Water Rights Division, Water Resources Dept.
555 13th Street N.E., Mill Creek Park
Salem, Ore 97310 RE: Permit # ~~8464~~ Permit # 7763
Application # 8464

Dear Mr. Jebousek:

I received a postcard A-Form 90 indicating that you have not received a Form A Notice of Beginning of Construction. The postcard says Form A was attached to my permit.

I have never received a permit # G-7763.

The last letter you sent me is dated 13 October 1977. It assigned # G-8464 to my application and said you were backlogged and that you would send me a permit as soon as possible. There is a form C attached. I cannot remember if I already sent in Form A or not.

At any rate the well is finished, pump installed, etc. This was done in fall of 1977. In 1978 I irrigated approximately 120 acres South of dike.

However before I send in FORM C, I would like to review the Permit to see the acres and conditions recorded on it. Would you check your file to see if you already mailed it? I do not have it in my file and cannot remember ever receiving it. Thank you, Ray Hanson (493-2319)

STATE OF OREGON

COUNTY OF HARNEY

CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

Richard P Johnson or Kathleen M Johnson
69854 Crane Buchanan RD
Burns OR 97720

confirms the right to use the waters of A WELL in the CURTIS CREEK Basin for IRRIGATION of 116.0 ACRES.

This right was perfected under Permit G-7763. The date of priority is SEPTEMBER 27, 1977. The amount of water to which this right is entitled is limited to an amount actually used beneficially, and shall not exceed 1.45 CUBIC FEET PER SECOND or its equivalent in case of rotation, measured at the well.

The well is located as follows:

Twp	Rng	Mer	Sec	Q-Q	GLot	DLC	Measured Distances
23 S	33 E	WM	14	NE SE			1490 FEET NORTH & 850 FEET WEST FROM SE CORNER, SECTION 14

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second, or its equivalent for each acre irrigated, and shall be further limited to a diversion of not to exceed 3 acre-feet per acre for each acre irrigated during the irrigation season of each year.

A description of the place of use to which this right is appurtenant is as follows:

IRRIGATION							
Twp	Rng	Mer	Sec	Q-Q	GLot	DLC	Acres
23 S	33 E	WM	14	NE SE			18.0
23 S	33 E	WM	14	NW SE			27.2
23 S	33 E	WM	14	SW SE			34.4
23 S	33 E	WM	14	SE SE			36.4

The well shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate at any time before it has issued, and after the time has expired for the completion of the appropriation under the permit, or within three months after issuance of the certificate.

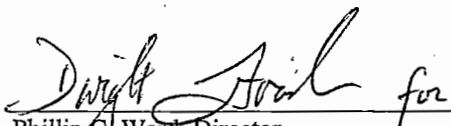

The works shall include an airline and pressure gauge or an access port for measuring line, adequate to determine the water level elevation in the well at all times.

The water user shall install and maintain a weir, meter, or other suitable measuring device and keep a complete record of the amount of ground water withdrawn.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

Issued FEB 25 2011

Phillip C. Ward, Director
Water Resources Department

Oregon

John A. Kitzhaber, MD, Governor

Water Resources Department
North Mall Office Building
725 Summer Street NE, Suite A
Salem, OR 97301-1271

FAX 503-986-0904

Date Mailed: February 25, 2011

NOTICE OF CERTIFICATE ISSUANCE

Attached are certificates that confirm water rights established under the terms of permits issued by this Department. The water rights are now appurtenant to the specific place where the use was established as described by the certificates. The water rights are limited to a specific amount of water, but not more than can be beneficially used for the purposes stated within the certificates.

This is a final order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within **60 days of the mailing date stated above** as specified by ORS 183.484(2).

This statement of judicial review rights is required under ORS 536.075; it does not alter or add to existing review rights or create review rights that are not otherwise provided by law.

Under ORS 537.260 and 537.270, a water right certificate may be contested before the Water Resources Department within three (3) months of the date it is issued. If a certificate is contested, the qualifying contestant shall be offered an administrative hearing.

Oregon law does not allow the Director to reissue a certificate because of a change in the ownership of the appurtenant place of use. The water must be controlled and not wasted. To change the location of the point of diversion, the character of use, or the location of use requires the advance approval of the Water Resources Director.

If any portion of this water right is not used for five or more consecutive years, that portion of the right may be subject to forfeiture according to ORS 540.610. Land enrolled in a Federal Reserve Program is not subject to forfeiture during the period of enrollment. Other exceptions to forfeiture are explained in ORS 540.610.

If you have any questions please contact Gerry Clark at 503-986-0811

NOTICE

Reference: Permit G-7763 Application G-8464

Our research has indicated that you are the current land owner of the land involved in the attached proposed certificate. The original proposed certificate was initially mailed to the permit holder of record.

Oregon law does not allow the Director to reissue a certificate, once it has been issued, because of a change in the ownership of the appurtenant place of use. If you wish to have the name changed on the right, you may have the file assigned to you through the assignment process. Please contact the Department if you want additional information concerning the assignment process.

Enclosed is a proposed certificate of water right and a map which illustrates the location of the right. The map and proposed certificate represent the extent water was used within the terms of the permit based upon a survey and inspection.

If you do not agree with the proposed certificate or the map, Oregon Administrative Rule 690-330-010 (2) allows the permittee or landowner 60 days from the mailing date of this notice to request the Department to reconsider the contents of the proposed certificate.

If you agree with the proposed certificate and map no response to this notice is required. Sometime after the 60 day period, the recorded certificate of water right will be mailed to the permittee.

If you have any questions please contact Gerry Clark at 503-986-0811.

Sincerely,

Dwight French
Administrator
Water Rights Division

Subject: Richard Johnson Permit Extension

Dear Mr. Clark,

Thank you for the information you provided on the phone yesterday. Due to our present situation we would greatly appreciate some more time to determine whether or not we need an extension on the permit #G-7763. As you know, my father wanted to extend the acreage from 116 to 160 for this permit and apply for a new permit to add an additional 80 acres of water rights. Now that my father has passed away, we need to determine if this is the right approach for us. We will have a decision for you no later than the end of the year, December 31, 2010. I hope this will work for you.

Thank you very much for your patience on this matter.

Sincerely,

Zack Jenks

Zack,

Thanks for the update. Based on your reply I plan to move to issue the final certificate for permit G-7763. The final certificate will be consistent with the proposed certificate mailed back on January 22, 2010. That proposed certificate was for 116.0 acres and 1.45 cfs from one well.

