REMARKS

I, C. N. Bennett, of Warrenton, Oregon, do hereby certify that this map was made from notes taken during an actual survey made by me during July and August, 1911, and that it correctly represents the works described in the accompanying application together with the location of streams and other ditches in the immediate vicinity, and has written thereon the area in each smallest legal subdivision, which it is proposed to irrigate.

Application No. 2381

Permit No. 1236

5321

STATE OF OREGON

COUNTY OF CLATSOP

CERTIFICATE OF WATER RIGHT

This is to Certify, That

W. E. SCHIMPF

of Astoria, State of Oregon, has made proof to the satisfaction of the STATE WATER BOARD of Oregon, of a right to the use of the waters of Cullaby Lake and Cullaby Creek, a tributary of _____ for the purpose of irrigation and flooding under Permit No. 1236 of the State Engineer, and that said right to the use of said waters has been perfected in accordance with the laws of Oregon and duly confirmed by order of the STATE WATER BOARD of Oregon, made and entered of record in the Record of Proceedings of said Board, at Salem, in Volume 1, at page 421, on the 16th day of November, 1921 that the priority of the right hereby confirmed dates from June 15, 1912

that the amount of water to which such right is entitled and hereby confirmed, for the purposes aforesaid, is limited to an amount actually beneficially used for said purposes, and shall not exceed

0.75 cubic feet per second, or its equivalent in case of rotation. The use hereunder for irrigation shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the lands under such right, and to which the water hereby confirmed is appurtenant, or, if for other purposes, the place where such water is put to beneficial use, is as follows:

5 acres in the Southwest quarter of Southeast quarter and 12 acres in the Southeast quarter of Southwest quarter of Section Fifteen; 3 acres in the Northwest quarter of Northeast quarter and 10 acres in the Northeast quarter of Northwest quarter of Section Twenty-two, Township Seven North, Range Ten West of Willamette Meridian, in Clatsop County, Oregon. Containing 30 acres.

The water is used for flooding cranberry land for weed eradication in winter and for insect and frost control during blooming and fruiting season.

The right to the use of the water for irrigation purposes is restricted to the lands or place of use herein described.

Rights to the use of water for power purposes are limited to a period of forty years from the date of priority of the right, as herein set forth, subject to a preference right of renewal under the laws existing at the date of the expiration of the right for power purposes, as hereby confirmed and limited.

WITNESS the seal and signature of the State

Water Board, affixed this 16th day

of November, 1921

AFFIDAVIT OF WITNESSES

We, Lorenzo Espinosa, and D. M. Rezin,
of Warrenton, Oregon, being first duly sworn, depose and say that
we are well acquainted with the facts and conditions set forth in the foregoing statement relative
to proof of appropriation of water under Permit No. 1236; that we and each of us have
been over and upon each tract described in said proof, and from such personal inspection have
knowledge that all necessary ditches, dams and other diversion and distributing works have been
constructed, and water used as stated therein; that we have carefully read such proof of appropria-
tion, and that each and every statement contained therein is true to the best of our knowledge
and belief.

ASTORIA, OREGON June 14, 1921.

State Water Board,
Salem, Oregon.

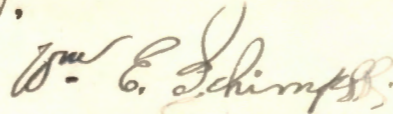

Gentlemen,

Enclosed I hand you Proof of Application of Water for application No 2381 and permit No. 1236, which I found in my files and which I send to you. I will state that since this making proof additional acreage has not only been put into vines but has been flooded as well.

I do not know what your procedure is relative to the making proof on additional acreage, but send you the proof as made out on the 11th of March, 1919.

I have not been able to find the proof of application of water for filing of John E. Gratke, but just as soon as you send me final proof blanks I will have Mr. Gratke make out the same and will send to your office. In the mean time I would appreciate very much for both the sake of Mr. Gratke and myself if you would keep the right alive and not permit the same to lapse.

