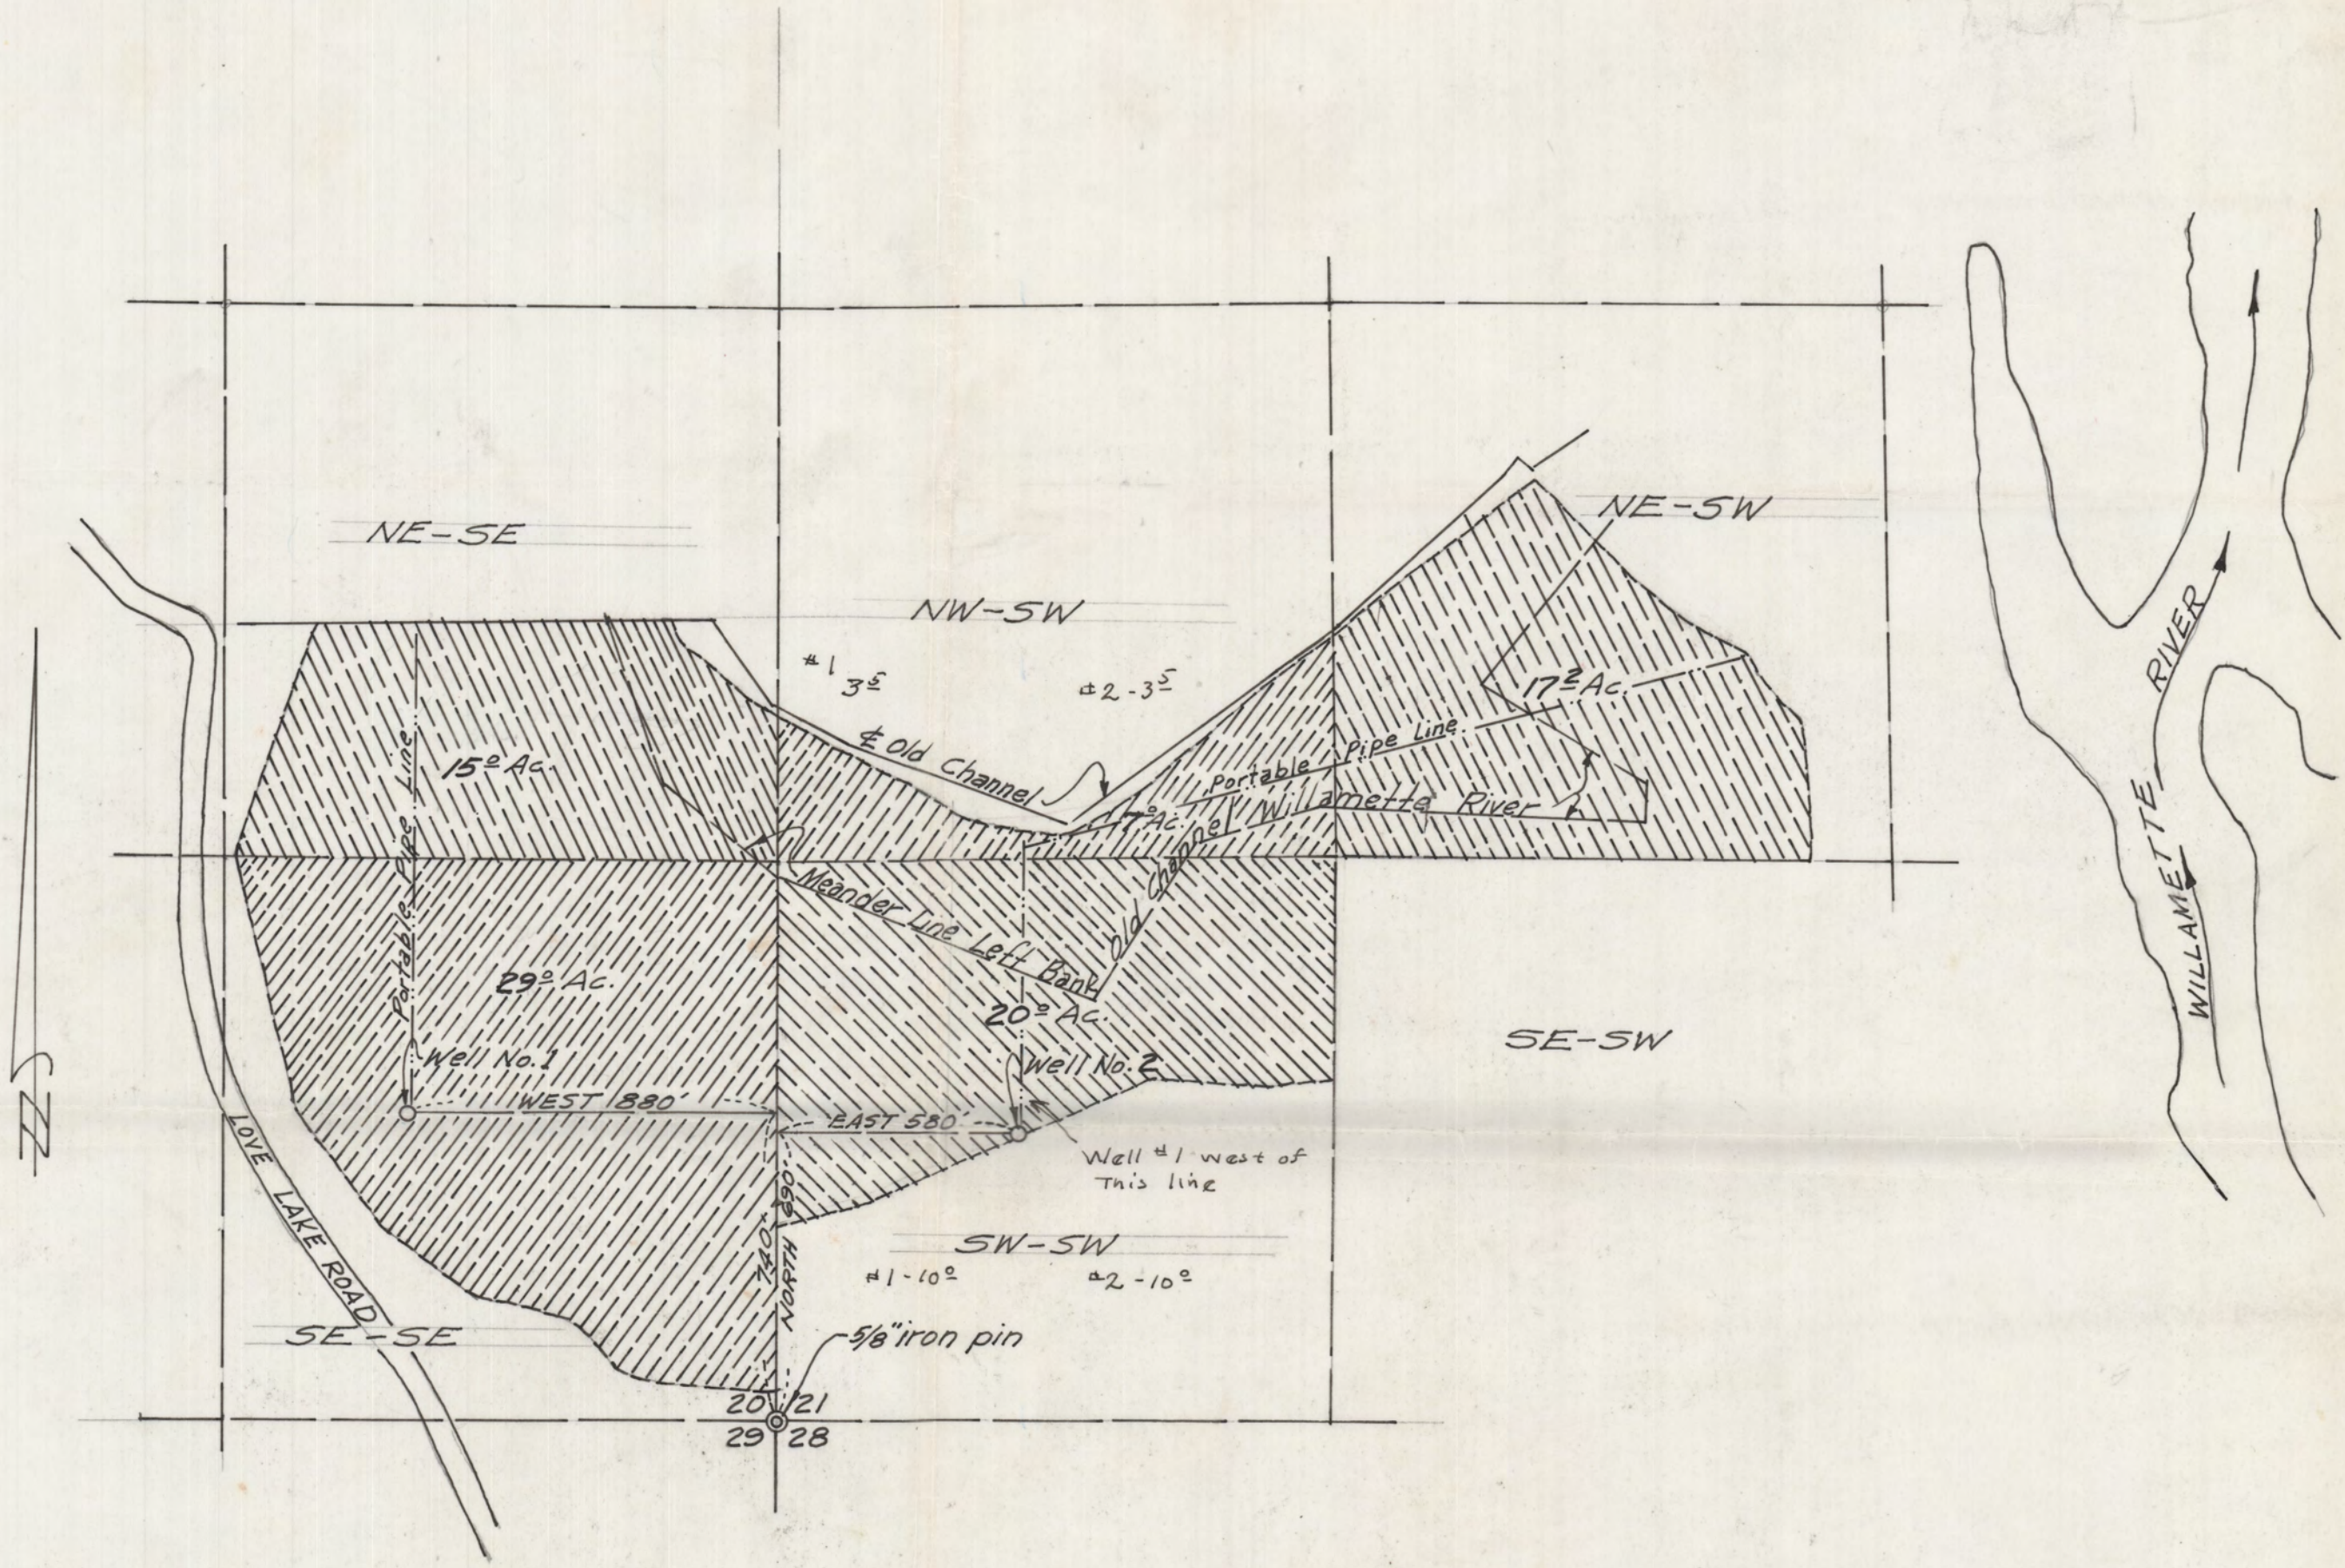

Sincerely,

Thomas E. Shook

Dear Madams:

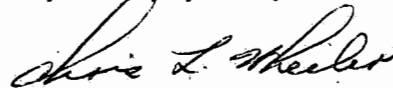

This will acknowledge receipt of your notice to the effect that complete application of water has been made under permit No. G-4926.

Pursuant to your report and in line with the general practice of this office, a survey will be made at a later date.

After this survey, proof may be made and certificate issued covering the actual use of water as found by the engineer. In case of irrigation, any lands described in the permit that have not been irrigated will be automatically eliminated from the water right.

In the meantime, the permit which you hold will be valid evidence of the water right in question so long as you continue to use the water.

Very truly yours,

CHRIS L. WHEELER
State Engineer

Dear Mrs. Leedy:

Acknowledged is your letter of December 7, 1972. I believe the card you make reference to in your letter is a post card mailed from this office reminding you that the time limit allowed to make a substantial beginning of construction under permit number G-4926 has expired as of November 23, 1972, and your notice of beginning of construction should be submitted. Permit number G-4926 describes the appropriation of 1.10 cubic feet per second of water from two wells, being 0.72 cubic foot per second from well #1 and 0.38 cubic foot per second from well #2 for the irrigation of 57.5 acres from well #1 and 30.7 acres from well #2.

A substantial beginning of construction in connection with this permit would be the construction of no less than one of the two wells described.

According to your letter, you have stated that the well was drilled on the day you received the post card. The post card was mailed from this office on November 27, 1972, which is after the time limit as described on the permit.