Following the issuance of the certificate, the only way to irrigate any acres beyond the 116.0 acres will be to file for a new permit.

Let me know if you have any additional questions.

Gerry

Rick,

Your request for additional time to respond to the proposed certificate is approved the Department will not take any additional action on this file or on Application S-53909 until after August 30, 2010.

We received the check for the Assignment on the April 12, 2010. We will process that request soon.

Let me know if you have any additional questions.

North Mall Office Building
725 Summer Street NE, Suite A
Salem, OR 97301-1271

Dear Gerry,

Thank you for providing information in our phone conversation last Thur, 4/1, regarding options for addressing the subject water resource permit and application.

The purpose of this note is threefold:

1. Request an extension of time to appeal the proposed order of certification;
2. Submit assignment by proof of ownership; and
3. Summarize approach we will take to meet OWRD requirements.

1. Extension of Time:

Please allow me until August 30 to satisfy OWRD requirements (see item 3. below). I anticipate that the time needed may be substantially less, but would like the additional time in order to address any scheduling challenges I may encounter obtaining the necessary information from neighbors.

2. Water Rights Ownership Assignment:

Please see attached form that we have completed and signed along with supporting proof in the form of a deed conveyed to us by the State of Oregon. A check in the amount of \$75 has been sent under separate cover via our electronic check writing service and should arrive at your office this Thursday, April 8. This check is for the ownership assignment fee.

3. Proposed Approach to Meet OWRD Requirements:

On or before August 30, 2010, we will provide statements from our neighbors that confirm the water usage both before and after our ownership. We will then request that the "Certificate of Water Right" be updated to reflect a full 160 acres permitted. In addition we may (at the same time) make application for a permit to allow water use on an additional 110 acres (80 acres of land adjacent to the 160 plus another 30 acres of land previously irrigated under Permit No. 1514, dated April 2, 1913). It is our hope that the Department will then allow us, through proper permitting, to irrigate a total contiguous parcel of 270 acres to produce alfalfa and other crops.

Sincerely, Rick

Original Petition to OWRD

January 29, 2010

Phillip C. Ward, Director
Water Resources Department
North Mall Office Building
725 Summer Street NE, Suite A
Salem, OR 97301-1271

(Contains "Attachment
A")

Subject: Petition for modification – water right permit G-7763
Reference: Permit G-7763 Application G-8464

RECEIVED

FEB 17 2010

Dear Mr. Ward:

WATER RESOURCES DEPT
SALEM, OREGON

We respectfully ask that you modify the issuance name and the acreage of use for the subject water right permit.

Specific requests:

1. Change certificate issuance name shown in "Certificate of Water Right" in Attachment A to current owners: Richard P and Kathleen M Johnson, 69854 Crane Buchanan Rd., Burns, OR 97720;
2. Change the acreage indicated in first sentence of "Certificate of Water Right" in Attachment A from 116.0 to 240.0;
3. Change the IRRIGATION table shown in Attachment A to:

IRRIGATION							
Twp	Rng	Mer	Sec	Q-Q	GLot	DLC	Acres
23S	33E	WM	14	NE SE			40.0
23S	33E	WM	14	NW SE			40.0
23S	33E	WM	14	SW SE			40.0
23S	33E	WM	14	SE SE			40.0
23S	33E	WM	14	SW NE			40.0
23S	33E	WM	14	SE NE			40.0

Justification for requests:

Kate and I have owned the subject property since March 2, 1988 as shown in Attachment B. We live on land we own adjacent to the property and have farmed all our land off and on over the last 20 plus years. For several years, now, we have leased the subject land to our neighbors for cattle grazing purposes, because my health was not good for a period of time (went through chemotherapy and radiation treatment for

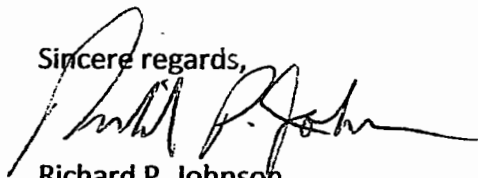

cancer that was successful). Our six children have all grown up and moved off on their own, and none was available to assist with irrigation during that difficult period.

During the years that we did grow crops we used wheel lines for irrigation and had extended mainline that allowed irrigation of the entire 240 parcel as indicated by the revised table. Although the land did not produce bumper crops every year, it did provide good hay when adequate irrigation was applied.

We recently asked our local utility to hook up electricity to the existing pump so that we can resume irrigating and farming this spring. We hope you will allow us to continue using our well and the water we need, so we can continue to make beneficial use of our property.

Thank you for your consideration of this petition.

Sincere regards,

Richard P. Johnson

confirms the right to use the waters of A WELL in the CURTIS CREEK Basin for IRRIGATION of 112.0 ACRES. **240**

This right was perfected under Permit G-7763. The date of priority is SEPTEMBER 27, 1977. The amount of water to which this right is entitled is limited to an amount actually used beneficially, and shall not exceed 1.45 CUBIC FEET PER SECOND or its equivalent in case of rotation, measured at the well.

The well is located as follows:

Twp	Rng	Mer	Sec	Q-Q	GLot	DLC	Measured Distances
23 S	33 E	WM	14	NE SE			1490 FEET NORTH & 850 FEET WEST FROM SE CORNER, SECTION 14

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second, or its equivalent for each acre irrigated, and shall be further limited to a diversion of not to exceed 3 acre-feet per acre for each acre irrigated during the irrigation season of each year.

A description of the place of use to which this right is appurtenant is as follows:

IRRIGATION							
Twp	Rng	Mer	Sec	Q-Q	GLot	DLC	Acres
23 S	33 E	WM	14	NE SE			18.1
23 S	33 E	WM	14	NW SE			27.1

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may either petition for judicial review or petition for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate at any time before it has issued, and after the time has expired for the completion of the appropriation under the permit, or within three months after issuance of the certificate.

PROPOSED

RECEIVED

The works shall include an airline and pressure gauge or an access port for measuring line, adequate to determine the water level elevation in the well at all times.

The water user shall install and maintain a weir, meter, or other suitable measuring device and keep a complete record of the amount of ground water withdrawn.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

Thanks so much for your help on this issue, Gerry. You're an asset to our State.

I'm going through some health issues since last we spoke - brain tumor and emergency helicopter ride from Burns to St. Charles med center in Bend, if you can believe that! You just never know what challenges lie ahead on the path of life, my friend.

