# Application for a Permit to Store Water in a Reservoir

Alternate Review (ORS 537.409)

Oregon Water Resources Department  
725 Summer Street NE, Suite A  
Salem, Oregon 97301-1266  
(503) 986-0900  
www.oregon.gov/OWRD

You may use this form for any reservoir storing less than 9.2 acre-feet *or* with a dam less than 10 feet high.

Use a separate form for each reservoir

## SECTION 1: APPLICANT INFORMATION AND SIGNATURE

Note: Attach multiple copies as needed

\* By providing an e-mail address, consent is given to receive all correspondence from the department electronically. (paper copies of the final order documents will also be mailed.)

By my signature below I confirm that I understand:

- I am asking to use water specifically as described in this application.
- Evaluation of this application will be based on information provided in the application.
- I cannot legally store water until the Water Resources Department issues a permit.
- Oregon law requires that a permit be issued before beginning construction. Acceptance of this application does not guarantee a permit will be issued.
- If I get a permit, I must not waste water.
- If development of the water use is not according to the terms of the permit, the permit can be cancelled.
- The water use must be compatible with local comprehensive land use plans.
- Even if the Department issues a permit, I may have to stop using water to allow senior water right holders to get water to which they are entitled.

I (we) affirm that the information contained in this application is true and accurate.

**SECTION 2: SOURCE OF WATER AND LOCATION OF RESERVOIR**

<b>Reservoir name:</b>	Shetzline <del>Ponds</del> Wildlife Ponds				
<b>Source*:</b> run off	<b>Tributary:</b>		Drury Creek and Mohawk River		
<b>County:</b>	Lane Co.				
<b>Quantity:</b>	Acre-Feet [length x width x depth / 43,560]				
<b>Reservoir Location:</b>	Township (N or S)	Range (E or W)	Section	Quarter-Quarter	Tax Lot #
	15 S	1 W	28	SW SE	804
<b>Maximum Height of Dam:</b>	feet. If excavated write "zero feet."				

\* Provide the name of the water body or other source from which water will be diverted, and the name of the stream or lake it flows into. Indicate if source is run-off, seepage, an unnamed stream, or spring.

**SECTION 3: WATER USE**

Indicate the proposed use(s) of the stored water: multipurpose

**NOTE: You may wish to consider filing for "Multipurpose use" for your reservoir.** Multipurpose use does not limit the types of future uses for the stored water. Multipurpose covers all uses including: stock water, fish and wildlife, aesthetics, domestic, irrigation, agriculture, fire protection and pollution abatement.

**SECTION 4: PROPERTY OWNERSHIP**

Do you own all the land where you propose to divert, transport, and use water?

- Yes (please check appropriate box below then skip to section 5)
  - There are no encumbrances
  - This land is encumbered by easements, right of way, roads of way, roads or other encumbrances
- No (Please check the appropriate box below)
  - I have a recorded easement or written authorization permitting access.
  - I do not currently have written authorization or easement permitting access.
  - Written authorization or an easement is not necessary, because the only affected lands I do not own are state-owned submersible lands, and this application is for irrigated and/or domestic use only (ORS 274.040). (Do not check this box if you described your use as "Multipurpose" in #3 above.)

List the names and mailing addresses of all affected landowners:

SECTION 5: ENVIRONMENTAL IMPACT

Channel: Is the Reservoir:  in-stream or  off channel?

Wetland: Is the project in a wetland?  YES  NO  unknown

Existing: Is this an existing reservoir?  YES  NO

If YES, how long has it been in place? years. 70+ Years (1950's?)

Fish Habitat: Is there a fish habitat upstream of the proposed structure?  YES  NO  unknown

If YES, how much? miles.

Existing: Have you been working with other agencies?  YES  NO

Indicate agency, staff and phone numbers of those involved. Also indicate any agencies that are cost sharing in this project.

Lanaya Blakely - Lane Co. water master (541) 682-3620  
Jeffrey S. Zeller - ODFW (541) 686-7861

SECTION 6: WITHIN A DISTRICT

Check here if the point of diversion or place of use are located within or served by an irrigation or other water district.

Irrigation District Name:		Address:	
City:	State:	Zip:	

SECTION 7: DESCRIPTION \*

Provide a short description of the design and operation of the proposed diversion, including a description of how live flow will be passed outside the authorized storage season. Use this space for narrative. You may also provide narrative and sketches on separate pages.

