According to the terms of your Permit 46945, complete application of water was to have been made by October 1, 1986.

Complete application of water means the application of water to a beneficial use under the permit to the full extent intended. In the case of irrigation, it means beneficial irrigation of all the lands the permittee intends to cover under the terms of the permit. If the water has been used, you should promptly submit notice describing the extent of completion as set forth in the letter accompanying your permit and also in our postal card of November 7, 1986.

Ors 537.360 provides that: "Whenever the time within which any appropriation under a permit should have been perfected has expired and the owner of the permit fails or refuses within three months thereafter to submit to the Water Resources Director proof of completion of the appropriation as required by ORS 537.230 and 537.250, the Water Resources Director may, after 60 days notice by registered mail, order the cancellation of the permit"

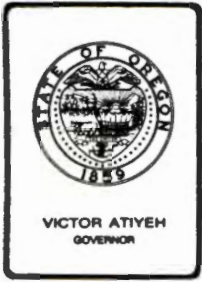

In accordance with the provisions of ORS 537.260, you are hereby notified that unless proof of beneficial use is received within 60 days from the date of this letter, the permit may be canceled without further notice.

If you are no longer interested in the project described by the permit, we would appreciate being advised. If the property involved has been sold and any part of the project was completed, you should assign the permit to the new owner. An assignment form will be furnished upon request.

If additional information is needed, please contact Ves Garner, Manager, Survey/Certificate Section.

I have accomplished the following described works and/or purchase and installation of equipment necessary to the use of water under said permit:

within the past year I have found that the original design and recommendations for pipe size were inadequate for the number of acres intended. I have to replace 1200' of PVC 4" pipe with 1200' of 6" PVC. I then complete the system.
prior to this past year Purchased and installed 2000' of 4" mainline PVC, underground and covered. Purchased 10hp single phase jet water pump,

and have accomplished beneficial use of water to the extent of (IF FOR IRRIGATION, STATE HOW MANY ACRES HAVE BEEN IRRIGATED) The cost of replacing and installing new mainline, has set back my plans for completion of the system. I also have to increase my pump size in order to have adequate volume of water.

Dear Mr. Kahn:

REFERENCE: File 62378

Your Application 62378 describing the proposed use of 0.8 cubic foot of water per second from North Umpqua River for irrigation of 63.9 acres, together with the map and legal descriptions, has been reviewed.

I apologize for the long delay in responding to you about your application. It will be necessary for you to make certain corrections on the application or map and submit additional fees before your application can be considered for approval.

According to your supporting map, the point of diversion is located by distances and directions from the Southeast Corner of Section 26 instead of from the Southeast Corner of 5.26 as presently noted in Item 2. If your map is correct, Item 2 must be amended to properly identify the reference corner.

Also, according to the map, the point of diversion is located within the SE $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 26 instead of the SE $\frac{1}{4}$ SE $\frac{1}{4}$ as presently noted in the latter part of Item 2. Again, if your map correctly represents the location of the point of diversion, the latter part of Item 2 of your application must be amended to be in agreement.

A new fee schedule, enacted by the Legislature, became effective August 19, 1981. Under the new fee schedule, the required fees for your application are an examination fee of \$40 and a permit recording fee in the amount of \$74, for a total of \$114. An amount of \$40.20 has been credited to your application. Therefore, an additional \$73.80 is needed to complete the fees.