I'll continue working on the water rights when I return to the ranch.

all the best, Rick

RE: Application G-8464, Permit G-7763

Dear Mr. Johnson,

The Department has received your letter concerning modification of the proposed certificate mailed on January 22, 2010.

The permit was issued on January 20, 1978. The permit allowed for the development of 160 acres in the SE ¼ of Section 14. The permit allowed for the use of 2.0 cfs for the irrigation from one well. The water was required to be beneficially used by October 1, 1979.

The proposed certificate was based on the results of a series of inspections of the lands made by the Department between 1986 and 1988. The proposed certificate and map represent what the Department found to be irrigated based on those inspections. The purpose of the inspection was to document how much water and how many acres had been used by October 1, 1979.

Your letter contained three requests:

1. Change the name the certificate is being issued under to both you and your wife;
2. To increase the acreage indicated on the proposed certificate from 116.0 acres to 240.0 acres; and
3. To change the location of the irrigation to include 80.0 acres in the S 1/2 of the NE 1/4.

I will address each request above separately:

1. In order to change the name on the proposed certificate you must go through the Assignment process. I have attached the form you will need to complete in

order to have your name added to the record. Along with the form, you will need to attach a copy of your deed and a check for \$75.00. If you have addition questions concerning the completion of this form, please contact Jerry Sauter at 503-986-0817.

2. The permit only allowed for the irrigation of 160 acres. The Department found only 116.0 acres being irrigated. If you have developed additional acreage beyond the 116 acres identified by the Department, you could file a permit extension of time to gain additional time to develop up to the 160 acres allowed by the permit. To use water from the well on the additional 80 acres, beyond the 160 acres allowed by the permit, would first require the submittal of a new application and subsequent issuance of a new water right permit.
3. As was discussed in item 2, since the permit only allowed for the irrigation of 160 acres, the additional 80 acres in the S 1/2 of the NE 1/4 could not be added to the certificate. If you wished to add these 80 acres, you would need to file a new application for permit.

In the process of preparing a response to your letter, I checked to see if there any other rights covering the lands you have asked about. There is a water right that covers 40 acres in the SE 1/4 NE 1/4 of Section 14 from Curtis Creek. I have enclosed a copy of that certificate for your reference. If any portion of this water right is not used for five or more consecutive years, that portion of the right may be subject to forfeiture according to ORS 540.610.

If you have any additional questions, please feel free to contact me at 503-986-0811.

Sincerely,

Gerry Clark

STATE OF OREGON

WATER DIVISION NO. 2 COUNTY OF HARNEY

CERTIFICATE OF WATER RIGHT

(For rights perfected under original, enlargement or secondary permits)

This is to Certify, That THOMAS L. VICKERS

of Buchanan, State of Oregon, has made proof to the satisfaction of the STATE WATER BOARD of Oregon, of a right to the use of the waters of Curtis Creek, a tributary of

for the purpose of the irrigation of 60 acres of land under Permit No. 1514 of the State Engineer, and that said right to the use of said waters has been perfected in accordance with the laws of Oregon and duly confirmed by order of the STATE WATER BOARD of Oregon, made and entered of record in the Record of Proceedings of said Board, at Salem, in Volume 1

at page 236, on the 8th day of February, 1917; that the priority of the right hereby confirmed dates from April 2, 1913; that the amount of water to which such right is entitled and hereby confirmed, for the purposes aforesaid, is limited to an amount actually beneficially used for said purposes, and shall not

exceed 0.75 cubic feet per second, or its equivalent in case of rotation. The use hereunder shall conform to any reasonable rotation system ordered by the proper State Officer. A description of the lands under such right, and to which the water hereby confirmed is appurtenant, or, if for other purposes, the place where such water is put to beneficial use, is as follows: 20 acres in the Northeast quarter of Northeast quarter and 40 acres in the Southeast quarter of Northeast quarter of Section Fourteen (14), Township Twenty-three (23) South, Range Thirty-three (33) East of Willamette Meridian, in Harney County, Oregon.

The right to the use of the water aforesaid, hereby confirmed, is restricted to the lands or place of use herein described.

Rights to the use of water for power purposes are limited to a period of forty years from the date of priority of the right, as herein set forth, subject to a preference right of renewal under the laws existing at the date of the expiration of the right for power purposes, as hereby confirmed and limited.

Witness the seal and signature of the STATE

WATER BOARD affixed this 5th day of March, 1917.

Subject: ~~Retraction of name change request and Appeal of Time Extension Requirement~~

Reference: Permit G-7763 Application G-8464

RECEIVED

Dear Mr. Clark:

FEB 17 2010

Thank you for responding to our earlier petition in a clear and concise manner.

WATER RESOURCES DEPT
SALEM, OREGON

Based on your letter and to save money, we retract our petition for name change on the referenced permit and would like to make these modified requests:

1. Change the acreage indicated in first sentence of "Certificate of Water Right" in Attachment A from 116.0 to 160.0 and
2. Change the IRRIGATION table shown in Attachment A to:

IRRIGATION							
Twp	Rng	Mer	Sec	Q-Q	GLot	DLC	Acres
23S	33E	WM	14	NE SE			40.0
23S	33E	WM	14	NW SE			40.0
23S	33E	WM	14	SW SE			40.0
23S	33E	WM	14	SE SE			40.0

Discussion of Items 1 and 2:

Our initial petition (enclosed) asked for 240 acres of water use, adding 80 to the 160 allowed in the original permit of January 20, 1978. We understand now, based on your clarification, that we will need to apply for a separate permit to allow continued water use on the additional 80 acres.

Please note that we began irrigating the 160 acres shown in the proposed table shortly after purchasing the property from the Oregon Department of Veterans Affairs in March of 1988, based on our understanding of the water rights on our property. The land had been for sale by the ODVA for some period of time previously (foreclosed on the last owner). Thus, the OWRD inspections between 1986 and 1988 were probably during that period of ownership transition. As such, they would not represent the longer-term

water usage on this property. The inspections, unfortunately, were a snapshot taken during a short period of inactivity.

I know that is a long time ago, but it does not seem fair that we should now have to pay \$500 for an extension of time to develop the 160 acres that we have already utilized much of the time for the last 20 years. Times are tough everywhere, and especially here in eastern Oregon. We were hoping to use most of the money we have available for seed and planting purposes.