\*Please see included Alt Res Applications map. This pond is existing in situ since the (1950's?) It was connected to improve Endangered Chub habitat in 2000(?)

Runoff flow through, discharge to Dury Creek.

If the diversion involves a dam, use this space below for sketches of the diversion (e.g. cross-section of the dam with its dimensions, dimension and placement of outlet pipe, means of passing live flow outside of the authorized storage season, and means for providing fish passage).

[www.oregon.gov/OWRD](http://www.oregon.gov/OWRD)

## NOTE TO APPLICANTS

In order for your application to be processed by the Water Resources Department (WRD), this Land Use Information Form must be completed by a local government planning official in the jurisdiction(s) where your water right will be used and developed. The planning official may choose to complete the form while you wait, or return the receipt stub to you. Applications received by WRD without the Land Use Form or the receipt stub will be returned to you. Please be aware that your application will not be approved without land use approval.

**This form is NOT required if:**

- 1) Water is to be diverted, conveyed, and/or used only on federal lands; **OR**
- 2) The application is for a water right transfer, allocation of conserved water, exchange, permit amendment, or ground water registration modification, and **all** of the following apply:
  - a) The existing and proposed water use is located entirely within lands zoned for exclusive farm-use or within an irrigation district;
  - b) The application involves a change in place of use only;
  - c) The change does not involve the placement or modification of structures, including but not limited to water diversion, impoundment, distribution facilities, water wells and well houses; and
  - d) The application involves irrigation water uses only.

## NOTE TO LOCAL GOVERNMENTS

The person presenting the attached Land Use Information Form is applying for or modifying a water right. The Water Resources Department (WRD) requires its applicants to obtain land-use information to be sure the water rights do not result in land uses that are incompatible with your comprehensive plan. Please complete the form or detach the receipt stub and return it to the applicant for inclusion in their water right application. You will receive notice once the applicant formally submits his or her request to the WRD. The notice will give more information about WRD's water rights process and provide additional comment opportunities. You will have 30 days from the date of the notice to complete the land-use form and return it to the WRD. If no land-use information is received from you within that 30-day period, the WRD may presume the land use associated with the proposed water right is compatible with your comprehensive plan. Your attention to this request for information is greatly appreciated by the Water Resources Department. If you have any questions concerning this form, please contact the WRD's Customer Service Group at 503-986-0801.

### For Local Government Use Only

The following section must be completed by a planning official from each county and city listed unless the project will be located entirely within the city limits. In that case, only the city planning agency must complete this form. This deals only with the local land-use plan. Do not include approval for activities such as building or grading permits.

**Please check the appropriate box below and provide the requested information**

- Land uses to be served by the proposed water uses (including proposed construction) are allowed outright or are not regulated by your comprehensive plan. Cite applicable ordinance section(s): LC 16.290(2)(a) & (2)(t).
- Land uses to be served by the proposed water uses (including proposed construction) involve discretionary land-use approvals as listed in the table below. (Please attach documentation of applicable land-use approvals which have already been obtained. Record of Action/land-use decision and accompanying findings are sufficient.) **If approvals have been obtained but all appeal periods have not ended, check "Being pursued."**

Type of Land-Use Approval Needed (e.g., plan amendments, rezones, conditional-use permits, etc.)	Cite Most Significant, Applicable Plan Policies & Ordinance Section References	Land-Use Approval:

Local governments are invited to express special land-use concerns or make recommendations to the Water Resources Department regarding this proposed use of water below, or on a separate sheet.

*Applicant has indicated that to her knowledge the ponds were established prior to the 1970's, when zoning laws were applied to the subject property. Thus staff consider this a lawful existing use.*

Name: Noray-An Spradling Title: Planner

Signature: Noray-An Spradling Phone: 541-682-6704 Date: June 24, 2022

Government Entity: Lane County

**Note to local government representative:** Please complete this form or sign the receipt below and return it to the applicant. If you sign the receipt, you will have 30 days from the Water Resources Department's notice date to return the completed Land Use Information Form or WRD may presume the land use associated with the proposed use of water is compatible with local comprehensive plans.