Gentlemen,

Replying to your letter addressed to the writer, as well as one addressed to John E. Gratke of similar type, I will state that it was the impression of the writer that this matter had been completely settled and that final proof had been made. However I am unable to find anything in my own records, and would appreciate your sending to me papers for final proof for both the land filed upon by Wm. E. Schimpff and John E. Gratke, so that I can have the same completed and sent to you. Mr. Gratke is now residing in Portland, and has asked me to kindly attend to the filling out of his blanks, which I have agreed to do if satisfactory to yourselves.

I wish to express my appreciation of your kindness in calling my attention to this delinquency, and not permitting the rights we have to lapse without notifying us, as you have done.

GB.

May 7th, 1921.

Mr. Wm. E. Schimpff,
Astoria,
Oregon.

Dear Sir:

Permit No. 1236.

I note from the records of this office that you have not filed the Notice of Complete Application of Water under your permit No. 1236, which covers the appropriation of 2.30 second feet from Gullaby Lake and Gullaby Creek for irrigation and flooding of cranberry bog of 92 acres, although the time for the completion of this water right, as extended by the Board expired October 1st, 1920. In view of the fact that the notice has not been filed, we presume the water right has been abandoned, and if so, we would be glad to have you authorize the cancellation of the permit on our records, as this will eliminate the necessity of following the regular procedure for the cancellation of the same.

However, if the terms of the permit have been complied with, we would be glad to forward final proof blanks for execution upon receipt of the required notice.

As we have received no reply to our postcard notice of October 5th, 1920, in regard to this matter, you are advised that unless hearing from you within sixty days from the date of this letter, the permit will be presented to the Board for cancellation in accordance with the provisions of Section 7, Chapter 366, Laws of Oregon for 1917, which provides for the cancellation of permits when the holders thereof fail or refuse to complete their water rights within three months after the same should have been completed.

Very respectfully,

RR.
This letter registered.

Apr. 11, 1919.

OFFICE OF STATE WATER BOARD
RECEIVED
APR 13 1919
SALEM, OREGON.

State Water Board,
Salem, Oregon.

Gentlemen,

The undersigned hold Permits Nos. 1235 and 1236 for waters from Cullaby Lake and Cullaby Creek. This as you know is for the purpose of flooding and irrigating the cranberry land. This industry although now several years old, is as an industry still in its infancy. Much development has been undertaken in the district in which the land covered by these two permits is located. While most of the development has been made in land covered by Permit No. 1236, as filed upon by W. E. Schimpff, a good sized undertaking has been started in land as covered by Permit No. 1235, filed upon by J. E. Gratke.

At the present writing there is new development going on in Schimpff district, five additional acres being set out at this time, and according to the present program more acreage will be set out here next Fall and Winter.

Although your board has already granted us an extension of time in which to complete proof, we believe that it would be best for the interests of the industry as well as protecting the interests of the parties originally filing, and without harming any other parties interested, that an additional period of time be granted. The cranberry industry is slow of development taking at best four years to reach maturity, and on account of the heavy financial outlay required, it is impossible to put out the entire acreage within the short period of a year or two.

We trust you will grant our request and extend time of final proof until say October 1920.

Very respectfully,

J. E. Gratke

Holder of Permit No. 1235

W. E. Schimpff

Holder of Permit No. 1236.

February 4, 1919.

Mr. W. E. Schimpff,
749 Irving Street,
Astoria, Oregon.

Dear Sir:

I am enclosing blank for proof of appropriation of water under permit No. 1236 which you will please fill out and return to this office, together with \$1.00 to cover recording fee, and the matter will be presented to the Board at its next meeting for approval and issuance of final water right certificate.

Yours very truly,

R. W. Potter,
Secretary.

OFFICE OF STATE WATER BOARD
NOV 10 1916
SALMON, OREGON

Mr. M. F. Mers, Secy.

