REV. 11/20/03

SPRING DESCRIPTION SHEET

Application S-88924

1. Is the spring on the property owned by the applicant? YES ☒ NO ☐
2. If not, give name and address of legal owner: n/a
3. Have you secured consent of the legal owner of the spring to appropriate water and for construction of your delivery system? YES ☐ NO ☐ n/a
4. If you do not have such consent, do you expect to secure right-of-way through condemnation? YES ☐ NO ☐ n/a
5. What is the maximum flow from the spring in gallons per minute or cubic feet of water per second?
What is the maximum flow? 0.06 gpm.
Is flow measured or estimated? MEASURED ☐ ESTIMATED ☒
6. Does the stream flowing from the spring form a well defined natural channel?
YES ☒ NO ☐
7. Does the water flow off the lands on which it first arises? YES ☒ NO ☐
8. Give the name of the stream or other body of water into which the water from the spring flows: Elk River
9. If the water from the spring sinks or evaporates before reaching other water, give the distance water flows from spring before vanishing: n/a
10. Remarks: _____

I certify that the information I have provided on this form is accurate, true and correct to the best of my knowledge:

Oregon Water Resources Department

RECEIVED

**Application Supplement for
Human Consumption & Livestock Uses**

MAY 17 2021

For water use permit applications within or above scenic waterways, or from streams for which **OWRD** water is not available due to required instream flows, the Department may issue limited permits for human consumption and livestock uses. Human consumption use is limited to 500 gallons per day for indoor use only for drinking, cooking, and sanitation, and does not include other uses such as lawn or garden watering or other related water uses.

In order to issue a permit to you for human consumption or livestock use, the Department must find that you cannot reasonably obtain water from any other source. For human consumption, an additional finding must be made that denial of the water right would result in loss of reasonable expectations for use of your property. For livestock use, additional findings must be made that issuance of a permit is necessary to prevent the livestock from watering in or along the stream bed and that you have excluded livestock from the stream and the adjacent riparian zone.

Please answer the following questions, and sign and return this form to Oregon Water Resources Department, 725 Summer St NE Ste A, Salem OR 97301-1266.

1. Can you reasonably obtain water from any other source? YES

NO

If not, please describe why each of the following options are not reasonable: *the applicant is retired on social security.*

- a. Groundwater, such as a well on yours or a neighbor's property. (If expense is the reason groundwater is not reasonable, please provide two estimates of the cost.)

- b. Securing stored water from upstream reservoirs.

There are no upstream reservoirs.

- c. Trucking water. (If expense is the reason this option is not reasonable, please provide a copy of an estimate of the cost of trucking water.)

RECEIVED

MAY 17 2021

OWRD

- d. Community or municipal water suppliers.

none

- e. Tying in to a neighboring property's spring.

none

- g. Transferring existing water rights to your proposed use(s).

n/a

Please identify any other alternate water sources you have considered, and why they are not feasible:

Rain water - this is for a summer use cabin and no rain falls in the summer.

2. If you are seeking a permit for **human consumption use**, would denial of your application result in loss of reasonable expectations for use of your property?

☒ YES

☐ NO

☐ NOT APPLICABLE

If so, please describe how:

"Curry County Planning Division will not approve a Planning Clearance for a dwelling without a domestic water source identified."

3. If you are seeking a permit for **livestock use**, is the proposed use necessary to prevent the livestock from watering in or along the stream bed?

☐ YES

☐ NO

☒ NOT APPLICABLE

4. If you are seeking a permit for **livestock use**, have you excluded livestock from the stream and the adjacent riparian zone?

☐ YES

☐ NO

☒ NOT APPLICABLE

SW Regional Well Inspector quote

Good Morning Melissa,

As Ryan Carr mentioned, the cost of drilling a well can vary widely, especially within the coastal counties. In lower lying areas wells can be installed for under \$10,000 if conditions are favorable. Higher up water can be much harder to reach and a well can easily cost more than \$20,000. We do not collect information on the cost of well installations, so my estimates can only be so accurate.

There are only 3 drillers active in Curry County. Bandon Well and Pump, Barrington Well Drilling, and Wrights Artesian. Clouser Well Drilling, out of Grants Pass, also occasionally drills wells out in that area.

I would recommend calling all for of those drillers and try to get a rough estimate. It is their busy season and they can often be difficult to get ahold of this time of year.

If you have any further questions about the well drilling process, please feel free to contact me.

Regards,

Ben Thorpe
South Western Regional Well Inspector