# Watermaster Alternate Reservoir Application Review Sheet

In lieu of the water right application process set forth in ORS 537.140 to 537.211, an owner of a reservoir may submit an alternate reservoir application for a reservoir that has a storage capacity less than 9.2 acre-feet or a dam or impoundment structure less than 10 feet in height. ORS 537.409 describes the criteria used to evaluate alternate reservoir applications.

The review shall be limited to issues pertaining to: a) water availability, b) potential detrimental impact to existing fishery resources; and c) potential injury to existing water rights. (ORS 537.409 (6))

Within 60 days after the Water Resources Department provides public notice, any person may submit detailed, legally obtained information in writing, requesting the Department to deny the application for a permit on the basis that the reservoir: (a) Would result in injury to an existing water right; or (b) Would pose a significant detrimental impact to existing fishery resources. (ORS 537.409 (5))

<b>Applicant's Name</b>		
1. Does the proposed reservoir have the potential to injure existing water rights? <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO Explain:		
2. Can conditions be applied to mitigate the potential injury to existing water rights? <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO Explain:		
3. Is water available for the proposed reservoir? <input checked="" type="checkbox"/> YES <input type="checkbox"/> NO		
4. If yes, during what period? Beginning: 1/1      End: 12/31		
Attach a WARS printout at 50% exceedance. If WARS does not cover the proposed location, make a recommendation for a storage season based upon regulation history and your knowledge of the location. (Water Availability for Reservoir Policy found under OAR 690-410-0070(2)(c))		
5. Did you meet with staff from another agency to discuss this application? <input type="checkbox"/> YES <input type="checkbox"/> NO

# ODFW Alternate Reservoir Application Review Sheet

<b>This portion to be completed by the applicant.</b>		<b>RECEIVED RECEIVED</b>	
Applicant Name: <u>Erica Shetzline</u>		JUL 13 2022 JUN 27 2022	
Address: <u>39454 Mohawk Loop Rd, Marcola, OR 97454</u>		OWRD OWRD	
Phone/Email: <u>541-505-4788/ericashetzline@hotmail.com</u>			
Reservoir Name: <u>Shetzline Pond</u>	Volume (AF): <u>3.0</u>		
Source: <u>Run-off/tributary to Drury Creek</u>	<input checked="" type="checkbox"/> in-channel		
Basin Name: <u>Mohawk River</u>	<input type="checkbox"/> off-channel		
Twp Rng Sec QQ: <u>15S 1W 28 SWSE</u>			
Note: It is unlikely that ODFW will be able to complete this form while you wait, nevertheless we recommend making an appointment to submit the form so as to provide any necessary clarifications. See pg. 6 of Instructions for contact information.			

**This portion to be completed by Oregon Department of Fish and Wildlife (ODFW) staff.**

1) Is the proposed project and AO<sup>1</sup> off channel?.....  YES  NO  
(if yes then proceed to #4; if no then proceed to #2)

*\*Based on available information, the proposed use does not appear to involve instream structures that would create or maintain an artificial obstruction. However, if the applicant creates or maintains an artificial obstruction to fish passage for the proposed use, the applicant will need to address Oregon's fish passage laws.*

2) Is the proposed project or AO located where NMF<sup>2</sup> are or were historically present?.....  YES  NO  
(if yes then proceed to #3; if no then proceed to #4)

3) If NMF are or were historically present:

a. Is there an ODFW-approved fish-passage plan?.....  YES\*  NO

b. Is there an ODFW-approved fish-passage waiver or exemption?.....  YES  NO

**\*Please see attached letter regarding ODFW passage approval.**

If fish passage is required under ORS 509.580 through .910, then either 3(a) or 3(b) must be "Yes" to move forward with the application. If responses to 3(a) and 3(b) are "No", then the proposed reservoir does not meet the requirements of Oregon Fish Passage Law and shall not be constructed as proposed.

4) Would the proposed project pose any other significant detrimental impact to an existing fishery resource locally or downstream?.....  YES  NO

*Explain below (for example, list STE species or other existing fishery resources that would be impacted negatively.)*

Any diversion or appropriation of water for storage during the period May-July and November poses a significant detrimental impact to existing fishery resources. *(For example, if diversion of water for storage during a certain time period would cause a significant detrimental impact to an existing fishery resource, then ODFW should recommend conditions or limitations.)* If NMF fish are present at the project site or point

<sup>1</sup> AO = Artificial Obstruction means any dam, diversion, culvert or other human-made device placed in waters of this state that precludes or prevents the migration of native migratory fish. ORS 509.580 (1)

<sup>2</sup> NMF = Native Migratory Fish Species in Oregon as defined by OAR 635 - 412 - 0005 (32)

of water diversion then the applicant should be advised that a fish screen consistent with screening criteria will be required.