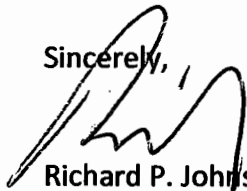

Appeal:

We humbly appeal the designation made between 1986 and 1988 of 116 acres.

We respectfully ask the Department to change that designation to the 160 acres we have actually been using, as described in our original letter to Mr. Ward.

Thank you very much for your support and for considering this appeal.

Sincerely,

Richard P. Johnson

RE: Application G-8464, Permit G-7763

Dear Mr. Johnson,

The Department has received your letter concerning modification of the proposed certificate mailed on January 22, 2010.

The permit was issued on January 20, 1978. The permit allowed for the development of 160 acres in the SE ¼ of Section 14. The permit allowed for the use of 2.0 cfs for the irrigation from one well. The water was required to be beneficially used by October 1, 1979.

The proposed certificate was based on the results of a series of inspections of the lands made by the Department between 1986 and 1988. The proposed certificate and map represent what the Department found to be irrigated based on those inspections. The purpose of the inspection was to document how much water and how many acres had been used by October 1, 1979.

Your letter contained three requests:

1. Change the name the certificate is being issued under to both you and your wife;
2. To increase the acreage indicated on the proposed certificate from 116.0 acres to 240.0 acres; and
3. To change the location of the irrigation to include 80.0 acres in the S 1/2 of the NE 1/4.

I will address each request above separately:

1. In order to change the name on the proposed certificate you must go through the Assignment process. I have attached the form you will need to complete in

order to have your name added to the record. Along with the form, you will need to attach a copy of your deed and a check for \$75.00. If you have addition questions concerning the completion of this form, please contact Jerry Sauter at 503-986-0817.

2. The permit only allowed for the irrigation of 160 acres. The Department found only 116.0 acres being irrigated. If you have developed additional acreage beyond the 116 acres identified by the Department, you could file a permit extension of time to gain additional time to develop up to the 160 acres allowed by the permit. To use water from the well on the additional 80 acres, beyond the 160 acres allowed by the permit, would first require the submittal of a new application and subsequent issuance of a new water right permit.
3. As was discussed in item 2, since the permit only allowed for the irrigation of 160 acres, the additional 80 acres in the S 1/2 of the NE 1/4 could not be added to the certificate. If you wished to add these 80 acres, you would need to file a new application for permit.

In the process of preparing a response to your letter, I checked to see if there any other rights covering the lands you have asked about. There is a water right that covers 40 acres in the SE 1/4 NE 1/4 of Section 14 from Curtis Creek. I have enclosed a copy of that certificate for your reference. If any portion of this water right is not used for five or more consecutive years, that portion of the right may be subject to forfeiture according to ORS 540.610.

If you have any additional questions, please feel free to contact me at 503-986-0811.

Sincerely,

Gerry Clark
Water Rights Specialist

RECEIVED

FEB 02 2010

WATER RESOURCES DEPT
SALEM, OREGON

Subject: Petition for modification – water right permit G-7763
Reference: Permit G-7763 Application G-8464

Dear Mr. Ward:

We respectfully ask that you modify the issuance name and the acreage of use for the subject water right permit.

Specific requests:

1. Change certificate issuance name shown in "Certificate of Water Right" in Attachment A to current owners: Richard P and Kathleen M Johnson, 69854 Crane Buchanan Rd., Burns, OR 97720;
2. Change the acreage indicated in first sentence of "Certificate of Water Right" in Attachment A from 116.0 to 240.0;
3. Change the IRRIGATION table shown in Attachment A to:

IRRIGATION							
Twp	Rng	Mer	Sec	Q-Q	GLot	DLC	Acres
23S	33E	WM	14	NE SE			40.0
23S	33E	WM	14	NW SE			40.0
23S	33E	WM	14	SW SE			40.0
23S	33E	WM	14	SE SE			40.0
23S	33E	WM	14	SW NE			40.0
23S	33E	WM	14	SE NE			40.0

Justification for requests:

Kate and I have owned the subject property since March 2, 1988 as shown in Attachment B. We live on land we own adjacent to the property and have farmed all our land off and on over the last 20 plus years. For several years, now, we have leased the subject land to our neighbors for cattle grazing purposes, because my health was not good for a period of time (went through chemotherapy and radiation treatment for

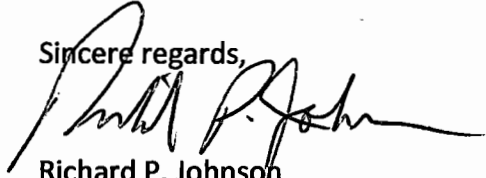

cancer that was successful). Our six children have all grown up and moved off on their own, and none was available to assist with irrigation during that difficult period.

During the years that we did grow crops we used wheel lines for irrigation and had extended mainline that allowed irrigation of the entire 240 parcel as indicated by the revised table. Although the land did not produce bumper crops every year, it did provide good hay when adequate irrigation was applied.

We recently asked our local utility to hook up electricity to the existing pump so that we can resume irrigating and farming this spring. We hope you will allow us to continue using our well and the water we need, so we can continue to make beneficial use of our property.

Thank you for your consideration of this petition.

Sincere regards,

A handwritten signature in black ink, appearing to read "Rick P. Johnson", written over the typed name.

Attachment A

MAILED: JAN 22 2010

NOTICE

Reference: Permit G-G-7763 Application G-8464

Enclosed is a proposed certificate of water right and a map which illustrates the location of the right. The map and proposed certificate represent the extent water was used within the terms of the permit based upon a survey and inspection.

If you do not agree with the proposed certificate or the map, Oregon Administrative Rule 690-330-010 (2) allows the permittee or landowner 60 days from the mailing date of this notice to request the Department to reconsider the contents of the proposed certificate.

If you agree with the proposed certificate and map no response to this notice is required. Sometime after the 60 day period, the recorded certificate of water right will be mailed to the permittee.

If you have any questions please contact Gerry Clark at 503-986-0811.

Sincerely,

Dwight French

confirms the right to use the waters of A WELL in the CURTIS CREEK Basin for IRRIGATION of 116.0 ACRES. **240**

This right was perfected under Permit G-7763. The date of priority is SEPTEMBER 27, 1977. The amount of water to which this right is entitled is limited to an amount actually used beneficially, and shall not exceed 1.45 CUBIC FEET PER SECOND or its equivalent in case of rotation, measured at the well.