State Water Board,
Salmon, Ore.

Dear sir,

The undersigned have made application for water to a beneficial use under permits Nos. 1235 & 1236.

We respectfully request an extension of time not only for completion of the work, but more especially for application of water to proposed use contemplated.

The nature of construction of a cranberry bog differs from that of other land for agricultural purposes, first, in the matter of expense, and second, in the time necessary to elapse before water for flooding is needed.

The raw marsh land is taken, ditches are dug with which to drain the land. Then land is scalped, scalping is removed. Bog is leveled. Sand is applied to a depth of three inches. After which the vines are planted. The cost of this improvement is usually from \$400 to \$500 per acre. Sometimes even more. Now comes the wait for the bog to come into bearing. Plantings have been made in Clatsop County as early as 1912. Most however in 1913 & 1914. There was some fruit raised in the district this year. Not much of course compared with the possibilities of the district. The real object in our filing upon the

Mr. M. F. Mers, Secy 2.

water was to obtain priority in the matter of using the waters of Cullaby Lake and Creek for flooding, first, as a preventative against frost, both in the spring and fall, and second, as a means of controlling insect infestations and diseases.

You can see that on account of the newness of the venture that a pumping plant on the banks of Cullaby Lake or Creek is as yet not an absolute necessity. None has therefore been installed. It is a part of our program to have this pumping plant. We consider it insurance to our property, and expect to have the same in operating condition within the next season or two.

On account of the thinness of the growth of young marshes (improved cranberry bogs) much of the sanded ground still shows through the vegetation. This makes danger from frost much less than when the vines are well wooded and completely cover the ground.

Neither is the danger from insect infestation as great with a young bog as it is with an older one. As yet we have seen no real danger signs for insects.

We do feel that we need our rights continued, and in view of the fact that the development of a marsh is a slow, as well as expensive proposition, would request your honorable board to grant us such extension of time as in their judgment would adequately protect our interests, as well as our investment.

If we may be permitted to suggest a time, we would suggest three (3) years.

Yours respectfully,

J. E. France

239a

STATE OF OREGON

OFFICE OF THE
STATE ENGINEER

JOHN H. LEWIS, STATE ENGINEER
PRESIDENT OF THE BOARD OF CONTROL
SECRETARY OF THE DESERT LAND BOARD
PERCY A. CUPPER
ASSISTANT STATE ENGINEER

SALEM, OREGON

July 22, 1912.

Mr. W. E. Schimpff,

Astoria, Ore.

Dear Sir:

I enclose herewith Application No. 2381, by W. E. Schimpff, being Permit No. 1236, which has been approved and recorded in this office. I am also enclosing ^{one blueprint} map. It is not necessary to record this in your county, or to publish notice of its issuance. This permit is not a water right, but is, in a way, a contract between you and the State. It should be held by the owner of the right, and not disposed of in making final proof on desert land, or for any other purpose.

You should make annual proof under this permit upon the forms attached hereto. Within the time as limited by the State Engineer for the beginning of construction, for completion, and for the application of water to beneficial use, you should fill out the proper blank, detach, and mail to the Secretary, Board of Control, Salem, Oregon. If more than one year is allowed for completion of construction you should give on the proper blank a detailed description of the work performed each year so that the Board may judge as to whether or not the law is being complied with as to the prosecution of work with reasonable diligence.

Final proof will be taken by the Board, through the proper division superintendent, as soon as possible after the expiration of time for the complete application of water to beneficial use, or any extension thereof. The Board of Control will thereafter issue a "Certificate of Water Right" to be recorded with the county clerk of the proper county, which to your water title will correspond to a patent from the United States as foundation for your land title.