- This proposed pond or reservoir contemplates impounding water in the Columbia Basin above Bonneville Dam. ODFW has determined that additional diversions of water in this area pose a significant detrimental impact to existing fishery resources during the period April 15 through September 30.

ESA-listed fish (spring Chinook Salmon), sensitive species (Pacific Lamprey, Coastal Cutthroat Trout), and other game fish (summer steelhead) are present in the Mohawk River during the period of impact. The pond under review has a population of Oregon Chub (Oregon sensitive species), and the applicant has worked extensively with ODFW on monitoring and protecting that population. ODFW has identified biologically necessary flows not captured in an instream water right (e.g., flows in a Basin Investigation Report, Persistence Flow Determination, Seasonally Varying Flow prescription, or other flow analysis) that would benefit fishery resources at the Point of Diversion or downstream.

ODFW recommends the following biologically necessary flows be available in the Mohawk River downstream of Drury Creek to protect public uses:

JAN	<u>200 cfs</u>	APR	<u>200 cfs</u>	JUL	<u>40 cfs</u>	OCT	<u>20 cfs</u>
FEB	<u>200 cfs</u>	MAY	<u>200 cfs</u>	AUG	<u>20 cfs</u>	NOV	<u>200 cfs</u>
MAR	<u>200 cfs</u>	JUN	<u>100 cfs</u>	SEP	<u>20 cfs</u>	DEC	<u>200 cfs</u>

Based on parameters assessed by ODFW, instream flows in the Mohawk River are currently below those essential to support the biological needs of an existing fishery resource during May-July and November. The proposed use will diminish physical habitat and alter the flow regime to which fish are naturally adapted. These changes will negatively affect their distribution, productivity, and abundance. Therefore, a further reduction in flow or alteration of habitat from the proposed water use would impair or be detrimental to an existing fishery resource and/or their habitat without appropriate conditions and/or mitigation.

**If YES**, can conditions be applied to mitigate the significant detrimental impact to an existing fishery resource?

- NO** (explain)
- YES** (select from Menu of Conditions on next page)

See applicable conditions selected from "Menu of Conditions" on next page

Water is only available to support biologically necessary flows at the POD and/or downstream during December 1-April 30 and August 1-October 31. ODFW recommends the season of use be restricted to coincide with this period unless the pond is only used for fish (no secondary use) and inflow equals outflow year-round. Fish screens are not required at this location.

**MENU OF CONDITIONS FOR WRD, ODFW, DEQ AND ODA**

Revised May 12, 2020

**JUL 13 2022**

Use this menu to identify appropriate conditions to be included in the permit:

**OWRD**

**Agricultural Water Quality Management Area Rules:** The permittee shall comply with basin-specific Agricultural Water Quality Management Area Rules described in Oregon Administrative Rule Chapter 603-095. The permittee shall protect riparian areas, including through irrigation practices and the management of any livestock, allowing site capable vegetation to establish and grow along streams, while providing the following functions: shade (on perennial and some intermittent streams), bank stability, and infiltration or filtration of overland runoff.

**b52** Water may be diverted only when Department of Environmental Quality sediment standards are being met.

**b5** The water user shall install and maintain adequate treatment facilities meeting current DEQ requirements to remove sediment before returning the water to the stream.

**RECEIVED**

**b51a** The period of use has been limited to December-April and August-October.

**JUN 27 2022**

**b57** Before water use may begin under this permit, a totalizing flow meter must be installed at each diversion point.

**b58** Before water use may begin under this permit, a staff gage that measures the entire range and stage between full reservoir level and dead-pool storage must be installed in the reservoir. The staff gage shall be United States Geological Survey style porcelain enamel iron staff gage style A, C, E or I.

**OWRD**

**Bypass Flows:** Per 690-410-0070 (2)(c), the following flows shall be bypassed or passed through the reservoir during the filling season:  
1) When the biologically necessary flows identified below are not available immediately upstream of the impacted area, the permittee shall pass all live flow downstream at a rate equal to the inflow, minus the amount of mitigation water provided upstream, if applicable, and  
2) When the biologically necessary flows identified below are available immediately upstream of the impacted area, the permittee shall pass flow downstream at a rate equal to or greater than the biologically necessary flows.