The well is located as follows:

Twp	Rng	Mer	Sec	Q-Q	GLot	DLC	Measured Distances
23 S	33 E	WM	14	NE SE			1490 FEET NORTH & 850 FEET WEST FROM SE CORNER, SECTION 14

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second, or its equivalent for each acre irrigated, and shall be further limited to a diversion of not to exceed 3 acre-feet per acre for each acre irrigated during the irrigation season of each year.

A description of the place of use to which this right is appurtenant is as follows:

IRRIGATION							
Twp	Rng	Mer	Sec	Q-Q	GLot	DLC	Acres
23 S	33 E	WM	14	NE SE			18.1
23 S	33 E	WM	14	NW SE			27.1

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080, you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate at any time before it has issued, and after the time has expired for the completion of the appropriation under the permit, or within three months after issuance of the certificate.

PROPOSED

The works shall include an airline and pressure gauge or an access port for measuring line, adequate to determine the water level elevation in the well at all times.

The water user shall install and maintain a weir, meter, or other suitable measuring device and keep a complete record of the amount of ground water withdrawn.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

Subject: Ownership Information

Tony,

I need your assistance in obtaining the current ownership of property within Harney County. I'm trying to complete a proposed certificate (File G-8464) and a proposed order of certification (File 53909). The property is in T 23 S, R 33 E, Section 14, tax lots 2000 and 2200. The original applicant was Ramon Hanson.

Your assistance will be greatly appreciated.

Thanks

Jerry

May 4, 2006

TO: Dwight French

FROM: Larry Nunn

SUBJECT: Adverse Report P#40222 and Proof P# G-7763

Permit 40222 allowed use of Curtis Creek for irrigation of 95.0 acres. Permit G-7763 allowed a well for irrigation and supplemental irrigation of 160.0 acres. A portion of the ground water permit was to be supplemental to the surface water. The C-date for the surface water was '78; ground water was '80.

Larry Toll, in '86, found only the well being used. Zeidan Saleh went back in '88, and got a claim from the permittee that he used the creek in '85 and '86. Saleh then went to the land and found no ditch from creek, and only a mainline from the well. Toll reported he talked to the person who farmed the land in '85; and who claimed only the well was used.

Evidence in the file suggests that Larry Toll recommended both permits be cancelled because of no proof on the primary permit. However, it appears that Steve Applegate decided that since the ground water permit allowed both irrigation and supplemental irrigation without breaking out the acreage for each one, that proof could be made for primary irrigation for all the use from the well.

Proof should be made on the ground water permit only. The surface water permit should be cancelled. The certified cancellation letter and the proposed ground water certificate should be sent together, preferably in the same envelope.

STATE OF OREGON

COUNTY OF HARNEY

PROPOSED CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

RAMON K. HANSON
3807 NE 13TH STREET
PORTLAND, OREGON 97212

confirms the right to use the waters of A WELL in the CURTIS CREEK BASIN for of IRRIGATION of 116.0 ACRES.

The right has been perfected under Permit G-7763. The date of priority is SEPTEMBER 27, 1977. The right is limited to not more than 1.45 CUBIC FEET PER SECOND or its equivalent in case of rotation, measured at the well.

The well is located as follows:

NE $\frac{1}{4}$ SE $\frac{1}{4}$, SECTION 14, T 23 S, R 33 E, W.M.; 1490 FEET NORTH & 850 FEET WEST FROM SE CORNER, SECTION 14.

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

A description of the place of use under the right, and to which such right is appurtenant, is as follows:

NE $\frac{1}{4}$ SE $\frac{1}{4}$ 18.0 ACRES
 NW $\frac{1}{4}$ SE $\frac{1}{4}$ 27.2 ACRES
 SW $\frac{1}{4}$ SE $\frac{1}{4}$ 34.4 ACRES
 SE $\frac{1}{4}$ SE $\frac{1}{4}$ 36.4 ACRES

SECTION 14

TOWNSHIP 23 SOUTH, RANGE 33 EAST, W.M.

The works shall include an airline and pressure gauge or an access port for a measuring line, adequate to determine the water level elevation in the well at all times.

The water user shall maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

Saturday, May 11, 1991

Department of Water Resources
State of Oregon
3850 Portland Road NE
Salem, Oregon 97310

Dear Dept. of Water Resources:

We think our water rights may expire this year, if we do not irrigate. However, drought conditions in Harney County make it undesirable to invest in a crop at this time, because of the uncertainty of the water table. Is there any way we can petition for a limited one or two-year extension on the expiration date of our water rights?

Our water rights are for:

- Water Right Numbers: 2863, G-8464 and 53909
- Permit Numbers: 1514, G-7763 and 40222
- Certificate Number: 1347

Acreages involved:

- 60 ACRES=Curtis Creek / Certified (2863)
- 65 ACRES=Irrigation Well / Permit Stage (G8464)
- 95 ACRES=Irrigation Well Supplemental / Permit Stage (G8464)
- 95 ACRES=Curtis Creek / Permit Stage (53909)

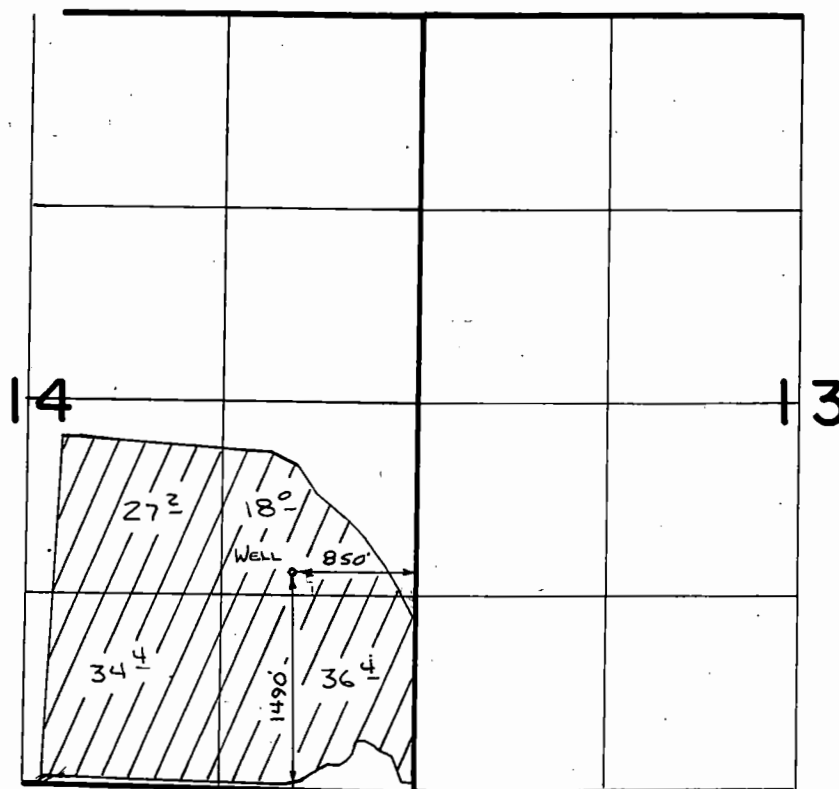

Please advise us on this matter by June 15, if possible.