Unless we receive proof that a substantial beginning of construction was made in connection with this permit on or before November 23, 1972, the permit cannot remain in force and an application for a new permit must be submitted if water is to be used. I have enclosed for your use form A for reporting to us the date that construction had begun and also to what extent the work had been completed on or before November 23, 1972, if any.

If a new application must be submitted you may make reference to file number G-5544 to aid in the preparation of a new application.

Very truly yours,

Dear Sir:

Regarding water right permit #G-4926, file # G-5544,
names: Lucille Leedy & Linda I. Ayres; old address Rt. 1,
Box 435.

I telephoned the Corvallis Drilling Co. who drilled the
well the day I received your post card. Their files were
at a different office but promised to send me the dates the
drilling was started on the well and the date of completion.
I will complete the forms as soon as I get this information,
and if I do not get it soon I will telephoned them again.

Yours truly,
Lucille Leedy

Dear Mrs. Leedy:

This will acknowledge the completed affidavit to clear our records regarding certificate No. 36464 so your application No. G-5544 will be for primary irrigation.

Your application No. G-5544 is in satisfactory form and will be included in the next group for issuance of a permit.

With my last letter I furnished a copy of a map with various tracts colored to agree with the explanation in the letter. You returned this map along with the affidavit but I am again returning it to you in case you would like to keep it for your records.

A certificate to cover the remaining right for the use of water from the slough following the cancelation of a portion requires a recording fee of \$1.00. You have a refund due for fees submitted in connection with application No. G-5544 and we will take the certificate recording fee from this. When the permit approving your application No. G-5544 is issued and sent to you we will also include a check refunding excess fees of \$14.50.

Dear Mrs. Leedy:

I am enclosing an affidavit to provide for cancellation of that part of the water right for Lancaster Slough for irrigation of the lands described in your application for a permit to irrigate from a well.

I find no record in correspondence and I am not sure if it was discussed with you but there is another point for consideration. The original right for Lancaster Slough did not include all the lands shown on the final proof survey map as the total claimed irrigated exceeded the limits of the permit. I am enclosing a print of the final proof survey map made in connection with permit 25884. The area colored blue was under the right but canceled when the permit to irrigate from two wells was obtained. The area colored green is described in the enclosed affidavit for cancelation of this part and is covered by the new application for use from two wells. The area colored yellow is that part of the original right which will remain after the cancelation being considered. The area colored red comprising 15.3 acres was not included in the certificate issued to Linda Ayres and there is no other right appurtenant to this. If the land is irrigated and the owner intends to continue irrigating it from the slough, an application for a permit can be filed and we could assist with this if no other land is to be added.

Transferring the place of use of part instead of canceling would not serve the same purpose as the existing right only provides for the appropriation of 0.305 cubic foot per second of water from the west branch of the slough and the normal limitation for irrigation of the 16.7 acres shown in yellow together with the 15.3 acres shown in red is 0.4 cubic foot per second of water.

Dear Mrs. Leedy and Ms. Ayres:

Will you please submit a legal description of lands you own in the NE 1/4 of Section 20 and the NW 1/4 of Section 21, of Township 15 South, Range 4 West, W.M.

We will need this legal description in the preparation of the affidavit requested when you were in this office. Your previous files do not have a description of the land and apparently the legal description was overlooked when you were in this office.

Dear Ms. Leedy and Ms. Ayres:

This will acknowledge your application for a permit to appropriate 0.72 cubic feet per second from well number 1 for the irrigation of 57.5 acres and 0.38 cubic feet per second from well number 2 for the irrigation of 30.7 acres, a map with one print, and the fee of \$44.35 for which our receipt number 23947 is enclosed. Your application has been filed and numbered G-5544.

In the remarks section of the application you indicate that the surface water supply under permit 25884 is not sufficient due to the drying up of the sloughs. If the wells are to be the primary source of water for the lands described in this application, we will prepare for your signature the necessary affidavit of abandonment to cancel Certificate 36464.

If the sloughs are to be used to the extent the water is available and the wells are to be a supplemental source, the map and Item number 12 on the application must separately identify the primary and supplemental irrigation.

Item number 4 on the application apparently has the well numbers incorrect in describing their location.

The specific lands to be irrigated from each well must also be designated on the map as well as in Item number 12.

I am returning your application and map for completion, endorsed so that in order to retain its priority date it must be returned to this office on or before September 7, 1971.

Very truly yours,

On June 1st I sent a permit for a well by certified mail, I received the card which I requested.

I misunderstood the letter from Stephen Ford who did the paper work for me and I sent the check to them instead of with the permit.

Please find the check enclosed. I am sorry for this mistake on my part.