Once the reservoir has reached the permitted volume, all live flow shall be passed downstream at a rate equal to the inflow.

The permittee shall quantify and document inflow and outflow and maintain the bypass flows for the life of the permit and subsequent certificate per the approved Bypass Plan. The bypass flow data shall be available upon request by the Oregon Water Resources Department, Oregon Department of Fish and Wildlife, Oregon Department of Environmental Quality, or Oregon Department of Agriculture.

**Construction Activities:** For construction activities (clearing, grading, excavation, staging, and stockpiling) that will disturb one or more acres and may discharge to state waters, the permittee is required to obtain from DEQ a 1200-C NPDES Stormwater Construction Permit prior to project construction.

**fence:** The stream and its adjacent riparian area shall be fenced to exclude livestock.

**fishpass:** As required by ORS 509.585, a person owning or operating an artificial obstruction (AO) may not construct or maintain any AO across any waters of this state that are inhabited, or historically inhabited, by native migratory fish (NMF) without providing passage for NMF. A person owning or operating an AO shall, prior to construction, fundamental change in permit status or abandonment of the AO in any waters of this state, obtain a determination from ODFW as to whether NMF are or historically have been present in the waters. If ODFW determines that NMF are or historically have been present in the waters, the person owning or operating the AO shall either submit a proposal for fish passage to ODFW or apply for a waiver or exemption. Approval of the proposed fish-passage facility, waiver, or exemption must be obtained from the department prior to construction, permit modification or abandonment of the AO. Approved fish-passage plans, waivers, and exemptions shall maintain adequate passage of NMF at all times (ORS 509.601) as per the approved plan, waiver or exemption.

**fishself:** The permittee shall install, maintain, and operate fish screening and by-pass devices consistent with current Oregon Department of Fish and Wildlife (ODFW) standards. Fish screening is to prevent fish from entering the proposed diversion while by-pass devices provide adequate upstream and downstream passage for fish. The required screen and by-pass devices are to be in place and functional prior to diversion of any water. Permittee shall obtain written approval from ODFW that the installation of the required screen and by-pass devices meets the state's criteria or the permittee shall submit documentation that ODFW has determined screens and/or by-pass devices are not necessary.

**fishapprove:** The permittee shall install, maintain, and operate fish screening and by-pass devices consistent with current Oregon Department of Fish and Wildlife (ODFW) standards. Fish screening is to prevent fish from entering the proposed diversion while by-pass devices provide adequate upstream and downstream passage for fish. The required screen and by-pass devices are to be in place and functional, and approved in writing by ODFW prior to diversion of any water. The permittee may submit evidence in writing that ODFW has determined screens and/or by-pass devices are not necessary.

**fishdiv33:** If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area in accordance with ODFW's Fish and Wildlife Habitat Mitigation Policy OAR 635-415. For purposes of mitigation, the ODFW Fish and Wildlife Habitat Mitigation Goals and Standards, OAR 635-415, shall be followed.

The use may be restricted if the quality of the source stream or downstream waters decrease to the point that those waters no longer meet existing state or federal water quality standards due to reduced flows.

Applicant Name: Erica Shetzline

ODFW Review

The permittee shall install, maintain, and operate fish screening and by-pass devices consistent with current Oregon Department of Fish and Wildlife

(ODFW) standards. Fish screening is to prevent fish from entering the proposed diversion while by-pass devices provide adequate upstream and downstream passage for fish. The required screen and by-pass devices are to be in place and functional, and approved in writing by ODFW prior to diversion of any water. The permittee may submit evidence in writing that ODFW has determined screens and/or by-pass devices are not necessary.