Should it be impossible for you to complete the work or to put the water to beneficial use before the expiration of the time fixed in the permit, you should, if you have good reasons for so doing, apply to the State Engineer for an extension of time. All such requests must be received before the date of expiration, otherwise you will have to re-file and lose something in priority by your neglect. No extension of time can be granted for the beginning of work, nor in any case where request is made after the expiration of the time limit as fixed in the permit.

Any assignment of this permit should be made in writing and recorded in the State Engineer's office at Salem. The assignee should make all proofs required after date of assignment.

Water belongs to the land it irrigates and not to the ditch, or ditch owner. The transfer of land will carry with it the water appurtenant thereto.

Failure to fill out and mail the annual proofs required by the Board may jeopardise your rights under this permit and result in its cancellation after proper notice, as the law provides that proof must be made "to the satisfaction of the Board of Control".

Respectfully yours,

State Engineer.

NOTICE OF BEGINNING OF CONSTRUCTION

June 23, 1913.

Work on main ditch was begun March 1, 1912. Ditch was cut from Cullaby Lake in a westerly direction to the sand ridge next adjoining the right of way of the S.P. & S. Ry. This ditch was cut three feet wide at the top narrowing to two feet at the bottom. Upon completion of main ditch secondary ditches were cut of same dimensions surrounding a tract of approximately nine acres on the south of main ditch and another secondary system on the north side surrounding a ten acre tract. Total length of these ditches approximately 7190 ft. All ditches were cut one foot deeper in July & August of 1912. A system of cross ditches was cut in both above mentioned areas of length (combined) 4400 ft. Dikes were thrown up on north side of cross ditches to assist in proper flooding, ground sloping in that direction. All of land included in area ditches has been scalped, sanded and set out to cranberry vines. Cost of improvement not including cost of machinery is considerably in excess of \$5000.00.

NOTICE OF COMPLETION OF CONSTRUCTION

Permit No.

Application No.

I, W. E. Schimpff, holder of Application No. 2381, being
 Permit No. 1236, issued by the State Engineer of the State of
 Oregon for the appropriation of 2.5 second feet of the waters of Cullaby Lake & Creek
 in accordance with the tenor of such permit and the limitations endorsed thereon by the State Engi-
 neer, have completed the construction of the works described therein for the application of water to
 a beneficial use on the 29th day of May, 1918, being within the time limitation as
 fixed in said permit for the completion of construction work. and as per extension
 granted at meeting of State Water Board, Nov. 15, 1916.

Remarks:

If the works have a less capacity than as described in the permit, or you have definitely abandoned your
Acreage served by improvements twenty three (23). This being
 plan of irrigating any of the lands described in your permit, you should so state in order that our records may not be
number of acres of cranberry improvement in district covered by
 unnecessarily duplicated in application and permit.

IN WITNESS WHEREOF, I have hereunto set my hand this 15th day of June, 1918.

Ascoria, Oregon.

Fill out, detach and mail to the Secretary, Board of Control, Salem, Oregon, on or before the expiration of one year from the date of beginning of work as fixed in your permit; also likewise for each succeeding year, until completion of works, when the notice, Form B, especially prepared for such purpose shall be used.

NOTICE OF PROSECUTION OF WORK WITH DILIGENCE

Since report made to State Engineer of Beginning of Construction, much constructive work has been done. Total to date for all purposes in this district being well in excess of \$10,000.00. Besides the applicant there are other interests in the district, which brings the total to these high figures.

Winter flooding for weed control has been practised. Since boxes have been installed on different portions of the improved marsh capable of holding the water at various levels. These have been of great benefit to the grovers in holding the water at the proper level in order to obtain best growing results.

The industry is still in its infancy. No pumping has been done from Cullaby Lake or Cullaby Creek. There has been no need for the same. Frost danger is not great with young bogs. Neither has there been any insect manifestation of serious nature up to this time.

We deem water rights just as essential as when application was filed, and are anxious to have our rights continued. On account of the slowness of the development it will take several years before complete application of water for beneficial use can be made.