Thank you very much for your help.

1. The development will consist of ONE IRRIGATION well
(Give number of wells, tile lines, infiltration galleries, etc.)

having a diameter of 12 inch and an estimated depth of 150 feet.

2. The well or other source is to be located 1320 ft. N and 1320 ft. W
(N. or S.) (E. or W.)

from the SE corner of Sec 14
(Public Land Survey Corner)

(If there is more than one well, each must be described)

being within the SE ¼ of the SE ¼ of

Sec. 14 Tp. 23S R. 33 E, W. M., in the county of HARNEY

3. Location of area to be irrigated, or place of use if use other than irrigation.

[illegible]

4. It is estimated that 150 feet of the well will require 250 steel casing.

5. Depth to water table is estimated 12' Well drilled by SKINNER & SONS
(Feet) (Kind)

Permit to Appropriate the Public Waters of the State of Oregon

This is to certify that I have examined the foregoing application and do hereby grant the same, SUBJECT TO EXISTING RIGHTS INCLUDING THE EXISTING MINIMUM FLOW POLICIES ESTABLISHED BY THE WATER POLICY REVIEW BOARD and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 2.0 cubic feet per second measured at the point of diversion from the well or source of appropriation, or its equivalent in case of rotation with other water users, from a well.

The use to which this water is to be applied is irrigation and supplemental irrigation.

If for irrigation, this appropriation shall be limited to 1/80th of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3 acre feet per acre for each acre irrigated during the irrigation season of each year; provided further that the right allowed herein shall be limited to any deficiency in the available supply of any prior right existing for the same land and shall not exceed the limitation allowed herein,

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

The works constructed shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times.

The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

The priority date of this permit is September 27, 1977

Actual construction work shall begin on or before January 20, 1979 and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1979

Complete application of the water to the proposed use shall be made on or before October 1, 1980

WITNESS my hand this 20th day of January, 1978

Application No. G-8464

Permit No. G 7763

STATE OF OREGON WATER RESOURCES DEPARTMENT

Application for a Permit to Appropriate Ground Water

WATER RESOURCES DEPT
SALEM, OREGON

WATER RESOURCES DEPT
SALEM, OREGON

NAME OF APPLICANT: RAMON K. HANSON
MAILING ADDRESS: PO Box 722
CITY: BURNS
STATE: Oregon ZIP CODE: 97720 PHONE NO.: 573-7655

do hereby make application for a permit to appropriate the following described ground waters of the State of Oregon:

1. The development will consist of ONE IRRIGATION well
(Give number of wells, tile lines, infiltration galleries, etc.)
having a diameter of 12 inch and an estimated depth of 150 feet.

2. The well or other source is to be located 1320 ft. N and 1320 ft. W
(N. or S.) (E. or W.)
from the SE corner of Sec 14
(Public Land Survey Corner)

(If there is more than one well, each must be described)

being within the SE $\frac{1}{4}$ of the SE $\frac{1}{4}$ of
Sec. 14 Tp. 23S R. 33E, W. M., in the county of HARNEY

3. Location of area to be irrigated, or place of use if use other than irrigation.

Township	Range	Section	List $\frac{1}{4}$ $\frac{1}{4}$ of Section	List use and/or number of acres to be irrigated
23S	33E	14	SE $\frac{1}{4}$ SE $\frac{1}{4}$	Irrigation of 160 acres
			SW $\frac{1}{4}$ SE $\frac{1}{4}$	
			NW $\frac{1}{4}$ SE $\frac{1}{4}$	
			NE $\frac{1}{4}$ SE $\frac{1}{4}$	

4. It is estimated that 150 feet of the well will require 250 steel casing.
(Kind)

5. Depth to water table is estimated 12' Well drilled by SKINNER & SONS
(Feet)

6. The amount of water which the applicant intends to apply to beneficial use is cubic feet per second or 1,000 gallons per minute.

7. The use to which the water is to be applied is irrigation

8. If the flow to be utilized is artesian, the works to be used for the control and conservation of the supply when not in use must be described.

9. If the location of the well, or other development work is less than one-fourth mile from a natural stream channel, give the distance to the channel and the difference in elevation between the stream bed and the ground surface at the source of development.

10.

DESCRIPTION OF WORKS

Include length and dimensions of supply ditch or pipeline, size and type of pump and motor, type of irrigation system to adequately describe the proposed distribution system.

A 75 hp turbine pump will be mounted on top of well. Pumps will feed into mainline which will run north & south. 3 or 4 wheel lines will be operated off mainline.

11. Construction work will begin on or before Aug. 1, 1977

12. Construction work will be completed on or before Aug. 30, 1977

13. The water will be completely applied to the proposed use on or before June, 1978

14. If the ground water supply is supplemental to an existing supply, identify the supply and existing water right. The ground water will initially be used as a supplemental supply to surface water in Permit # 1514 and 40222

Application No.

6-8464

Permit No.

G 7763

Remarks: As soon as adequate sprinkler system is installed, the ditch and ditcher now paved under Permit 40222 will be removed and reliance upon run-off water reduced. However, I intend to maintain some capability to use run-off water when this is desirable.

Application No. G-8464

Permit No. G 7763

U.S.G.S.

Permit to Appropriate the Public Waters of the State of Oregon

This is to certify that I have examined the foregoing application and do hereby grant the same, SUBJECT TO EXISTING RIGHTS INCLUDING THE EXISTING MINIMUM FLOW POLICIES ESTABLISHED BY THE WATER POLICY REVIEW BOARD and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 2.0 cubic feet per second measured at the point of diversion from the well or source of appropriation, or its equivalent in case of rotation with other water users, from a well.