- fishway:** Notwithstanding that ODFW has made a determination that fish screens and/or by-pass devices are not necessary at the time of permit issuance, the permittee may be required in the future to install, maintain, and operate fish screening and by-pass devices to prevent fish from entering the proposed diversion and to provide adequate upstream and downstream passage for fish.
- futile call:** The use of water allowed herein may be made only at times when waters from the (NAME OF SURFACE WATER) would not otherwise flow into a tributary of the type here River or sufficient water is available to satisfy all prior rights, including rights for maintaining instream flows.
- In-Water or Riparian Construction:** For in-water or riparian construction, permittee may be required to obtain additional permits from the Oregon Department of State Lands, the U.S. Army Corps of Engineers, and the DEQ Section 401 certification program prior to construction. The applicant must contact these agencies to confirm requirements.
- In-Water Work:** Any in-water work related to construction, development, or maintenance of the proposed use shall be conducted during the preferred work period in consultation with ODFW.
- Live Flow:** Once the allocated volume has been stored, permittee shall pass all live flow downstream at a rate equal to inflow, using methods that protect instream water quality.
- Off-Channel Stored Water Releases:** The permittee shall not release polluted water from this off-channel reservoir into waters of the state except when the release is directed by the State Engineer to prevent dam failure.
- On-Channel Reservoir:** The permittee shall design and operate the water storage facility such that all waters within and below the reservoir meet water quality criteria. The permittee shall develop a reservoir operations plan that details how water quality criteria and standards will be met. A Certified Water Rights Examiner shall verify that the reservoir operations are consistent with the plan before a certificate is issued. The reservoir operator shall maintain a copy of the plan and make it available for review upon request.
- riparian:** If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area in accordance with ODFW's Fish and Wildlife Habitat Mitigation Policy OAR 635-415. For purposes of mitigation, the ODFW Fish and Wildlife Habitat Mitigation Goals and Standards, OAR 635-415, shall be followed.
- Water Quality:** All water use under this permit shall comply with state and federal water quality laws. The permittee shall not violate any state and federal water quality standards, shall not cause pollution of any waters of the state, and shall not place or cause to be placed any wastes in a location where such wastes are likely to escape or be carried into the waters of the state by any means. The use may be restricted if the quality of source stream or downstream waters decrease to the point that those waters no longer meet existing state or federal water quality standards.
- wq:** The use may be restricted if the quality of the source stream or downstream waters decrease to the point that those waters no longer meet existing state or federal water quality standards due to reduced flows.
- wetland:** The permittee must submit an offsite determination request to the Oregon Department of State Lands (DSL) to determine the need for a wetland delineation prior to disturbance or development of the point of diversion and/or diversion of water.
- blv:** Water must be diverted to a trough or tank through an enclosed water delivery system. The delivery system must be equipped with an automatic shutoff or limiting flow control mechanism or include a means for returning water to the stream source through an enclosed delivery system. The use of water shall not exceed 0.10 cubic feet per second per 1000 head of livestock.

# Application Completeness Checklist

Applicants are encouraged to use this checklist before submitting a complete application to the Department.

1.  Landowner name, mailing address and telephone number provided
2.  Application signed – All parties noted as applicants must sign the application
3.  Source and tributary listed.
4.  Reservoir Location. TRSQQ and tax lot provided.
5.  Dam height indicated, if applicable  $\emptyset$
6.  Property ownership completed
7.  If applicant does not own all the land, is the affected landowner's name and mailing address listed?
8.  Environmental impact section completed?
9.  **Completed Watermaster review sheet**, signed and dated. Note: Must be completed within last 6 months.
  - Will the reservoir injure an existing water right?  YES  NO
  - If YES, can conditions be applied to mitigate injury?  YES  NO  
If NO, return the application.
10.  **Completed ODFW review sheet**, signed and dated. Note: Must be completed within last 6 months.
  - Will the reservoir pose a significant detrimental impact to an existing fishery resource?  YES  NO
  - If YES, can conditions be applied to mitigate the impact?  YES  NO  N/A  
If NO, return the application.
11.  **Completed Land-Use Form** or receipt signed by the appropriate planning department official enclosed?  
Note: Does the use on land-use form match the proposed use on the application? Must be completed within the last 12 months.
12.  **Include a copy of a Legal Description** of all the property involved with this application. A copy of a deed, land sales contract, or title insurance to meet this requirement.
13.  **Acceptable Map**. Note: Requirements set forth by the Commission; causes fatal flaw if not provided by the applicant.
  - Reservoir Location - noting Township, Range, Section, 1/4 1/4 and Tax Lot number(s)
  - Scale of the Map, even scale such as 1" = 400', 1" = 1000', or 1" = 1320'
  - Reference corner on map
  - North directional symbol
  - 1/4 1/4's clearly identified
  - Reservoir clearly identified \*\*
  - Dam location identified, with measured distances from survey corner. If no dam, use coordinates to the center of reservoir.
  - If diverting water from a river or stream to a reservoir located off-channel, include measured distances from survey corner
14. **Fees:** Are the appropriate fees included? Use this fee calculator to determine the application fees:

[https://apps.wrd.state.or.us/apps/misc/wrd\\_fee\\_calculator/Permit\\_for\\_AltRes.aspx](https://apps.wrd.state.or.us/apps/misc/wrd_fee_calculator/Permit_for_AltRes.aspx)

RECEIVED

OWRD

**Oregon Water Resources Department  
Alternate Reservoir Application**

- [Main](#)    [Help](#)
- [Return](#)    [Contact Us](#)

For impoundments less than 10 feet in height or storing less than 9.2 acre feet of water.

Today's Date: Wednesday, January 6, 2021

Base Application Fee.		\$410.00
Proposed Dam Height in feet.	0	
Proposed Reservoir volume in Acre Feet.	4.8	\$175.00
Subtotal:		\$585.00
Permit Recording Fee. ***		\$520.00
*** the Permit Recording Fee is not required when the application is submitted but, must be paid before a permit will be issued. It is fully refundable if a permit is not issued. If the recording fee is not paid prior to issuance of the Final Order, permit issuance will be delayed.	<b>Recalculate</b>	
Estimated cost of Permit Application		\$1,105.00

These fees assume the pond holds 4.8 Acre Feet.

During my visit in 2019 you said the ponds are connected with a culvert and are essentially one body. From the OWRD online mapping tool, it looks the the pond is 230 ft by 180.3 ft.

I guessed and said the pond was an average of 5 ft.

Section 2 of the application provides an equation to estimate volume:  
 $(230 \times 180.3 \times 5) / 43,560 = 4.759 \text{ AF}$

These number are an estimate. Please correct the information accordingly.

**Provide a Legal Description** of all the property involved with this application. You may include a copy of your deed land sales contract or title insurance to meet this requirement.

**An application map.** The map must include following elements:

The approximate size and location of the reservoir, with the township, range, section, quarter-quarter, and tax lot number(s) clearly identified and labeled.

An acceptable map scale, clearly shown and labeled. The Department will accept an even scale, for example, 1" = 400 feet, 1" = 500 feet, 1" = 1000 feet, or 1" = 1320 feet.

Reference corner on map.

North directional symbol.

Quarter-quarters clearly identified.

Reservoir clearly identified.

The location of the dam, if one exists, by measured distance from a government land survey corner. If no dam exists, provide the measured distance to the center of reservoir. A measured distance includes how many feet north or south, and how many feet east or west, from a recognized survey corner (Example: 495 feet South and 200 feet West from the NW Corner, Section 16).

If the reservoir is located off-channel, and water is pumped from a creek or stream to the reservoir, include the measured distances of the point of diversion.

**From:** E Shetzline <ericashetzline@hotmail.com>  
**Sent:** Friday, June 24, 2022 2:26 PM  
**To:** SPRADLING Noray A  
**Subject:** Re: Lane County Missing Information on Use of Ponds for OWRD LUCS

[EXTERNAL △]

To whom it may Concern for OWRD LUCS Documentation,

I am applying for Water rights for existing ponds on my property at 39454 mohawk loop rd, Marcola , Or 97454

The water is currently supporting a healthy and unique Native Chub population as well as numerous other species of wildlife and plants. This water is used year round for those populations and will continue to be used only for that use.

We do not now use it for irrigation. Nor do we intend the water for any other purposes. It is for use as part of the natural drainage system and wetlands attached to the Drury creek and Mohawk River water shed.

Please mark the box under Other if applicable.

The water is solely for use as part of the natural system.

The ponds are simply a temporary holding system for extra run off under Marcola road and other natural sources and are there to support wildlife.

Thank you,

Erica Shetzline

**Subject:** Lane County Missing Information on Use of Ponds for OWRD LUCS

Good morning Erica,

I'm filling out the local government section of the Oregon Water Resources Dept. form that you submitted yesterday and I noticed that you did not indicate the use of the water at the bottom of the section for you to fill out (see attached scanned copy). Could you please send me an email back indicated which box you would check and a brief description? I can attach that to the form so that it's included in the documentation.

Thank you,

Noray-Ann Spradling  
Planner | Land Use Division
