# Memo

**To:** Oregon Water Resources Department / Scott Grew

**From:** Doann Hamilton, CWRE

**CC:**

**Date:** March 11, 2019

**Re:** Application G-18737.

---

On March 1, 2019, the IR for our client Joann and Bud Fawver was issued. According to the IR, the requested rate of 0.68 cfs would only be allowed from November 1 through May 30. In an email to Scott Grew on March 1, 2019, I asked if on behalf of our client and according to the Groundwater review, if we could reduce the rate to 0.36 cfs to obtain year round use. Scott replied on March 5, 2019, this would be acceptable and please submit this request in writing/email. I have attached is the revised page 3 of the groundwater application for Fawver Application G-18737, reducing the proposed rate of use to 0.68 cfs and the client has reduced the case diameter to 8 inch.

JUN 30 2019

**SECTION 3: WELL DEVELOPMENT, continued**

Total maximum rate requested: 0.36 CFS (each well will be evaluated at the maximum rate unless you indicate well-specific rates and annual volumes in the table below).

The table below must be completed for each source to be evaluated or the application will be returned. If this is an existing well, the information may be found on the applicable well log. (*If a well log is available, please submit it in addition to completing the table.*) If this is a proposed well, or well-modification, consider consulting with a licensed well driller, geologist, or certified water right examiner to obtain the necessary information.

OWNER'S WELL NAME OR NO	PROPOSED	EXISTING	WELL ID (WELL TAG) NO* OR WELL LOG ID**	FLOWING ARTESIAN	CASING DIAMETER	CASING INTERVALS (IN FEET)	PERFORATED OR SCREENED INTERVALS (IN FEET)	SEAL INTERVALS (IN FEET)	MOST RECENT STATIC WATER LEVEL & DATE (IN FEET)	PROPOSED USE

\* Licensed drillers are required to attach a Department-supplied Well Tag, with a unique Well ID or Well Tag Number to all new or newly altered wells. Landowners can request a Well ID for existing wells that do not have one. The Well ID is intended to serve as a unique identification number for each well.  
 \*\* A well log ID (e.g. MARI 1234) is assigned by the Department to each log in the agency's well log database. A separate well log is required for each subsequent alteration of the well.  
 \*\*\* Source aquifer examples: Troutdale Formation, gravel and sand, alluvium, basalt, bedrock, etc.