The use to which this water is to be applied is irrigation and supplemental irrigation.

If for irrigation, this appropriation shall be limited to 1/80th of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3 acre feet per acre for each acre irrigated during the irrigation season of each year; provided further that the right allowed herein shall be limited to any deficiency in the available supply of any prior right existing for the same land and shall not exceed the limitation allowed herein,

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

The works constructed shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times.

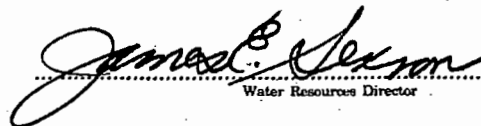

The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

The priority date of this permit is September 27, 1977

Actual construction work shall begin on or before January 20, 1979 and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1979

Complete application of the water to the proposed use shall be made on or before October 1, 1980

WITNESS my hand this 20th day of January, 1978

STATE OF OREGON

COUNTY OF HARNEY

PROPOSED CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

RAMON K. HANSON
P.O. BOX 722
BURNS, OREGON 97720

confirms the right to use the waters of A WELL in the CURTIS CREEK BASIN for the purpose of IRRIGATING 116.0 ACRES.

The right has been perfected under Permit G-7763. The date of priority is SEPTEMBER 27, 1977. The right is limited to not more than 1.45 CUBIC FEET PER SECOND or its equivalent in case of rotation, measured at the well.

The well is located as follows:

NE 1/4 SE 1/4, SECTION 14, T 23 S, R 33 E, W.M.; 1490 FEET NORTH & 850 FEET WEST FROM SE CORNER SECTION 14.

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3.0 acre-feet per acre for each acre irrigated during the irrigation season of each year.

The right shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use under the right, and to which such right is appurtenant, is as follows:

NE 1/4 SE 1/4	18.0 ACRES
NW 1/4 SE 1/4	27.2 ACRES
SW 1/4 SE 1/4	34.4 ACRES
SE 1/4 SE 1/4	36.4 ACRES

SECTION 14

TOWNSHIP 23 SOUTH, RANGE 33 EAST, W.M.

The right to the use of the water for the above purpose is restricted to beneficial use on the lands or place of use described.

Perfected water rights may be forfeited for five successive years of non-use. This is defined in ORS 540.610.

Section (d) of that law says you may rebut the presumption of forfeiture if you are unable to use the water due to economic hardship. The rules which define economic hardship spell out bankruptcy and foreclosures as economic hardships. Also OAR 690-17-800 (3) (f) says "The time during which a natural disaster would limit or prohibit the record owner's or principal farm operator's use of water in question." This is interpreted to mean that during the time of a declared drought the forfeiture statute would be suspended.

Permit 40222 required complete application of water be made by October 1, 1977. Permit G-7763 required complete application of water by October 1, 1980. Both permits must have not gone for five successive years of non-use.

By the way, we have a report, written in 1986, that permit 40222 may have not been used for several years prior to 1986. It is possible that permit 40222 may no longer be valid. We are waiting for the results of additional field inspections for permit 40222 and G-7763.

If you have any further questions, please call the Water Rights Section at 378-3739

Form C

IMPORTANT—This form is a notice to the State Engineer that permittee is ready to make **final proof** to the extent to which the water has actually been applied to the intended use under the terms of the permit. Permittee is cautioned that Certificate of Water Right will be issued based on the extent of the quantity and use as determined by the **final proof** inspection and survey which will be made in response to the filing of this Form C.

NOTE: In the case of an irrigation permit, this Form C should not be mailed to the State Engineer until all of the land described in the permit, which it is intended to irrigate under this permit at any time, has actually been irrigated. Fill out, detach and mail to the State Engineer, Salem, Oregon 97310, when all of the water has been applied.

Application No. G-8464

NOTICE OF COMPLETE APPLICATION OF WATER TO A BENEFICIAL USE

Ramon X. Hansen (Ray Hansen), the holder of Permit No. G 7763 to appropriate the public waters of the state of Oregon, completely applied the waters to a beneficial use in accordance with the terms of said permit, on the 1 day of July, 1978.

Remarks:

See letter to Larry W. Johnson which reported completed application to beneficial use - by flooding out of well - In 1980 I am converting to sprinkler.

IN WITNESS WHEREOF, I have hereunto set my hand this 10 day of October, 1980

(message line)

March 4, 1982

Ramon K. Hanson
Star Route 2, 21 Kerry Road
Burns, OR 97720

Dear Mr. Hanson:

REFERENCE: Files 62382, 53909
G-8464 & 2863

Your Application 62382 describing the proposed use of 1.75 cubic feet of water per second, being 0.5 cfs by pump from channel of Curtis Creek and 1.25 cfs from diversion for the irrigation of 125.0 acres, together with the map, has been reviewed.

I apologize for the long delay in responding to you about your application. We will need some clarification on your proposed project and additional fees before your application can be considered for approval.

If you only intend to appropriate water from Curtis Creek as presently noted in Item 1 of your application, Item 4 of your application should only state the amount of water to be appropriated from Curtis Creek instead of from Curtis Creek and from another diversion. Will you please explain why you have listed a separate amount of water from Curtis Creek and a separate amount of water from a diversion?

The 60.0 acres you have listed to be irrigated in the SE $\frac{1}{4}$ of Section 14 as presently noted in Item 3 of your application has a primary right to the use of water from a well as allowed under your Permit G-7763. Since we cannot issue a permit providing for the use of water from another source for the primary irrigation of the same lands, you may, if there is a deficiency in supply at the well to satisfy the lands, apply for the use of water from Curtis Creek as a supplemental supply of water for these lands. Therefore, if you feel there may be a deficiency in supply at the well to satisfy the irrigation of the lands, you may amend Item 3 to list the acreage in the SE $\frac{1}{4}$ as lands to receive a supplemental supply of water from Curtis Creek.

You have also noted in the Remarks Section that this application changes the point of diversion. I am not sure what point of diversion is to be changed. If you wish to change the point of diversion for the right evidenced by Certificate 1347 (Permit 1514), which according to information in our files is located within the NW $\frac{1}{4}$ NW $\frac{1}{4}$ of Section 13, it will

Ramon K. Hanson File 63282

March 4, 1982

page two

be necessary for you to submit an application for transfer of water right. I am enclosing the proper application form and instructions. We will need additional information on the project allowed under Permit 40222 before we can advise you of any changes that may be made. We never received the completion notices for your Permit 40222. I am enclosing the completion forms (Forms B & C) which you may complete and submit to advise us of the dates of the completion of construction work and complete application of water along with advising us of the extent of use perfected under the terms of the permit.

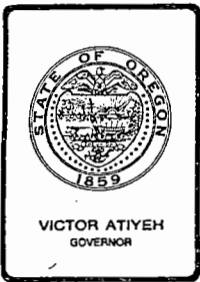

A new fee schedule, enacted by the Legislature, became effective August 19, 1981. Under the new fee schedule, the required fees for your Application 62382 are an examination fee of \$40 and permit recording fees of \$135, for a total of \$175. An amount of \$57 has been credited to your application, therefore, an additional \$118 are needed to complete the fees.

I am returning your application and map for completion. The application is endorsed so that in order to retain its priority date, it must be received in this office on or before May 4, 1982.

Sincerely,

Wayne J. Overcash
Senior Water Rights Examiner

Attention: Mike Hight - Loan Officer

Dear Mike:

Mr. Ramon K. Hanson has requested that I send this letter confirming the status of his water right permit to use 2.0 cubic feet per second of water from a well for the irrigation and supplemental irrigation of 160 acres in the SE $\frac{1}{4}$ of Section 14, T.23S. R.33E. W.M.

Permit #G-7763 was approved on January 20, 1978 with a date of completion of October 1, 1980. On November 13, 1980, Mr. Hanson submitted his notice of complete application of water to beneficial use stating that the irrigation had been accomplished by July 1, 1978 by flooding out of the well.

Because our final proof survey section does their field work during the summers and the office work during the periods of normally inclement weather, the final proof survey has not yet been made. During the cut-backs last summer we were forced to reduce to one statewide survey crew, therefore, it is not likely that the survey will be made this year.

I hope this supplies the information required for Mr. Hanson's loan. If you have any questions, feel free to contact me.

Sincerely,

Donald R. Buell
Water Rights Engineer

Mr Vestal R. Garner
Water Rights Engineer
Oregon Dept of Water Resources
555 - 13th Street N.E.
Salem, Oregon 97310

RE: Permit # G-8464

DEAR MR. GARNER:

In your letter of August 16, 1977, you credited me \$20.00 (receipt # 63119) and returned my application for correction. In a letter dated Oct 13, Mr. Jeboresky credited me an additional \$49.00 (receipt # 64109) and indicated that you were too busy at the time to complete my permit.

I am very much in need of it now for two reasons:

- 1) The well was drilled under the Drought Relief Program and all records, including the Water Rights Permit, must be submitted to the County ASCS Office before November 30, 1977.
- 2) Our farm is being financed by the Oregon VA Program and includes construction of a house. Construction was started in October, but is now being held up until the pump is installed and Water Rights Permit secured. The pump is scheduled for installation Nov. 8, at which time we will need the Water Rights Permit in order to resume building the house, which must in turn be completed before we can close the loan.

Would you please send the Permit as soon as possible.

Thank you,

Ray Hanson

Ramon K. Hanson
P.O. Box 722
Burns, Oregon 97720

Dear Mr. Hanson:

We have received your map, additional fees of \$49.00 and your application for a permit to use 1000 gallons of water per minute from a well for the supplemental irrigation of 160.0 acres. For reference, your application has been numbered G-8464.

We also received your letter of November 5, 1977.

Your application is satisfactory for the issuance of a permit.

Sincerely,

Vestal R. Garner
Water Rights Engineer

VRG:clh

August 16, 1977

Ramon K. Hanson
P.O. Box 722
Burns, Oregon 97720

Dear Mr. Hanson:

We have received your map, fees of \$20.00 and your application for a permit to use an unspecified quantity of water from a well for irrigation of an unspecified number of acres and a notice of beginning of construction. Your application could not be filed because it did not contain sufficient information to adequately describe a proposed use and place of use of water. The \$20.00 which you have submitted has been placed in a pending account in your name to be either refunded or credited in to an exceptable application.

The map to support your application, must be prepared to a uniform scale of no less than 4" equals one mile and with reference to the Government Survey showing the section lines and quarter-quarter section lines within the vicinity. The map must show the location of the well and the land to be irrigated. Item 2 and 3 of the application must be completed to be in agreement with the map.

Item 6 must be completed to request a quantity of water to be taken from the well. Item 10 needs to be completed to give a brief description of the proposed irrigation system.

If it is intended to use the water from the well, as a supplemental supply for the same lands described by Certificate number 1347 and Permit number 40222, then Item 14 of the application should be completed.

Since your application could not be filed, I am returning it and the map for completion. In addition to the examination fee of \$20.00 your application would also require a permit recording fee of \$10.00 for the first 30 acres and .30¢ for each additional acre.

Sincerely,

Your application would receive the priority date
as of the date as received in this office and
the proper form with fees.

Sincerely,

Vestal R. Garner
Water Rights Engineer

Dear Mr. Hanson:

We have received your application for
along with the supporting data and fees. ^{irrigation} Our receipt number
64109 is enclosed. Your application has been filed and assigned
number G-8464.

Because of the many applications which have been filed in recent
months, we are temporarily behind in our processing. Your appli-
cation will be examined in detail as soon as possible. We will
contact you if we need any additional information.

The permit approving your application will be issued without
further correspondence if no additional information is required.
Thank you for your patience.

Sincerely,

Larry W. Jehousek
Administrator
Water Rights Division

Form A

Application No.

NOTICE OF BEGINNING OF CONSTRUCTION

I, Ramon X. Hanson, the holder of Permit No.

to appropriate the public waters of the state of Oregon, began the actual construction of the works described therein on the 1 day of August, 1977.

Remarks: Shinner & Sons begin drilling

The appropriator should state the manner of beginning construction work, number of men employed, the amount of work completed

up to the date of this statement, and any additional information which may tend to show the beginning of work in good faith.

IN WITNESS WHEREOF, I have hereunto set my hand this 8 day of August, 1977.

Ramon X. Hanson

Permit No.

Dear Mr. Verbal R. Farmer:

Enclosed is \$49.00 to pay for 160 acres to be put under sprinkler irrigation from the well described. I did not send this money before because we had not hit water yet and I don't see why you want money if I don't hit water. I hope the papers are now OK. Thanks.

Ray Hanson

P.S. \$20.00 already sent, receipt # 63119,
